Later in the call, one of our colleagues from Wisconsin, GWEN MOORE, Democrat from Milwaukee, she had, used to have, an engine plant in a town called Kenosha, Wisconsin. And she specifically asked, she said, 800 people work there. Where in your restructuring do you envision the Kenosha plant being?

She was told, We love Kenosha. Kenosha is safe. Kenosha is going to be fine. Those 800 people don't have to worry.

So, silly me and silly Representative MOORE and silly Governor Granholm, we all sent out press releases praising the President, praising the task force and the work that they were doing, only to find out that my plant was closed and Ms. MOORE's plant in Kenosha, Wisconsin, was closed.

Now, obviously that caused some concern with the folks in Wisconsin and the folks in Ohio, so the Governor of Wisconsin, Ms. MOORE also and the mayor of Kenosha, sent a letter to Mr. Nardelli and said, Why did you do that?

Madam Speaker, I include the letter for the RECORD.

CHRYSLER LLC,

Auburn Hills, MI, May 7, 2009.

Hon. Governor JIM DOYLE,

East State Capitol,

Madison, WI.

DEAR GOVERNOR DOYLE: I want to start by expressing my sincere apologies about the confusion surrounding comments I made on a conference call with you and other elected officials about the Kenosha Engine Plant on April 30, 2009.

In response to a question from Congresswoman Moore regarding the future of the Kenosha Plant, I mistakenly conveyed the status of the Phoenix investment in Trenton, MI. The facts I described were accurate for Trenton and not Kenosha, WI. I recognize this has added further confusion to an already difficult situation.

I would like to take this opportunity to clarify the Phoenix Engine Program production status.

In 2006, DaimlerChrysler started a program for a new V6 engine family. Based on industry volumes and forecasted demand, the initial planning volumes were 1.76 million units. In order to achieve this level of production, a site selection process was initiated that included four new locations in Michigan, Ohio, Wisconsin and Mexico.

Before site selection was finalized, the engine volume planned for the combined company was reduced when the common engine program with Daimler was redefined as a Chrysler only engine. This reduced the number of production sites to three.

These three sites would have the capability of producing 1.3 million V6 engines. Early in 2007, for a variety of reasons, the Corporation was required to reduce its capital investments in all programs which required a new production strategy for the Phoenix engine. Therefore, Chrysler decided to reduce the number of greenfield plant locations to two. In May and June of 2007 the Company chose those two sites and announced the greenfield investments of \$730 million in Trenton and \$570 million in Saltillo and broke ground on the construction of the facilities. The greenfield decisions were based on the adjacency of the proposed plants to the point-of-use assembly locations.

In February of 2007, Chrysler notified the State of Wisconsin and Kenosha officials that a greenfield site was no longer viable, but rather that a retool of the existing Kenosha Engine Plant was under consideration. The Kenosha retooling plan resulted in necessary capital savings; however, it required the Kenosha site to continue to produce its current engines through 2013.

In late 2007 and 2008, deterioration in industry volume resulted in a drop of the 1.3 million unit demand to 880,000. This reduction in volume and the need for Kenosha to produce its current engines resulted in the company deciding to defer the retooling strategy.

Chrysler kept Kenosha Area Business Alliance updated on the status of the retool through 2008. As the market began to collapse through late 2008 and 2009, a decision was made to idle the Kenosha Engine Plant in December of 2010. This and other restructuring actions were included in the Chrysler LLC February 17, 2009 Viability Plan submission to the United States Treasury and the President's Auto Task Force. The specific plant actions, including Kenosha Engine Plant, were not made public because it would have been presumptuous to assume that the plan was going to be approved and inappropriate to communicate prior to thorough discussion with the United Auto Workers union.

On April 3, 2009, Chrysler officials met with the Kenosha Task Force and reiterated the need to defer the Phoenix Program. Upon emergence from Chapter 11, plans are to continue to produce the current engine families through December of 2010 at the Kenosha Engine Plant in order to support our current products. The Trenton Engine site has been completely facilitated and will launch when we exit from Chapter 11. The Saltillo Engine site has also been facilitated and is scheduled to launch mid-to-late 2010.

We would have hoped to have been able to convey this information to you and the community in a more timely fashion, but circumstances simply did not afford us an opportunity to do so. It is expected that virtually all employees associated with Kenosha and the other closures announced in our Chapter 11 filings will be offered employment with the new company.

While the company continues to address difficult market conditions, we expect that the Chrysler Fiat alliance will ultimately provide customers and dealers a broader competitive line of fuel-efficient vehicles and technology, and will result in the preservation of more than 30,000 jobs in the United States along with thousands of employees at dealers and suppliers.

Again, please accept my sincere apologies for the confusion. We will continue to work with the people of Kenosha to ensure an orderly transition.

Sincerely,

BOB NARDELLI,
Chairman and CEO.

The response they got back, Madam Speaker, on May 7 he wrote to Governor Jim Doyle and he said, I know I said Kenosha was safe, but I just need to tell you I was confused. I thought Kenosha, Wisconsin, was Trenton, Michigan.

Now, if I had a nickel for every time I got in the car and tried to go to Kenosha, Wisconsin, and ended up in Trenton, Michigan, that would be something.

Mr. NUNES. If I remember my geography correctly, there is a lake that separates Wisconsin and Michigan, correct?

Mr. LATOURETTE. Now the gentleman is nitpicking.

Mr. NUNES. Maybe they were going to take a boat.

Mr. LATOURETTE. Even the day before, and now I remember the guy's name, His name is Robert Manzo, Robert Manzo is the consultant that Chrysler hired to help sort of take them through this thing. The day before the filing, he sent this email exchange, which has been in all the newspapers, to the President's task force saying, Maybe we don't have to go this way. Maybe there is another way. Basically he said, I hope you think it is worth giving this one more shot, that is, to not have all these horrible things happen through the bankruptcy.

And here is the response from Mr. Feldman, the attorney on the unelected task force, who basically said, We are done, and indicated that he wasn't going to be treated to another terrorist like Lauria.

Now, I should explain. Lauria is the lawyer who represented the bondholders. These are people that invested in Chrysler, and they were told that they had secure creditor status, and it was \$27 billion.

Mr. Lauria represented some of them, and the some of them that he represented was the Teachers Retirement System of Indiana. So people who had taught the children of Indiana for years and had retired, in order to maxi-

mize their retirement fund they had invested in Chrysler, which was once a pretty safe investment, and they were told that they were secure, which means they get paid before anybody else gets paid.

Mr. Lauria was advocating on behalf of the teachers of Indiana and saying, You cannot just get rid of us. You have to compensate these people who have invested \$27 billion in Chrysler. But the response from the task force is that these people were acting like terrorists.

Mr. NUNES. If the gentleman will yield for another point of clarification, you referred several times to this unelected task force, auto dealer or auto company task force. And we have seen these czars that have been appointed by the President. We have 30-some or 40-some czars, I don't know. Every day we add a new czar.

Is there a difference between the czars and the automotive task force? Was there a czar of the auto task force?

Mr. LATOURETTE. There was a czar. The President of the United States appointed the auto czar, the head of the task force. He has recently gone back into private business. It is now headed by a fellow by the name of Ron Bloom, whom we will get to in just a second.

But, you know, a funny thing happened on the way to the task force too, because when they began making these decisions, people began to say, Well, who are these folks and what is their background? Were they in the manufacturing business? Did they make cars? Did they sell cars? Did they manufacture parts for cars? And The Wall Street Journal actually did a study of the members of the task force and found that most of them don't even own cars, and those that do own cars own foreign cars, the majority of them.

Mr. NUNES. How many people were on the task force?

Mr. LATOURETTE. I think it was 12 or 16. And then we also had one of our colleagues from Ohio, Mr. JORDAN, who serves on the Judiciary Committee, and the Judiciary Committee had a hearing with a panel that asked that question, How many people on the task force have any experience at all in the car industry? And the answer was none. Nobody. But despite that fact, they have made decisions.

Now, the second decision I want to talk about is the decision that they made that somehow we needed to close car dealerships all across America, and in Chrysler's case it was 789 and General Motors it is about 2,600.

According to the National Association of Automobile Dealers, about 60 people work at each dealership. So if you multiply that by the number of dealerships that were instructed to close, you are north of 200,000 people; 200,000 people. And let's get this straight about car dealers. Most of them own their own buildings, they do

their own finance plan, floor plan, they do their own advertising.

The cost to the automobile company is pretty minimal. But, again, this non-elected task force that doesn't know anything about the car industry said, You know what? Toyota sells an awful lot of cars in this country and they don't have as many car dealers as Chrysler or General Motors, so therefore the car dealers must be the problem. They are the ones that are creating this problem.

So they basically gave—we had a car dealer from Michigan, I think it was, just at Chrysler's direction, was told to put \$7 million into his building to make it attractive and all this other stuff. He didn't get paid for that. He got a letter saying, You are no longer a Chrysler dealer.

The car dealers basically came to town, and there were pretty amazing stories about some of these car dealers and the way they were treated.

□ 1545

But, you know, it's not just the 3,000 men and women that own these auto dealerships, it's the 200,000 people, the mechanics, the salespeople, the clerks, they're out of a job. So I don't know how you recover the economy by having less stores.

Mr. NUNES. If the gentleman would yield, one of the important points here that you've made is that this task force, this unelected task force that has no experience in running anything to do with cars—in fact, some of them don't even own cars—have now made this unilateral decision to close these dealerships, and the way that they were able to do that is because the government has now taken over ownership of the car companies.

Mr. LATOURETTE. The gentleman is absolutely right.

I will tell you that initially the auto task force ran from this dealer issue like a scalded cat, and they were really quick to put out a press release saying, We're not micromanaging the car companies. We don't know enough to run Chrysler and General Motors. This was the car companies. This was General Motors, and this was Chrysler. They made the decision. They are the bad ones who decided they were going to throw all of these people out of work.

A couple of things run counter to that. The first was, just like I think it's an interesting business model that you are going to sell more cars with less dealers, the auto task force in the Chrysler bankruptcy, according to an article in the Automotive News, didn't want Chrysler to advertise their cars during the pendency of the bankruptcy. When somebody, apparently, told them how stupid that was, they said, Okay, you can spend half of it. It was \$134 million. So, again, this unelected task force apparently thinks that you can sell more cars if you don't advertise

and if you have 3,000 less stores across the country.

The other thing that sort of gets in their way is Fritz Henderson, who is the president and the CEO of General Motors, old and new, gave an affidavit to the bankruptcy court in New York.

I would like to insert that into the RECORD as well.

UNITED STATES BANKRUPTCY COURT SOUTHERN DISTRICT OF NEW YORK, IN RE GENERAL MOTORS CORP., ET AL., DEBTORS

AFFIDAVIT OF FREDERICK A. HENDERSON, PURSUANT TO LOCAL BANKRUPTCY RULE 1007-2 State of New York, County of New York

Frederick A. Henderson, being duly sworn, hereby deposes and says:

1. I am the President, Chief Executive Officer, and a Director of General Motors Corporation, a Delaware corporation ("GM"), which together with its wholly-owned direct subsidiaries, Chevrolet-Saturn of Harlem, Inc. ("Chevrolet-Saturn") and Saturn, LLC ("Saturn"), and GM's wholly-owned indirect subsidiary Saturn Distribution Corporation ("Saturn Distribution"), are the debtors in the above-captioned chapter 11 cases (collectively, the "Debtors"). I submit this affidavit (the "Affidavit") pursuant to Rule 1007-2 of the Local Bankruptcy Rules for the Southern District of New York (the "Local Rules") to assist the Court and other parties in interest in understanding the circumstances that compelled the commencement of these chapter 11 cases and in support of (i) the Debtors' petitions for relief under chapter 11 of title 11, United States Code (the "Bankruptcy Code"); filed on the date hereof (the "Commencement Date"), (ii) the relief requested in the motions and applications that the Debtors have filed with the Court, including, but not limited to, the "first day motions," and

* * * * *

93. The Company, however, is not assuming and assigning to New GM all of its existing dealer franchise agreements. The Company's vast dealer network, consisting of approximately 6,000 dealerships, developed over an extended time period in which the Company's market share was growing and was far greater than it is now, and when there was far less, or even no meaningful foreign competition. Consequently, and precisely because there are now far more dealerships than the Company's market share can support, including, in some cases, multiple dealers in a single contracting community and dealerships that have become poorly situated as a result of changing demographics, the Purchaser is not willing to continue all dealerships. Among the dealerships the Purchaser is not willing to continue, for example, are those approximately 400 dealers who sell fewer than fifty cars per year, and those approximately 250 dealers who sell fewer than 100 cars per year. Approximately 630 other dealerships are not being continued because they are dealers who, in whole or substantial part, sell brands that are being discontinued.

94. Notwithstanding the foregoing, the 363 Transaction does not contemplate an abrupt cutoff of nonretained dealerships. In pursuit of the maximization of New GM's ability to, among other things, maintain consumer confidence and goodwill, provide ongoing warranty and other services, and preserve resale and trade-in values, the Company not only is giving approximately 17 months notice, but also will offer to enter into, and New GM will assume "deferred termination agreements" with most of the dealers whose franchise

agreements are not being assumed, which should have the additional benefit of easing the hardships attendant to the dealership closings.

Mr. LATOURETTE. Madam Speaker, could you tell us how much time we have left?

The SPEAKER pro tempore (Ms. EDWARDS of Maryland). The gentleman from Ohio has 11 minutes remaining.

Mr. LATOURETTE. I thank the Chair very much.

In this affidavit, Mr. Henderson indicates that the idea of shutting all these dealerships—in their case, 2,600—wasn't his idea. The purchaser rejected their plan. Does the gentleman know who the purchaser of General Motors is? It's the United States Government.

Mr. NUNES. It's us. It's the people.

Mr. LATOURETTE. It's the task force. So they rejected Chrysler's plan. They rejected General Motors' plan. They said, Go back to the drawing board. Mr. Rattner, who was the head of the task force, said, You have got to come up with a new plan; and Mr. Bloom testified in front of the Senate that they rejected the plans because they didn't find the car companies' plans to be aggressive enough when it came to shutting down plants, throwing people out of work, and closing car dealerships. So again, just like when people were shocked about the AIG bonuses, people running around town here saying, I'm shocked. Well, you shouldn't be shocked. You told them what to do. You didn't say that you have to close 10. You didn't say that you have to close one in Cleveland and one in California; but you did say you have to close a bunch; and you can't walk away from that responsibility.

And now there's legislation. I thought that the gentleman from New York was still in the Chair. The gentleman from New York (Mr. MAFFEI) is the lead Democratic sponsor of a piece of legislation that says, You've got to deal with these people fairly, these 200,000 people that you've tossed out of work. So he has proposed legislation. I have proposed legislation. But Mr. Rattner, before he left, in response to the legislation, the administration opposes the legislation to force the re-opening of Chrysler dealers and prevent General Motors from closing dealers. So I don't know how much more they could be involved.

That brings us to Clue, the Travel Edition. The task force has said that they're not responsible for 20 auto plants closing and about 50,000 auto workers being thrown out of work. They're not responsible for the 50,000 Delphi workers who don't have health insurance today. They're not responsible for the 200,000 people that work at the dealerships across the country that are now going to be out of business. So who is? Around this chart we have Mr. Bloom. This is the Secretary of the Treasury, Mr. Geithner; former Presi-

dent George W. Bush; the President of the United States; Larry Summers, the President's economic adviser; and down there is Robert Nardelli, the former head of Chrysler I was talking about.

Again, the same scenario. This is a pretty simple question: who decided to take the ax to those 20 plants, those almost 300,000 people and shut 'er down? I mean it's no longer get 'er done. It's shut 'er down. I think we should find out, but nobody will fess up. Nobody will say who did it.

Mr. NUNES. So nobody knows who did the AIG bonuses; no one knows who put that legislation in; and now no one knows who shut down the automotive plants, the auto dealers. We're sitting here with 300,000 people out of work in the largest democracy in the world, which is supposed to be a deliberative body where the Congress is supposed to make the decisions, and we have no answers.

Mr. LATOURETTE. The gentleman is correct. I just want to conclude, unless the gentleman has another thought.

Mr. NUNES. I just want to thank the gentleman for bringing this to the people's attention. This is really the only avenue that you now have is to come before the people, to come before the whole world, and you have laid out a very compelling case that, quite frankly, we're not getting anything done. In fact, we don't know who's doing what around here. I am troubled by this, what you've brought to the floor of the House; and I hope that you will continue your effort to figure out and get to the bottom of who did this.

Mr. LATOURETTE. Well, I will. And I thank the gentleman for participating in this. I want to thank Larry the Cable Guy for making a cameo appearance during the course of this. We want to be bipartisan. We want to get things here. But get 'er done by a date certain, no matter what the details are, when you drop 300 pages at 3 o'clock in the morning, when you drop 1,100 pages at midnight, when you work in private and in secret to draft legislation to do things like cap-and-trade and health care legislation, it really is not the way that the government is supposed to work.

We know, on our side of the aisle, as Republicans, that we did such a lousy job that the voters replaced us in 2006. We understand that. But by the same token, there are a lot of bright people on our side, a lot of bright people on that side; and I would believe that we could come together on all of these important issues and give the American people some legislation that they can have confidence in because Members of both parties participated. People are very suspicious of Washington. They say, It's so partisan. They're always fighting with each other. A giant step toward solving that would be to work these things out in a bipartisan way.

I thank the gentleman, I thank the Chair, and I yield back the balance of my time.

ISSUES FACING AMERICA

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Oregon (Mr. BLUMENAUER) is recognized for 60 minutes as the designee of the majority leader.

Mr. BLUMENAUER. Thank you, Madam Speaker.

I always enjoy listening to my good friend, the gentleman from Ohio, with whom I have worked on a number of projects. I have the greatest respect for him. But I don't always agree with his analysis. It's interesting to listen to people who are claiming that they're concerned that they've been shut out of the process or that they are irrelevant. I do think there is some real question about the relevance of some of my friends on the other side of the aisle, but that is a decision that they and their leadership have made consciously.

Now I don't think that my good friend from Ohio falls into the description of what his fellow Ohioan has declared that Republican legislators should be. Minority Leader BOEHNER has said, They shouldn't be legislators, they should just be communicators, because their job is more of a political one, not being involved with the process. That is why their budget plan was not a budget plan, but it was a press release. In fact, I was kind of embarrassed for them when they announced it with great fanfare and the press asked, Well, where are the details? You're giving us a press release. Sadly, sitting on the Budget Committee, we found that our Republican friends were not involved with a serious alternative that would deal with our Nation's problems.

We have enacted, for the first time in history, a significant, comprehensive piece of legislation that's passed the House to deal with carbon pollution, climate change, global warming, and the fact that the United States simply can no longer continue to waste more energy than any other country in the world. The Republican response, the tone has sort of in part been set by the Senator from Oklahoma who has declared that global warming is a hoax. We have not seen a Republican response that puts forth a comprehensive effort. In fact, the previous 8 years of the Bush administration, Republican control, were characterized by global warming denial, interference with States that were trying to do something. Remember the State of California and nine other States who wanted to put in place more effective energy protections for automobiles, higher standards? California has this right under the law. It requires a waiver for

the Federal Government, waivers that Republican and Democratic administrations alike have always granted, except for the Bush administration and the Republicans in the latest round over the last 8 years. They denied that right for the people in California to move forward and deal with it. Denied the opportunity to save energy, to create new jobs. It's I think, frankly, embarrassing.

Most recently we've had a chance to watch up close and personal the debates that are taking place dealing with health care. Frankly, I have got some personal experience with this because I tried to do exactly what my previous two friends were talking about, and that was to have serious efforts for bipartisan legislation to improve America's health care. You know, you wouldn't know it, listening to some of the rhetoric that comes from leadership; but there are actually areas of broad bipartisan agreement. One deals with the notion that our senior citizens and people and their families who are facing extraordinarily difficult circumstances, dealing with end-of-life situations, that these citizens and their families ought to be able to have their doctor help them understand what they're facing, what their choices are; and most importantly, have them be able to tell their family and their doctor what they want done. Sadly today, Medicare, although it will pay for all sorts of tests and procedures, 7,000 different categories, I think is the count, it won't pay for a senior's doctor or nurse or some other trusted health professional to sit down and have that conversation with them. Madam Speaker, when we worked on the Ways and Means Committee, we found that Republicans and Democrats alike agreed that that was wrong, agreed that this was an area, when we were talking about health care reform, that we should change. We should have Medicare and any reform effort that we brought forward help seniors and their families prepare for the most difficult decision any of us will face.

We had bipartisan legislation. I am proud to say that we discussed it extensively in committee. In fact, some of the most heartrending stories for the need for this legislation did not come from our witnesses. They came from members of the committee, including Republican members, who talked about why this legislation was important. Well, that is why I was proud that this legislation we've been working on, that I cosponsored, that I have had Republicans join me in cosponsoring, was incorporated into the House reform legislation, House bill 3200.

□ 1600

But, you know, people who've watched C-SPAN and the news over the course of the last week, people who've

read news accounts, would see that this bipartisan, humane, important legislation giving more choice to seniors and their families for being able to make sure that their needs are met the way they wanted, that was hijacked.

We saw, sadly, on the Web page of the Republican minority leader that they're claiming that this is somehow leading us down the path of euthanasia. We heard a Republican on the floor this week claim that their approach is better because it would protect senior citizens from the government taking their life. Absolutely outrageous and shameful, inaccurate statements designed to inflame, confuse and, frankly, gum up the works.

I find no small amount of irony, because what my Republican friends were claiming they wanted to be involved, they were involved. They agreed with it. And yet we're finding people, for political purposes, trying to mislead and scare families across America.

It's ironic, because the only provision that I know that would have been mandatory was actually offered up by a Republican Senator, who's a friend of mine, from Georgia, who had offered the proposal. It wasn't accepted. It was later withdrawn, but the proposal was that before somebody enroll in Medicare, that they have to fill out a form telling people what they want rather than having people guess about it. Not a bad idea to consider.

But in this climate where people are trying to poison the discussion, stifle the debate, and prevent us moving towards health care reform, it would have, sadly, been toxic. It's ironic that I had one of my Republican doctor colleagues tell me that he has conversations like this often, but he said that he wishes that it wasn't in the last hours before a major operation or before it was too late; that people ought to think about it, and we ought to do it in reasonable fashion, like we proposed under our bipartisan legislation.

Madam Speaker, this is an example of where I think our Republican friends really need to take a deep breath and decide whether they are going to be communicators or they're going to legislate, whether they're going to join us in trying to solve these problems. There are amazing opportunities.

One of the things that has been interesting, even the most hardened C-SPAN junkies of late have probably been a little embarrassed when they hear Republicans coming to the floor braying like donkeys asking, "where are the jobs?" interrupting otherwise semicoherent speeches with a refrain over and over again, "where are the jobs?" like somehow the Democrats and President Obama have taken them and hidden them. But I give them credit for finally asking an important question; although, without any context and without any answer, looking as though they had no clue.

Next, to national security and the health of our communities, the record of job creation, how many, what kind, and for whom is one of the most fundamental issues that government will face in tough times of high unemployment and job insecurity. It can, in fact, sometimes feel like it crowds everything else out, and no wonder. Americans want economic security for themselves, their family, and ultimately for the country. If we're not economically secure, we can't deal with cleaning up the environment, with education and health care.

Unfortunately, my Republican colleagues are losing an opportunity, not just to ask themselves a question, but to deal with these critical, long-term economic questions because, in a dynamic, free market economy like the United States, the job creation process is a continuous one.

Every day in America jobs are being created and jobs are being lost. The real question is what is the balance between job growth and job loss. What's the nature of the jobs, and how do we improve it for the future. I understand my Republican friends starting to pay more attention to this because, candidly, the Republican record, since 1940, is not exactly stellar in this regard.

Since 1940, Republicans have been in charge of the United States more years than Democrats, 36-33. But, despite that fact, in terms of actual job creation, you can go back and look at the Department of Labor's statistics, for those 33 years, Democrats created 64.2 percent of the jobs in this country. Republicans were responsible for 35.8 percent of the jobs.

Now, I'm not saying this was all President Kennedy or President Johnson or President Truman, and I'm not saying that there weren't things that President Eisenhower and President Reagan did that were important and useful. It isn't always the partisan makeup that is determinative. But there is a very interesting pattern that should count for something.

When my Republican friends come to the floor braying, "where are the jobs?" they ought to look at the record, and the record is that Democrats have a better history of job creation. And you don't have to go back to Truman and Eisenhower to look at that. It has, in fact, been a rather dramatic difference just in the period of time that I've been in Congress. We've had 16 years, 8 years of the Clinton administration, 8 years of Bush, where there's a pretty stark difference.

The Clinton administration produced 22 million jobs in the period of time. They averaged 237,000 jobs per month, despite the predictions of some of my Republican friends, many of whom actually are still in Congress, that the policies, the economic policies, the tax policies of the Clinton administration

were going to destroy the economy. 237,000 jobs per month created. And that's more than the 150,000 jobs that a dynamic American economy needs to sort of keep in balance.

What was the record under the Bush administration where the Republicans were actually in control, almost absolute control of Congress, and they were in control of the White House? The Bush, the second Bush administration, created only 58,000 jobs per month. It's the lowest average monthly job creation rate since the Eisenhower administration when the country was almost half as small. It was the lowest average yearly job creation since Herbert Hoover. And it got worse as it went along. The economy lost half a million net jobs in 2008. Now, remember, this is an administration, 5 million jobs in the Bush administration, 22 million jobs in the Clinton administration, and those are just private sector jobs.

In the Bush administration, 2½ million people were added to unemployment, and there were a smaller proportion of Americans who were working when Bush left office than when Clinton left office. But that trend was actually quite disturbing because, for 10 consecutive months as the Bush administration was wrapping up, we were seeing job loss. And they continued early in the new year.

Now, I think even my most partisan Republican friends would agree that you don't take a massive economy like the United States and turn it on a dime. The fact that Barack Obama became President January 20 didn't turn around. The jobs that were being shed and lost were a result of the previous 8 years of activity. And so, much of the last 10 months of job loss, plus what has happened earlier in this year is certainly not the fault of the Obama administration.

The Obama administration has inherited the worst financial collapse in American history since the Great Depression, with the effects that are still being felt on the State and local level and will continue to ripple throughout the economy even after it's turned around. It would be premature, at best, to render a verdict on the Obama administration, although I am actually pleased that my Republican friends who remained silent in the midst of the anemic job performance of the Republican administration under George Bush and actually went into negative areas, I'm glad that they've found their voice and are starting to speak out. Now it's time to engage their brains in these important long-term questions.

The fundamental nature of the job market is, in fact, changing in this country. Employers are slower to replace jobs. Assumptions about guaranteed employment and benefits are being challenged as economic models have been turned upside down. We ought to be working on two different levels.

One is to stop an economy in free fall, to strengthen opportunities to avoid future job reductions and strengthen underlying economic activity. The second is to deal with the nature of future jobs. It's even more important than the short-term strategy, because in a large and growing country, we need to be able to provide for the needs of workers, young and old, with a variety of interests and skills all across the country. This suggests that it is time for my friends on the other side of the aisle to reconsider their opposition to infrastructure investment and unyielding support for more and more tax cuts, especially for those who need them the least. That's the same formula that the Republicans were offering which, essentially, helped create the problem.

For 8 years, they had unprecedented control, not just of the executive but the legislative branch. They resisted robust infrastructure investment. Even when it appeared a year ago that the economy was teetering, when we were starting to see actual job loss, President Bush and his Republican allies would only agree to a tax cut-only solution.

We implored, we begged, put unemployment insurance into the equation, put food stamps into the equation. This is money that all the economists agree will have more stimulative effect. This is something that will help people most in need, and they'll spend it right away. These are people who are living on the edge. And for heaven's sake, work with us to spend a little money rebuilding and renewing America, because these not only create construction jobs, engineering jobs across America, but it also improves our long-term productivity by protecting the environment, by stopping congestion and pollution. They refused. The only thing they would agree to was a package of tax cuts, including tax cuts for many people who, frankly, didn't need them.

Well, that changed with the election of President Obama and strengthened Democratic leadership in Congress. We produced an economic recovery package, and it was passed in a few days in the new Congress, that met broad needs across the country. As a gesture to Republicans, as an effort to get Republican support, the largest single portion of that recovery package was tax cuts. Now, we're not hearing, as the Republicans come to the floor asking in a confused way, "where are the jobs?" they ignore the fact that an important part of this recovery package is their favorite solution, tax cuts, \$288 billion.

□ 1615

Now, we limited the tax cuts to the bottom 95 percent. We're not giving it to the wealthiest Americans but to the Americans who need it the most. By

the way, it fulfills a campaign pledge of President Obama's. Every working family in America who is in the bottom 95 percent has enjoyed a reduction in their tax rates and a reduction in their withholdings, which is having some effect on the economy. It was a gesture to the Republicans. Ironically, as for the Republicans who come to the floor who say they want to be involved, we put this in to address their concerns and to engage them.

How many Republicans in the House voted for the package? Zero. Even though almost half of the package was their favorite prescription and it was going to 95 percent of the American public, there was not a single Republican vote, and there were only three in the United States Senate.

We went beyond that. We added \$144 billion to State and local fiscal relief. I don't know what it's like in your community, but I'll tell you that, if our State legislature hadn't received several billion dollars for Health and Human Services, a half billion dollars for education, over a third of a billion dollars for transportation infrastructure, the unemployment rate in my State would be even higher, and our legislature would tie itself in knots trying to figure out what to do.

You know, it's interesting. Some of the Republican Governors made a big show that they weren't going to accept this money for unemployment insurance. Hello. They had to be forced in States like Texas and in South Carolina by Republican legislators to stop grandstanding and accept money to help the poor and unemployed in their States.

Mr. Speaker, it's interesting all of those people who voted against the economic recovery and who voted against the infrastructure. It's interesting looking at a list of them who are showing up to be on the platform when the ribbon is cut when the projects are announced. I find it ironic that the Republican leaders who voted against it are claiming credit in their press releases for important projects that are being funded in their States. They're communicating, but it's a curious communication—claiming credit, blaming Democrats because it doesn't happen instantaneously, not being part of formulating the solution.

It is, I think, frankly, embarrassing watching the spectacle. The most embarrassing thing about what's going on in South Carolina is not whether some politician was hiking the Appalachian Trail or not but the fact that it took their legislature to take a State that has one of the highest unemployment rates in the Nation and accept money to help impoverished people. That's what's embarrassing.

Well, I am pleased that we actually did enact this. I'm sorry that Republicans decided not to support it. I'm sorry that they are attacking and dis-

torting. I'm sorry that they, in the past, haven't been concerned about job creation. It has not been an issue until recently when they've thought they could make political mileage out of it.

Mr. Speaker, this is serious business, and the American public deserves a Congress that will treat it seriously, not one that comes to the floor, braying "Where are the jobs?" or one that ignores legislation that they have before them that talks about what investments have been made in health care, in education and in infrastructure.

In fact, just this week, we had over 60 Republican legislators vote against filling a hole in the Highway Trust Fund. If they'd had their way, it would have meant that we would have stopped issuing important transportation projects this summer, which make a difference all over America.

Mr. Speaker, I will conclude by just making some reference to job intensity. We've had a program that speaks to job creation and to trying to keep the jobs that we've got. It speaks to trying to help State and local governments and the private sector move forward. Our energy legislation that passed the House, if it were to pass in the Senate and be enacted into law, would make a huge difference for jobs in the future within the energy business—everything from wind and solar to more energy-efficient construction. It is time for us to use the tools to develop more and better jobs and to think about how we spend dollars that will create the most jobs: job intensity.

Many of the smaller-scale projects in transportation, in community livability and in rehabilitation carry multiple benefits. Last Sunday's New York Times was filled with stories of decayed roads in the metropolitan New York area, in Connecticut, in New York, and in New Jersey. Yet these articles could have been written about places all across the country—from Detroit, to Decatur, to Davenport, to Denver—where investment, if it happens at all, really hasn't been invested in the ways that will create the most jobs.

Going out to some suburban area and building a new road in a newly developed area rather than fixing decayed existing infrastructure does not create as many jobs as fixing it first. Fixing it first is a winner because it will help to restore damaged communities. It will not add an inventory of more and more roads that will have to be maintained when we can't even maintain our roads, bridges and transit systems right now. Fixing it first is much more labor-intensive. There are more jobs to be created in fixing existing infrastructure that is falling apart than in making new infrastructure that will have to be maintained in the future.

It also strengthens mature cities. Many in America are concerned about

the vitality of their inner cities. It's not just older industrial cities that one thinks of, like Detroit or Buffalo, but cities around the country, from Cincinnati to my hometown of Portland, Oregon. People are concerned about what's happening in the inner cities. You know, it's not just the inner city. It's that first and second tier of suburbs around them. We need to be thinking about these metropolitan areas, about making strategic investments that are going to strengthen local economies and are going to create more jobs, which will enable us to revitalize the neighborhoods that Americans live in.

There is also a question about what we're going to do with jobs for the future. Even if we're able to get the auto industry back on its feet—and some of my friends have heard our colleagues recently talking about their concerns about whether or not the auto bailout was effectively targeted. Well, I think we don't want a collapse of the American automobile industry in the United States. It would not just affect the upper Midwest. It would send a ripple effect across the country, affecting all of those dealerships and the many auto suppliers. Even if it works, it's very unlikely that we're going to have the high level of automotive activity that we've had in the past. We've got a lot of inventory. Things are being scaled down.

What will be the source of new job growth in the future if we're able to hold onto the auto industry that we have?

Another area that we've had has been the homebuilding and development industry that, since World War II, has been a source of dramatic growth and activity, especially in the last 20 years. Its construction, finance and home sales have employed all sorts of people all along the food chain, which has propped up the economies in southern California, Florida, Las Vegas, and Phoenix. Now these same boom areas are in a collective swoon, and look to have significant development over supply for years to come.

We're going to see a rebalance in the future in the type of housing. Smaller families are going to be the norm. By 2040, there will be more single-person households than families with children. With another 100 million Americans, who will be here by the mid-century, we are going to be changing dramatically—where we live, how we live, how we move. We're going to move forward in restructuring communities.

We also need to think differently about job creation. We need, as I say, to be looking at the job density for the rehabilitation and for the location of infrastructure. There's going to be an explosion of needs to upgrade our infrastructure for sewer, for water, for the smart grid.

Future jobs will focus on enhanced efficiency, on new energy supplies, on

being able to clean up after ourselves. Tens of millions of acres that the United States owns have been polluted by unexploded ordnance and by military toxins because of years—actually, centuries—of military training and activity in the United States. Maybe we should start cleaning that up and putting people to work repairing the environmental damage and then recycling that land for park and open space, for housing and industrial development.

We've got lots of opportunities, Mr. Speaker, to be able to redirect the economy—to deal from health to energy. That is what the administration and the leadership in Congress are attempting to do.

The bottom line is that we are going through a major restructuring. It's hard. The administration has inherited the most damaged economy since the Depression. It's not going to turn on a dime. It's going to be a struggle for the next year or two, but it's going to be redirected faster. We're going to recover faster, and it's going to be sustainable if we are able to move in the right direction for the future.

I've talked about energy, about renewable resources, about using Federal resources more wisely, about being able to invest in critical infrastructure. I'm hoping that this is one area in which our Republican friends will join us to reverse the policies of the Bush administration, which have, frankly, prevented us from passing the transportation reauthorization for 2 years. We had 12 short-term extensions, and we were forced to accept a funding level that even the Bush Transportation Department said was almost \$100 billion lower than what we needed.

We have got an opportunity to rebuild and to renew America. We have got an opportunity to work together. I am hopeful that the American public will weigh in on these issues. Nothing is more critical, and nothing will bring about, I think, a little more grown-up behavior here on the floor of the House than if the American public indicates that they're watching and if they ask the hard questions.

As Members of Congress return to their districts this next month for meetings and for townhalls with business, with media, with students, with churches, and with civic organizations, having Americans asking these pointed and direct questions will help us get on track.

I am convinced that, ultimately, with the help of the American public, a new administration and a Congress that is focusing on what is most important, we will be able to deliver on this promise: That we will have a better Federal partnership, that we will strengthen the livability of our neighborhoods and that we will make our families safer, healthier and more economically secure.

Thank you, Mr. Speaker. I yield back the balance of my time.

□ 1630

THE PEOPLE'S WORK

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentlewoman from Texas (Ms. JACKSON-LEE of Texas) is recognized for 22 minutes as the designee of the majority leader.

Ms. JACKSON-LEE of Texas. Thank you very much, Mr. Speaker, and I thank my good friend from Oregon for giving such a detailed presentation of the enormity of the work that we have generated in collaboration with this administration and what "change" actually means.

Sometimes the television news bites and other activities that, by the very nature of our Nation, which is so diverse, may draw upon our thinking, we don't get to the bottom line of the kinds of opportunities that we've seen over the past 8 months, 7 months, of hard work from the time that President Barack Obama was sworn in as President of the United States and Congress was sworn in for the 111th Congress. Our work is not yet finished. And we want to continue that work in dialogue with our constituents.

So I wanted to speak today some with a little lightheartedness and some with enormous sincerity and seriousness.

I want to acknowledge the passing of the mother of the mayor of Acres Home, Willie Baker in my congressional district. I offer them my deepest sympathy. I rose to the floor yesterday to acknowledge the passing of Vermel Cook. A pioneering surgical nurse who worked with Dr. Michael E. Debakey and Dr. Michael Cooley. These are issues that members address as Federal Representatives in the people's House.

So to those families, the Cook and Baker families, I offer my deepest sympathy.

It seems then relevant to suggest that in addition to the many issues that we confront, I had the privilege of joining the Senate in having passed today by unanimous consent H.J. Res. 12, which, for many of my colleagues, 61 of them who cosponsored, many of them recognized the cultural richness of America, particularly in music which I happen to be a fan of and I believe it's so much a part of the American character whether it's country western or whether it's jazz, whether it's pop or whether it is gospel.

So H.J. Res. 12 acknowledged today along with the United States Senate that we would designate September 2009 as Gospel Music Heritage Month and it would honor the gospel music for its valuable and longstanding contributions to the culture of the United States. I hope that those who are members of various faiths throughout this Nation will take the time during their religious services to celebrate gospel musicians, gospel singers, gospel pro-

ducers, gospel writers, and their own church choir or their place of faith's church choir, wherever they are practicing their faith. If there is a choir and it draws the kind of celebratory respect for their faith, I hope they will celebrate it.

So I am very pleased to have done this for a second time and to recognize the importance of the many artists and the many different influences, including country western music on gospel music. To recognize Thomas Dorsey, and Mahalia Jackson, the Stamps Quartet, the Statesmen, The Soul Stirrers, James Cleveland, Ray Hearn, Rex Humbard, the Mighty Clouds of Joy, Kirk Franklin, the late Brenda Waters and Carl Preacher and Shirley Joiner, The Winans, and Kathy Taylor, and so many others.

And then those who went on from gospel like Al Green and Elvis Presley and Aretha Franklin, Alan Jackson, Dolly Parton that had a gospel influence.

So in this place that is the people's House, we likewise attempt to be sensitive to items of joy, and I'm very proud that we will have an event in September, on September 12, at the Kennedy Center honoring gospel music heritage, and I hope my friends will do so.

But as we do that, we recognize that there are painful experiences so many of our constituents are having. So I rise today to thank my colleagues for joining me in sponsoring H.R. 3450. That is the Automobile Dealers Fair Competition Act of 2009.

We expect that because of the bankruptcies of GM and Chrysler that we are in direct line of losing some 200,000 jobs—I believe some 40,000, some 10,000 in the State of Texas—from the closing of automobile dealerships. Not only that, we realize that automobile dealerships, many of them, were the anchors of our community, the supporters of little leagues. Some of them, of course, gave us the best deals of our life. Maybe some of them didn't give you the best deal or the deal you wanted, but they are your neighbors.

Dealerships in the 18th Congressional District hire people. They're like family. They provide cars for our law enforcement, our city government. They make a difference. And by the closing, we know that they're closing small businesses. According to estimates, all termination actions combined could lead, as I said, to the loss of 200,000 direct jobs and many, many productive small businesses will be destroyed.

We also know that this termination has been in contrast to the contractual relationship called a franchise that the different dealerships had with GM and Chrysler.

So what does H.R. 3450 do? The bill deals with automobile dealers by giving them, if you will, the ability to have antitrust protection. They can

now have the right to protect themselves by asking the question, Is the closing of automobile dealerships anti-competitive?

So in this bill, the bill will provide enforcement teeth to this right by giving dealers in an expedited court process to enforce the restraint of trade rights.

The bill is, in essence, giving them the right to protect themselves by going to court. This would deem decisions by auto manufacturers, specifically the Automobile Dealers Fair Competition Act of 2009, would deem decisions by auto manufacturers not to grant franchise extensions to old GM and Chrysler dealers provided they can demonstrate that they are still operating as a viable operation, that they can provide or they can show that that is an illegal restraint of trade.

In addition, the bill will provide enforcement teeth to this ride by giving dealers an expedited court process to enforce the restraint of trade rights. If new GM or Chrysler doesn't grant a replacement franchise to a growing concern within 90 days, the dealer can petition to Federal court, district court and ask the court to refer the case to a special master who will be required to hear the case and make a ruling within 90 days.

We don't want these dealerships to be closed, particularly those that are viable and are working in our community, as many have been, who have provided an economic engine to the community. It is our belief that there is empirical evidence and quantitative analysis that can be done to determine the impact of GM's mass dealer terminations to GM's market share.

If you close dealerships and you leave open Honda and Toyota and Lexus and other foreign-made car dealerships, are you impacting the competitive nature of our manufacturers and car dealers by giving them a noncompetitive edge because you have shut down competitive dealerships trying to sell American cars and you're leaving the other guys—which we welcome here in the United States; we're open to opportunity—but you let the foreign-made cars have the higher number of dealerships and therefore you deny jobs, you deny the manufacturers a forum for selling their cars. It's just not right.

So I ask my colleagues to join me in supporting H.R. 3450 to provide for the Automobile Dealers Fair Competition Act of 2009. It is H.R. 3450. We're delighted to already have a number of sponsors. It is bipartisan. We believe it can be another legislative initiative, and I am on many, to protect and provide for automobile dealers and say to the car manufacturers, our good friends in GM and Chrysler, we care about the suppliers, the car dealerships, and all of the workers that may now look to unemployment because those dealerships are closing. Those are

good, good-paying jobs, and we want them back.

So, Mr. Speaker, I'm hoping that my colleagues, as they return from the August break working in their districts, will look at H.R. 3450 so we can likewise move that forward as quickly as possible.

Now, Mr. Speaker, I would like to emphasize the importance of good health care: health care for all America, health care with a public option. And for some reason, we think that this is something strange, but every single policy that has asked the question, Would you favor or oppose creating a public health insurance option to compete with private health insurance, not closing down private health insurance, you can see the increasing strong numbers: 65 percent, 83 percent, 76 percent and 72 percent.

One of the highest, I believe, indicated that this would not close anyone's private health insurance. In fact, it said: public plan option creating a new public health insurance plan that anyone can purchase. Some of the other polls say: ensuring that you can continue in your own choice.

And so I'm very proud that I support the public health insurance option that allows people to have insurance to stay where they are, but it allows all the small businesses to be able to provide themselves with insurance so they can do their business right.

What about leaving a job, getting fired and wanting to be a sole proprietor? You won't have to worry about being covered with good quality health insurance. Preexisting disease, you won't have to be worried about being covered by good health insurance. The idea that you're not old enough for Medicare, you won't have to worry about good public insurance.

Let me give you an example—and this is happening in districts around America. In the 18th Congressional District, for example, up to 14,600 small businesses could receive tax credits to provide coverage to their employees; 5,300 seniors would avoid the doughnut hole in Medicare part D, 480 families would escape bankruptcy each year due to unaffordable health care costs; health care providers would receive payment for \$49 million in uncompensated care each year. Ask your hospitals. They do not get reimbursed when they are the Good Samaritans and take people into their emergency rooms or take people who are sick. Once they're in the emergency room, they admit them.

Uncompensated care in my district alone will get \$49 million and 184,000 uninsured individuals would gain access to high-quality health care.

How can we beat this? Help the small business, individuals who have ideas, want to get out and show their entrepreneurship, want to be a sole proprietor. Maybe they have two employees

or 10 employees. You will get a public option. Don't let those scare tactics of you lose your insurance or it will accelerate beyond belief, because we have cost control in this bill.

In addition, don't let anyone misdirect their anguish at physician-owned hospitals. They are valuable. Do you realize that doctors come together and save hospitals from closing? They do that in Texas with Saint Joseph's Hospital. They want to do that in my district with ATH Heights Hospital. Some of my colleagues have told me about rural hospitals that are closing but doctors who care about the Hippocratic oath believe that they're there to be caregivers, and they run and they provide the saving grace by putting money into investing in those hospitals and saving them and keeping them from closing.

□ 1645

They, too, should be allowed to take in patients under this health care reform. And I'm fighting to make sure that that happens because they're not double-dipping. We want the quality to be high. We want to regulate it. But anyone that knows a doctor that has interest in a hospital by way of ownership, small amount kept regulated, you know that that hospital, if it's a general acute hospital, can give good care, if it's a specialty hospital, can give good care. And so I am looking forward to the opportunity to again begin this debate because I believe it is important.

Mr. Speaker, I also want to acknowledge the critics that say that the stimulus package has not worked. Well, I will tell you that Houston Metro in Houston, Texas, as a new start transportation system, is going to be eligible for stimulus dollars as we move forward. I only use the 18th Congressional District because it is right at my fingertips.

But there are jobs being created. Just alone in my district, housing and urban development, we've had \$13.6 million in stimulus dollars; education, \$42.5 million in stimulus dollars. And we want to continue to raise a question for our Governor to take out the \$3.2 billion that is in the Rainy Day Fund in the State of Texas and utilize those stimulus dollars to put teachers back to work.

We were able to ensure that every teacher in Texas will get an \$800 salary increase the day they start work when the new school year starts. Those are stimulus dollars that came through the working of the Democratic Congressional delegation of the State of Texas, \$800 increase in their salary. \$22 million in Social Security, and Small Business Administration, \$8.5 million. That means in loans to our small businesses that are receiving monies from this important generating of jobs.

And so we have been able to fix our courthouse with \$807,000. We have been

able to fix our Federal building with \$109 billion. We have been able to work, if you will, with the Catholic Charities emergency food and shelter, \$24,000. We have been able to reach the Community of the Streets Outreach with \$25,000. We have been working with new Kid Care emergency food and shelter. They have received dollars. Northwest Assistance Ministries has received dollars.

This is one district, but multiply it for the needs across your community. We have been able to keep nonprofit workers to help those people who have been unemployed. I think that is a far cry. Cleme Manor Apartments, new construction, substantial rehabilitation. Garden City Apartments, new construction, substantial rehabilitation.

Mr. Speaker, we are putting people to work. They are working on the construction and rehab of those apartments where individuals live. They are giving individuals a cleaner, safer, better quality of life by improving their apartments.

What I would ask my colleagues to do and those who may be listening, go to your local city halls. It's public knowledge. Ask them to print out for you a list of the stimulus dollars that have already come. More are going to come. Those will be grant dollars. It means that any of the nonprofits in your States or cities or counties can apply for dollars that will put people to work.

Right now, we have the ability to utilize some \$700 million in what we call "green" jobs. Of course, you can't see it overnight. You couldn't see it in March. You couldn't see it possibly in February. Maybe you didn't see it in April or May because, yes, processing is important, documenting your dollars, where are your tax dollars going, making sure we have the right report is correct.

In Houston, I am very proud to have worked on the stimulus dollar legislation providing language to ensure that minority- and women-owned and small businesses would be recipients of those dollars in the appropriate manner so that we don't leave out small businesses who would have the ability to legitimately be receiving stimulus dollars through a government process and work that they would be doing.

And construction dollars for all of the construction workers out there. Rehabilitation is a right way to work. I'm glad that the Houston Heights Tower received some \$95,000—those are where a lot of my senior citizens live—for new construction and rehabilitation. I remember going to the Heights Tower during Hurricane Ike.

And so it is important to refute some of the negative commentary that the stimulus dollars don't work. They do. Settegast Heights, again, \$877,000 have gone to my city of Houston in the 18th

Congressional District alone; new construction, substantial rehabilitation. People will have a better quality of life.

Wesley Square Apartments, \$508,000, new construction, substantial rehabilitation. Some of the homeless persons who have come upon hard times, many of them homeless veterans, will be able to have a better quality of life because stimulus dollars were utilized.

So, Mr. Speaker, I believe that we have come to the end of a portion of the 111th Congress, and I am very proud that we passed an SCHIP bill that enrolled more children in health care, that we increased the minimum wage, that we provided for parity for women in working, that their income or their salary is competitive with men, that, as well, we have begun to stand down in Iraq. And our Defense Appropriation bill speaks to helping move the defense of Iraq to the Iraqi National Forces.

I offer my deepest sadness and reflection on those lives that have been lost, our soldiers on the front line, those that are now being lost in Afghanistan, and we will work hard to stand down there to ensure that the country of Afghanistan can stand up. But we've been working hard to ensure that that happens.

I've been working hard to help the people of Pakistan. We passed a Pakistan relief bill, in essence, out of Foreign Affairs so that they can stand up, so they can help with social programs, they can help economically, that we can help those who are in the camps because of the violence that was perpetrated, that we can show the respect for the soldiers in Afghanistan, their own soldiers in Afghanistan, Afghans and the Pakistanis, who have lost soldiers themselves fighting terrorism.

We passed H.R. 2200, the bill I authored, helping to secure transportation—airports, trains, busses—to emphasize more training for flight attendants, to provide more resources for the Transportation Security Administration, to ensure that America is safe.

And so this House has been busy. And as we go home to our districts, we will not run away from the idea of good health plans. Because, my friends, I don't know what my friends on the other side of the aisle have, a bunch of question marks about the health plan that my friends on the other side of the aisle have offered.

I want them to join us. I can articulate what we have done. I realize that we've made great strides. I know that the people want, if you will, good health care.

And so as I close, I want to thank the Speaker. And I just want to leave you with this forceful message: We're going to get the job done. We're going to get health care for all Americans, and the stimulus is going to work for you. And celebrate Gospel Music Heritage Month

in September as we help our automobile dealers return to their jobs and to retain their jobs. You know we've been working.

HEALTH CARE IN AMERICA

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes.

Mr. KING of Iowa. Mr. Speaker, I appreciate the privilege to be recognized here on the floor of the United States House of Representatives. And having had an opportunity to listen to some of the dialogue that went on previously, I'm glad that I have a chance to raise these issues.

On the front of everybody's mind in this country is the situation of our health care and our health insurance for 306 million people in the United States. And I would point out that if we look at the size of this economy and the size of this population, it is a huge endeavor to think that we would take 17.5 percent of the American economy, 17.5 percent of our gross domestic product and switch it over to a government-run plan, and do so in almost the blink of a legislative eye, and do so without the full deliberation of the floor of the House of Representatives or without the American people having an opportunity to weigh in.

I am glad that this process has been slowed down—however great the price has been—so that there is an opportunity now for some of the legislation that has been more closely refined, shall we say, in its 1,100 or so-page form to be available to the public, a public that has more access to this information that is going on in the House than ever before because of being able to access this information now by the Internet. And all of us in this Congress have Web sites, and I would think there is at least one link on every Member of Congress' Web site that will help you access this information on where we are with bills that are being deliberated here in this Congress.

And as I look at where we are today and what's out there, I'm very interested in the entire month of August and I'm very interested in the first week of September. Those are the times when the American people will have had a chance to read the bill, talk to the people within their profession or whatever their interest group is that have read the bill, weigh their ideas, do this across the backyard fence and do this at the coffee table at work, and be able to give us the benefit of the wisdom of the American people to weigh in on all the components that have been created here that are promised to come at us and perhaps have a vote on a final passage; not here, not any longer this week or next week or in the month of August, but perhaps in the first or second week in September, and

something that—this will decide the fate, if it's passed, of the health care system of the United States, I believe, at least as far as we can look into the future. And it is a national health care plan. It is a government-run health care plan. It is a model that transforms the entire health care system in the United States.

Today we have more than 1,300 private health insurance companies competing for premium dollars. And they do so by providing the best value for the dollar and marketing that best value for the dollar and trying to adjust those policies to meet the demands of the American people. Over 1,300 private health insurance companies, and among them they offer, in the aggregate, perhaps as many as 100,000 different health insurance options. And the President of the United States has said he just wants to offer one more option, 100,001 policies now for everybody in America to choose from if this bill should pass.

And this extra government option that he would offer, as if there wasn't enough competition out there among the 1,300 health insurance companies and the roughly 100,000 policies that are there, how can anyone presume that one more policy that would just compete with the other policies out there would result in anything other than one one-hundredth more options for the people of the United States?

I would submit that there is a lot more afoot here, Mr. Speaker, there is a lot more afoot here. The people that are advocating for this public option, the people that are advocating that the Federal Government should run their own health insurance policy in order to compete against the private sector are the people who sometimes they will leak it into the media, sometimes they will shout it out in a private meeting, but in their soul they want a single-payer, government-run, socialized medicine, one-option government plan for everybody. And they want to run every private health insurance company out of business and take the 100,000 options that the American people have with them. That is their agenda.

And I can put together a string of quotes from the very liberal Members of this Congress that find themselves in powerful positions in this Congress, gavels in hand, that are determined to take away the private health insurance options and turn it into one government plan.

Even the President of the United States believes in that, however much lip service he has paid to the idea of telling the American people, well, if you like your health insurance that you have today, then you get to keep it. That's one thing that I cannot accept that the President believes when he says it. He is a very smart man. He's got to understand that if it says in the bill—and it does, section 102 of the

bill—that every private health insurance policy has to be rewritten in the first 5 years of the passage of the legislation that's proposed, that means the American people's individual policies will all change within 5 years and they will have to accommodate themselves to the new qualifications that will be written by a health insurance czar to be appointed by the President later, and regulations that are not in the bill, but regulations that would grant that health insurance czar the power and the authority to set the standard.

So he might rule that every health insurance policy in America has to pay for abortion. He might rule that everyone has to pay for mental health. He might rule that everyone has to pay for all pharmaceuticals, or maybe only generic pharmaceuticals.

□ 1700

Whatever he may decide, he'll be looking at the costs of the premium, the percentages of copayments, and the regulations will be written so that the public option, which is so carefully defined and that language that's determined to be defended by the Democrats in this Congress—so that the public option can compete with all of these 1,300 private health insurance companies that have competed in the marketplace for years and found their niche in the market and done it the American way.

Now, if somebody thinks that there's too much money in the health insurance business, why don't they get in that business and provide that health insurance and lower the premiums and cut down on the administrative overhead and take some money and take some profit out of it?

That's how this works in the free market system. If there's something out there in the marketplace that has too much profit in it, you don't need government to come in and do it for you. You need to take a look and determine is it a monopoly? If it's a monopoly, then Teddy Roosevelt rides again. Let's bring him in and let's bust the trust. But if you have 1,300 health insurance companies and 100,000 health insurance policies, you don't have anything that looks at all like a monopoly. You see something that looks like the maximum amount, or nearly the maximum amount, anyway, of competition in the marketplace.

So that argument is specious, the idea that we need to create one more company, unless it is the intent of the proponents to create socialized medicine—one size fits all, take away the American people's individual policies and give them a government policy or a facsimile of a government policy that would be their former private health insurance company that has had to adapt to the new rules written by government and offer a qualified plan.

Now, why am I suspicious of this? I am more than suspicious. I'm con-

vinced that this is the initiative: to wipe out all private health insurance and force everybody into a public policy and a public plan. One of the reasons is because there has been such an indignation about those of us who have said that this is a government-run health care plan that they're proposing.

They have tried to censor us here in the United States. They have actually effectively to a degree censored Members of Congress who wanted to simply mail out the flow chart, the schematic, if you will, of what this proposed health insurance plan or this health care policy looks like.

And I would take the people in this country back, Mr. Speaker, to this little chart right here. This is a chart that hung on my office for probably a decade starting in 1993, when Hillary Clinton came to town and became the secret master of the reform of the health care and the government takeover of health care in the United States. A lot of people remember, as I do, those were intense times. I was watching my freedom being marketed away day by day in secret meetings. I don't know if they actually kept minutes, but I know they weren't available to the public. I know the press wasn't allowed in the room. The public wasn't allowed in the room. There weren't Members of Congress representing their constituents. There were people like Ira Magaziner and others who were handpicked by Bill and Hillary Clinton to devise a plan.

And the idea of this was, put these smart people in a room, have them devise a plan, don't let anybody weigh in on that, no kibitzers on this plan, because if that happens, then the American people would start to grumble, and if they start to grumble, they might start to talk out loud, and if they talk out loud, they might start to yell, and if they start to yell, they might come to town and tell us that they don't want to have a government-run health plan in the United States, that they don't want to have their private plans taken over.

Well, that's what they finally did. They finally said they are not going to tolerate it, and the American people scared enough Members of Congress and enough United States Senators that they were going to lose their seat if they supported this monstrosity that this monstrosity finally was pulled down. This was a time when United States Senator Phil Gramm said that this health care policy will be over his cold, dead political body if they pass something like this. He stood there. He meant it. They held their ground. People in this House held their ground. And people like Dick Armey held their ground. In fact, Dick Armey was instrumental in helping to form this chart, this black and white chart that is the schematic that shows all the

government agencies that are created by the old plan back in 1993, which I will at least give Bill Clinton credit for. He wrote a bill. He presented a bill to Congress, and he asked Congress to pass the Hillary plan. And, of course, Congress liked their job. They didn't pass the Hillary plan.

And when I call it a "schematic," I don't know that one might think today that that's pejorative, but in here they actually do call their own plan a "scheme." Someplace in this chart it addresses at least some of the components in it as a "scheme." Well, I call it a "schematic" or maybe more appropriately a "scheme-attic," Mr. Speaker.

But it has here an ombudsman who is supposed to broker the deals between government because people can't get through government bureaucracy; so you create an ombudsman. Well, we have to change the name of that because now people know what an ombudsman is. We have the HMO provider plan that doesn't show up in the other chart that I can see. HMOs have slid down in their popularity.

Here we have the global budget. In 1993 a global budget for a health care plan. All of these squares and boxes are created as new affiliations with the exception of the executive office of the President. A few others, but generally speaking, this scheme, and they call it a "scheme," does scare the American people.

Now, Mr. Speaker, I would point out that as scary as this chart looks, we have another chart here that is far more scary. This is the color-coded, modern-day, software-driven, packaged-up plan that is a very accurate facsimile of what actually is taking place in the Democrat bill here in the House of Representatives. This is 31 new agencies, and there are subagencies and other responsibilities that are behind it.

But just to look at the chart, Mr. Speaker, one can look at all these white boxes here. If they're not colored, if they're white and they have black letters in them, they're existing government agencies. These are already hoops that people have to jump through. And then when you look at the colored boxes, the orange and yellow and the green and the blue and the purple, those are all new agencies. These are all new hoops for the American people to jump through. These are untried. They are untested.

When you create new government agencies, you run a little beta test because you don't know how it's going to act, how it's going to function, and you don't know how people are going to react. All you can do is guess how people will react. And you don't know if you can actually manage this.

But I will suggest this: We don't do that good a job of managing the health care that we pay for out of this Federal

Government today. Right now the Federal Government is paying 80 percent of what the cost is to deliver Medicare services. And if I look at my State, where we have a high percentage of Medicare patients because we have a very high percentage of senior citizens, then the percentage of that Medicare that they're providing is less than 80 percent, and one of the reasons is because we have some of the highest-quality care. In the State of Iowa, if people go there, Mr. Speaker, they can expect that they will receive quality care in the top five of all of the States in the country year after year after year. And with that high-quality care, Iowa sits at the lowest Medicare reimbursement rate.

So we're looking at this and wondering if it is the majority's, and that means the Democrats' and that means the President's idea, that we are going to fund the cost of this \$1 trillion to \$2 trillion health care "scheme-attic" that we have here, and we're going to fund it, in part, by reducing the funding that is going to Medicare by roughly \$500 billion when Medicare funding that is already inadequate at best pays 80 percent of the costs, and they're going to cut these costs and fees going into the States to come up with enough money to pay for this?

So what it means is, Mr. Speaker, is this: If you take \$500 billion out of Medicare in order to fund a national health care plan, that means you're taking it right out of the health care for the senior citizens in the United States of America across the board. The health care access for senior citizens will be diminished. The services will be diminished. Presumably the quality will be diminished because the doctors and nurses and providers will have to spend less time per patient, accelerate their time with them, and that means less quality care. And it means fewer services to our seniors.

So this \$500 billion, a half-trillion dollars, taken out of Medicare, right out of the Medicare services, the health care services for our senior citizens, in order to find a way to do a pay-for for a \$1 trillion to \$2 trillion National Health Care Act. And President Obama has said we're going to pay for all of this. We're going to find a way to pay for it. Well, that's the problem that CHARLIE RANGEL has run into in the Ways and Means Committee. But it looks like some of it comes out of not the pockets of our senior citizens that are accessing their health care; it comes out of services to them.

And the arguments I've heard were behind closed doors, the derogatory comments that have been made about doctors and nurses and providers and the allegations made, for example, by the President of the United States that we have doctors that are removing tonsils because it pays rather than because they need to be removed. I think

that needs to be documented and it needs to be quantified. And, yes, there are people in every industry that don't meet the highest standards. But to paint the whole industry with anecdotes like that without any data to back it up just further clouds this debate and makes it harder for us to make progress.

This chart, by the way, this chart that we have called government-run health care, we have called this—well, it is. It's the organizational chart of the House Democrats' health plan, and this "scheme-attic" that has 31 new agencies, I would just direct, Mr. Speaker, your attention and the public's attention down to these boxes right here on the bottom:

This white box here that says "traditional health insurance plans," that's where the 1,300 companies are. That's where the 100,000 policies are, in this square box right here; 1,300 companies, 100,000 policies in traditional health insurance plans. According to the bill, section 105, all of these plans, every single health insurance plan in America, would have to run through—they would be here in this white box. They couldn't function after 5 years unless they met the qualified health benefits plans here in this purple circle right here. In order to be qualified, they would have to meet the new government standards that are not yet written. These new government standards would be written by the Health Choices Administration right here.

Health Choices Administration would be run by the HCA, Health Choices Administration, Commissioner. Now, he's a commissioner, or she, because America is up to here with czars. We have 32 czars. We do have more czars than the Romanovs, and they're less accountable than the Romanovs. They're not held up to any kind of confirmation. They're not answerable to Congress. I don't know that we have subpoena power to even bring them before Congress to ask them what they did when they were managing the car industry, for example. We know we had a Car Czar that had never made a car nor sold one. I presume he'd driven one, probably never fixed one.

But he was running the car business in America and on the phone sometimes multiple times a day with President Obama's appointed CEO of General Motors. The Car Czar wasn't doing too well. He got replaced. Now we have a new Car Czar, and that new Car Czar says, well, the Federal Government would like divest themselves eventually of General Motors and perhaps the Chrysler stock, but there's no definitive plan, just kind of a general goal. Well, it looks to me like the general goal has been to nationalize huge industries in America rather than divest the Federal Government from those and let the free market prevail.

So if this bill passes, we will end up with a health insurance czar. He will be

running the Health Choices Administration, and he will be called the Commissioner of the Health Choices Administration, but he'll be the czar. Commissioner. I don't call him commissar. Maybe I'll call him "commi-czar-issioner," but he will be calling the shots for all of these 1,300 health insurance companies that exist today and writing the regulations so that they could become qualified health benefits plans coming out of there. So 100,000 qualified health benefits plans from 1,300 companies would have to qualify under new standards written by the new "commi-czar-issioner" of the Health Choices Administration.

Now, if you had a few million dollars invested in a health insurance company, Mr. Speaker, would you really be interested in investing more money in that company on the odds that that new "commi-czar-issioner" would write some regulation that lets you stay in business, when the people that are writing this regulation want to take you out of business and they say so, people like the chairman of the Financial Services Committee, BARNEY FRANK, who on tape says that he believes there has to be a public option? The public option is this purple circle right here, the public health plan. Chairman FRANK believes there has to be a public option.

□ 1715

This is because that public option is the path to a single-payer plan. A single-payer plan is code word for socialized medicine, one-size-fits-all, the government runs it all, and every one of these plans here that were in the private sector will all be swallowed up, they will all be squeezed out, and eventually this purple circle becomes the whole and everything else is swallowed up and diminished.

I think this happens if this bill happens, because it is the goal of the liberals in this Congress to end private health insurance and eventually end private health care and eventually have every doctor working for the government or else for a government prefixed price, and the nurses and the clinics doing the same thing. They might be billing fee-for-service or fee-for-patient, but they won't be running their own clinic; they won't be working competitively anymore.

When I look around the world, I will give you examples of why I believe this. The oldest example is Germany. Now, Germany has had its ups and downs over the last century, but the last century and a decade, about that far back, they passed their first national health care plan. That was back before we had modern medicine and certainly didn't have anything that looks like modern medicine today.

But the German plan was passed under Otto von Bismarck. And as I

read history, he did so in order to consolidate a political base in order to expand his political power. But it got established then.

Of course, there will be Germans that will defend their policy. And it probably has helped and it has no doubt helped millions of them, and other millions have stood in line and they probably at this point don't have a concept of what it is like to have the freedom we have to go out and purchase a policy or be an employer to negotiate and select from the policies we want and do the best we can working with our employees and being an agent for our employees to put the best packages together, or for individuals to purchase individual policies.

In Germany it works this way: you can buy a private plan there. They are pretty proud of being able to have private plans in Germany, even after more than a century of socialized medicine. But today it is this, Mr. Speaker: ninety percent of the plans in Germany are the public option. Ninety percent. And the 10 percent are the private options.

Now, the private options, they only exist as the company is functioning and selling health insurance in Germany in order to cater to those people who are reasonably well off, those that believe they can get a little bit better quality of care, even though they have to pay a premium for that better quality care, because they don't want to be in the government line. They want to try to find a way to take care of their care and health means too much to them to let the government run it.

That is the bottom line in Germany. Ninety percent on the public option, 10 percent on the private option, mostly self-employed and independently wealthy people. Not regular common people, very rare, not people that are generally working for someone else for a wage, not punching the time clock, not paid a salary so much. It is self-employed people and often independently wealthy people that carry their private health insurance in Germany. That is about 10 percent. Ninety percent the public plan, 90 percent socialized medicine. That is Germany.

The United Kingdom passed their National Health Care Act in 1948. There they were recovering from the Second World War. They were a nation that was nearly broke. Nobody had any money, their industrial base had been destroyed by the bombing from Germany, and they had used all of their resources to save their country.

God bless them, they were a great ally and it is a great thing for the world that the Allied Powers were successful in World War II and we turned back the level of tyranny that was threatening to swamp the world.

But Great Britain was broke post-World War II, and they were looking for anything that provided them security, and they believed that they could

manage health care in Great Britain if they just took it over and they could do better in government.

If we remember, this nation was in peril in World War II, and we grew government in a great big way. There was a threat to take over the steel industry in that era as well. We managed to provide private sector industry that turned out bombers and battleships and the things that we needed to be successful in that war.

But if our industry had been destroyed, if the spirit of the people had been hammered as hard as it was on a percentage of its population as it was in Great Britain, we might have been looking for security. We might have decided that we needed to do something with government to supplant what was being so efficiently provided in the private sector.

For whatever the reason, Great Britain passed their National Health Care Act in 1948. And I read, Mr. Speaker, through a whole stack of Collier's magazines from that era, and each of them featured the socialized medicine that was being implemented in the United Kingdom at that time. And they showed pictures of long lines at the doctors' offices, lines that went outside the clinic, and they interviewed doctors and showed doctors that were haggard and frazzled and tired, and they lamented that they could not do that doctor-patient relationship in the fashion that they had before, that they had to limit the time per patient and they had to move from room to room and they had set up more rooms so they could get the patients in the room and get them ready for exams so they could walk in, do the exam, order what was to happen and go on to the next one.

And doctors that are hurried like that make mistakes. So does any human being. But a human being should not be treated like they are on an assembly line. That was already what was taking place in the United Kingdom in 1948.

The stories that are in those Collier's magazines from that era are the same stories that we hear in the modern version of socialized medicine that exists in the United Kingdom today. They are not a lot different than the stories you read and hear about in other countries in the European Union, including Germany.

For example, I ran into an immigrant from Germany, actually it was in a Menards Store some months ago, and he told me that he had a hip replacement done. It had gotten very bad and he could hardly walk, and he had to wait, and he waited a long, long time in line. Finally he decided that he would try to get himself in more than one line so that he had the best chance of getting it over with so he could get on with his life. And so he got in a line, and the shortest line that he could get into was the line in Italy.

So he queued himself into the line for a hip replacement in Italy, and some months later he was able to go to Italy to have the surgery to replace the hip. And now, good surgery, good job, he is healthy, moving around and enjoying life.

But to have to go to another country to have the surgery done, it begs the question. It must be a lot of what it is like to be a Canadian, to go to another country to get your surgery done. And thinking of the Canadians and those kinds of surgery, I could give an example on that.

We had a presentation done that was a little over a week ago by a doctor from Michigan, and this was at the Policy Committee on a Thursday night, a week ago last Thursday, if I recall.

He has practiced medicine in Canada and in the United States. In one of his earlier forays into providing medicine and services in Canada, he was working in the emergency room and a patient came in, a younger man, who had torn up his knee playing sports. He had a torn meniscus, a torn ACL, an anterior cruciate ligament, and his knee was a mess. This doctor in this emergency room in Canada examined the knee and said, You need surgery and you need it right away. I will schedule you for surgery in the morning.

Apparently the doctor wasn't familiar with the standards of qualifying for reconstructive surgery care, and he found out after he made that promise to the patient that he had to first get him scheduled for the specialist who approved the surgery. So he did his best to get that patient covered, because the patient was in a lot of pain. They had to put him in a knee brace. He was on crutches. And they scheduled him finally to be examined by the specialist who approves for the surgery, and he was examined 6 months later.

He was not operated on the next day, not operated on 6 months later, but on crutches and with a knee brace on, unable to work, 6 months later examined by the surgeon, the specialist, who approved the surgery. The surgery was approved. Well, that was an obvious thing to the doctor who looked at him the first night, and 6 months later they did the surgery.

Now, Mr. Speaker, I have to go back and reiterate, because it sounds implausible. A young man with the knee torn up, a torn meniscus, a torn ACL. He needed surgery the next day. In the United States of America he would have had surgery the next day. Instead, the exam to approve his surgery, which is required in Canada, took place 6 months after the injury, and the surgery itself took place 6 months after the exam.

Almost a year to the day the surgery took place to reconstruct the knee. And we know what happens. He lost

more than a year's work because the rehab was another couple of months, and that leg will atrophy because you are not using it, and all of that loss of quality of life, the things he could have been doing, his entire lost productivity gone, because bureaucracy is calling the shots, not the doctors, in Canada.

Now, that sounds like anecdote. Well, it is a real live human being case, and I am confident that I could trace that back and name the individual, and I am confident I am likely to get that individual to come here and try to talk to the thicker skulls that exist on this side of the aisle.

But suffice it to say that here is the data that supports this individual that some might allege is an anecdote. And it is this: the average waiting time for hip surgery to replace a hip in Canada, the average waiting time is 196 days. Once you are approved for surgery, you wait in the line, in the queue, 196 days. A lot of people with bad hips are on crutches—196 days.

If you are waiting for a knee replacement, Mr. Speaker, you wait for 340 days on average in Canada. Outrageous delays, loss of human productivity. And there isn't anybody's chart that calculates the loss to the GDP, the gross domestic product of Canada, lost work time, the loss to their economy, because people who would otherwise be productive are hobbling around on crutches or sitting in a wheelchair because they can't get the services until that delay is over.

Mr. Speaker, that is what goes on in Canada.

Furthermore, there are companies in Canada that when they offer their employment, they set it up as part of the employment package that the worker has an opportunity to come to the United States if he needs reconstructive surgery.

If, let's say, for example, it is heart surgery that would be necessary, it is written into the policies. In some of the policies in Canada, if you have a good job and you have a good benefits package, they will have it set up so they will package it up. Say you need bypass surgery, they can put you on a plane, fly you to Houston for heart surgery, and give you the heart surgery, get you back on the wellness side of this thing, get a little rehab, and then send you back home again and set that all up, and it is turnkey. It is turnkey provided there because they know that people can't wait in line in Canada. Everybody is not going to be alive at the end of their waiting period.

But in the United States, it is a different story. We get people in immediately. We bring them in immediately because it is lifesaving. In Canada they make provisions to get out of the country and come to the United States.

There are companies that are set up in Canada for the very purpose of packaging up health care access into the

United States. And so let's presume this, and this is not a documented story, but let's just presume it this way.

Let's say you live in Toronto and you need hip surgery and you don't want to wait the 196 days. You want it done. You want to get on with your life. So let's just say travel agency companies are a natural to tie up together with health care providing companies, people that know things about health care.

You might be able to go into a company in Canada and contract to come down to, let's say, the Mayo Clinic at Rochester, Minnesota, and they will turnkey that. They will say, we have got you an airplane ticket. Here is the hotel you go to. Here is the shuttle bus, the transportation from the airport to the hotel. You will up show up at the clinic tomorrow morning or on the morning following your flight. You will be examined that morning. If it is what I think it is, you will go right into surgery the same day or the next day.

They will give you the rehab that you need, take care of you to get you back out to the airport, fly you back home to Toronto. All of that for, write one check, hand over your debit card or your credit card, and have access to the best health, reconstructive surgery in the world, right down here in the United States of America.

Why is that? Do the people on the other side that propose this scary schematic, this color-coded, it will be quotas. There will be 31 new agencies, do they think that the best health care in the world that brings people from not just Canada, but all over the world to access this best health care, do they think that it just kind of randomly spawned itself out of American society? Or do they think that there is real reasons that we have the best health care system in the world? I think there are reasons for that.

One is health care is important to us and the American people are willing to pay for high-quality health care because our health is the most important thing that we can protect with the capital that we have in this country.

□ 1730

We're a country that's comparatively very, very wealthy. We've demonstrated our commitment to health care by committing a lot of our wealth to health care. We should not begrudge the people that are making our lives longer and more enjoyable for making a profit at it. We should not begrudge them for that. If we think they're making too much money, we should get in the business, compete against them, gather in some of that profit, and then lower our prices. Competition lowers prices. That, we know. Adam Smith wrote about that in 1776 in *Wealth of Nations*; and it's been true well before he recognized it; and it's been true

every day since; and it always will be true.

This schematic, by the way, that is here is not something that the Democrats in this Congress want to see out in the public eye. It's something that they want to censor, in fact. Here's the model of what they have done. This chart shows 31 agencies. It shows how every American who has a health insurance policy will have to watch as that policy submits to the new regulations that are written by the health insurance czar and qualify under new rules that will be written by that Health Choices Administration commissioner. They will watch every policy change in America or else watch the qualifications be adapted to a few policies in America that the Federal Government wants to allow to compete. People understand this chart.

But here's what's going on over the head of the Franking Commission, I believe. It's been prohibited for Members of Congress to send this chart out in our mail to the American people, Mr. Speaker. I don't think there's ever any comparable job of censoring Members of Congress than what's going on here. They have decided this chart can't go out in the mail, paid for under the franking privilege that any other chart can go out. We saw mail go out under President Obama's stimulus plan that advocated in a partisan way for how the stimulus plan was going to solve our economic problem. Democrats in this Congress used the franking privilege to try to convince the American people that the stimulus plan was the only way to go, and it's clear to everybody in America today that the stimulus plan has failed, with the exception of the gentlelady from Texas who I heard a little bit ago say that it had succeeded, and it had created jobs. She hasn't shown me where they are yet. So I will reserve my judgment on the accuracy of that statement until I actually see some jobs created by the stimulus plan.

Mr. Speaker, my point is, in a partisan fashion, Democrats in this Congress used the franking privilege to put the virtual stamps on their mail to tell the American people that the stimulus plan was necessary or the economy was going to collapse. That went on. This chart is not pie-in-the-sky threats that scare people. This chart is just stomp-down accurate, and it has withstood the test of the criticism of even the Democratic staff in the Ways and Means Committee, the Energy and Commerce Committee and the Joint Committee on Taxation. They've tried to blow holes in it, and yes, there's a little tweak there, but it's not substantive. It's simply specious to make that single little point, and it doesn't change the score of this bill.

Bottom line—31 new agencies, other obligations that are behind these squares, added to all of these white

boxes that are existing programs or agencies, it creates all these hoops that the American people would have to jump through, and Democrats don't want this chart shown to the American people. So I thought, Okay, if they don't want us to show this chart, there must be a lot of truth here that they surely don't want to have to face, and they surely don't want to see the American people come to their town hall meetings and fill up that room and ask them how they're going to defend swallowing up 17.5 percent of America's gross domestic product, our health care, and turning it into government run.

Have we done that good a job with Fannie Mae and Freddie Mac? Have we done that good a job running General Motors and Chrysler? Have we done that good a job with anything the government is doing other than, let's just say, our military, for example, who's done a great and fantastic and noble job and has achieved victory in Iraq? Does anybody have confidence that the Federal Government can run health care better than the American people, working with their private health insurance companies, negotiating for their own policies? I say not, Mr. Speaker. I think the American people understand what this is. I think they understand that when something is censored, it's not profane. Democrats want to fund the National Endowment for the Arts, which is funding millions of dollars to produce profanity in America. They're not offended by all of the profanity that goes out from the National Endowment for the Arts. They're offended by the truth about their bill about health care; and so they censor it because they have the majority here in this Congress, and they decide which staff people get a paycheck and which ones don't, in some cases. They also have the benefit of the President, I believe; and there are people in this Capitol building and in this complex of offices around who are more interested in pleasing the President, I think, than they are in preserving the fundamental integrity of the franking privilege or objective debate. This is objective debate.

Here are some of the subject matters that the Democrats don't want us to use when we describe this national health care plan. Mr. Speaker, these are all objectionable phrases, the seven dirty words or phrases you're not supposed to use to describe the leading Democratic health care proposal. It says, "you can't use," but I'm going to use them. These are the words that, in part, brought about the censorship of this color flow chart of the 31 new agencies that swallow up people's private health care in America. We can't call it a government-run plan. They want to amend that. They have another word for that. I think it is the public option, rather than the govern-

ment-run plan. It is a government-run plan. I will submit, Mr. Speaker, that you could walk down the streets of America, and you could ask those good, well-educated, commonsense people that I have the privilege to represent in western Iowa and in many places across this country, and go to them a month ago and say, Explain to me with regard to health insurance what is a public option. I can only imagine what kind of answers we would get if we asked people what that meant. But I will suggest that most of those answers would not have been accurate. They would not have said, Oh, a public option. Let me see. That's what President Obama wants to make sure everybody has. That would be government-run health care. If they were going to describe what a public option is, a regular man or a woman on the street with common sense couldn't describe what a public option was, if they understood what it was, without describing it as, Oh, government-run health insurance. They would have to describe it as government-run or they couldn't even describe it at all. This phrase is far more descriptive and honest than public option. Public option is Orwellian gobbledygook for the eventual Federal Government monopoly on health insurance. We just say government-run. The President wants us to say public option. They want to censor government-run. I say, I'm going to say it over and over again. It's government-run. Don't say single payer. A single-payer system means socialized medicine. So we can't say single payer. How do you describe that? Ask a commonsense person on the street, What is a single payer for a health insurance public option? Well, let's see. They would have to say, A single payer is when only one entity pays for all of the health care that an individual might receive. So let me describe how that works. Mr. Speaker, let's use that hip replacement because that's an easy thing to describe. Somebody went into the clinic and said, I'm in terrible pain here. I don't think I can hobble along any longer. What can you do, Doc? A doctor would do that examination. He would likely do an x-ray. He would evaluate the x-ray. If he was satisfied that he knew what was there, he might prescribe that there be reconstructive surgery done that would put a new hip joint in that individual, put him through some rehabilitation and hand him a cane that could be handed away later on and get him back out to the square dance. All of those things are going to take place. There would be billing that would come from the clinic, billing that would come for the service of the surgery, billing for the anesthesiologist, the operating room, the hospital bed, the gauze, the Tylenol, and whatever else there might be. Who would pay for all of that? Well, it might be the patient today, and it

might be Medicare, and it might be a private health insurance company. But when they say single payer, that's code for—the only entity that ever pays for it all—I shouldn't actually say that because there are private individuals that will pay for it all out of their pocket. So the entity they're talking about is the Federal Government paying for all of the health care services. That is socialized medicine. That's taxpayer-funded government doing it all single payer. But if you're not versed in the vernacular of the Orwellian gobbledygook, when they use the term single payer, you might think something entirely different. I don't think a normal person on the street can describe what a single payer means. We say single payer. Democrats think it's pejorative, that it is biased against the single-payer plan, for example. So using the terms that describe what they want to do is pejorative, and they are, presumably, forbidden, and it shouldn't show up on a color chart. We shouldn't send it out and can't send it out on our frank mail, otherwise they will bill us back for the costs out of our own pockets. We can't say socialized medicine. I already slipped into that in describing single payer. Socialized medicine does describe what they're talking about, maybe not in the first phase because they won't do like Canada eventually did and outlaw the health insurance policies of everyone in America. If you apply the Canadian plan today, the Canadians outlawed private health insurance. They did so incrementally in the provinces over the years, and then they did so in a Federal fashion. I would have to guess, but I think the year was 1964 when that happened. It may have been after that. So Canadians have socialized medicine. They have single payer. They have government-run.

We know what's going on up there, don't we? There is a 196-day wait for a hip, 340-day wait for a knee. They have government-run, single-payer socialized medicine. They just don't have ObamaCare. You can't say ObamaCare because that aligns the President with a policy that is becoming ever more unpopular. We use shorthand around here to describe things, and this is why the American version of the English language has been such an effective language to communicate because it's fluid, and it picks up new meanings, and it conveys those meanings. I think that we can paint the picture of this society and this culture very effectively because our language adapts, it flows, and it moves. This is one of those words in our language that—back in 1993, everybody knew what HillaryCare was. HillaryCare was the black-and-white schematic that we had then. No one wondered. It wasn't pejorative then. This chart got mailed out by franking mail, by Members of Congress in '93. It was devastating to those that wanted socialized medicine. We

just simply called it HillaryCare, and this chart was in the minds of millions of Americans as they went in and filled the offices of their Members of Congress and said, I don't want that. And I don't want this thing to be run over the top of Senator Phil Gramm's cold, dead, political body either. I don't know who has put a stake out there in the United States Senate that's taken that kind of stand, that's gotten that much press out of it. But I hope they're there, and I hope they're strong, and I encourage them to speak up.

This was HillaryCare in 1993. We are not supposed to declare this to be ObamaCare in 2009 because this has been censored by the Democrats in this Congress who think that these terms that are on this chart are pejorative. Pejorative terms, government-run. What about a government-run United States Marine Corps? That makes me feel good. I like government-run Air Force. I like government-run Navy. I like government-run Army. We cover those four branches. Government does some things good. Government-run is not pejorative. But it tells you what is going on if they are going to run health care. Single payer—hmm. Single payer does tell you that government will be calling all the shots because of the golden rule. Whoever has the gold makes the rules. The government will have all the gold, and they will write all the rules for everybody's health insurance policy in the United States of America. That's in the flow chart that's behind here that's been censored. And if it's single payer, it is socialized medicine. To declare it to be ObamaCare, it is pretty accurate. I haven't heard whether the President disagrees with the liberals in this Congress or the liberals in the United States Senate. I have heard the President talk about all kinds of socialized medicine programs. All he has said that defends the private market is if you like your policy, you get to keep it. That is simply not true, Mr. Speaker. When you look at the chart, when you look at the language, and you understand that every single policy would have to qualify under rules yet to be written by President Obama's appointee, the health insurance, czar-issioneer.

□ 1745

Would we get rationed care? Indeed. We're only paying 80 percent of the Medicare today of what it costs to deliver it.

They propose to take \$500 billion out of the Medicare funds that are streaming there now. How are they going to do that? They're going to have to cut down on services, cut down on surgeries for seniors, cut down on access to health care in order to come up with the \$500 billion. All of that spells rationed care.

Care has been rationed in every Nation that has a single-payer, socialized

medicine, government-run plan. We can't believe it's anything else. It will be rationed care. ObamaCare will be rationed care. We're on a path, if we pass this, to single-payer, socialized medicine, because there will be government-mandated care for everybody, whether you can hang on to your private plan or whether you can't.

Government-mandated care is another term that we're not supposed to use because they think it's pejorative, but this chart, the color-coded chart of the 31 new agencies schematic is full of all kinds of government mandates. That's what they are. They're mandates, Mr. Speaker, almost all of them. You're not even supposed to say keep your change care. Well, I don't know that you get to keep your change. I don't use that phrase very much, but it's one of the things that they've raised as objectionable.

So in the end, in real summation of this issue of the national health care plan that is almost completely crafted here in the House of Representatives and probably poised to go before this House on a vote sometime after Labor Day, presuming that there are enough Members of Congress still standing after the public shows up at their town hall meetings, at their offices, at their house, wherever they might be able to encounter their Member of Congress or their staff, presuming that there are enough Members of Congress still willing to walk this path, we're likely to see a vote here on the floor, and the result will be all of these things that we're not supposed to say now.

If it passes, it will be a government-run, single-payer, socialized medicine, ObamaCare, rationed care, government-mandated care. If not the first day, it will be over time when everybody's health insurance has to requalify and be run through the qualifications that will be drafted by the new health insurance czar, the commissioner, the comicarissioner of health insurance in America. That's where we are, Mr. Speaker.

And so I will quote Congressman JOHN SHADEGG who articulated this as well as anyone in this Congress when he said, if you like your health insurance that you have today, get ready to lose it. That's what will happen. The American people understand that it is their freedom, that their discretion is at risk, and there are people who want to create a complete nanny state, who have privatized—excuse me—who have nationalized eight huge entities here and moved us on a leftward lurch off the abyss into socialism in the private sector; three huge investment banks, AIG, Fannie Mae, Freddie Mac, General Motors, Chrysler, all now under the control of the White House. And this White House now wants to take over all the health care in America, eventually. And we understand that was President Obama's original policy. He

has just moved to try to set up health insurance in such a way that he can promise you you get to keep it.

And I promise you that it will not look like anything you have today if the government's going to write new regulations that it has to qualify for. And I will submit that Republicans have good solutions to this. I'll submit also that what we're trying to fix here is this. Here's where I agree, Mr. Speaker.

I believe that we have a very, very difficult economic situation to work our way out of. I believe that it may be as serious as anything that we have seen since the Great Depression, but I'm not certain of that because I lived through the eighties during the farm crisis and the other, the housing crisis that we had and the banking crisis that we had during that period of time. We lost 3,000 banks in the eighties. Those were tough times. I want to measure this after it's over and look back before I would commit that this is the worst time since the Great Depression. But it's not a very good time. It's a bad time.

And we have our challenges ahead of us, and we have to fix this economy. With that, I agree with the President. But the President says that health care in America is broken. I don't agree. I don't believe it is broken. I believe that we can improve it, and we should. But the President declares that we can't fix the economy without first fixing health care.

Now, if health care—and that encompasses health insurance and the health care that's provided through our clinics and our hospitals and the whole breadth of the health care that we have. If health care is broken, there must be a service out there that's not adequate compared to some other country in the world.

I'll submit health care is not broken. We have the best health care in the world. It costs too much money. I'll agree with the President on that. About 14½ percent of our GDP, and some of the costs that you see in the rest of the industrialized world are around 9½ percent of GDP. They ration health care. They have socialized medicine. They don't have the research and development that we have. We have the best in the world.

We lead the world in development of pharmaceutical and surgery techniques, and we lead the world in survival after cancer diagnosis. And we also lead the world, I believe, in the diagnosis of cancer itself. All of those things are at risk today. But if we have to, according to the President, change 100 percent of the health care system that we have in order to declare we have fixed it so we can declare we're fixing the economy, I will submit that that statement cannot be valid. It cannot be defended or sustained in open public debate or any kind of analysis

because they want to spend \$1 trillion to \$2 trillion.

Now, if we're spending too much money on health care in America, and we are, why do we need to dump another \$1 trillion to \$2 trillion into it to fix it? If we're going to fix it, we should be able to fix it and save money, not fix it and dump trillions of dollars into it and raise taxes and cut funding that goes into Medicare and deny health care services to our seniors, all of that wrapped up in the name of fixing something that's not broken, just changing and transforming America.

We socialized three large investment banks, AIG, Fannie Mae, Freddie Mac, General Motors and Chrysler. They're nationalized today. This is about the nationalization of the best health care system in the world, and 17½ percent of it, and taking away the freedom of the American people to go out and purchase a health insurance policy that they choose.

I want to expand the health savings accounts and I want to provide 100 percent deductibility for everybody's health insurance premium. And I want to reduce the medical malpractice liability that's out there by capping the liability claims so people get whole again but trial lawyers don't get rich. We can do all of those things and more, besides.

And by the way, there's only 4 percent of America that are chronically uninsured, 4 percent, 10 to 12 million people, depending on whose study you look at. That's 4 percent. And we would upset 100 percent of the health care system in order to fix an expensive health insurance program only if you compare to other countries that don't have the quality that we have. I think that would be a colossal mistake, and we could never get back from that colossal mistake because it creates 306 million people that would be dependent upon the government-run, single-payer, socialized medicine, ObamaCare, rationed care, government-mandate care. And I reject it. I hope the American people do.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Ms. KAPTUR) to revise and extend their remarks and include extraneous material:)

Ms. WOOLSEY, for 5 minutes, today.

Ms. LINDA T. SÁNCHEZ of California, for 5 minutes, today.

Ms. KAPTUR, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

(The following Members (at the request of Mr. POE of Texas) to revise and extend their remarks and include extraneous material:)

Mr. WOLF, for 5 minutes, today.

Ms. FOXX, for 5 minutes, today.

Mr. PRICE of Georgia, for 5 minutes, today.

(The following Member (at his request) to revise and extend his remarks and include extraneous material:)

Mr. KUCINICH, for 5 minutes, today.

HOUSE BILLS AND JOINT RESOLUTIONS APPROVED BY THE PRESIDENT

The President notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the following titles:

April 21, 2009:

H.R. 1388. An Act entitled The Edward M. Kennedy Serve America Act, an Act to reauthorize and reform the national service laws.

May 7, 2009:

H.R. 1626. An Act to make technical amendments to laws containing time periods affecting judicial proceedings.

May 12, 2009:

H.R. 586. An Act to direct the Librarian of Congress and the Secretary of the Smithsonian Institution to carry out a joint project at the Library of Congress and the National Museum of African American History and Culture to collect video and audio recordings of personal histories and testimonials of individuals who participated in the Civil Rights movement, and for other purposes.

May 22, 2009:

H.R. 627. An Act to amend the Truth in Lending Act to establish fair and transparent practices relating to the extension of credit under an open end consumer credit plan, and for other purposes.

June 2, 2009:

H.R. 131. An Act to establish the Ronald Reagan Centennial Commission.

June 19, 2009:

H.R. 663. An Act to designate the facility of the United States Postal Service located at 12877 Broad Street in Sparta, Georgia, as the "Yvonne Ingram-Ephraim Post Office Building".

H.R. 918. An Act to designate the facility of the United States Postal Service located at 300 East 3rd Street in Jamestown, New York, as the "Stan Lundine Post Office Building".

H.R. 1284. An Act to designate the facility of the United States Postal Service located at 103 West Main Street in McLain, Mississippi, as the "Major Ed W. Freeman Post Office".

H.R. 1595. An Act to designate the facility of the United States Postal Service located at 3245 Latta Road in Rochester, New York, as the "Brian K. Schramm Post Office Building".

H.R. 2675. An Act to amend title II of the Antitrust Criminal Penalty Enhancement and Reform Act of 2004 to extend the operation of such title for a 1-year period ending June 22, 2010.

June 22, 2009:

H.R. 1256. An Act to protect the public health by providing the Food and Drug Administration with certain authority to regulate tobacco products, to amend title 5, United States Code, to make certain modifications in the Thrift Savings Plan, the Civil Service Retirement System, and the Federal Employees' Retirement System, and for other purposes.

June 24, 2009:

H.R. 2346. An Act making supplemental appropriations for the fiscal year ending September 30, 2009, and for other purposes.

June 26, 2009:

H.J. Res. 40. A joint resolution to honor the achievements and contributions of Native Americans to the United States, and for other purposes.

June 30, 2009:

H.R. 813. An Act to designate the Federal building and United States courthouse located at 306 East Main Street in Elizabeth City, North Carolina, as the "J. Herbert W. Small Federal Building and United States Courthouse".

H.R. 837. An Act to designate the Federal building located at 799 United Nations Plaza in New York, New York, as the "Ronald H. Brown United States Mission to the United Nations Building".

H.R. 2344. An Act to amend section 114 of title 17, United States Code, to provide for agreements for the reproduction and performance of sound recordings by webcasters.

July 1, 2009:

H.R. 1777. An Act to make technical corrections to the Higher Education Act of 1965, and for other purposes.

July 27, 2009:

H.R. 2632. An Act to amend title 4, United States Code, to encourage the display of the flag of the United States on National Korean War Veterans Armistice Day.

July 28, 2009:

H.J. Res. 56. A joint resolution approving the renewal of import restrictions contained in the Burmese Freedom and Democracy Act of 2003, and for other purposes.

SENATE BILLS AND JOINT RESOLUTIONS APPROVED BY THE PRESIDENT

The President notified the Clerk of the House that on the following dates he had approved and signed bills and a joint resolution of the following titles:

April 23, 2009:

S. 520. An Act to designate the United States courthouse under construction at 327 South Church Street, Rockford, Illinois, as the "Stanley J. Roszkowski United States Courthouse".

April 24, 2009:

S. 383. An Act to amend the Emergency Economic Stabilization Act of 2008 (division A of Public Law 110-343) to provide the Special Inspector General with additional authorities and responsibilities, and for other purposes.

May 7, 2009:

S.J. Res. 8. A joint resolution providing for the appointment of David M. Rubenstein as a citizen regent of the Board of Regents of the Smithsonian Institution.

May 8, 2009:

S. 39. An Act to repeal section 10(f) of Public Law 93-531, commonly known as the "Bennett Freeze".

May 15, 2009:

S. 735. An Act to ensure States receive adoption incentive payments for fiscal year 2008 in accordance with the Fostering Connections to Success and Increasing Adoptions Act of 2008.

May 20, 2009:

S. 386. An Act to improve enforcement of mortgage fraud, securities and commodities fraud, financial institution fraud, and other frauds related to Federal assistance and relief programs, for the recovery of funds lost to these frauds, and for other purposes.

S. 896. An Act to prevent mortgage foreclosures and enhance mortgage credit availability.

May 22, 2009:

S. 454. An Act to improve the organization and procedures of the Department of Defense

for the acquisition of major weapon systems, and for other purposes.

June 30, 2009:

S. 407. An Act to amend title 38, United States Code, to provide for an increase, effective December 1, 2009, in the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans, to codify increases in the rates of such compensation that were effective as of December 1, 2008, and for other purposes.

S. 615. An Act to provide additional personnel authorities for the Special Inspector General for Afghanistan Reconstruction.

July 1, 2009:

S. 614. An Act to award a Congressional Gold Medal to the Women Airforce Service Pilots ("WASP").

ENROLLED BILL SIGNED

Lorraine C. Miller, Clerk of the House, reported and found truly an enrolled bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 3357. An act to restore sums to the Highway Trust Fund and for other purposes.

SENATE ENROLLED BILL SIGNED

The Speaker announced her signature to an enrolled bill of the Senate of the following title:

S. 1107. To amend title 28, United States Code, to provide for a limited 6-month period for Federal judges to opt into the Judicial Survivors' Annuities System and begin contributing toward an annuity for their spouse and dependent children upon their death, and for other purposes.

BILL PRESENTED TO THE PRESIDENT

Lorraine C. Miller, Clerk of the House reports that on July 31, 2009 she presented to the President of the United States, for his approval, the following bill.

H.R. 838. To provide for the conveyance of a parcel of land held by the Bureau of Prisons of the Department of Justice in Miami Dade County, Florida, to facilitate the construction of a new educational facility that includes a secure parking area for the Bureau of Prisons, and for other purposes.

ADJOURNMENT

Mr. KING of Iowa. Mr. Speaker, pursuant to House Concurrent Resolution 172, 111th Congress, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 54 minutes p.m.), the House adjourned until Tuesday, September 8, 2009, at 2 p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2978. A letter from the Director, Regulatory Review Group, Department of Agriculture, transmitting the Department's "Major" final rule — Conservation Reserve Program (RIN 0560-AH80) received July 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

2979. A letter from the Chief Counsel, FEMA, Department of Homeland Security, transmitting the Department's final rule — Changes in Flood Elevation Determinations [Docket ID FEMA-2008-0020; Internal Agency Docket No. FEMA-B-1059] received July 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Financial Services.

2980. A letter from the Director, Regulations Policy and Management Staff, Department of Health and Human Services, transmitting the Department's "Major" final rule — Prevention of Salmonella Enteritidis in Shell Eggs During Production, Storage, and Transportation [Docket No.: FDA-2000-N-0190 (Formerly Docket No. 2000N-0504)] (RIN: 0910-AC14) received July 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2981. A letter from the Chief of Staff, Media Bureau, Federal Communications Commission, transmitting the Department's final rule — Amendment of Section 73.622(i), Final DTV Table of Allotments, Television Broadcast Stations. (Amarillo, Texas) received July 29, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Energy and Commerce.

2982. A letter from the Acting Assistant Secretary for Export Administration, Department of Commerce, transmitting the Department's final rule — Addition and Removal of Certain Persons on the Entity List: Addition of Persons Acting Contrary to the National Security or Foreign Policy Interests of the United States; Removal of Persons based on ERC Annual Review and Removal Requests; and Entry Modified for Purposes of Clarification [Docket No.: 090414651-91046-01] (RIN:0694-AE59) received July 28, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Foreign Affairs.

2983. A letter from the Secretary, Department of Defense, transmitting the report on Measuring Stability and Security in Iraq, pursuant to Section 9204 of the Supplemental Appropriations Act for 2008, Pub. L. 110-252 and Section 1508(c) of the Department of Defense Authorization Act for 2009, Pub. L. 110-417; to the Committee on Foreign Affairs.

2984. A letter from the Acting Senior Procurement Executive, GSA, Department of Defense, transmitting the Department's final rule — Federal Acquisition Regulation; FAR Case 2008-009, Prohibition on Contraction with Inverted Domestic Corporations [FAC 2005-34; FAR Case 2008-009; Item II; Docket 2009-0020, Sequence 1] (RIN: 900-AL28) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

2985. A letter from the Acting Director, Office of Sustainable Fisheries, National Oceanic and Atmospheric, transmitting the Administration's final rule — Fisheries of the Northeastern United States; Northeast Multispecies Fishery; Modification of the Yellowtail Flounder Landing Limit for the U.S./Canada Management Area [Docket No.: 080521698-9067-02] (RIN: 0648-XP50) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Natural Resources.

2986. A letter from the Paralegal Specialist, Department of Transportation, transmitting the Department's final rule — Airworthiness Directives; Turbomeca S.A. Models Arriel 1E2, 1S, and 1S1 Turboshaft Engines [Docket No.: FAA-2008-0681; Directorate Identifier 2008-NE-13-AD; Amendment

39-15805; AD 2009-03-04] (RIN: 2120-AA4) received June 4, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2987. A letter from the Attorney-Advisor, Department of Homeland Security, transmitting the Department's final rule — Special Local Regulation, Maggie Fisher Memorial Great South Bay Cross Bay Swim, Great South Bay, NY [Docket No. USCG-2009-0302] (RIN: 1625-AA08) received July 29, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2988. A letter from the Attorney-Advisor, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Harborfest 2009, Parade of Sail, Elizabeth River, Norfolk, VA [Docket No.: USCG-2009-0405] (RIN: 1625-AA00) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2989. A letter from the Attorney, Department of Homeland Security, transmitting the Department's final rule — Safety Zone; Naval Training, San Clemente Island, CA [Docket No.: USCG-2009-0455] (RIN: 1625-AA00) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2990. A letter from the Attorney-Advisor, Department of Homeland Security, transmitting the Department's final rule — Drawbridge Operation Regulations; Raritan River, Arthur Kill and their tributaries, Staten Island, NY and Elizabeth, NJ [Docket No. USCG-2009-0202] (RIN: 1625-AA09) received July 1, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2991. A letter from the Attorney-Advisor, Department of Homeland Security, transmitting the Department's final rule — Establishment of Suspension and Revocation National Center of Expertise [Docket No.: USCG-2009-0314] (RIN: 1625-ZA22) received July 29, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2992. A letter from the Attorney-Advisor, Department of Homeland Security, transmitting the Department's final rule — Special Local Regulation for Marine Event; Temporary Change of Dates for Recurring Marine Event in the Fifth Coast Guard District [Docket No.: USCG-2009-0252] (RIN: 1625-AA08) received July 29, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Transportation and Infrastructure.

2993. By Ms. CASTOR of Florida (for herself, Mr. BURGESS, Mr. GENE GREEN of Texas, Mr. MCGOVERN, Ms. BORDALLO, Mr. GONZALEZ, Ms. NORTON, Mr. MASSA, Mr. KIRK, Ms. ROYBAL-ALLARD, Mr. SESTAK, Mr. RUSH, Mrs. CHRISTENSEN, Mr. GRIJALVA, Mr. BOSWELL, Ms. MCCOLLUM, Mr. MOORE of Kansas, Mr. HINOJOSA, Ms. DELAUNO, Mr. TOWNS, Ms. SCHAKOWSKY, Ms. CLARKE, Mr. SARBANES, Mr. DAVIS of Illinois, and Ms. EDDIE BERNICE JOHNSON of Texas):

H. Res. 709. A resolution supporting the goals and ideals of National Immunization Awareness Month to raise awareness of the benefits of immunization; to the Committee on Energy and Commerce.

By Ms. CASTOR of Florida (for herself, Mr. ADLER of New Jersey, Mr. BOYD, Mr. BUCHANAN, Mrs. CAPPS, Mr. CASSIDY, Mr. CASTLE, Mrs. DAVIS of California, Mr. DELAHUNT, Ms. DELAUNO, Mr. DICKS, Mr. FRANK of Massachusetts, Mr. HALL of New York, Ms. HARMAN, Mr. HOLT, Mr. KENNEDY, Ms. KOSMAS, Mr. LANGEVIN, Mr. LARSEN of Washington, Ms. LEE of California, Mr. LOBIONDO, Mrs. LOWEY, Mr. LYNCH, Mr. INSLEE, Mr. MACK, Mr. MARKEY of Massachusetts, Mr. MCGOVERN, Mr. MCINTYRE, Mr. MELANCON, Mr. GEORGE MILLER of California, Mrs. NAPOLITANO, Mr. PALLONE, Mr. PAYNE, Mr. PIERLUISI, Mr. POSEY, Mr. PUTNAM, Mr. ROONEY, Mr. ROTHMAN of New Jersey, Mr. SARBANES, Mr. SCHIFF, Mr. SCOTT of Virginia, Ms. SHEA-PORTER, Mr. SIREs, Ms. SPEIER, Mr. STARK, Mr. WITTMAN, Mr. WU, Ms. ROYBAL-ALLARD, Mr. SMITH of New Jersey, Mr. MEEKS of New York, Mr. BILIRAKIS, and Mr. SERRANO):

H. Res. 710. A resolution supporting the goals and ideals of "National Estuaries Day"; to the Committee on Natural Resources.

By Mr. DAVIS of Illinois (for himself and Ms. JACKSON-LEE of Texas):

H. Res. 711. A resolution calling on the United States Government and the international community to address the human rights and humanitarian needs of Sri Lanka's Tamil internally displaced persons (IDPs) currently living in government-run camps by supporting the release of such IDPs, implementing and facilitating an independent oversight of the process of release and resettlement, and allowing foreign aid groups to provide relief and resources to such IDPs; to the Committee on Foreign Affairs.

By Mr. FILNER (for himself, Mr. GRAVES, Mr. WILSON of South Carolina, and Mr. DAVIS of Tennessee):

H. Res. 712. A resolution commending the people of Iraqi Kurdistan for reaffirming in the July 25, 2009, parliamentary elections the region's dedication to democratic ideals and congratulating all the political slates and candidates that participated in the elections, and for other purposes; to the Committee on Foreign Affairs.

By Mr. AL GREEN of Texas (for himself and Mr. HENSARLING):

H. Res. 713. A resolution recognizing the significant contributions of United States automobile dealerships, and expressing the sense of the House of Representatives that in the interest of equity, automobile dealers whose franchises have been terminated through no fault of their own be given an opportunity of first consideration once the auto market rebounds and stabilizes; to the Committee on Energy and Commerce.

By Mr. INGLIS (for himself, Mr. DEFALIZO, Mrs. BACHMANN, Mr. BILBRAY, Mr. LUETKEMEYER, Mr. CONAWAY, Mr. COBLE, Mr. RADANOVICH, and Mr. LAMBORN):

H. Res. 714. A resolution expressing the sense of the House of Representatives that any interest or dividends repaid to the government through the Troubled Asset Relief Program should be used solely for debt reduction, consistent with the authorizing leg-

islation and Article One, Section Nine of the United States Constitution; to the Committee on Financial Services.

By Ms. KAPTUR:

H. Res. 715. A resolution recognizing the 70th anniversary of the Soviet and Nazi invasion of Poland and the pivotal role Poland has assumed at freedom's edge since gaining independence; to the Committee on Foreign Affairs.

By Mr. KENNEDY (for himself, Mrs. MCMORRIS RODGERS, Mr. WAXMAN, Mr. SCHIFF, Mr. SHERMAN, Ms. MATSUI, Mr. BERMAN, Mr. WEXLER, and Ms. DELAUNO):

H. Res. 716. A resolution recognizing Gail Abarbanel and the Rape Treatment Center, and for other purposes; to the Committee on the Judiciary.

By Ms. LEE of California:

H. Res. 717. A resolution supporting the goals and ideals of "National Passport Month"; to the Committee on Foreign Affairs.

By Ms. MATSUI (for herself and Mr. KING of New York):

H. Res. 718. A resolution recognizing September 11 as a "National Day of Service and Remembrance"; to the Committee on Oversight and Government Reform.

By Mr. TIAHRT:

H. Res. 719. A resolution commending Russ Meyer on his induction into the National Aviation Hall of Fame; to the Committee on Transportation and Infrastructure.

By Ms. WATSON (for herself, Mr. ROHRBACHER, Ms. HIRONO, Mr. MCDERMOTT, Mr. DINGELL, Mr. FRANK of Massachusetts, Ms. ZOE LOFGREN of California, Ms. SCHWARTZ, Mr. GRAYSON, Mr. SCOTT of Georgia, Mr. BLUMENAUER, Mr. TOWNS, Mr. CONYERS, Mr. BACA, Ms. WOOLSEY, Ms. SHEA-PORTER, Ms. EDWARDS of Maryland, Mr. MOORE of Kansas, Mr. GARY G. MILLER of California, Mr. COSTA, Mr. JACKSON of Illinois, Mr. PALLONE, Ms. SUTTON, Ms. KAPTUR, Ms. ESHOO, Mrs. NAPOLITANO, Mr. SIREs, Ms. VELAZQUEZ, Mr. DOGGETT, Mr. GEORGE MILLER of California, Mr. LEWIS of Georgia, Ms. SPEIER, Ms. CORRINE BROWN of Florida, Mr. ISSA, Mr. CUMMINGS, Mr. CLYBURN, Mr. DAVIS of Illinois, Mr. PAYNE, Ms. LEE of California, Ms. DEGETTE, Ms. BALDWIN, Ms. FUDGE, Mr. HONDA, Ms. JACKSON-LEE of Texas, Ms. KILPATRICK of Michigan, Ms. CLARKE, Ms. MOORE of Wisconsin, Mr. BISHOP of Georgia, Mr. BUTTERFIELD, Mr. KUCINICH, Mr. HOYER, Mr. HARE, Mr. CONNOLLY of Virginia, Mr. KILDEE, Mr. HASTINGS of Florida, and Ms. HARMAN):

H. Res. 720. A resolution commending Serena Williams for her victory in the 2009 Wimbledon Women's Singles Championship and the 2009 Wimbledon Doubles Championship; to the Committee on Oversight and Government Reform.

MEMORIALS

Under clause 4 of Rule XXII, memorials were presented and referred as follows:

155. The SPEAKER presented a memorial of the Senate of the State of Tennessee, relative to SENATE JOINT RESOLUTION NO. 352 urging the United States Congress to enact H.R. 1633 of the 111th Congress, the "Honor the Written Intent of our Soldier Heroes Act"; to the Committee on Armed Services.

156. Also, a memorial of the Senate of the State of Louisiana, relative to SENATE RESOLUTION NO. 145 memorializing the Congress of the United States to protect Louisiana consumers and competition by opposing efforts to interfere with free markets in order to artificially regulate payment system interchange fees; to the Committee on Financial Services.

157. Also, a memorial of the Senate of the State of Louisiana, relative to SENATE CONCURRENT RESOLUTION NO. 106 memorializing the Congress of the United States to consider appropriate legislation that would require the Federal Communications Commission to regulate auditory volume standards for commercial advertisements broadcast on television; to the Committee on Energy and Commerce.

158. Also, a memorial of the House of Representatives of the State of Texas, relative to H.R. No. 1085 urging the United States Congress to enact legislation facilitating the ability of cities to access appropriate financing for critically needed municipal projects; to the Committee on Oversight and Government Reform.

159. Also, a memorial of the General Assembly of the State of Indiana, relative to SENATE RESOLUTION SIXTY-TWO encouraging the Indiana Congressional Delegation and Senators to oppose legislation that would impede states' rights; to the Committee on the Judiciary.

160. Also, a memorial of the Senate of the State of Louisiana, relative to SENATE CONCURRENT RESOLUTION NO. 32 memorializing the Congress of the United States to review the GPO and the WEP Social Security benefit reductions and to consider eliminating or reducing them by enacting the Social Security Fairness Act of 2009 (H.R. 235 or R.S. 484) or similar instrument; to the Committee on Ways and Means.

ADDITIONAL SPONSORS

H.R. 13: Ms. WATERS.
H.R. 39: Mr. KUCINICH, Mr. STARK, and Mr. PRICE of North Carolina.
H.R. 197: Mr. ROHRBACHER and Mr. DAVIS of Tennessee.
H.R. 204: Mr. JACKSON of Illinois, Mr. DELAHUNT, and Mr. DEFazio.
H.R. 211: Mr. TONKO.
H.R. 235: Mr. HEINRICH, Mrs. BACHMANN, and Mr. CASSIDY.
H.R. 270: Mrs. BLACKBURN.
H.R. 272: Mr. JOHNSON of Illinois.
H.R. 294: Mrs. BLACKBURN.
H.R. 303: Mrs. BLACKBURN, Mr. ROTHMAN of New Jersey, Ms. KAPTUR, and Mr. JOHNSON of Georgia.
H.R. 333: Mrs. BLACKBURN and Mr. AKIN.
H.R. 413: Mr. KING of New York, Mr. SULIVAN, Mr. SHIMKUS, Mr. ROONEY, and Mr. ROGERS of Michigan.
H.R. 442: Mr. MARSHALL, Mr. BERRY, Mr. DAVIS of Tennessee, Mr. MARIO DIAZ-BALART of Florida, Mr. WALDEN, and Mr. TIM MURPHY of Pennsylvania.
H.R. 501: Mr. MCGOVERN.
H.R. 510: Ms. DELAURO and Mr. ENGEL.
H.R. 544: Mr. BILIRAKIS.
H.R. 571: Ms. TITUS, Mr. SIRES, Ms. SCHWARTZ, Mr. BISHOP of Utah, and Mr. LEE of New York.
H.R. 593: Mrs. BLACKBURN.
H.R. 606: Mr. BLUMENAUER.
H.R. 621: Mr. MELANCON, Mr. NADLER of New York, Mr. KING of Iowa, Mr. MCCLIN-

TOCK, Ms. JENKINS, Mr. GARY G. MILLER of California, Mr. REICHERT, Mr. LUETKEMEYER, Mr. BROUN of Georgia, Mr. BILIRAKIS, Mr. BACHUS, Mr. THORNBERRY, Mrs. MYRICK, Mr. HENSARLING, Mr. NEUGEBAUER, Mr. OLSON, Mr. VISLOSKEY, Mr. THOMPSON of California, Mr. MCNERNEY, Mr. TIAHRT, Mr. ROGERS of Michigan, Mr. CONAWAY, Mr. BOCCIERI, and Mr. WITTMAN.

H.R. 644: Mr. HOLT and Mr. POLIS.
H.R. 646: Mr. GARY G. MILLER of California.
H.R. 658: Mr. MCCLINTOCK.
H.R. 666: Mr. BISHOP of New York.
H.R. 667: Mr. WU, Mr. MCCOTTER and Mr. BOSWELL.

H.R. 676: Ms. CHU.
H.R. 690: Mr. QUIGLEY and Mr. WELCH.
H.R. 708: Mr. TURNER and Mr. WITTMAN.
H.R. 718: Mr. BUTTERFIELD.
H.R. 744: Mrs. BLACKBURN.
H.R. 750: Mr. CARSON of Indiana.
H.R. 775: Mr. DAVIS of Illinois, Mr. DANIEL E. LUNGREN of California, Mr. AKIN, Mr. TONKO, and Mr. TIBERI.

H.R. 795: Mr. VAN HOLLEN and Mr. CONNOLLY of Virginia.
H.R. 802: Mr. PATRICK J. MURPHY of Pennsylvania.

H.R. 811: Mrs. BLACKBURN.
H.R. 836: Ms. KOSMAS, Mr. PETERSON, Mr. JACKSON of Illinois, Mr. DAVIS of Illinois, and Ms. JACKSON-LEE of Texas.

H.R. 847: Mr. COURTNEY.
H.R. 868: Mr. MOORE of Kansas and Ms. DEGETTE.

H.R. 953: Mrs. BLACKBURN.
H.R. 1020: Mr. SERRANO.
H.R. 1034: Mr. SHULER and Mr. PLATTS.
H.R. 1053: Mr. CANTOR.
H.R. 1074: Mr. MARIO DIAZ-BALART of Florida, Mr. WALDEN, and Mr. GOODLATTE.
H.R. 1075: Mrs. BLACKBURN.
H.R. 1079: Mrs. BLACKBURN.
H.R. 1103: Ms. BERKLEY.
H.R. 1117: Mr. INGLIS.

H.R. 1132: Mr. TANNER, Mr. HODES, Mr. BUTTERFIELD, Mrs. BACHMANN, Mr. BISHOP of Georgia, Mr. SKELTON, Mr. KILDEE, Mr. ELLSWORTH, Mr. MEEK of Florida, Mr. BUYER, Mr. HARE, Mr. HALL of New York, Mr. PETERS, Mr. BOEHNER, Mr. BARTLETT, Mr. DANIEL E. LUNGREN of California, Mr. TIBERI, Mr. CRENSHAW, Mr. LUETKEMEYER, Mrs. BONO MACK, Mr. BRIGHT, Mr. PENCE, Mr. PAUL, Mr. WALZ, Mr. NEAL of Massachusetts, Mr. ETHERIDGE, Mr. CONNOLLY of Virginia, Mr. KLEIN of Florida, Mr. FORBES, Mr. PERRIELLO, Mr. MCCARTHY of California, and Ms. FOX.

H.R. 1162: Mr. HEINRICH.
H.R. 1179: Mr. RYAN of Ohio and Mr. WELCH.

H.R. 1194: Mr. LARSEN of Washington, Mr. BAIRD, Mr. BRADY of Pennsylvania, Mr. CARDOZA, Ms. FOX, and Mr. SAM JOHNSON of Texas.

H.R. 1201: Mrs. HALVORSON.

PETITIONS, ETC.

Under clause 1 of Rule XXII,

64. The SPEAKER presented a petition of The Village Council of the Village of Yellow Springs, Ohio, relative to RESOLUTION 2009-20 affirming its support for President Obama and his efforts to seek reform of our National Health Care System through Congressional action on legislation currently being debated by Congress; which was referred to the Committee on Energy and Commerce.

DISCHARGE PETITIONS— ADDITIONS OR DELETIONS

The following Members added their names to the following discharge petitions:

Petition 3 by Mr. LATOURETTE on House Resolution 359: Don Young, Christopher H. Smith, Frank R. Wolf, Edward R. Royce, Patrick T. McHenry, Randy Neugebauer, Dana Rohrabacher, Anh “Joseph” Cao, David G. Reichert, Harold Rogers, Peter Hoekstra, Paul Ryan, Timothy V. Johnson, Robert B. Aderholt, Brian P. Bilbray, Ginny Brown-Waite, and Joe Barton.

Petition 4 by Mr. BURTON on House Resolution 460: John Campbell, Harold Rogers, Leonard Lance, Lynn Jenkins, Howard Coble, Christopher H. Smith, Frank R. Wolf, Zach Wamp, Virginia Foxx, Randy Neugebauer, Dana Rohrabacher, John Boozman, Steve Buyer, Aaron Schock, and Tom Cole.

Petition 5 by Mrs. BLACKBURN on H.R. 391: Cathy McMorris Rodgers, Pete Olson, John Campbell, F. James Sensenbrenner, Jr., Harold Rogers, Paul C. Broun, Howard Coble, Ander Crenshaw, David P. Roe, John Linder, Nathan Deal, Virginia Foxx, Peter J. Roskam, Ralph M. Hall, John Boozman, Rob Bishop, Steve Buyer, John Kline, Robert B. Aderholt, Tom Cole, and John B. Shadegg.

AMENDMENTS

Under clause 8 of rule XVIII, proposed amendments were submitted as follows:

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 1: After section 104, add the following new section (and amend the table of contents accordingly):

SEC. 105. CONTINUATION OF BENEFITS.

No funds or services authorized under this Act, or the amendments made by this Act, or

appropriated pursuant to an authorization under this Act or such amendments, shall be withheld from any Indian tribe or member of an Indian tribe based on the fact that the Indian tribe was federally recognized on or after June 18, 1934.

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 2: Page 318, line 16, before “after” insert the following: “before, on, or”.

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 3: After section 714 of the amendment added by section 101 of the bill, add the following new section (and amend subsequent sections and the table of contents accordingly):

SEC. 715. TESTIMONY BY SERVICE EMPLOYEES IN CASES OF RAPE AND SEXUAL ASSAULT.

(a) APPROVAL BY DIRECTOR.—

(1) IN GENERAL.—The Director shall approve or disapprove, in writing, any request or subpoena for a sexual assault nurse examiner employed by the Service to provide testimony in a deposition, trial, or other similar proceeding regarding information obtained in carrying out the official duties of the nurse examiner.

(2) REQUIREMENT.—The Director shall approve a request or subpoena under paragraph (1) if the request or subpoena does not violate the policy of the Department to maintain strict impartiality with respect to private causes of action.

(3) TREATMENT.—If the Director fails to approve or disapprove a request or subpoena by the date that is 30 days after the date of receipt of the request or subpoena, the request or subpoena shall be considered to be approved for purposes of this subsection.

(b) POLICIES AND PROTOCOL.—The Director, in coordination with the Director of the Office on Violence Against Women of the Department of Justice, in consultation with Indian Tribes and Tribal Organizations, and in conference with Urban Indian Organizations, shall develop standardized sexual assault policies and protocol for the facilities of the Service.

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 4: After section 817, add the following new section (and amend subsequent sections and the table of contents accordingly):

SEC. 818. LIMITATION ON USE OF FUNDS.

No funds authorized under this Act, or the amendments made by this Act, or appropriated pursuant to an authorization under this Act or such amendments, shall be withheld from release to or expenditure for the benefit of any federally recognized Indian tribe based on the pendency of litigation; provided, that this limitation shall not be effective if a temporary order or temporary injunction is in effect during the pendency of litigation or there is a settlement agreement which effects the end of litigation among the adverse parties.

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 5: Add at the end of the bill, add the following new title (and amend the table of contents accordingly):

TITLE IX—LAW ENFORCEMENT AND METHAMPHETAMINE ISSUES IN INDIAN COUNTRY

SEC. 901. SENSE OF CONGRESS REGARDING LAW ENFORCEMENT AND METHAMPHETAMINE ISSUES IN INDIAN COUNTRY.

It is the sense of Congress that Congress encourages State, local, and Indian tribal

law enforcement agencies to enter into memoranda of agreement between and among those agencies for purposes of streamlining law enforcement activities and maximizing the use of limited resources—

(1) to improve law enforcement services provided to Indian tribal communities; and

(2) to increase the effectiveness of measures to address problems relating to methamphetamine use in Indian Country (as defined in section 1151 of title 18, United States Code).

H.R. 2708

OFFERED BY: MR. COLE

AMENDMENT NO. 6: Add at the end of the bill, insert the following new title (and amend the table of contents accordingly):

TITLE IX—APOLOGY TO NATIVE PEOPLES OF THE UNITED STATES

SEC. 901. APOLOGY TO NATIVE PEOPLES OF THE UNITED STATES.

(a) FINDINGS.—Congress finds that—

(1) the ancestors of today's Native Peoples inhabited the land of the present-day United States since time immemorial and for thousands of years before the arrival of people of European descent;

(2) for millennia, Native Peoples have honored, protected, and stewarded this land we cherish;

(3) Native Peoples are spiritual people with a deep and abiding belief in the Creator, and for millennia Native Peoples have maintained a powerful spiritual connection to this land, as evidenced by their customs and legends;

(4) the arrival of Europeans in North America opened a new chapter in the history of Native Peoples;

(5) while establishment of permanent European settlements in North America did stir conflict with nearby Indian tribes, peaceful and mutually beneficial interactions also took place;

(6) the foundational English settlements in Jamestown, Virginia, and Plymouth, Massachusetts, owed their survival in large measure to the compassion and aid of Native Peoples in the vicinities of the settlements;

(7) in the infancy of the United States, the founders of the Republic expressed their desire for a just relationship with the Indian tribes, as evidenced by the Northwest Ordinance enacted by Congress in 1787, which begins with the phrase, "The utmost good faith shall always be observed toward the Indians";

(8) Indian tribes provided great assistance to the fledgling Republic as it strengthened and grew, including invaluable help to

Meriwether Lewis and William Clark on their epic journey from St. Louis, Missouri, to the Pacific Coast;

(9) Native Peoples and non-Native settlers engaged in numerous armed conflicts in which unfortunately, both took innocent lives, including those of women and children;

(10) the Federal Government violated many of the treaties ratified by Congress and other diplomatic agreements with Indian tribes;

(11) the United States forced Indian tribes and their citizens to move away from their traditional homelands and onto federally established and controlled reservations, in accordance with such Acts as the Act of May 28, 1830 (4 Stat. 411, chapter 148) (commonly known as the "Indian Removal Act");

(12) many Native Peoples suffered and perished—

(A) during the execution of the official Federal Government policy of forced removal, including the infamous Trail of Tears and Long Walk;

(B) during bloody armed confrontations and massacres, such as the Sand Creek Massacre in 1864 and the Wounded Knee Massacre in 1890; and

(C) on numerous Indian reservations;

(13) the Federal Government condemned the traditions, beliefs, and customs of Native Peoples and endeavored to assimilate them by such policies as the redistribution of land under the Act of February 8, 1887 (25 U.S.C. 331; 24 Stat. 388, chapter 119) (commonly known as the "General Allotment Act"), and the forcible removal of Native children from their families to faraway boarding schools where their Native practices and languages were degraded and forbidden;

(14) officials of the Federal Government and private United States citizens harmed Native Peoples by the unlawful acquisition of recognized tribal land and the theft of tribal resources and assets from recognized tribal land;

(15) the policies of the Federal Government toward Indian tribes and the breaking of covenants with Indian tribes have contributed to the severe social ills and economic troubles in many Native communities today;

(16) despite the wrongs committed against Native Peoples by the United States, Native Peoples have remained committed to the protection of this great land, as evidenced by the fact that, on a per capita basis, more Native Peoples have served in the United States Armed Forces and placed themselves in harm's way in defense of the United States in every major military conflict than any other ethnic group;

(17) Indian tribes have actively influenced the public life of the United States by continued cooperation with Congress and the Department of the Interior, through the involvement of Native individuals in official Federal Government positions, and by leadership of their own sovereign Indian tribes;

(18) Indian tribes are resilient and determined to preserve, develop, and transmit to future generations their unique cultural identities;

(19) the National Museum of the American Indian was established within the Smithsonian Institution as a living memorial to Native Peoples and their traditions; and

(20) Native Peoples are endowed by their Creator with certain unalienable rights, and among those are life, liberty, and the pursuit of happiness.

(b) ACKNOWLEDGMENT AND APOLOGY.—The United States, acting through Congress—

(1) recognizes the special legal and political relationship Indian tribes have with the United States and the solemn covenant with the land we share;

(2) commends and honors Native Peoples for the thousands of years that they have stewarded and protected this land;

(3) recognizes that there have been years of official depredations, ill-conceived policies, and the breaking of covenants by the Federal Government regarding Indian tribes;

(4) apologizes on behalf of the people of the United States to all Native Peoples for the many instances of violence, maltreatment, and neglect inflicted on Native Peoples by citizens of the United States;

(5) expresses its regret for the ramifications of former wrongs and its commitment to build on the positive relationships of the past and present to move toward a brighter future where all the people of this land live reconciled as brothers and sisters, and harmoniously steward and protect this land together;

(6) urges the President to acknowledge the wrongs of the United States against Indian tribes in the history of the United States in order to bring healing to this land; and

(7) commends the State governments that have begun reconciliation efforts with recognized Indian tribes located in their boundaries and encourages all State governments similarly to work toward reconciling relationships with Indian tribes within their boundaries.

(c) DISCLAIMER.—Nothing in this section—

(1) authorizes or supports any claim against the United States; or

(2) serves as a settlement of any claim against the United States.

EXTENSIONS OF REMARKS

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed some recorded votes on the House floor on Friday, July 24, 2009.

I ask that the RECORD reflect that had I been present, I would have voted "no" on rollcall vote No. 638 (On motion to table appeal of the ruling of the chair), "no" on rollcall vote No. 639 (On Ordering the Previous Question to H. Res. 673), "no" on rollcall vote No. 640 (On Agreeing to H. Res. 673), "no" on rollcall vote No. 641 (On Agreeing to the Obey of Wisconsin amendment to H.R. 3293), "aye" on rollcall vote No. 642 (On Agreeing to the Souder of Indiana amendment to H.R. 3293), "aye" on rollcall vote No. 643 (On Agreeing to the Pence of Indiana amendment to H.R. 3293), "aye" on Rollcall vote No. 644 (On Agreeing to the Wittman of Virginia amendment to H.R. 3293), "aye" on rollcall vote No. 645 (On motion to recommit with instructions to H.R. 3293), "no" on rollcall vote No. 646 (On passage to H.R. 3293).

HONORING BRITTANY BASS AND KIRSTEN MUELLER UPON RECEIPT OF THE GIRL SCOUT GOLD AWARD

HON. STEVE ISRAEL

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISRAEL. Madam Speaker, I rise today to acknowledge two young women in my hometown of Dix Hills, Brittany Bass and Kirsten Mueller.

Brittany and Kirsten will receive the Girl Scout Gold Award on August 3, 2009. Their project included teaching younger girls how to stay healthy by collecting new and used sporting equipment, food for local pantry and sneakers for the Nike Reuse-A-Shoe Foundation. I wish to commend them for their community service.

PERSONAL EXPLANATION

HON. CAROLYN MCCARTHY

OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mrs. MCCARTHY of New York. Madam Speaker, yesterday, I missed 7 votes. Had I been present, I would have voted as follows.

Rollcall No. 654, on Ordering the Previous Question on the Amendment to and Resolution H. Res. 685, I would have voted "yea."

Rollcall No. 655, on Agreeing to the Resolution, as Amended H. Res. 685, I would have voted "yea."

Rollcall No. 656, on the Motion to Table H. Res. 690, I would have voted "yea."

Rollcall No. 657, on the Motion to Suspend the Rules and Pass, as Amended, H.R. 2749, I would have voted "yea."

Rollcall No. 658, on the Motion to Suspend the Rules and Pass, as Amended, H.R. 1665, I would have voted "yea."

Rollcall No. 659, on the Motion to Suspend the Rules and Pass, as Amended, H.R. 3357, I would have voted "yea."

Rollcall No. 660, on the Motion to Suspend the Rules and Agree to, as Amended, H. Res. 496, I would have voted "yea."

EARMARK DECLARATION

HON. DOC HASTINGS

OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. HASTINGS of Washington. Madam Speaker, to provide open disclosure, I am submitting the following information regarding projects that I support for inclusion in H.R. 3293, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act of 2010.

Amount: \$600,000

Account: U.S. Department of Health and Human Services—Health Resources and Service Administration

Entity receiving funds: Central Washington Hospital located at 1201 South Miller Street, Wenatchee, WA 98807.

Description: These funds will be used to expand Central Washington Hospital's medical campus so that the hospital can continue to meet the health care needs of North Central Washington. This region is currently facing a shortage of hospital beds.

Amount: \$400,000

Account: U.S. Department of Health and Human Services—Health Resources and Service Administration

Entity receiving funds: Pacific Northwest University of Health Sciences located at 111 University Parkway, Suite 202, Yakima, WA 98901.

Description: Funds will be used to help the new College of Allied Health and Sciences and Postgraduate Studies develop and implement new programs to teach medical specialties where there are doctor shortages in the region.

HONORING ANDREW TINGWALL

HON. HARRY TEAGUE

OF NEW MEXICO
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. TEAGUE. Madam Speaker, today I would like to honor a very special New Mexican, Andrew Tingwall of the New Mexico State Police. Sergeant Tingwall served our country and my home state with distinction and honor for almost two decades, beginning with his tenure in the United States Marine Corps, where he was a Jump Qualified Reconnaissance Marine. Sergeant Tingwall then went on to join the New Mexico State Police, where he became the youngest pilot on the force. During his time with the State police he was named the 2008 Officer of the year by the New Mexico Sheriffs and Police Association for his lifesaving efforts of a man that had fallen into an arroyo in Albuquerque.

On several occasions, Sergeant Tingwall risked his own life to save others. He did so without any thought of personal gain. The only driving force for him was his mission to serve and protect and sadly that discipline cost him his life when Sergeant Tingwall flew his last mission earlier this year in an attempt to find lost hikers in the Sangre de Cristo Mountains. Andrew did all he could, but in the end, this mission was his last.

Throughout his career in public service he exemplified the attributes that make both the New Mexico State Police and the United States Marine Corps premier organizations that defend liberty and security of Americans and New Mexicans.

ENERGY

HON. BETSY MARKEY

OF COLORADO
IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. MARKEY of Colorado. Madam Speaker, I rise today to remind my colleagues to continue the dialogue on the American Clean Energy and Security Act over the August recess. I supported this legislation because I believe western states like Colorado stand to gain much from this energy bill. Renewable energy companies like Abound Solar and Vestas Wind Systems are already creating jobs and driving economic development in northern and eastern Colorado.

I believe the House-passed bill will help farmers and ranchers reap great benefits in America's renewable energy economy. I worked hard with my colleagues on the Agriculture Committee to ensure the concerns of America's farmers and ranchers were addressed. By developing cleaner energy here at home and using the vast domestic resources

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

we currently have, we can work towards a less volatile energy market that will benefit us all.

I encourage all my colleagues in the House and the Senate to continue this important work.

HONORING THE MEMORY OF
OSCAR OLCHYK

HON. ILEANA ROS-LEHTINEN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. ROS-LEHTINEN. Madam Speaker, I would like to take this opportunity to honor the memory of one of my fellow South Florida constituents, Oscar Olchyk. Oscar passed away peacefully on Thursday, July 23 at the age of 82, surrounded by his loving family.

Oscar spent his life completely and wholeheartedly dedicating himself to his family, including his wife of 50 years, Marta, his children, Sonia and Samuel, his grandchildren, Abram and Ross, his brother Bernardo, and his sister Mary. He also held an immense devotion for his mother and father-in-law, his daughter-in-law, Debbie, and his brother-in-law, Boris.

Born in Havana, Cuba in 1927, Oscar spent his first 33 years in Cuba, where he became a Certified Public Accountant and a Professor of Accounting at the University of Havana. It was also in Cuba where he met the love of his life, Marta, and where they were married and started a family together. Oscar and Marta, along with their son Samuel, fled Cuba for a new life in the United States after the Castro takeover.

Oscar spent most of his life in Dallas, Texas, where he continued to raise a family with his wife. In addition to his family, he devoted himself to pursuing a higher education, serving his community, and his accounting practice. Oscar and Marta spent the last decade enjoying their retirement in beautiful South Florida and near their family. They both had the opportunity to travel around the world and spend their 50th anniversary with their grandson, Abram.

My greatest sympathy goes to all of his loving family and friends whom he treasured so deeply throughout his life.

HONORING THE PUBLIC SERVICE
AND COMMUNITY ACTIVISM OF
MR. CLYDE MCINTOSH OF NORTH
CAROLINA

HON. HEATH SHULER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SHULER. Madam Speaker, I rise today to honor an outstanding public servant and dedicated volunteer in Yancey County, North Carolina. Mr. Clyde McIntosh of Burnsville has dedicated his life to service and activism. After graduating from Burnsville High School in 1950, Mr. McIntosh proudly served four years in the United States Navy. Upon completion of

his service, he moved back to the mountains of western North Carolina, where he built a successful real estate and development business and operated a dairy farm. During this period, he worked diligently toward the goal of preserving the rural heritage of the area.

Mr. McIntosh assumed public office when he was elected Sheriff of Yancey County in 1986. From 1999 to 2005, he served on the Board of Directors of the Yancey County Department of Social Services, spending a portion of his tenure as Chair. For many years, Mr. McIntosh has been an active community volunteer for the Lions Club and Meals on Wheels.

Mr. McIntosh has worked for years to educate Yancey County youth on the importance of civic engagement and community involvement. He has acted as a mentor for the Young Democrats organization of Yancey County, encouraging young people to be politically active.

I commend his outstanding contributions to the Democratic Party. In April 2001, he was named Mountain Democrat of the Year and also served as Yancey County Democratic Party Chair throughout the years. He has served as Precinct Chair for both Jacks Creek and Burnsville Townships, and he is currently the Burnsville Township Chair.

Madam Speaker, I ask my colleagues to join me in honoring Mr. Clyde McIntosh and recognizing his service to Yancey County, North Carolina.

BOB BARKER'S LIFELONG PASSION
TO PROTECT ANIMALS

HON. C.W. BILL YOUNG

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. YOUNG of Florida. Madam Speaker, Bob Barker is a household name who is known nationally and internationally as the beloved host of the Price is Right. While he has retired from his career in television, he has redoubled his lifelong efforts to protect animals around the world.

I first met Bob Barker a number of years ago when he was here in the Capitol in support of legislation to stop the inhumane treatment of animals. We quickly became good friends and my wife Beverly and I have come to respect not only his commitment to animals but also his unwavering support for our men and women who serve in uniform.

Bob Barker is a great American with a very unique background. He grew up on the Rosebud Indian Reservation in South Dakota and was a Navy fighter pilot at the end of World War II.

Yesterday Beverly joined Bob Barker for a press conference about another case of the mistreatment of animals that was brought to his attention and which he has in turn called to the attention of our nation. Following my remarks, I would like to include for the benefit of my colleagues an Associated Press report about that event. While I wish I could have been there with Bob to show my support for his work and lifelong passion, I had to be here in the House as we debated the rule and began consideration of the Defense Appropriations Bill.

However, Madam Speaker, I wanted to commend Bob Barker for once again crisscrossing our nation in his continuing commitment to protect innocent animals that cannot protect themselves.

BOB BARKER ASKS CHEROKEES TO END NORTH
CAROLINA BEAR PIT ATTRACTIONS

(From The Canadian Press, July 29, 2007)

ASHEVILLE, N.C.—Former game show host and longtime animal rights activist Bob Barker has made a personal appeal to the Eastern Band of Cherokee Indians in North Carolina to stop exhibiting bears in pit-like enclosures at three local zoos.

The Asheville Citizen-Times reported that Barker met Tuesday with Principal Chief Michell Hicks and five members of the Tribal Council. He called the bears' conditions inhumane and asked that they be turned over to a sanctuary in California.

"To think that with as advanced as our civilization is now that there is any place in the United States where bears are kept in pits is just unbelievable," said Barker, who is part American Indian and grew up on the Rosebud Indian Reservation in South Dakota. "Just picture yourself, if your life, 24 hours a day, seven days a week, month after month, was in a pit."

The bears are displayed in walled enclosures set into the ground at three local attractions that bill themselves as zoos and theme parks.

Barker will discuss the meeting at a news conference Wednesday morning in Asheville.

Hicks told the Asheville Citizen-Times that the tribe follows federal regulations in caring for the bears.

Collette Coggins, who owns one of the attractions, the Cherokee Bear Zoo, with her husband, Barry, said the bears don't stay in the pits all day, every day. "We love our animals," she said. "They are like our pets."

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed recorded votes on the House floor on Monday, July 27, 2009.

I ask that the RECORD reflect that had I been present, I would have voted "aye" on rollcall vote No. 647 (on motion to suspend the rules and agree to H. Res. 593); "no" on rollcall vote No. 648 (on motion to suspend the rules and agree to H.R. 1376); and "aye" on rollcall vote No. 649 (on motion to suspend the rules and agree to H.R. 1121).

INTRODUCING THE TAX EQUITY
FOR MEAL REPLACEMENTS AND
SUPPLEMENTS ACT OF 2009

HON. EARL BLUMENAUER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BLUMENAUER. Madam Speaker, there are small, common sense steps everyone can take to improve their health, save money, and reduce unnecessary visits to the doctor. Nutritional supplements can significantly improve

health, and by making vitamins and supplements more affordable, we can help people stay healthy while reducing medical costs.

For that reason, I have introduced the Tax Equity for Meal Replacements and Supplements Act of 2009, which will make it easier for our constituents to make healthy choices and improve their health and well-being. This legislation allows employees to purchase certain dietary supplements and meal replacement products with pre-tax dollars already reserved for health needs.

The prevention of disease is a key factor in limiting health care expenditures. A 2007 study conducted by The Lewin Group showed that the appropriate use of select dietary supplements over a five year period would improve the health of key populations and save the nation more than \$24 billion in healthcare costs.

Among the findings, that report noted that if 11.3 million of the 44 million American women who are of childbearing age and not taking folic acid, began taking 400 mcg. of folic acid on a daily basis, neural tube defects could be prevented in 600 babies, saving as much as \$344 million in the first year. Over five years, taking into account the cost of the supplement, \$1.4 billion could potentially be saved.

The report also highlighted the potential five-year savings in health care expenditures resulting from a reduction in the occurrence of coronary heart disease, CHD, among the population over age 65. Through a daily intake of approximately 1800 mg of omega-3, the occurrence of this disease can be reduced, saving \$3.2 billion. Approximately 374,301 hospitalizations and associated physician fees due to CHD could also be avoided.

I look forward to working with my colleagues to pass this commonsense legislation.

EARMARK DECLARATION

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. TIAHRT. Madam Speaker, in accordance with the Republican Earmark Standards Guidance, I submit the following in regard to the Fiscal Year 2010 Department of Defense Appropriations Act found in H.R. 3326:

PORTABLE MILITARY RADIO COMMUNICATIONS TEST SET

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$1,500,000 for Portable Military Radio Communications Test Set in the Marine Corps, Procurement Account. The entity to receive funding for this project is Aeroflex at 10200 West York Road, Wichita, KS 67215-8999.

The Portable Military Radio Communications Test Set was developed with the military in mind with its portability, rugged build, and weight. The technician can easily perform maintenance checks of radio systems (including antennas & cables); perform diagnostics or troubleshooting of faulty radio systems in order to repair or restore the radio systems. The test set is portable, weighing in at only 8.5 lbs (including the battery). It operates from a rechargeable battery with about 5 hours operating time. With the additional capability to

perform quick testing of antennas and cables, the Portable Military Radio Communications Test Set provides for the tester to isolate problems and assess performance of the radio, cable, and antenna systems. It was designed to significantly reduce the number of radios incorrectly removed from vehicles where it was later determined to have no trouble found.

The Marine Corps pays about \$10,000 for each tester, with a requirement for 1600 units. This funding will go to procurement of the testers to meet this requirement.

No matching funds are required for this Department of Defense project.

RADIO PERSONALITY MODULES FOR SINCGARS TEST SETS

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$3,000,000 for Radio Personality Modules for SINCGARS Test Sets in the Army, Other Procurement Account. The entity to receive funding for this project is Aeroflex at 10200 West York Road, Wichita, KS 67215-8999.

The funds will fund Radio Personality Modules for SINCGARS Test Sets which capitalizes upon existing radio test sets by making them up to 10 times more capable than they were before. Presently, the GRM-122 test set diagnoses only one type of radio—the SINCGARS. After the proposed upgrade, the very same tester will be able to test multiple radios in common use, including: UHF radios, VHF radios, high frequency radios, intercoms, survival vest radios, and four different types of navigation radios installed in aircraft on the flight line. This efficient program saves both time and money. Time, because the technician performing the test will have the entire test suite he requires at his immediate disposal on the flight line; and money because the Aviation Intermediate Maintenance locations equipped with Radio Personality Modules for SINCGARS Test Sets will not need to acquire nor carry entire test suites of disparate equipments.

This funding is for procurement of these test sets. The cost of each test suite is \$157,946—there is a need for about 80 test sets in all. The anticipated source of funding for the duration of the project is funding from the government; the customer is the US Army.

No matching funds are required for this Department of Defense project.

DIRECTED ENERGY SYSTEMS FOR UAV PAYLOADS

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$1,000,000 for Directed Energy Systems for UAV Payloads in the Defense-wide, RDT&E Account. The entity to receive funding for this project is ARC Technology at 13076 NW 120th St., White-water, KS 67154.

ARC anticipates that federal funds will complete the research and development of this technology. This technology enables both offensive and defensive capabilities from UAV platforms that are either controlled or autonomous. Targets of interest include remotely controlled devices, communications systems, computers, electronics, radar systems, infrared and acoustic sensors, and GPS jammers. The FY 10 funding addresses additional integration issues, range extension, packaging issues, and customer performance verification for incorporation into specific delivery platforms.

BUDGET FOR UAV PAYLOAD DIRECTED ENERGY SYSTEMS Materials—5%

Labor—70%

Testing—15%

Performance verification*—10%

Total—100%

*Per customer specifications, to simulate performance in end applications.

No matching funds are required for this Department of Defense project.

B-52 TACTICAL DATA LINK PROGRAM

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$6,000,000 for B52 Tactical Data Link (TDL) Program in the Air Force, Research and Development account. This project is for The Boeing Corporation located at P.O. Box 7730 MC K71-33, Wichita, KS 67277-7730.

The B-52 Combat Communications Network Technology (CONNECT) Capabilities Description Document (CDD) identified mission area capability gaps that supplied rationale for Line-of-sight (LOS) Tactical Data Link (TDL) communications. These mission area capability gaps continue to exist for missions that the B-52 has been tasked to perform. Current planned B-52 CONNECT Phase A capability, slated for IOC in 2011, relies on low-speed data links that are not jam-resistant and will not meet specific mission area goals. To meet mission goals within theater operations (300 nautical miles or less), a jam-resistant, low-latency tactical data link capability is required.

Original B-52 CONNECT program effort included the integration of a LOS TDL capability per the CDD requirements. During FY2005, the LOS TDL component and associated funding was removed from the program. The current B-52 CONNECT program includes a two phase delivery with the initial capability (Phase A) providing low-speed BLOS and LOS communications that are not jam-resistant followed by an additional phase that adds the Family of Advanced BLOS Terminals (FAB-T) Airborne Wideband Terminal (AWT) for enhanced jam-resistant BLOS reach-back capability to the B-52. The initial phase of the program provided significant computing hardware integration and infrastructure as the basis for future communications data link integration on the B-52.

Full integration of a LOS TDL on the B-52 involves significant effort to design, test, and certify the system for operational use. The original B-52 CONNECT program solution set involved integrating the MIDS JTRS terminal that has been under development since FY2004. This architecture involved integration of the legacy Link-16 Tactical waveform. Numerous platforms have integrated the Link-16 Waveform capability to participate in a LOS tactical environment.

Since that time, new technologies and concepts of operation have been assessed by the DoD community. Assurance will need to be established as to whether the Link-16 waveform is the proper transport of choice or if alternate waveform transports will be required. When developing Network-Centric architectures, robust system engineering efforts will need to be performed to establish and obtain agreement on concepts of operations and operational needlines and timelines for interoperability (i.e. establish who we are talking with and how). Effort will need to be expended to determine these interoperability solutions. Proposed Project Activities:

Develop DoD architecture products within an Information Support Plan (ISP) to provide

mission area justification for LOS TDL integration

Perform analysis of alternatives (AOA) to determine terminal selection and transport/waveform requirements to meet operational needlines

Develop candidate requirements/architecture definition utilizing original B-52 CONECT TDL architecture as a basis for integration and ensure stakeholder concurrence through design review.

Perform aircraft installation trade studies to identify any potential issues with integration (size, weight, power, cooling, antenna performance)

Perform lab demonstration of capability using government-supplied LOS terminal assets in the Wichita B-52 SIL

Deliver draft SSS modifications and System Design modifications that will provide the basis for a follow-on proposal to complete integration of a LOS TDL capability
Project Estimates:

Requirement integration with existing CONECT architecture (\$1.8M—8 folks for 6 months (about \$1.4M to contractor with \$0.4M to customer)

Prototype design in SIL (\$3.7M—12 months for 10 folks (\$3.2M to contractor with \$0.5M to customer)

Government Furnished Equipment (GFE) Equipment—\$0.5M (Two TDL Terminals and ancillary equipment)

At the completion of the project effort, a preliminary requirements definition and architecture design understanding will be established between the government and Boeing. This would serve as the basis for a follow-on Request for Proposal (RFP) for the full SDD development effort to integrate the LOS TDL capability on the B-52. In addition, the effort will establish an Information Support Plan which supports and validates the CDD requirements and addresses mission area gaps that would be filled with a LOS TDL capability.

No matching funds are required for this Department of Defense project.

CIVIL AIR PATROL (CAP) AIRCRAFT

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$7,426,000 for Civil Air Patrol (CAP) Aircraft in the Air Force, Aircraft Procurement Account, of which \$5,000,000 is a Congressional add. The entity to receive funding for this project is Cessna Aircraft Company at 3 Cessna Blvd, Wichita, Kansas 67215.

The CAP provides the least expensive airborne emergency services and Homeland Security services of any agency at approximately \$100 per flying hour. The CAP budgets through the USAF for acquisition of new aircraft to modernize the fleet, maintain operational readiness, and contribute to the Homeland Security. The additional funding will procure additional aircraft for CAP.

No matching funds are required for this Department of Defense project.

DEMONSTRATION PROJECT FOR COHORT/ACIMS: COMPOSITE OCCUPATIONAL HEALTH AND OPERATIONAL RISK TRACKING SYSTEM/ADVANCED CONCEPT INFORMATION MANAGEMENT SYSTEM

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$3,000,000 for Demonstration Project for COHORT/ACIMS: Composite Occupational Health and Oper-

ational Risk Tracking System / Advanced Concept Information Management System. The entity to receive funding for this project is Spin Systems located at 3450 North Rock Road, Bldg #200, Suite 202.

This project leverages the successes of the COHORT/ACIMS I & II projects that developed the Armed Forces Medical Analysis and Collaboration Tool (AFMAC) using the Spin Business Framework (SBF). AFMAC was designed by an AF/SG physician epidemiologist to analyze and track "Injured Airmen" as a proof of concept. Both tasks are necessary to fully realize the power of putting actionable information in the hands of doctors and nurses carrying for our sick and injured.

Task 1: Enterprise Medical Management Framework.

This funding is to develop a clinical business intelligence and "bedside" case management support tool for nurses and doctors using the SBF-AFMAC framework. This tool will provide access to real-time, consolidated health information and hands-on tools to assist them in coordinating care for wounded warriors and other MHS patients. These tools will assist with case management, care coordination, team collaboration, workflow management, secure messaging, notifications and alerts, documentation creation and management, metrics, dashboards and forecasting. Our clinical teams are missing these tools, which have been identified by the AF/SG's Family Health Initiative as essential to success. The AFMS has advised the need for additional work in the amount of \$1.8M.

Finance Plan: Labor—57%, ODC—5%, Materials (Enterprise License/Hardware)—38%.

Task 2: Real-Time Data Delivery.

This funding is to develop a modern solution to provide a quick, efficient, standardized and secure mechanism for delivering data from centralized information systems and databases into the hands of the doctors and nurses at the bedside and in the clinic. Providing a near-real time data delivery system will take full advantage of valuable but separate data systems and put the information in the hands of clinicians, medical technicians and health administrators without delay, duplication or redundancy. Real-time data delivery will save manpower and resources in the IT community in addition to improving health and saving lives. The AFMS has advised the need for \$1.2M in additional work in this area.

Finance Plan: Labor—82%, ODC—5%, Materials (Enterprise Licenses/Hardware)—13%.

No matching funds are required for this Department of Defense project.

DEMONSTRATION PROJECT FOR CONTRACTORS EMPLOYING PERSONS WITH DISABILITIES

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$4,000,000 for Demonstration Project for Contractors Employing Persons with Disabilities in the Air Force, Operation & Maintenance. The entities to receive funding for this project is Cerebral Palsy Research Foundation located at 5111 East 21st Street Wichita, Kansas 67208 and Envision located at 2301 South Water, Wichita, Kansas 67213.

The program is authorized under H.R. 1588; Demonstration Project for Contractors Employing Persons With Disabilities. The purpose of

the demonstration project is to provide jobs for people with severe disabilities who otherwise would not be fully employed. The national unemployment rate for people with severe disabilities is 70%. It is in the national best interest for the government to provide, and fund, programs which have as a purpose to lower this rate. Disabled individuals employed under the Demonstration Project are able to live independent lives and are able to pay their share of employment taxes and income taxes. These individuals, when employed, contribute to the growth of our economy. As a result of the Demonstration Project for Contractors Employing Persons with Disabilities, the U.S. Air Force Printing Office has engaged in an ongoing relationship with Envision Corporation in Wichita, Kansas. This relationship has been very successful in accomplishing not only the goal of furthering employment opportunities for the blind, but also in providing the U.S. Air Force Printing Office with funding and manpower it would otherwise not have. To date, the U.S. Air Force has advised of the need for additional work totaling approximately \$8 Million.

As a result of the Demonstration Project for Contractors Employing Persons with Disabilities, the U.S. Air Force Office of Personnel and Management has engaged in an ongoing relationship with The Cerebral Palsy Research Foundation in Wichita, Kansas. This relationship has been very successful in accomplishing not only the goal of furthering employment opportunities for the severely disabled, but also in providing the U.S. Air Force Office of Personnel and Management with funding and manpower it would otherwise not have for the purpose of digitizing all paper records of its personnel. To date, the U.S. Air Force has advised of the need for additional work totaling approximately \$11 Million.

The United States Air Force Personnel community is undergoing the most extensive re-engineering effort in history. This effort includes streamlining processes and centralizing where it makes sense to do so by leveraging technology, and shifting the service model to a greater reliance on self-service. A key enabler to achieving the desired end state is a shift from paper-intensive personnel transitions and document storage to a near-paperless environment as spelled out in the AF/A 1 E-Records Strategy document. A key milestone in achieving an E-Record environment is conversion of current paper document repositories into a centralized digital repository. There are approximately 13 million pages of paper records that need to be scanned. Currently we are operating in option year three of a five year plan.

No matching funds are required for this Department of Defense project.

LASER PEENING FOR FRICTION STIR WELDED AEROSPACE STRUCTURES

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$2,000,000 for Laser Peening for Friction Stir Welded Aerospace Structures in the Department of the Air Force, RDT&E Account. The entity to receive funding for this project is Curtiss-Wright Metal Improvement Company at 1618 Ida, Wichita, Kansas 67211.

The program will demonstrate the benefits of laser peening on subscale components with

identical geometry of targeted DoD aircraft components, quantify anticipated improvement in performance, lifetime extension and cost reduction of full size DoD aircraft components, and demonstrate the technology for use with large wing structures to achieve substantial material and operational savings for the military.

Funding will support the following activities:

Engineering and Planning—\$90,000
 Test Article Design & Analysis—\$280,000
 Test Article Fabrication—\$310,000
 Test Article Welding—\$80,000
 Test Article Laser Peening—\$120,000
 Test Article Fatigue Testing—\$400,000
 Engineering Applications for Aircraft component Evaluation—\$270,000
 Analysis & Reporting—\$220,000
 Overhead & Administration—\$220,000

No matching funds are required for this Department of Defense project.

C-130 ACTIVE NOISE CANCELLATION SYSTEMS

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$3,000,000 for C-130 Active Noise Cancellation Systems in the Department of the Air Force, Aircraft Procurement Account. The entity to receive funding for this project is Global Aviation Technologies, located at 2629 W May, Wichita, Kansas 67213.

Justification of federal funding: ANCS is a program of record, and federal funds have been appropriated each year since the FY-06. The ANCS System is included in the Air National Guard FY-09 Weapons Systems Modernization Requirements desired capabilities list. The C-130 Active Noise Cancellation (ANC) is a commercial off-the-shelf (COTS) product that will reduce crew fatigue and associated hearing loss by greatly reducing the unhealthy noise levels in the C-130 cockpit. Over 700 ANC systems are in use throughout the world in commercial airline applications, and the system has been fully tailored for the C-130H with no additional non-recurring integration work required. The system has been proven highly reliable in commercial use and requires no scheduled maintenance. C-130 cockpit noise exceeds 100 decibels, a noise level at which it is difficult to communicate clearly, and which causes fatigue and loss of crew coordination. Additionally, this noise level is well above the permanent hearing loss threshold (established by OSHA at 85 decibels). The Ultra ANC system cancels noise by introducing equal amplitude/opposite phase sound into the cockpit via a distributed speaker system. A sophisticated control system samples the noise throughout the cockpit several times a second and drives the speaker outputs to provide maximum quieting. The anticipated installed price will be \$260K per C-130 aircraft.

No matching funds are required for the Department of Defense program.

AT-6B CAPABILITIES DEMONSTRATION FOR THE AIR NATIONAL GUARD

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$7,000,000 for AT-6B Capabilities Demonstration for the Air National Guard in the Air Force, RDT&E Account. The entity to receive funding for this project is Hawker Beechcraft Corporation at 9709 E Central Ave, Wichita, Kansas 67201.

The funding would be for the development of an AT-6B. The Air National Guard (ANG),

has stated a requirement to fill equipment capability gaps in support of the mission to conduct for Irregular Warfare operations, Joint Terminal Attack Controller (JTAC) Training, as well as Homeland Defense, Homeland Security, and Civil Support mission capabilities training that support DoD, DHS, and State mission requirements. The AT-6B is an affordable, sustainable and responsive aircraft tailored to the NetCentric intelligence, surveillance and reconnaissance (ISR) and light attack missions. The AT-6B meets the needs of top level US National Strategic Guidance, including recent Quadrennial Defense Review recommendations, at a fraction of the cost and a fraction of the infrastructure requirements of conventional jet fighters. The AT-6B offers the US Air Force and Air National Guard an asset tailored to increase airman-to-airman engagement with partner Air Forces vital to meeting US national security objectives. It is a cross-cutting enabler critical to expanding foreign partnerships and expanding partnership airpower capacity.

Estimated cost of the AT-6B capabilities flight demonstration is approximately \$21 million. Approximately \$14 million = Industry costs to build and provide a mission system equipped AT-6B demonstrator aircraft. Hawker Beechcraft will provide this portion of the total cost. The capital investment required to deliver an operational flight demonstration aircraft also leverages a significant corporate IR&D investment made to develop the AT-6B aircraft which is not included in the \$14 million industry contribution. In addition to the actual capital investment in building the aircraft, the contractor also intends to provide sensors and other mission equipment on loan to the Air Force in support of the demonstration, thereby further reducing government costs. Approximately \$7 million = Government costs to fund government-run flight test, including: government program management costs, range instrumentation costs, aircraft operating costs, Air Force directed mission equipment integration costs, and contractor engineering and support services in support of demonstration.

No matching funds are required for the Department of Defense program.

DEVELOPMENT OF IMPROVED LIGHTER-WEIGHT IED/EFP ARMOR SOLUTIONS

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$2,000,000 for Development of Improved Lighter-Weight IED/EFP Armor Solutions in the Department of the Army, RDT&E Account. The entity to receive funding for this project is Leading Technology Composites at 2626 West May, Wichita, KS 67213.

This funding is to develop and field Light-weight IED/EFP Armor Solutions for the US Military. These improved solutions will reduce weight, increase payload and maneuverability, and defeat the current battlefield threats. Innovative solutions to reduce current system weights result in increased payload, maneuverability.

Finance Plan:

Materials—40%
 Processing—10%
 Test and Analysis—30%
 STE—5%
 Labor—15%

No matching funds are required for the Department of Defense program.

ACCELERATED INSERTION OF ADVANCED MATERIALS

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$2,500,000 for Accelerated Insertion of Advanced Materials in the Department of the Air Force, RDT&E Account. The entity to receive funding for this project is Wichita State University at 1845 Fairmount St, Wichita 67260.

This program will provide a breakthrough in technology integration and will achieve significant cost and cycle-time reductions in new material insertion through (a) data-sharing among multiple users, (b) statistical continuity from one length-scale to another and (c) reduced testing via increased capability and use of numerical/analytical simulation tools. Anticipated benefits include reductions in non-recurring and recurring program qualification costs and introduction of multiple sources of new advanced material forms. Unlike structures that use metallic materials in the manufacturing process, the material properties of a composite are manufactured into the structure as part of the fabrication process. Therefore, it is essential to ensure that critical parameters pertaining to composite materials and their production processes are identified to facilitate adherence to standards in the final engineered part. Presently, each original equipment manufacturer (OEM) is responsible for this assurance, creating "customized", nonstandard procedures for quality and safety assurance.

DoD aircraft repair and modification efforts are extremely important because (a) difficulty in this area can lead to the rejection of a structural or material concept in the preliminary design phase, (b) they form a significant part of the total ownership cost and can drive fleet life-cycle decisions, (c) they provide opportunities to insert new material concepts quickly and at minimal cost, and (d) the type and level of engineering effort for repair/modification qualification in large military and commercial transport aerospace applications closely equates to that of full-design efforts. This program will seek to provide the DoD with a solution to this problem and eliminate the costly material insertion that exists for new programs or retrofitting materials used on legacy aircraft as well as enable United States aerospace leadership. This program is also supported by the aviation industry and composite material supplier industry and has over a 1:1 leverage factor.

Financial Plan:

Labor (salary and fringes)*—41%
 Travel*—2%
 Materials & supplies*—20%
 Laboratory testing—37%
 Equipment—0%

Percent and Sources of Matching Funds:

10%—State of Kansas; 60%—Aviation Industry; 60%—Composite Material Suppliers; 10%—FAA; 5%—NASA. No matching funds are required for the Department of Defense program.

AGING AIRCRAFT FLEET SUPPORT

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$2,000,000 for Aging Aircraft Fleet Support in the Department of the Navy, RDT&E Account. The entity to receive funding for this project is Wichita State University at 1845 Fairmount St, Wichita 67260.

Most of the aging research being conducted presently is focused on metallic structures. In addition to the ongoing research in aging metallic structures, the requested appropriation will permit NIAR to partner with the NAVY and investigate the effects of aging on composite structures as well as composite/metallic hybrid structures. As more composite components are being certified and used on primary and "flight critical" secondary structures, a future need of the military and commercial aviation industry will be the investigation of these composite structures and the assurance of the airworthiness of composite components. NIAR already has a background in this through partnerships with the FAA by investigating Boeing 737 composite tail structures which flew commercial service for over 20 years and by examining the first of all composite certified aircraft recently taken out of service, the Beechcraft Starship. Lessons learned from this research will provide insight into the aging aspects of other composite aircraft structures and influence the use of advanced materials on new aircraft being proposed for military service as well as maintenance of the existing fleet.

The biggest concerns with aging aircraft are the unknowns that emerge with little or no warning, raising the concern that an unexpected phenomenon may suddenly jeopardize an entire fleet's flight safety, mission readiness, or support costs. The DoD can benefit from the direct application of the research results into fleet management strategies as well as proactively provide strategies that will reduce the cost of maintenance for advanced materials used on military aircraft.

Financial Plan:

Labor (salary and fringes)*—32%
Travel*—2%
Materials & Supplies*—9%
Laboratory Testing—39%
Equipment—18%

Percent and Sources of Matching Funds: 25%—FAA; 10%—Aviation Industry. No matching funds are required for the Department of Defense program.

COMPOSITE SMALL MAIN ROTOR BLADE

The Department of Defense Appropriations Act, 2010, H.R. 3326, contains \$3,000,000 for development of a Composite Small Main Rotor Blade in the Department of the Army, RDT&E Account. The entity to receive funding for this project is Kaman Aerostructures at 1650 South McComas Street, Wichita, KS 67213.

It is my understanding that the funding would be used to continue development on the Composite Small Main Rotor Blade which would replace the legacy main rotor blade on the US Army's A/MH-6 Little Bird helicopter. The Little Bird, flown by the U.S. Army's 160th Special Operations Aviation Regiment, has been heavily modified to better meet operational needs; however, the main rotor blade, a critical dynamic component, has not been upgraded to modern standards. Constructed of metal, this blade is highly susceptible to damage and fatigue, and since metal lacks ballistic tolerance, the blades leave the aircraft especially vulnerable to enemy weapons in hostile action. Moreover, when gunners fire their weapons from the aircraft, expended shell casings can cause minor skin dents, and even

these small dents require that the blades be replaced. The Composite Small Main Rotor Blade takes advantage of the inherent ballistic tolerance of composite construction, advanced aerodynamic design, and state-of-the-art erosion-resistant materials and will significantly improve the safety, reliability, performance—and survivability—of the aircraft. Specifically, the blades will increase damage tolerance, enhancing survivability in hostile environments, and improve hover performance, increase operating ceiling, increase maximum forward speed, all adding to the aircraft's maneuverability and performance envelope. The composite blades will also improve erosion resistance, experience better field reparability, and reduce the cost and logistics burden related to premature metal blade replacement due to damage.

Funds are requested to fabricate production tooling, fabricate FAA certification blades, and conduct FAA certification ground and flight testing required to create Commercial-Off-The-Shelf acquisition capability for the military. Composite Small Main Rotor Blades will (1) make the A/MH-6 Little Bird helicopter more survivable in hostile environments; (2) expand the flight envelope of the aircraft; and (3) reduce logistics burden and cost associated with supporting the legacy blade.

No matching funds are required for the Department of Defense program.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DUNCAN. Madam Speaker, I submit the following.

Requesting Member: Congressman JOHN DUNCAN

Account: OP—Army

Project Amount: \$5,000,000

Legal Name of Requesting Entity: TN Army National Guard, Houston Barracks, 3041 Sidco Drive, Nashville, Tennessee 37204

Description of Request: The funding would be used to allow Army National Guard trainers (both fielded and yet-to-be procured) to network together on a Combined Arms virtual battlefield.

HONORING SCOTT JOSEPH BURGER UPON ATTAINING THE RANK OF EAGLE SCOUT

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISRAEL. Madam Speaker, I rise today to acknowledge a young man in my district, Scott Joseph Burger.

Scott will be celebrating his Eagle Court of Honor on August 2, 2009. For his community service project, he designed and facilitated the construction of two lecterns for Walt Whitman High School in Huntington Station, New York.

PAYING TRIBUTE TO MICHIGAN
STATE UNIVERSITY'S IMPACT
89FM RADIO STATION

HON. MIKE ROGERS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ROGERS of Michigan. Madam Speaker, I rise to honor the accomplishments of the students and staff of Michigan State University's WDBM "Impact 89" FM Radio Station on the occasion of the station being named the College Radio Station of the Year by the Michigan Association of Broadcasters and Broadcast Music Inc.

MSU's Impact 89 FM has received this prestigious honor nine of the past 10 years, making the station a standout among all the college radio stations in the entire Great Lakes region. The 2009 Gold Record Award was presented at the Great Lakes Broadcasting Conference in March.

Judging for the awards is by professional radio and television broadcasters in Michigan.

In addition to winning the overall college station of the year award, Impact staffers also earned first place in four of seven individual categories, including Jon Erickson for air check; Wes Holing for talk show; Nate Gray for promotional announcement; and the team of Jeremy Whiting and Brock Elsesser for the station activities report.

Other staffers receiving individual awards were Mike Weber, Doug Neal, Corrina Van Hamlin, John Simpkins, D'Destin Kaufmann, Lindsay Machak, Emily Fox, Brandon Jaksim, Autumn Maison, Dan Dugger, Jamal Spencer, Ed Glazer and Jesse McLean.

The Impact 89 team is led by Gary Reid, Distinguished Senior Specialist with the MSU Department of Telecommunication, Impact 89 FM General Manager, and Associate Director of the Quello Center for Management and Law, named after long-time FCC Commissioner, James H. Quello.

As someone who worked on the college radio station at my own alma mater, I have great respect for the professionalism and competitive spirit of the Impact 89 FM team and their manager and mentor, Gary Reid.

In 2009, Impact 89 FM is celebrating its 20th anniversary and the thousands of students who have worked there and gone on to successful careers throughout the country.

Impact 89FM has been a leader in creative, diverse programming and adoption of new technology. WDBM was the 132nd among nearly 14,000 radio stations in the country to be licensed by the FCC to make the transition to High Definition broadcasting in 2004.

Madam Speaker, I ask my colleagues to join me in honoring the students and staff of WDBM "Impact 89" FM for their dedication to excellence. They are truly deserving of our respect and admiration.

TAYLOR: THE LITTLE MIRACLE
BABY

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. POE of Texas. Madam Speaker, "Although the world is full of suffering, it is also full of the overcoming of it." Madam Speaker, Hellen Keller made this observation about life and today I'd like to share the inspiring story of Taylor Christine Hunt. A little baby who I like to call the Miracle Baby. Her story is a moving reminder that prayer, faith, hope, and love can and do overcome the challenges of life.

Born at 27 weeks and weighing just one and a half pounds little Baby Taylor beat the odds. Last fall my staffer, Nicole Hunt and her husband Jeff Hunt shared their excitement with me as they announced they were expecting their first baby at the end of May. In January of this year they found out they were having a girl. We all rejoiced at the news. However, on March 1, 2009, due to pregnancy complications, little Baby Taylor was born three and a half months premature.

Taylor was immediately admitted to the Neonatal Intensive Care Unit and placed on a ventilator to help her breathe. She remained on the ventilator for nearly a week as doctors kept a close watch on her. Nicknamed the "little spitfire" by doctors and nurses because of her sassy and stubborn attitude towards all of their poking and prodding, Taylor would not let anything keep her down.

Early on doctors detected an irregularity with her heart and took prompt medical action to correct it. Thankfully they were successful. In the first few months of her life doctors also discovered that Taylor had an eye disorder that primarily affects premature babies. Miraculously, it was there one day and gone the next. Today Taylor has perfect vision. Slowly, as Taylor's body matured, she learned to breathe on her own, take food, and maintain her body temperature.

While Jeff and Nicole sat by her bedside day and night, they also rallied a huge group of supporters to pray for Taylor. Taylor even had her own website called "Pray Taylor Home" and literally thousands of people all over this country and the world prayed for her recovery.

On June 2, 2009, after 94 days of hospitalization, hundreds of tests, dozens of specialists, 3 blood transfusions, and one ambulance ride, Taylor was finally well enough to go home.

Today Taylor has been home for about two months and is thriving. She is almost 8 pounds and is developing beautifully. It has been a pleasure to see this little Miracle Baby beat the odds and I am proud to share her story with this Chamber today.

Edith Wharton, a famous novelist, once wrote: "There are two ways of spreading light: to be the candle or the mirror that reflects it." Taylor is that candle—spreading hope and teaching all of us that we must never give up.

And that's just the way it is.

EARMARK DECLARATION

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARTON of Texas. Madam Speaker, I rise today to submit documentation consistent with the Republican Earmark Standards.

Requesting Member: Congressman JOE BARTON

Bill Number: H.R. 3326—Department of Defense Appropriations Bill

Account: Army RDT&E

Legal Name of Receiving Entity: Federal Technology Group

Address of Receiving Entity: 2421 Thomas Rd., Haltom City, TX 76117

Description of Request: I have secured \$1,500,000 in funding to be used to develop and produce an application called "reactive materials," which is a system designed to defeat Improvised Explosive Devices, thus protecting America's war fighter.

EARMARK DECLARATION

HON. DOC HASTINGS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. HASTINGS of Washington. Madam Speaker, to provide open disclosure, I am submitting the following information regarding projects that I support for inclusion in H.R. 3288, the Transportation, Housing and Urban Development Appropriations Act of 2010.

Amount: \$750,000

Account: Federal Highway Administration—Transportation and Community and System Preservation

Entity receiving funds: City of Pasco, located at 525 North Third Avenue, Pasco, WA 99301.

Description: These funds will be used to replace the Lewis Street railroad undercrossing with a four-lane overpass to improve the safety of motorists and pedestrians, while improving freight mobility and response times for emergency services.

Amount: \$500,000

Account: Federal Transit Administration—Buses and Bus Facilities

Entity receiving funds: Link Transit of 2700 Euclid Avenue, Wenatchee, WA 98801.

Description: Funds will be used to replace old buses and ensure that Link Transit can continue to provide current services.

HONORING THE CAREER OF REAR ADMIRAL LEENDERT R. HERING, SR., UNITED STATES NAVY

HON. DARRELL E. ISSA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISSA. Madam Speaker, I rise today to honor and pay tribute to an individual whose dedication and contributions to the United States Navy are exceptional.

Our country has been fortunate to have dynamic and dedicated leaders who willingly and unselfishly give their time and talent to keep this country free and safe. Rear Admiral Leendert "Len" Hering, Sr. is one such leader.

Radm. Hering was born in Portsmouth, Virginia and commissioned through the NROTC Scholarship Program from State University of New York Maritime College in 1977 with a Bachelor of Science degree in Meteorology and Oceanography. He has also earned a Master of Science degree in International Relations and Strategic Studies from the Naval War College, and a Master of Science degree in Business Management from Salve Regina University in Newport, Rhode Island.

Rear Admiral Hering's initial sea assignment was aboard USS *Santa Barbara* (AE 28), where he served as 1st and 2nd Division Officer and Assistant First Lieutenant. Upon completion of Department Head School in 1980 he was assigned to the commissioning crew of USS *Fahrión* (FFG 22) as Ship's Control Officer and later as Combat Systems Officer. He had command of USS *Aries* (PHM 5) from January 1989 to January 1991 and USS *Doyle* (FFG 39) from July 1995 to March 1997. *Doyle* was a member of the Vinson Battle Group in Desert Strike; the ship earned the Battle "E," all possible departmental awards, the 1996 Chief of Naval Operations LAMPS Safety Award, and two TYCOM Safety Awards.

His assignments ashore include duty as operations and plans officer to Commander, Destroyer Squadron TWELVE; aide and administrative assistant to the Deputy Chief of Naval Operations for Naval Warfare; Action Officer, Pacific Command Branch J-33, Joint Operations Directorate, Joint Staff; 1st Battalion Officer and Ethics Instructor, U.S. Naval Academy, Annapolis, Maryland; Commanding Officer of Naval Base San Diego; Commander, Naval Surface Group Pacific Northwest; Commander, Navy Region Northwest, and presently Commander, Navy Region Southwest.

Rear Admiral Hering's personal awards include (2) Legion of Merit, Defense Meritorious Service Medal, (4) Meritorious Service Medals, and various other personal achievement, service awards and ribbons.

He and his wife Sharon have three boys. STS1 Lee Hering, USN, Tim, and Christopher.

On the occasion of his retirement and on behalf of the people of the United States whom he has served with courage and honor, we commemorate the service of Rear Admiral Leendert R. Hering.

RECOGNIZING ROSE ANN GALLETTA CORIGLIANO UPON HER 80TH BIRTHDAY

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. HIGGINS. Madam Speaker, I stand here today to recognize the life of Rose Ann Galletta Corigliano as she prepares to celebrate her 80th birthday on August 8, 2009.

Rose, born on Hickory Street in Buffalo, currently lives with her husband James in Amherst, New York and the pair has a long history of being active members of the Western New York community.

In 1963, Rose and James founded Rosina Food Products, a small sausage business James named after his wife, which serviced small meat markets, supermarkets and restaurants in the local Buffalo area.

With Rose's family meatball recipe, Rosina Foods flourished. Within a short time, Rosina Foods saw immense success, moving towards selling their products nationally.

Today, Rose and James have handed the family business down to their sons, Russell and Frank, who now serve as President and Executive Vice President. Russell and Frank have made some major acquisitions, including that of two labels which allows Rosina's to sell many frozen pasta items throughout the United States.

Rose still serves as the inspiration behind the enormously successful and ever growing Rosina Food Products, Inc. and the company regularly gives back to local organizations in the community.

I would like to congratulate Rose for reaching this important milestone. It is my pleasure to recognize Rose's many contributions to her family, friends and community. I wish Rose many more years of continued success and happiness.

EARMARK DECLARATION

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. GRAVES. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010:

Congressman SAM GRAVES (MO-6)

Department of Defense, Air Force, Operations and Maintenance ANG—\$465,000 for the 139th Airlift Wing, ANG for force protection and training equipment (705 Memorial Drive, St. Joseph, MO 64503-3388)

Federal funds will be used to purchase explosive/hazardous materials SABRE 4000 detection devices, procure training equipment, including UHF and Automated Access System, and reinforce defensive infrastructure. These funds will increase the 139th AW's capability for future missions, enhance effectiveness of current missions, and improve efficiency.

Congressman SAM GRAVES (MO-6)

Department of Defense, Army, Procurement of Ammunition—\$5,000,000 for the Lake City Army Ammunition Plan for small caliber ammunition production modernization (PO Box 1000, Independence, MO 64501)

Federal funds will be used for ammunition production and ballistic test range upgrades. Due to increased regulations by the EPA and DoD prohibiting the use of heavy metals in ammunition production and use, the DoD has undertaken an initiative to eliminate heavy metal compounds from priming mixtures as

soon as an acceptable product is available. The federal funding obtained will be used to determine if the industry efforts made to find a new potential heavy metal free compounds can be applied to military requirements. This will reduce hazards to personnel engaged in small arms training and operation, enable DoD to utilize ranges that might otherwise not be available due to federal and local restrictions on heavy metal content in training ammunition, and supports training and readiness requirements.

EARMARK DECLARATION

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY—

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SMITH of New Jersey. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 2996: Making Appropriations for Interior and Environment for Fiscal Year 2010.

Requesting Member: Rep. CHRISTOPHER H. SMITH

Bill Number: H.R. 2996

Account: Save America's Treasures

Legal Name of Requesting Entity: Georgian Court University—

Address of Requesting Entity: Georgian Court University, 900 Lakewood Avenue, Lakewood, NJ 08701

Description of Request: The \$200,000 in funding would be used to help preserve the Mansion at Georgian Court University, a building on both the State and National Registers of Historic Places. The building is used by over 23,000 New Jersey residents each year while attending various programs offered through the University's Department of Conferences and Special Events.

EARMARK DECLARATION

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SAM JOHNSON of Texas. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I, Sam Johnson, am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act of 2010.

(1) The entity to receive funding is Microfab Technologies, Inc., 1104 Summit Ave., #110, Plano, Texas 75094.

This \$1M request is funded through the Army RDT&E, Medical and Technology account. MicroFab Technologies Inc., located in Plano, is working to develop a portable bioprinter/skin printing system to repair life threatening battlefield burn injuries with biologic skin. This will allow military medical personnel to promptly respond and manage burn injuries on site using a printable allograft, a graft using cells from a variety of individuals.

(2) The entity to receive funding is L-3, 3414 Herman Drive, Garland, Texas 75041.

This \$3.8M request is funded through the Navy (Marine Corps), Marine Corps Ground Combat/Supporting Arms Systems account. Garland's L-3 Electro-Optical Systems Division employs 336 people at the Garland facility and 202 at the Dallas site. Currently, it is not possible for a Marine to use Night Vision Devices (NVDs) and Thermal Weapon Sights (TWSs) at the same time. This causes a decrease in awareness and puts the Marine at greater risk. Through research, the industry has developed technology to fuse the two systems, enabling a Marine to see a night scene and thermal imagery, targeting lasers and targeting information all through the helmet-mounted NVD. The RASOR program is developing a kit to retrofit the existing NVD that will enable the user to receive the imagery and targeting data from the thermal weapon sight.

(3) The entity to receive funding is Mustang Technology, 400 W. Bethany Dr., Ste 110, Allen, Texas 75013.

This \$1M request is funded through the Navy RDT&E, Power Projection Advanced Technology account. Mustang Technology Group, of Allen, aims to improve the radar system for the Navy. The Navy lacks an all-weather airborne unmanned air vehicle (UAV) surveillance capability to detect and track high value targets that move, stop for a while, and then move again (Move Stop Move: MSM). Not having this capability allows terrorists that stop and plant mines and IEDs along the shoreline to evade surveillance. The MTI Scout radar hardware is designed to support MSM but requires additional work to develop, integrate, and test the MSM mode software. The light weight and low power of the MTI Scout radar make it ideal for many other airborne manned and unmanned surveillance platforms, like the Predator, Fire Scout, and MC-12W.

(4) The entity to receive funding is Raytheon, 2501 West University Drive, McKinney, TX 75071-2813.

This \$2M request is funded through the Army RDT&E, Combat Vehicle Improvement Programs account. Raytheon's Active Protection System division employs approximately 35 people full time in McKinney. APS is an externally mounted vehicle protection system that identifies, discriminates and intercepts rocket propelled grenades (RPGs), mortars, antitank guided missiles and artillery projectiles after they are launched toward a combat vehicle. It provides 360 degree surveillance and protection against multiple simultaneous threats. This funding will allow insertion of reduced cost electronics and modifications to the radar for Stryker integration, as well as software and hardware development for system command and control, including the human-machine interface.

(5) The entity to receive funding is SVTronics, 3465 Technology Drive, Plano, Texas 75074.

This \$3.4M request is funded through the Navy RDT&E, Medical Development account. SVTronics in Plano employs 120 people. The U.S. Marine Corps has been developing a lightweight, self-contained, Mobile, Oxygen, Ventilation, and External Suction (MOVES) system in support of the En Route Care System. The MOVES system uses ambient air to

produce oxygen and then delivers the oxygen directly to the casualty. It has a ventilator that can ventilate a patient with up to 85% oxygen, and it also has suction capability. In addition, the MOVES system can monitor vital signs including blood pressure, heart rate, pulse oximetry, temperature, oxygen and carbon dioxide levels, and ECG. All of these capabilities are integrated in a single system that can run on its own power and easily connect to a patient litter for transport. MOVES reduces the cube and weight of the present En Route Care System by over 60%, and eliminates the hazards associated with pressurized oxygen cylinders in the field.

EARMARK DECLARATION

HON. JOHN FLEMING

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. FLEMING. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the "Department of Defense Appropriations Act, 2010." I have requested funding for the following projects in Fiscal Year 2010:

Nuclear Enterprise Surety Tracking, Account: RDTE, AF. Recipient: United States Air Force, Global Strike Command (Barksdale AFB, Louisiana). In support of AFGSC at Barksdale AFB, funds would support the Air Force's efforts to reinvigorate the Nuclear Surety Mission by combining a suite of technologies and applications on a bio-metrically secure handheld computing device to enable the real-time tracking of nuclear warheads and nuclear bombs across all USAF installations.

Reconstitution of B-52 Nuclear Capability Study, Account: RDTE, AF. Recipient: United States Air Force, Global Strike Command (Barksdale AFB, Louisiana). In support of the 2nd Bomb Wing and Headquarters, Eighth Air Force at Barksdale AFB, FY10 funds would provide for a comprehensive study of nuclear vulnerabilities to assure the B-52 bomber can meet its nuclear mission. Project will support the USAF/Global Strike Command mission to reinvigorate the Air Force nuclear enterprise. The goal is to produce a prioritized list of recommendations that will enhance the B-52 fleet's capability to execute its nuclear role in support of USSTRATCOM commitments.

Consistent with the Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge, this request: 1) is not directed to an entity or program that will be named after a sitting Member of Congress, 2) is not intended to be used by an entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark, and 3) meets or exceeds all statutory requirements for matching funds where applicable. I also hereby certify that neither I nor my spouse has any financial interest in this project.

EARMARK DECLARATION

HON. LEONARD LANCE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LANCE. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, The FY 2010 Department of Defense Appropriations Act:

Agency: Army
Account: RDT&E
Amount: \$3,150,000
Project: Conversion of Municipal Solid Waste to Renewable Diesel Fuel
Recipient: Covanta Energy 40 Lane Rd, Fairfield, NJ 07004

The purpose of this program is to convert military solid waste to diesel, resulting in >10% savings and stabilize the long-term cost of fuel. This conversion will also enable the military to exercise unprecedented control over raw material (waste feedstock) generation and supply.

Agency: Army
Account: RDT&E
Amount: \$2,000,000
Project: Dermal Matrix Research
Recipient: LifeCell Corporation, One Millennium Way, Branchburg, NJ 08876

The purpose of this program is to continue development of an off-the-shelf transplantable graft from porcine tissue for combat casualties with full-thickness burns and other skin and dermal deficits prior to their evacuation from the theater of operation.

Agency: Army
Account: RDT&E
Amount: \$2,000,000
Project: Printed and Conformal Electronics for Military Applications
Recipient: FlexTech Alliance, 84 W. Santa Clara St., Suite 630 San Jose, CA 95113

The funding would be used to develop and manage a supply chain and prototype development program for printed and conformal electronics.

Agency: Army
Account: RDT&E
Amount: \$2,500,000
Project: Standard Ground Station—Enhancement Program

Recipient: Sarnoff Corporation, 201 Washington Road, Princeton, NJ 08540-6449

The purpose of this program is to allow the Standard Ground Station (SGS) to be used in other locations outside of Iraq by developing methodologies that can be applied to, and deployed in, multiple terrains and topographies—coastal, mountainous, forested—to extend the SGS's geographic primacy and protect Joint Warfighters as they prosecute the global war on terror.

Agency: Army
Account: RDT&E
Amount: \$1,000,000
Project: Tactical Metal Fabrication (TacFab)
Recipient: SeaBox, Inc., 450 Black Horse Lane, No. Brunswick, NJ 08902

The purpose of this program is to provide a containerized, mobile foundry to the U.S. Army, allowing deployed forces to produce

spare and replacement parts in the field. This cuts the order time from weeks or months to 24 hours.

Agency: Air Force
Account: RDT&E
Amount: \$3,000,000
Project: Planar Lightwave Circuit Development for High Power Military Laser Application
Recipient: LGS Innovations, 15 Vreeland Road, Florham Park, NJ 07932

The purpose of this program is to meet the High-Energy Laser Joint Technology Office (HEL-JTO) need for revolutionary high power, high efficiency, electrically-driven laser technology that can be turned into a ruggedized system for use by all branches of the military.

Agency: Defense-wide
Account: RDT&E
Amount: \$2,000,000
Project: Secure, Miniaturized, Hybrid, Free Space, Optical Communications
Recipient: LGS Innovations, 15 Vreeland Road, Florham Park, NJ 07932

The purpose of this program is to provide a fully operational secure, miniaturized, RF optics hybrid wireless communications system meeting the specific volume, weight, and power constraints required for secure, covert defense-related communication applications for the Department of Defense.

EARMARK DECLARATION

HON. DOC HASTINGS

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. HASTINGS of Washington. Madam Speaker, to provide open disclosure, I am submitting the following information regarding projects that I support for inclusion in H.R. 3326 the Department of Defense Appropriations Act, 2010.

Amount: \$3 million
Account: Army Research, Development, Test and Evaluation

Entity receiving funds: Army and General Dynamics located at 9256 Randolph Road NE, Moses Lake, WA 98837.

Description: The U.S. military has stated that it needs a compact, low-cost accuracy kit to place on existing mortar and rockets. This funding will be used to develop this technology for the U.S. military.

Amount: \$1.5 million
Account: Army National Guard, Operations and Maintenance

Entity receiving funds: Army National Guard and the HAMMER facility, located at 2890 Horn Rapids Road, Richland, WA 99354.

Description: These funds will be used to ensure that Army National Guard units receive the training needed to respond to weapons of mass destruction attack.

Amount: \$1 million
Account: Army Research, Development, Test and Evaluation

Entity receiving funds: Army and Infinia, located at 6811 West Okanogan Place, Kennewick, WA 99336.

Description: These funds will be used to provide the Army with a small, efficient, reliable way to equip American troops with both electricity and hot water.

Amount: \$2 million
Account: Research, Development, Test and Evaluation Defense Wide

Entity receiving funds: Battelle Northwest located at 902 Battelle Boulevard, Richland, WA 99352 and Heritage University located at 3240 Fort Road, Toppenish, WA 98948.

Description: These funds will be used to provide a security protected collection of technical reports, scientific studies, and reference documents on chemical and biological warfare available to the U.S. intelligence community. This supports the intelligence community's mission to make all relevant documents available to intelligence analysts.

EARMARK DECLARATION

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. GERLACH. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326 the Department of Defense Appropriations Act, 2010.

Analytical Graphics, Inc. (AGI) COTS Technology for Space Command and Control, Exton, PA—\$2 million to refine existing COTS technologies to make them completely applicable for space command and control programs. The funds will enable development and demonstrations of various COTS technologies for integrated space command and control.

Arkema, King of Prussia PA—\$2 million to develop lightweight, breathable clothing resistant to chemical and biological agents.

Bally Ribbon Mills, Bally PA—\$3 million to develop a technology and machine to produce 3D bias woven composite structures for aerospace applications.

Cerus Corporation, Bala Cynwd, PA—\$3 million requested for blood safety and decontamination technology development.

Morphotek, Exton PA—\$1 million for potent human monoclonal antibodies against BoNT A, B and E suited for mass production and treatment of large populations.

Rajant, Malvern PA—\$3 million for portable mobile emergency broadband systems.

EARMARK DECLARATION

HON. TED POE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. POE of Texas. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Act, 2010:

Requesting Member: Congressman TED POE

Bill Number: H.R. 3326, the Department of Defense Appropriations Act, 2010

Account: RDTE, A

Legal Name of Requesting Entity: Lamar University

Address of Requesting Entity: 4400 MLK Boulevard, P.O. Box 10119, Beaumont, TX 77710

Description of Request: I have secured \$4,000,000 in funding for Lamar University's Advanced Fuel Cell project to continue to develop an efficient and clean advanced renewable energy source to meet urgent U.S. Army space and missile defense battlefield requirements. The Advanced Fuel Cell project continues to develop, test and validate advanced fuel cell technologies necessary to enable lightweight, power efficient, environmentally clean, and cost-effective renewable energy technology and products for Army space and missile defense systems including: sensors, radars, weapons, and communications. Project could also be used in border, port, and chemical facility surveillance.

EARMARK DECLARATION

HON. BOB INGLIS

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. INGLIS. Madam Speaker, pursuant to the Republican leadership standards on earmarks, I am submitting the following information regarding an earmark I received as part of H.R. 3326, Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman BOB INGLIS

Bill Number: H.R. 3326, Department of Defense Appropriations Act, 2010

Account: 17 DARPA 0602715E Materials and Biological Technology

Legal Name of Requesting Entity: Milliken and Company

Address of Requesting Entity: 920 Milliken Road, Spartanburg, South Carolina 29304

Description of Request: This project continues work that began in July 2007 under Army Research Laboratory (ARL) Cooperative Agreement #W911NF-07-2-0074. An annual program plan was mutually developed for three years with the Cooperative Agreement Manager at the onset of the award. The scope of the effort will be to leverage the past work to fabricate a full-scale molded part that is suitable for use on an existing tactical vehicle platform. Milliken will work with ARL and a designated U.S. DOD prime vehicle contractor to select, fabricate and test the specific component, such as a hood, quarter panel or underbody hull component. The amount is \$2,800,000 and it would go to Milliken and Company.

EARMARK DECLARATION

HON. TIMOTHY V. JOHNSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. JOHNSON of Illinois. Madam Speaker, pursuant to the Republican Leadership standards on project funding, I am submitting the following information regarding project funding I requested as part of Fiscal Year 2010 Defense Appropriations bill—H.R. 3326:

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 3326—Fiscal Year 2010
Defense Appropriations bill

Account: Research, Development, Test and Evaluation—Navy

Legal Name of Requesting Entity: University of Illinois

Address of Requesting Entity: College of Engineering, University of Illinois at Urbana-Champaign, 1308 West Main Street, Urbana, Illinois 61801

Description of Request: \$1,500,000 for the University of Illinois to establish the Center for Assured Critical Application and Infrastructure Security (CACAIS) which will address the development of trust validation tools for critical computer infrastructures of particular importance to the nation, namely defense applications, financial systems, and electrical power, to ensure public confidence in these systems. It is my understanding that of this amount \$1,000,000 is for equipment, facilities, and laboratory costs; \$375,000 for personnel; \$75,000 for technology transfer; and \$50,000 for computer costs.

Requesting Member: TIMOTHY V. JOHNSON
Bill Number: H.R. 3326—Fiscal Year 2010
Defense Appropriations bill

Account: Research, Development, Test and Evaluation—Army

Legal Name of Requesting Entity: U.S. Army Engineer Research and Development Center, Construction Engineering Research Laboratory—

Address of Requesting Entity: 2902 Newmark Drive, Champaign, Illinois 61826

Description of Request: \$2,500,000 for the U.S. Army Engineer Research and Development Center, Construction Engineering Research Laboratory to field validate large-scale Zinc-Flow electrical energy storage to improve the energy security, fossil-fuel consumption and carbon-footprint of our military bases. It is my understanding that of this amount \$950,000 is for energy storage systems; \$400,000 is for equipment, installation, test, and data acquisition; \$975,000 for personnel; \$175,000 for administration.

EARMARK DECLARATION

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday July 30, 2009

Mr. COBLE. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I am requesting as part of H.R. 3326, the Defense Appropriations Act of 2010.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Army RDTE Ballistics Technology account (PE 0602618A)

Legal Name of Requesting Entity: PPG Industries

Address of Requesting Entity: P.O. Box 949, Lexington, NC 27293

Description of Request: The bill provides \$2,000,000 for Advanced Composite Armor for Force Protection at PPG Industries (PPG).

PPG recently discovered new resin and fiberglass technologies that can provide both performance improvements and weight savings in composite solutions for ballistic protection. Advanced composite materials will be developed and tailored to defeat evolving ballistic and Improvised Explosive Devices (IED) fragmentation threats. The research program will develop both non-transparent and transparent solutions. As PPG has begun initial research on this project, a variety of composite designs have demonstrated success in laboratory testing. Solutions will utilize new high strength glass fibers and will resist a wide range of threats, including ballistic, blast and IED. Further, the project directly supports research objectives at PPG facilities in Lexington, North Carolina, to develop composite ballistic panel solutions designed to meet specific identified threat levels. As threats continue to evolve, advanced soldier and asset protective material technologies are crucial to the U.S. Army. Technologies such as PPG's fiberglass composite research are of national interest as we seek better protection for our soldiers in the field today and look ahead to our defense needs to come.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Air Force RDTE Basic Research Materials account (PE 0602102F)

Legal Name of Requesting Entity: RF Micro Devices

Address of Requesting Entity: 7628 Thorndike Road, Greensboro, NC 27409

Description of Request: The bill provides \$2,000,000 for the Gallium Nitride Microelectronics and Materials project at RF Micro Devices. Gallium Nitride-based microelectronics is the next generation of semiconductor technology. It is of critical importance to the development of many advanced defense systems, in particular radar, communications and electronic warfare systems. This technology also has the potential to open up entirely new areas of commercial wireless infrastructure applications. This Navy research project focuses on the development of advanced GaN RF power devices with enhanced performance and reliability. Building on prior research and development, this request will enable the RFMD Defense and Power Business Unit to accelerate development and adoption of RFMD GaN technology. The Defense and Power Business Unit was created specifically to tailor RFMD technology to serve the needs of the defense community.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Air Force RDTE Advanced Materials for Weapons Systems account (PE 0603112F)

Legal Name of Requesting Entity: Timken Company

Address of Requesting Entity: GNE-01, 1835 Dueber Avenue, S.W., P.O. Box 6928, Canton, Ohio 44706

Description of Request: The bill provides \$1,000,000 for the Hybrid Bearing project at Timken Company. Standard aerospace bearings are not adequate for the demands of the Joint Strike Fighter engine, or many other engines. As a result, the Air Force has been

working with industry to develop an improved bearing that is tough, corrosion resistant and can tolerate the high speeds and temperatures of the expanding mission requirements. This project will test various corrosion resistant steel, including CSS-42L, for use in the bearing, as well as the introduction of new ball and retainer materials in the final bearing design (such as silicon nitride balls, and a lightweight carbon-carbon composite material for the retainer material). The hybrid bearing technology, which includes a variety of material and coating technologies, is being incorporated into the Joint Strike Fighter engine, and other platforms.

The Air Force has been working on this project since 2003 with the Timken Company. From prior year funding, 80% of the technology requirements set forth by the Air Force to bring the project to the point of final testing/ placement into weapon platforms has been completed, including full engine tests. If fully funded, the project should be completed in calendar 2010.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Navy RDTE Integrated Surveillance Systems account (PE 0204311N)

Legal Name of Requesting Entity: General Dynamics Advanced Information Systems—Greensboro

Address of Requesting Entity: 5440 Millstream Road, McLeansville, NC 27301

Description of Request: The bill provides \$2,000,000 for the Autonomous Anti-Submarine Warfare Vertical Beam Array Sonar project at General Dynamics. The Autonomous Anti-Submarine Vertical Beam Array (VBA) is a stationary, acoustic array system that helps protect surface ships and submarines against submarine-launched torpedoes and anti-ship cruise missiles by detecting and reporting quiet diesel and nuclear powered submarines. The VBA Sonar is deployable from Trident guided missile submarines (SSGN), the Littoral Combat Ship (LCS) and other surface ships. The VBA Sonar can be used to protect an established Sea Base or Global Fleet Station in deep water or in the littorals. Once positioned, it transmits submarine contact information back to the deploying platform's combat system for classification, localization, tracking and engagement.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Navy Research, Development, Test and Evaluation (RDTE) RF Systems Applied Research account (PE 0602271N)

Legal Name of Requesting Entity: RF Micro Devices

Address of Requesting Entity: 7628 Thorndike Road, Greensboro, NC 27409

Description of Request: The bill provides \$2,000,000 for the Gallium Nitride (GaN) Power Technology project at RF Micro Devices. Gallium Nitride-based microelectronics is the next generation of semiconductor technology. It is of critical importance to the development of many advanced defense systems, in particular radar, communications and electronic warfare systems. This technology also has the potential to open up entirely new

areas of commercial wireless infrastructure applications. This Navy research project focuses on the development of advanced GaN RF power devices with enhanced performance and reliability. Building on the prior work on the project, this request addresses the challenges in using this key technology to implement solutions for the Navy's advanced RF systems needs.

RFMD Defense and Power Business Unit will be the recipient of the funding and use the funds to accelerate development and adoption of RFMD GaN technology. The Defense and Power Business Unit was created specifically to tailor RFMD technology to serve the needs of the defense community. The project will be led from the lead design and fabrication facility in North Carolina.

Requesting Member: Congressman HOWARD COBLE

Bill Number: H.R. 3326

Account: Marine Corps Operations and Maintenance Operational Forces account (1A1A)

Legal Name of Requesting Entity: Saab Barracuda USA, LLC

Address of Requesting Entity: 608 East McNeill Street, Lillington, NC 27546

Description of Request: The bill provides \$3,500,000 for the Ultra Lightweight Camouflage Net System (ULCANS) at Saab Barracuda USA, LLC. ULCANS is the next generation camouflage system. ULCANS increases survivability against advanced multi-spectral visual, infrared (IR), and radar (RF) threats, providing reduced probability of visual detection, enhanced thermal and radar signature suppression, and improved background matching. ULCANS "Marine friendly" features include a more durable and snag-resistance design. The funding requested would provide ULCANS for one Marine Expeditionary Force.

The ULCANS will greatly enhance the ability for combat troops and support units to conceal military target signatures of weapons, vehicles and semi-permanent positions in situations where the natural cover or concealment may be absent or inadequate. ULCANS can also be used as an aid in the concealment of permanent prominent objects in a fixed pattern or array, which present obvious targets. The United States Marine Corps has an Unfunded Requirement (UFR) for ULCANS. Saab Barracuda, LLC, in Lillington, North Carolina, is the industry leader in development, testing and production of multi-spectral camouflage and heat-reducing systems. The company produces 3,500-plus ULCANS systems per month. A supplier in my district, Glen Raven, provides manufacturing support for this product.

EARMARK DECLARATION

HON. JOHN R. CARTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CARTER. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the Department of Defense Appropriations Act for Fiscal Year 2010.

Project Name: Fort Hood Training Lands Restoration and Maintenance

Account: Operation and Maintenance, Army Project Recipient and Address: Fort Hood, TX U.S. Army Garrison, Fort Hood, Bldg. 1001, Rm W321, Fort Hood, TX 75544

Amount Provided: \$2,500,000

Project Description: Dedicated resources are needed to rehabilitate Fort Hood lands degraded by over 60 years of training with tanks and other military vehicles. Substantial rehabilitation can be achieved over the next five years with an integrated program that reduces soil erosion and compaction, increases desirable vegetation, supports woody vegetation management, and provides appropriate tank trails, stream-crossings, and hilltop access points for tactical vehicles. Texas AgriLife Research will work with Fort Hood Integrated Training Area Management (ITAM) and other collaborators to plan, implement, execute, and verify the effectiveness of these rehabilitation efforts.

Benefit to Taxpayers: The project improves training land for Fort Hood soldiers using research proven reclamation practices. The practices installed through the project have saved both time and money, while achieving training area restoration. The local economy also benefited as local contractors were employed for soil ripping, gully plug construction, and other work.

Spending Plan: \$700,000 is for brush clearing and endangered species maintenance programs. Of the remainder, approximately 90% goes to Fort Hood-ITAM programs for implementation of training lands restoration validated practices and 10% goes to Texas AgriLife Research for assessment of these programs and development of new practices.

Project Name: Techniques to Manage Non-compressible Hemorrhage Following Combat Injury

Account: RDT&E Army

Project Recipient and Address: National Trauma Institute, 16500 San Pedro Avenue, Suite 350, San Antonio, TX 78232

Amount Provided: \$2,500,000

Project Description: Traumatic injury is a nationwide problem with severe consequences for our military and civilians. Noncompressible hemorrhage from injuries to the torso is the leading cause of potentially survivable deaths of American troops and its mitigation is the highest priority of U.S. military trauma surgeons and researchers. NTI's goal is to develop simple, rapid and field-expedient techniques for non-surgeons to stop truncal hemorrhage. To secure advances in this field will require additional federal funding. Currently, trauma research is significantly underfunded compared to illnesses which do not cause nearly the same level of mortality as trauma.

Benefit to Taxpayers: Increasing trauma research is likely to lead to the reduction of mortality and complications from noncompressible hemorrhage and improve outcomes. This will affect soldiers as well as civilians from the 31st and every congressional district.

Spending Plan: Personnel, 54%; Materials & Supplies, 8.4%; Equipment, 4.2%; Patient Care Costs, 16.8%; Administrative Costs, 16.2%.

Project Name: Army National Guard M939A2 Repower Program

Account: O&M Army National Guard

Project Recipient and Address: Osh Kosh Corporation, 1300 N. 17th St., Suite 1040, Arlington, VA 22209

Amount Provided: \$5,000,000

Project Description: Army National Guard M939A2 Repower Program. Due to the age of the M939 vehicle fleet, a lack of a support program for major sub-assemblies, and parts obsolescence, the M939A2 Repower program is a critical program to maintain the M939 series 5-ton trucks the U.S. Army will have in its inventory until 2035.

Benefit to Taxpayers: The M939 series vehicles are fielded in all 54 states and territories and are used extensively in Homeland Security, disaster relief, emergency response, and training missions. This program benefits central Texas (Killeen/Ft. Hood area) from a work force and supplier perspective. Approximately 48 production employees and support staff are involved in the M939A2 Series 5-ton Repower Program in Killeen, TX.

Spending Plan: \$5 million to install vehicle repower kits for aging Army National Guard M939 Series 5-ton trucks utilized in homeland defense and national security missions. Approximately 90 percent of funding is for material, including engine, transmission, cooling package, electronics, and other vehicle components, with the remaining 10 percent for manufacturing labor.

Project Name: High Volume Manufacturing for Thin-film Lithium Stack Battery Technologies

Account: RDT&E Army

Project Recipient and Address: Applied Materials, 1300 N. 17th St., Suite 1040, Arlington, VA 22209

Amount Provided: \$1,000,000

Project Description: The war fighter is reliant on dependable power for electronics and weapons to assure superiority in battle. The power sources must have energy available to power the electronics and weapons and be small, light and affordable. Applied Materials will develop cost effective domestic mfg. systems for next generation thin-film lithium batteries that provide a solution to these challenges that meet current and projected future DOD requirements for high power, lightweight, small size and low-cost. Successful development of the proposed mfg. systems will address the DoD power source technology requirements such as energy and power density, life cycle, shelf life, discharge and charge rates, form factor, safety and cost for the needed military applications such as sensors, fuses and man wearable soldier battery devices.

Benefit to Taxpayers: This project establishes in the U.S. innovative manufacturing technologies for a strategically important military and commercial field—thin-film energy storage technology. It will strengthen the competitive edge of Applied Materials and enable U.S. based companies to provide high-tech next generation domestic sources of thin film lithium batteries for military and commercial applications.

Spending Plan: The total project cost is \$30.5 million of which Applied Materials has requested \$3.0 million from Congress. Applied Materials will match the federal contribution dollar for dollar: Personnel Salaries/Wages,

\$12,777,500; Travel, \$660,000; Equipment, \$14,165,667; Materials/Supplies, \$2,904,000; Others (Shipping), \$24,000; Total Direct Costs, \$30,531,167.

Project Name: HTS Trap Field Magnet Motor

Account: RDT&E Navy

Project Recipient and Address: Teco Westinghouse Motor Company, 5100 North IH 35, Round Rock, TX 78681

Amount Provided: \$1,000,000

Project Description: The megawatt power on Navy future ships is estimated to be six times greater than that of existing surface combatants. The emergence of superconductor motors have the potential to make propulsion packages smaller, more powerful, more energy efficient, and quieter than their standard counterparts. The cost of superconductor motors, however, must be reduced if they are to be affordable for Navy ship applications. This development effort is for the purpose of demonstrating that bulk high temperature trapped field magnets can be used rather than wire to reduce the cost of superconducting motors by one-third, produce twice the power, and increase safety of the crew and ship by being able to turn the magnets off during fault conditions.

Benefit to Taxpayers: Will help sustain the 391 jobs at TECO-Westinghouse in Round Rock and create 4 new jobs. Once the program moves from development to production phase, it would have direct impact on 40 to 50 jobs. The benefit to the U.S. Navy is that it would have a powerful, affordable, reliable, and safe motor to support advanced weapon systems and radars on future ships in meeting the Navy's requirements stated in its Next Generation Integrated Power System Roadmap.

Spending Plan: If fully funded, the \$6 million requested in FY10 combined with the \$2 million appropriated in FY09 is expected to complete the development effort. The breakout is as follows: \$920,000 for program management and support; \$3,500,000 for engineering labor; \$290,000 for manufacturing labor; \$1,290,000 for testing.

TRIBUTE TO KELSEY DENNIS

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LATHAM. Madam Speaker, I rise today to recognize and congratulate Kelsey Dennis, a student at Ames Middle School in Ames, Iowa, on being selected as a winner of the Library of Congress's 2009 Letters About Literature Competition.

The Letters About Literature Competition is a reading and writing program sponsored by the Library's Center for the Book in partnership with Target Stores and in cooperation with affiliate state Centers for the Book located across the country. Kelsey's letter was one of approximately 55,000 entries nationwide selected from students in grades four through twelve. Her letter was written to Jerry Spinelli, the author of *Stargirl*.

I consider it a great honor to represent Kelsey Dennis and her family in the United

States Congress, and I know that my colleagues join me in congratulating her. I wish Kelsey continued success in her future education and career.

EARMARK DECLARATION

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ROGERS of Kentucky. Madam Speaker, pursuant to the House Republican standards on congressionally-directed funding, I am submitting the following information regarding funding included in H.R. 3326—Department of Defense Appropriations Act, 2010

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: OM, A

Legal Name of Requesting Entity: Outdoor Venture Corporation

Address of Requesting Entity: 2280 S. Highway 1651, Stearns, KY 42647

Description of Request: The funding of \$6 million will be used to address U.S. Army modular command post tent needs.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: OM, A

Legal Name of Requesting Entity: Outdoor Venture Corporation

Address of Requesting Entity: 2280 S. Highway 1651, Stearns, KY 42647

Description of Request: The funding of \$3 million will be used to address U.S. Army air-supported temper tent needs.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, N

Legal Name of Requesting Entity: Progeny Systems Corporation

Address of Requesting Entity: 155 Valley Oak Drive, Suite B, Somerset, KY 42503

Description of Request: The funding of \$2.5 million will be used for the development of a biometrics-based submarine access control system to automate and simplify secure system access. Properly configured biometrics systems, engineered into tactical system workstations and ship infrastructure, offer the ability for systems to reliably recognize users without user intervention, resulting in rapid and secure system access.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, N

Legal Name of Requesting Entity: Boneal Incorporated

Address of Requesting Entity: 6962 U.S. Highway 460, Means, KY 40346

Description of Request: The funding of \$5 million will be used for the development of experimental low-cost, expendable autonomous underwater vehicles (AUVs). AUVs provide support for a variety of mission including intelligence, surveillance, reconnaissance, deployment of mine counter measures, and assistance of anti-submarine warfare.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: OM, A

Legal Name of Requesting Entity: Phoenix Products, Inc.

Address of Requesting Entity: 106 Bethford Road, McKee, KY 40447

Description of Request: The funding of \$2.5 million will be used to retrofit U.S. Army UH-60 transmission drip pans.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: OM, ARNG

Legal Name of Requesting Entity: Phoenix Products, Inc.

Address of Requesting Entity: 106 Bethford Road, McKee, KY 40447

Description of Request: The funding of \$2.5 million will be used to retrofit U.S. Army National Guard UH-60 transmission drip pans.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: DPA

Legal Name of Requesting Entity: Aspen Compressor, LLC

Address of Requesting Entity: 825 Chap-pell's Dairy Road, Somerset, KY 42503

Description of Request: The funding of \$4.5 million will be used to produce miniature compressors for electronics and personal cooling systems.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, A

Legal Name of Requesting Entity: Tier 3 Data and Web Services

Address of Requesting Entity: 1708 Forest Lane, Suite 105, Corbin, KY 40701

Description of Request: The funding of \$2 million will be used to provide the Defense Logistics Agency (DLA) with an interface system to the Army's Product Lifecycle Management (PLM) system. This system will reduce manufacturing and repair potential costs and bridge the communications gap by exchanging product technical data between engineering and procurement.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, A

Legal Name of Recipient: University of Kentucky Research Foundation

Address of Recipient: Room 1 Kinthead Hall, Lexington, KY 40506

Description of Request: The funding of \$2 million will be used for a lethal cancers early detection and awareness program. This program can provide the Department of Defense with health information to identify high risk factors and exposures to cancer in military environments, and provide a model for early cancer detection and screening.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, DW

Legal Name of Recipient: University of Kentucky Research Foundation

Address of Recipient: Room 1 Kinthead Hall, Lexington, KY 40506

Description of Request: The funding of \$1.5 million will be used to accelerate the adoption of sustainable manufacturing for small and medium enterprises in the U.S. Department of Defense supply base. The program will serve as a pathway to find and utilize resources that can be of value to the defense manufacturing industrial base.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, A

Legal Name of Recipient: Morehead State University

Address of Recipient: 150 University Boulevard, Morehead, KY 40351

Description of Request: The funding of \$2 million will be used for the development of advanced power technologies applicable to nano-satellites, which will help meet tactical warfighter requirements. The program will look at increasing the power available from solar cells through innovative mechanical structures that increase surface area. This effort is in direct support of the Army's mission in developing nano-satellites to meet tactical warfighter requirements.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: DRUGS

Legal Name of Recipient: Kentucky Department of Military Affairs

Address of Recipient: Boone National Guard Center, 100 Minuteman Parkway, Frankfort, KY 40601

Description of Request: The funding of \$3.5 million will be used to support law enforcement in the eradication of marijuana across the Commonwealth of Kentucky through the use of military equipment and personnel.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: OP, A

Legal Name of Recipient: Kentucky Department of Military Affairs

Address of Recipient: Boone National Guard Center, 100 Minuteman Parkway, Frankfort, KY 40601

Description of Request: The funding of \$6 million will be used for the procurement of generators for the Kentucky Army National Guard. This will increase the capabilities of the Kentucky National Guard to effectively carry out its Defense Support to Civil Authorities mission by providing adequate power generation to its 54 National Guard armories and rapid, transportable emergency power generation to critical life-saving and emergency response facilities throughout the Commonwealth in emergency situations.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: AP, A

Legal Name of Recipient: Kentucky Department of Military Affairs

Address of Recipient: Boone National Guard Center, 100 Minuteman Parkway, Frankfort, KY 40601

Description of Request: The funding of \$2 million will be used for the one-time procurement of advanced civil support radio systems to be installed on Kentucky Army National

Guard UH60 Black Hawk helicopters. This will increase the National Guard's effectiveness when performing the full spectrum of state emergency missions by allowing direct communication with civilian first responders.

Requesting Member: Congressman HAROLD ROGERS

Bill Number: H.R. 3326

Account: RDTE, A

Legal Name of Requesting Entity: Ensign Bickford Aerospace and Dynamics

Address of Requesting Entity: P.O. Box 219, State Route 175, Graham, KY 42344

Description of Request: The funding of \$3 million will be used to provide for the forwarding and optimization of current Reactive Armor (RA) solutions to reduce weight, defeat emerging threats, develop multi-threat capability enhancements, and increase overall safety.

EARMARK DECLARATION

HON. LYNN JENKINS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. JENKINS. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the FY2010 Defense Appropriations Bill, H.R. 3326:

Earmark: Army Command and General Staff College Leadership Training Program

Requesting Member: Congresswoman LYNN JENKINS

Bill Number: H.R. 3326

Account: OM,A

Legal Name of Requesting Entity: Fort Leavenworth, KS

Address of Requesting Entity: 881 McClellan Ave., Fort Leavenworth, KS 66027

Description of Request: Provide an earmark of \$2,000,000 to continue a partnership with Kansas State University to provide an M.A. and Ph.D. in Security Studies, and an M.S. and Ed.D. in Educational Leadership to military students and faculty at the Command and General Staff College, Fort Leavenworth. The program was developed in close coordination with senior faculty at CGSC. This program responds to a need identified by Fort Leavenworth in an area of expertise at Kansas State University.

Earmark: Repair Heating, Ventilation, Air Conditioning System at Ft. Leavenworth

Requesting Member: Congresswoman LYNN JENKINS

Bill Number: H.R. 3326

Account: OM,A

Legal Name of Requesting Entity: Fort Leavenworth, KS

Address of Requesting Entity: 881 McClellan Ave, Fort Leavenworth, KS 66027

Description of Request: Provide an earmark of \$2,796,000 to replace a failing HVAC system in the Community Center located in Building 318. This is a 41,000 SF building, built in 1940. This building provides a unique location for a variety of community support events throughout the year that often involve large numbers of people, such as town hall meet-

ings, Chapel family events, Army Family Action Plan conferences, etc. The existing heating and air-conditioning equipment is failing, and portions of it cannot be repaired due to its age. As a result it is unable to cool and heat the building sufficiently throughout the year.

Earmark: Repair Heating, Ventilation, Air Conditioning System in National Simulations Center

Requesting Member: Congresswoman LYNN JENKINS

Bill Number: H.R. 3326

Account: OM,A

Legal Name of Requesting Entity: Fort Leavenworth, KS

Address of Requesting Entity: 881 McClellan Ave, Fort Leavenworth, KS 66027

Description of Request: Provide an earmark of \$1,785,000 to correct air quality problems in the three-story, 93,000 SF National Simulation Center located in Building 45. Originally built in 1882, this former barracks was remodeled 15 years ago into a secure training facility, which due to its mission, could not have any windows. It houses a large amount of information technology which is used in conducting simulations. The number of personnel using the building during training simulations has increased substantially over the last several years. The HVAC system must be upgraded to handle the requirement to properly ventilate and cool the building given the larger heat load generated by the automation equipment and the high number of personnel. The existing HVAC equipment was installed during the last remodel and has reached its useful life expectancy. It is no longer capable of supporting the mission.

Earmark: 190th Air Refueling Wing Squadron Operations Facility

Requesting Member: Congresswoman LYNN JENKINS

Bill Number: H.R. 3326

Account: OM,ANG

Legal Name of Requesting Entity: Kansas Air National Guard

Address of Requesting Entity: 5920 SE Coyote Dr., Topeka, KS 66619

Description of Request: To provide an earmark of \$1,000,000 to remodel and upgrade the current Squadron Operations Facility to effectively meet the day-to-day requirements of the 190th ARW, which has increased in size and mission for the KC-135R tanker operation.

HONORING THE SERVICE OF JUDGE RAYMOND LAWRENCE FINCH, TO THE FEDERAL AND VIRGIN ISLANDS JUDICIAL BRANCHES AND TO THE COMMUNITY OF THE U.S. VIRGIN ISLANDS

HON. DONNA M. CHRISTENSEN

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mrs. CHRISTENSEN. Madam Speaker, I rise to pay tribute to Judge Raymond Lawrence Finch, a Jurist extraordinaire, who has served the Virgin Islands legal and judicial communities with diligence, competence and

unfailing dedication for 33 years from the Bench.

Raymond Finch is a true "Native Son", a product of two Crucian Virgin Islands families: Bough and Finch; whose family members have been making outstanding contributions to the Territory of the U. S. Virgin Islands for more than four generations.

Raymond Finch is a product of the Virgin Islands public school system and a graduate of the Christiansted High School in 1958. He completed, on schedule, his Bachelor of Arts in Political Science, Minor in Economics, from Howard University in 1962; and his Juris Doctor Degree in 1965, from the Howard University School of Law.

Entering in the U. S. Army as a First Lieutenant in 1966, he served honorably for three years, adjudicating claims of U.S. personnel and Vietnamese nationals. He was also an Advocate before the Elimination Boards, Article 15 Hearings and in Article 32 investigations. His exemplary service was awarded with the Bronze Star Medal, the Army Commendation Medal, and a Certificate of Appreciation from General William C. Westmoreland and the Army Chief of Staff.

Having served previously as a Law Clerk in the Municipal Court of the Virgin Islands, he worked as a Law Clerk upon his return to the Territory, in the firm of Hodge and Sheen. He was admitted into the Virgin Islands Bar in 1970 and became a partner in the law firm of Hodge, Sheen, Finch and Ross in 1971. For more than a dozen years he was an instructor at the University of Virgin Islands and the American Banking Association.

In 1976, then Virgin Islands Governor, Cyril E. King, appointed him Judge of the Municipal Court of the Virgin Islands. On September 1, 1994, after being nominated by President Clinton, Raymond Finch took the oath of office as Judge of the District Court of the Virgin Islands, and became Chief Judge of the District Court in August, 1999.

Raymond Finch the Law Clerk, to retiring District Court Judge Finch, has seen the remarkable evolution of the Virgin Islands Judicial system. The Municipal Court that he first served as a Law Clerk was the same Court to which he was first appointed as a Judge. During his judicial tenure, the Municipal Court became the Territorial Court, where it achieved its jurisdictional autonomy and recognition as the highest local court in the Territory and it is now the Superior Court. During Judge Finch's District Court tenure, the Supreme Court of the Virgin Islands was established.

Accordingly, Finch's judicial career also evolved through his serving as Acting Presiding Judge, Territorial Court of the Virgin Islands; Judge, Appellate Division, U. S. District Court of the Virgin Islands; by Special Designation as Judge of the U. S. District Court of the Virgin Islands; U. S. District Court Judge and Chief District Court Judge for the Virgin Islands. During Judge Finch's tenure on the Bench, he was served by a group of Law Clerks, many of whom have gone on to distinguished and illustrious careers.

His demeanor has always been one of quiet reserve. He is one of those rare individuals that will listen attentively. There have been occasions where a court room participant miscalculated with uttering a statement, uncomfortably finding themselves in the vise of a first

class mind. His tenure has produced excellent legal Opinions and Memorandums, along with Decisions that demonstrate inordinate wisdom and compassion. He has mastered the uncanny ability to clearly and concisely follow the dictates of law, weaving and intermingling, with the African West Indian derived customs, of Danish and American cultural and jurisprudential influence. No easy task. His pride and understanding of the Virgin Islands culture, heritage and its people, resulted in outstanding interpretations and implementations of law that appealed to all the adversaries.

His numerous community and professional involvements have been demonstrated through membership in the Virgin Islands Bar Association; Court of Appeals for the Third Circuit; American Law Institute; American Judges' Association; American Bar Association; National Bar Association, and the Virgin Islands Law Enforcement Planning Commission. His wise acumen was sought as or contributed to, the Task Force Member of the Criminal Code Revision Project; Committee on Model Criminal Jury Instructions, Third Court of Appeals; Supervisory Board of Juvenile Justice & Prevention of Delinquency Committee; the Democratic Party of the Virgin Islands; and Board of Directors of Boy's Club, St. Croix Division.

At the recent unveiling of his official District Court Judge portrait, he showed a profound sensitivity when he thanked all that had gathered.

Judge Finch has one son and two daughters; through marriage, an additional son and daughter.

The Virgin Islands and its people have been privileged to witness the passing of one that touched many, thereby making the world a better place.

HONORING DENNIS CUBA AND
DAVID PARSONS

HON. DEBBIE WASSERMAN SCHULTZ

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. WASSERMAN SCHULTZ. Madam Speaker, I rise to recognize two heroic police officers from my district and to reinforce the importance of swimming pool safety.

On the evening of Tuesday, July 7, City of Pembroke Pines police officers Dennis Cuba, a seven-year force veteran and David Parsons, a 25-year force veteran, arrived within one minute of receiving a call about a boy whose arm was entrapped in the drain of a hot tub.

There is no doubt that the quick response and professionalism of the Pembroke Pines Police Department saved five-year old Miguel Marin's life.

Officers Parsons and Cuba were able to revive Miguel, but only after several attempts to free him from the brute force and suction of the spa drain—the result of a faulty drain cover.

Unfortunately, not all of these stories have a happy ending. Drowning is the leading cause of unintentional death to children under the age of five.

Hundreds of children across our country have died as a result of accidental drowning in swimming pools and spas.

In 2007, Congress passed the Virginia Graeme Baker Pool and Spa Safety Act, which aims to stop these senseless accidents.

In addition to encouraging the use of barriers, such as fencing to prevent children from wandering unsupervised into the pool, this law increases safety at public swimming pools and spas by requiring anti-entrapment drain covers. And yet even with these protections, we must remind parents to be vigilant and know where their children are at all times.

On behalf of the citizens of Pembroke Pines, I thank officers Parsons and Cuba for their heroic efforts and hope that we can learn an important lesson from this near-tragedy.

TRIBUTE TO AMERICAN LEGION
AUXILIARY UNIT 278 OF OSAGE,
IOWA

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LATHAM. Madam Speaker, I rise today to recognize the American Legion Auxiliary Unit 278 of Osage, Iowa. The Unit facilitated the Veterans Inspiring Patriotism program as a part of the Joe Foss Institute, and I am honored to submit into the CONGRESSIONAL RECORD the following commentary from the program in Osage.

"Osage American Legion Post 278 Presents program at Sacred Heart School:

Betty McCarthy of Osage American Legion Auxiliary Unit 278 was the facilitator of the Joe Foss Institute's program 'Veterans Inspiring Patriotism' for Sacred Heart students grades K–6th. Joe Foss achieved international fame as America's top Marine fighter pilot in World War II with a record of more than 60 missions in the South Pacific and shooting down 26 Japanese Zeroes. His bravery in combat earned him the Congressional Medal of Honor.

Joe's many lifetime achievements are told in his autobiography 'A Proud American.'

In 2001, he founded the Joe Foss Institute as a non-profit organization with its mission of promoting Patriotism, Public Service, Integrity and an Appreciation for America's Freedoms. The 'Veterans Inspiring Patriotism' is designed for school children from grades K–12. Through this program, American Flags for the classroom and replicas of the United States Constitution and the Bill of Rights are made available at no cost to be presented along with the program.

An age appropriate video was part of the presentation which helped the students understand the freedoms established by the Constitution and the Bill of Rights. Following the video, John Ross, member of Osage Legion Post 278, told of his service in the military and what it means to be a patriot. This was followed by questions from the students.

The presentation ended with John Ross presenting American Flags as well as the laminated copies of the Constitution and Bill of Rights to 5 students, each of whom were

wearing the uniforms of the 5 branches of the service. These uniforms were worn by veterans of World War II, Korea and Desert Storm.

McCarthy told of the final tribute, the military rites at the graveside of a veteran, the presentation of the American Flag under which they served and then TAPS was played by a 6th grade student. The program ended with the singing of God Bless America!

Osage American Legion Post 278 and Sacred Heart School are indebted to the Joe Foss Institute for making this program possible."

INTRODUCTION OF THE JERUSALEM EMBASSY AND RECOGNITION ACT OF 2009

HON. DAN BURTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BURTON of Indiana. Madam Speaker, forty-two years ago, during the Six Day War of 1967, Israeli troops reunified the city of Jerusalem. Since then, people of all religious faiths have been guaranteed full access to holy sites within the city, and the rights of all faiths have been respected and protected.

In 1995, the U.S. Congress declared that it is the official position of the United States that Jerusalem is, and rightly ought to remain, the undivided capital of Israel. Since that time, the Congress has repeatedly and overwhelmingly adopted multiple resolutions reaffirming this commitment to Jerusalem's continued status as a unified, undivided city. President Obama has also pledged his personal support for Jerusalem as the capital of Israel. On June 4, 2008, while still serving as a United States Senator, President Obama said that: "Jerusalem will remain the capital of Israel, and it must remain undivided."

Despite this apparent unanimity, however, the United States has inexplicably never acted to move the United States Embassy from Tel Aviv to Jerusalem. United States officials do conduct diplomatic meetings and other business in the city of Jerusalem in de facto recognition of its status as the capital of Israel, but the Embassy remains firmly grounded in Tel Aviv.

Every sovereign country has the right to designate its own capital and the United States maintains its Embassy in the functioning capital of every country. The one exception is Israel, a great friend and ally to the United States. The President of Israel, the Knesset—Israel's Parliament—and the Israeli Supreme Court are all located in Jerusalem; and that is where the Embassy of the United States rightfully should be as well.

I rise today to introduce the "Jerusalem Embassy and Recognition Act of 2009" which mandates the relocation of the U.S. Embassy to Jerusalem, and reaffirms U.S. policy that Jerusalem must remain the undivided capital of Israel; for two reasons. First, passing this bill and immediately relocating the United States Embassy to Jerusalem will, in my opinion, send a strong message to the Iranian regime that the United States stands in strong

solidarity with the people of Israel—we will not tolerate the mullahs' constant threats against Israel, and we will not accommodate their pursuit of a nuclear bomb. Second, passing this bill will send a bipartisan message to the Administration that the United States Congress remains strongly committed to Jerusalem's continued status as a unified, undivided city; a position that President Obama—despite his comments from June 4, 2008—appears to be backing away from.

For example, Presidential Determination 2009–19, which was transmitted by the Administration to Congress just a couple of months ago, renewed a legally required waiver which allows the Administration to continue to delay the May 31, 1999 deadline for moving the U.S. Embassy in Israel from Tel Aviv to Jerusalem. While the renewal of the waiver was not unexpected or unusual, the actual text of the waiver message did contain a surprise. The Obama Administration neglected to include a key sentence that the previous Administration had included in previous determinations; specifically: "My Administration remains committed to beginning the process of moving our embassy to Jerusalem."

Madam Speaker, I sincerely hope that the crucial omission in Presidential Determination 2009–19 was an inadvertent oversight. Even if it was, I believe it is well past time to revisit the Jerusalem Embassy Act and close, once and for all, the ludicrous waiver loophole that has continued to allow the diplomatic embarrassment of not having our Embassy located in the capital city of Israel to continue for ten years. I strongly urge my colleagues to demonstrate their support for the people of Israel by co-sponsoring this important bill.

EARMARK DECLARATION

HON. RANDY NEUGEBAUER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. NEUGEBAUER. Madam Speaker, pursuant to the Republican standards on member requests, I am submitting the following information regarding a congressionally directed appropriation project I sponsored as part of H.R. 3326, FY 2010 Department of Defense Appropriations Act.

Agency/Account: Department of the Army—RDT&E

Amount: \$1,500,000

Requesting Entity: Texas Tech University, The Institute of Environmental and Human Health (TIEHH), 2500 Broadway, Lubbock, TX 79409

The funding for the Zumwalt National Program for Countermeasures to Biological and Chemical Threats is requested to further the understanding and ability of operational military forces to identify, prevent, and mitigate any threats war fighters may face from biological and chemical weapon agents in any environment at any time.

INTRODUCING HOUSE RESOLUTION TO RECOGNIZE THE DYKE MARSH WILDLIFE PRESERVE AS A UNIQUE AND PRECIOUS ECOSYSTEM

HON. JAMES P. MORAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. MORAN of Virginia. Madam Speaker, I rise today to introduce a resolution recognizing one of the national capital area's most unique and cherished wetland and wildlife preserves and to celebrate the 50th anniversary of the legislation that was enacted to ensure its survival.

In 1959, the U.S. Congress passed legislation designating Fairfax County's Dyke Marsh as a protected ecosystem, for the purpose of promoting fish and wildlife development and preserving their natural habitat. Until that time, the Dyke Marsh, which is the largest remaining freshwater tidal marsh along the Potomac River shoreline in this area, was in danger of disappearing as a result of commercial dredging and dumping operations.

One of the key driving forces behind this legislation was our very own Honorable JOHN DINGELL of Michigan. His leadership, determination, and dedication to conservation and habitat preservation were essential to ensuring that the Dyke Marsh was not destroyed at the expense of further dredging and filling activities. Representative DINGELL, along with the late Honorable John P. Saylor of Pennsylvania and the late Honorable Henry S. Reuss of Wisconsin, are to be commended on their efforts in championing this legislation 50 years ago, and one purpose of this resolution is to do just that.

The Dyke Marsh was formed over 5,000 years ago and today provides a delicate, yet critical, habitat for a diverse array of more than 6,500 species of plants and animals, including some that are threatened or endangered. Thanks to this insightful legislation and continued restoration efforts since that time, the value of Dyke Marsh today extends beyond its role as a preserve and protected ecosystem; it provides natural flood control, stemming of shoreline erosion, water quality enhancement, and aesthetic and recreational enjoyment for people of all ages.

Please join me in celebrating the 50th anniversary of this legislation, in recognizing the importance and significance of the local treasure that the legislation protects, in reaffirming our commitment to protecting our precious threatened wetlands, and in honoring three individuals whose leadership and commitment to environmental stewardship were instrumental in the Dyke Marsh's preservation.

I urge my colleagues to support this resolution.

HONORING WOMEN AIRFORCE SERVICE PILOTS FROM WORLD WAR II

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. WOLF. Madam Speaker, I rise today to honor the Women Airforce Service Pilots (WASP) of World War II. They were the first women to fly military aircraft for the United States and deserve to be commended for their bravery.

From 1942 to 1944, these women flew in various non-combat missions, allowing male pilots to be deployed into combat. Their success in flying fighter, bomber, transport, and training aircraft eventually led to the integration of female pilots into the United States Armed Services.

There were 1,102 female WASP trained during World War II, and 300 survive today, two of whom currently reside in Virginia's 10th Congressional District. Joan Lemley of Purcellville and Barbara Ross of Warrenton are two of these brave pilots who served their country during World War II.

On July 1, President Obama signed S. 164 into law, which awards our nation's highest honor—the Congressional Gold Medal—to each of these women pioneers of World War II. They will finally receive the recognition they deserve for their wartime military service to our country. I was pleased to be an original cosponsor of the House version of this measure, which was introduced by Congresswoman ILEANA ROS-LEHTINEN.

I ask that my colleagues join me today in commending Barbara Ross, Joan Lemley and the other women pilots for serving their country in World War II.

TRIBUTE TO RYAN NOVAK

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LATHAM. Madam Speaker, I rise today to recognize and honor Ryan Novak, a native of rural Decorah, Iowa and current University of Iowa student. Ryan is riding his bicycle across the United States this summer to raise money for people with disabilities.

Ryan is participating in the Journey of Hope, a 64-day, 4000-mile bicycle ride from San Francisco, California to Washington, DC to benefit Push America. Push America was founded in 1977 through Pi Kappa Phi as a way for undergraduate fraternity brothers to experience leadership development through serving people with disabilities.

During this bicycle ride, Ryan is not only raising money but educating people about the needs of those with disabilities. He is also stopping at local organizations and a variety of community events to meet people with disabilities and to tell his story and promote the cause.

I know that my colleagues in the United States Congress join me in commending Ryan

Novak for his leadership and commitment to serving people with disabilities. I consider it an honor to represent Ryan in Congress, and I wish him the best in his future endeavors.

EARMARK DECLARATION

HON. MICHAEL K. SIMPSON

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SIMPSON. Madam Speaker, in accordance with the policies and standards put forth by the House Appropriations Committee and the GOP Leadership, I would like to list the congressionally-directed projects I have requested in my home State of Idaho that are contained in the report of H.R. 3326, the FY2010 House Defense Appropriations Bill.

Project Name: 3-D Technology for Advanced Sensor Systems

Amount Received: \$2,000,000

Account: Electronics Technology Account in the Department of Defense RDT&E

Recipient: Boise State University

Recipient's Street Address: 1910 University Drive, Boise, Idaho 83725

Description: The 3-D packaging approach offers the promise of a dramatic decrease in the system weight and volume, together with increased system performance. This project will provide funding to continue to develop 3-D processing techniques on silicon and LTCC platforms. These include technologies for die and wafer-scale bonding and 3-D interconnects. These techniques will be applied to create 3-D integration and packaging solutions applicable to a general category of high performance sensor systems. The military has a need for new three-dimensional (3-D) packaging of electronic systems, particularly sensor systems for portable (i.e., on-soldier) applications. 3-D integration and packaging of sensors will result in smaller electronics with expanded capability, allowing the soldier in the field to be more effective.

Project Name: Accelerator-Driven Non-Destructive Testing

Amount Received: \$2,000,000

Account: Support Systems Development Account in the Air Force RDT&E

Recipient: Idaho State University

Recipient's Street Address: 921 South 8th Avenue, Stop 8007, Pocatello, Idaho 83209

Description: The Idaho Accelerator Center (IAC) will develop a research, education and commercialization program that takes non-destructive testing techniques developed at the IAC and advances their development. The penetrating and non-destructive techniques that are under development include new techniques in positron annihilation spectroscopy with accelerator-based gammabeams, the use of mono-chromatic x-ray beams and the use of photon activation (via photonuclear reactions) for trace element analysis of materials and manufacturing processes. The development of practical non-destructive testing (NDT) techniques will help the U.S. Air Force reduce aircraft downtime necessary for inspection and enhance turn-around times by more quickly identifying needed repairs through spectroscopy and the use of x-ray. The development

of practical NDT techniques will be of immense value to the armed forces in four critical areas: quicker return of aircraft to the line by reducing the tear-downs necessary for inspection; non-destructively addressing the enormous 'aging fleet' problem of the U.S.A.F. and the private sector; better economics by replacing parts on an on condition inspections basis instead of a 'life limited' basis; and the ability to successfully apply NDT techniques to composite materials. Currently, no commercialized NDT technique works on composite materials.

Project Name: Domestic Manufacturing of 45nm Electronics (DOME)

Amount Received: \$2,000,000

Account: Advanced Spacecraft Technology Account in the Air Force RDT&E

Recipient: American Semiconductor, Inc.

Recipient's Street Address: 3100 South Vista Avenue, Suite 230, Boise, Idaho 83705

Description: Funding for this program will deploy a new foundry capability to address the most critical electronics sourcing issue faced for secure supply of advanced DOD integrated circuits in 2012 and beyond. DOME is an AFRL-sponsored initiative to implement a 45nm state-of-the-art wafer fabrication capability to meet current and future system requirements for fabrication of specialized integrated circuits in a broadly available foundry capacity to serve DOD. Microelectronics capability for defense applications requires advancement of technology for each generation of new defense system. Defense system requirements are often highly specialized and include capability beyond that of standard commercial devices due to their unique operational environments. An advanced and sustainable defense microelectronics supply solution is required that can provide parts in low volume at reasonable costs and be fabricated on-shore to meet security requirements. This advanced process technology enables higher speed, lower power electronics that are of vital importance to the military and intelligence communities. The DOME program will deliver the capability to manufacture semiconductors at the most advanced technology node currently in production, 45nm, at an American run on-shore facility optimized for DOD/IC business.

Project Name: Hybrid Energy Systems Design and Testing

Amount Received: \$2,000,000

Account: Military Engineering Advanced Technology Account in the Army RDT&E

Recipient: Idaho National Laboratory

Recipient's Street Address: 2525 Fremont Avenue, Idaho Falls, Idaho 83415

Description: The Hybrid Energy Systems Development and Testing Program will provide the Army transformational technologies that advance Army leadership in global energy security and carbon reduction. Hybrid energy concepts provided through this program could allow the Army to simultaneously address energy supply (electrical grid and fuel supply) security and surety, environmental (CO₂) footprint reduction, and provide national economic benefits. This project will leverage unique assets at the INL, such as its Hybrid Testing Lab, engineering-scale energy test beds, supercomputing capabilities, and hybrid systems design teams, and nuclear technology designs, to develop, validate, and assess hy-

brid and other advanced energy system concepts. This program will provide a foundation for Army leadership in clean, smart, secure energy for future defense and nondefense applications.

Project Name: Hybrid Power Generating System

Amount Received: \$2,000,000

Account: Advanced Electronics Technologies Account in the Department of Defense RDT&E

Recipient: M2E Power, Inc.

Recipient's Street Address: 845 West McGregor Court, Suite 150, Boise, Idaho 83705

Description: Research at the Idaho National Laboratory resulted in a breakthrough technology using compressed magnetic fields which can generate power. M2E Power is expanding on this research to develop high density generators based on breakthrough configurations of permanent magnetic material, coil designs and advanced power electronics. With further development efforts, M2E Power's technologies will enable lightweight, compact power sources and highly power-dense components that will significantly reduce the logistics burden, while increasing the survivability and lethality of the warfighter. The continued research, development, testing and validation of the technology should result in mission extension for dismounted soldiers and considerable savings by reducing the reliance on disposable batteries. In addition, the technology will substantially increase the overall efficiency of motors, generators and propulsion systems used defense-wide.

Project Name: Integrated Passive Electronic Components

Amount Received: \$1,700,000

Account: Advanced Spacecraft Technology in the Air Force RDT&E

Recipient: University of Idaho

Recipient's Street Address: 820 Idaho Ave., Morrill Hall 109, Moscow, ID 83844

Description: Spacecraft are critical for coordinating modern military operations, particularly for intelligence gathering, battle-space communications, resource deployment (e.g. Global Positioning System), and targeting. More accurate and timely information enables more effective deployment, but requires enhanced sensing, communications and computing, which require more power. Limited energy sources and cooling capacity aboard spacecraft restrict increased processing capability. Power consumption has become a limiting factor in the performance electronic and computing technologies. Microchip designers have addressed rising power consumption by reducing the voltage levels of the power delivered to the chips, with excellent results. However, this creates a new problem of how to deliver clean low-voltage power to the chips. This research will develop the technologies to enable low-voltage power regulation to be integrated onto the same piece of silicon that holds the computing circuits, thus making ultra-low-power microelectronics practical. The key to this technology is integrated passive components. In addition, this research will produce a new range of component options for analog circuit designers, enabling greater ability to program and increasing flexibility of on-board electronic systems.

Project Name: Material, Design, Fabrication Solutions for Advanced SEAL Delivery System external structural components

Amount Received: \$2,000,000

Account: Operations Advanced Seal Delivery System (ASDS) Development in the Department of Defense Research, Development, Test and Evaluation (RDT&E)

Recipient: Premier Technology Inc.

Recipient's Street Address: 1858 West Bridge Street, Blackfoot, Idaho 83221.

Description: Premier Technology Inc. will work with the Idaho National Lab, Navy PEO Submarine (PMS 399), U.S. Special Operations Command, Naval Special Warfare Command and the Navy Office of Naval Research to provide material, design and fabrication solutions for ASDS external structural components allowing those components to withstand severe hydrodynamic, hydrostatic and shock loading while maintaining significant resistance to corrosion in situations where the ASDS is attached to the submerged host submarine operating at high speeds. Candidate components include the host submarine pylon assembly, ASDS lower hatch (buttress threads) and ASDS shaft line components. The goal of this project is to assist the U.S. Navy in bringing ASDS to its fullest operational capability by addressing challenges that it faces in key material issues.

Project Name: Radiation Hardened Cryogenic Read Out Integrated Circuits

Amount Received: \$2,000,000

Account: Defense Production Act Purchases in Department of Defense Procurement

Recipient: ON Semiconductor, Inc.

Recipient's Street Address: 2300 Buckskin Road, Pocatello, Idaho 83201

Description: Readout integrated circuits (ROIC) are the foundation of thermal imaging systems. These systems have forever changed modern warfare and surveillance. The United States Air Force and the Missile Defense Agency have been investigating ways to improve manufacturing capabilities and improve cryogenic and radiation performance of these circuits. The thermal imagers of the future will operate in harsh environmental conditions for longer periods of time and will have increased resolution (through increased pixel count) than the detectors of today. Maintaining a domestic source of this technology, as well as working to enhance the manufacturing capabilities of this critical technology, are as equally important as increasing the yield. The DPA Title III Readout Integrated Circuit (ROIC) program will continue the improvement efforts to develop technology that includes a larger stitched die, smaller feature size (< 0.35um), improved yields, and reduced cycle times will enable a domestic U.S. source for ROIC manufacturing to meet our national defense needs.

I appreciate the opportunity to provide a list of Congressionally-directed projects in the report accompanying the FY 2010 Defense Appropriations bill on behalf of Idaho and provide an explanation of my support for them.

EARMARK DECLARATION

HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ROGERS of Alabama. Madam Speaker, in accordance with the Republican Conference standards regarding Member initiatives, I rise today to provide a description for how funds appropriated in response to my requests submitted to the House Appropriations Committee will be allocated. In making those requests, I submitted a financial certification letter to Chairman OBEY which accompanied my requests, and included the following information:

I hereby certify that to the best of my knowledge these requests (1) are not directed to any entity or program that will be named after a sitting Member of Congress; (2) are not intended to be used by any entity to secure funds for other entities unless the use of funding is consistent with the specified purpose of the earmark; and (3) meet or exceed all statutory requirements for matching funds where applicable. I further certify that should any of the requests I have submitted be included in the bill, I will place a statement describing how the funds in each of the included requests will be spent and justifying the use of federal taxpayer funds.

In order to fully comply with these standards, Madam Speaker, I hereby submit a description of how the funds appropriated in the Department of Defense Appropriations Act for Fiscal Year 2010 will be used for the projects to follow.

Requesting Member: Congressman MIKE ROGERS (Alabama)

Bill Number: H.R. 3326, Department of Defense Appropriations Act for Fiscal Year 2010
Account: RDT&E, Army

Legal Name of Receiving Entity: SCRA, Institute for Solutions Generation (funding will benefit the Anniston Army Depot)

Address of Receiving Entity: 5300 International Boulevard, N. Charleston, SC 29418

Description of Request: Provide \$2,500,000 in funding for the Highly Integrated Production for Expediting RESET. This funding was requested by the Calhoun County Chamber of Commerce to benefit the Anniston Army Depot, located at 7 Frankford Avenue, Anniston, AL 36201. A critical readiness issue facing the military today is repairing and restoring military equipment that has been damaged or worn out in battle. Resetting small arms and crew served weapons is particularly challenging, given their sheer numbers and the fact that, there is a growing incidence of non-conforming parts used to support reset operations there. In addition, under the current system, a lot of time and cost are required to design and apply product improvements during reset. HIPER ensure a quick and efficient RESET turn-around for weapons to the theater. The requested funding will drive downstream efficiencies in manufacturing and quality inspection by enabling the utilization of laser scanning technology to significantly shorten the time and lower the cost for resetting and modernizing the military's small arms and crew-served weapons. This funding will provide for integration, collaboration, scanning

and reverse engineering technology, and supply chain improvements to enhance and expedite RESET efforts.

Requesting Member: Congressman MIKE ROGERS (Alabama)

Bill Number: H.R. 3326, Department of Defense Appropriations Act for Fiscal Year 2010
Account: RDT&E, Army

Legal Name of Receiving Entity: BAE Systems

Address of Receiving Entity: 1101 Wilson Blvd., Suite 2000, Arlington, VA 22209

Description of Request: Provide \$2,000,000 for the Paladin Integrated Management for work to be completed in Anniston, AL. The FY 10 President's Budget contains funding for research and development Army funds to assist in making the M109A6 Paladin and its companion vehicle the Field Artillery Ammunition Support Vehicle (FAASV) sustainable through the year 2050. The changes to this vehicle will incorporate the Bradley's drive train and suspension components that will reduce the logistics footprint thereby reducing operational and support costs. This funding is needed for this program be reinstated to its original schedule (the program was Congressionally reduced by that same amount during the FY09 budget process). Procurement funds to initiate low rate initial production are in the FY 10 procurement budget. The Army intends to fund this program through completion. This is a national defense program which provides firepower to our troops engaged in combat.

Requesting Member: Congressman MIKE ROGERS (Alabama)

Bill Number: H.R. 3326, Department of Defense Appropriations Act for Fiscal Year 2010
Account: RDT&E, Army

Legal Name of Receiving Entity: Electric Fuel Battery Corporation (Arotech Subsidiary)

Address of Receiving Entity: 354 Industry Drive, Auburn, AL 36832

Description of Request: Provide \$2,500,000 for the Novel Zinc Air Power Sources for Military. This funding will develop Zinc-Air battery technology that will provide the soldier with a high energy density power source that significantly reduces battery carry weight. Previous advances in the technology have helped to cut warfighter battery carry weight in half. Continued development of body-worn energy distribution systems, coupled with further development of Zinc-Air battery technology, promises to cut warfighter battery carry weight further, while reducing battery quantities carried on long missions. Reducing battery type and count lowers operational risk by reducing the need for re-supply. In addition, Zinc-Air battery's intrinsic safety (cannot combust or explode even when penetrated by hot projectiles) enhances warfighter safety. Lithium-Air battery technology is in its infancy but has the highest possible energy density of any battery system promising a quantum leap in the warfighter mission length.

Requesting Member: Congressman MIKE ROGERS (Alabama)

Bill Number: H.R. 3326, Department of Defense Appropriations Act for Fiscal Year 2010
Account: RDT&E, Army

Legal Name of Receiving Entity: Auburn University

Address of Receiving Entity: 102 Samford Hall Auburn, AL 36849

Description of Request: Provide \$1,500,000 for the Logistical Fuel Processors Development to Meet Army/TARDEC/TACOM Needs. The technical focus of this program is the development and demonstration of logistical fuel processor-fuel cell combinations that operate at significantly higher efficiencies than current IC engines used by the Army. System attributes to be optimized include: overall efficiency, fuel flexibility, activity maintenance and poison tolerance of the various catalysts, start-up/shutdown time-scales, process robustness, reliability/ruggedness, safety, thermal/acoustic signature and integration, and reductions in overall weight and volume. Additional efforts will be conducted to design and adapt fuel processor/fuel cell systems to appropriate electrical loads with respect to voltage, current, AC/DC operation, peak power requirements versus average power and overall autonomy time. More efficient forms of energy conversion and power production are of key importance to the Army and can be leveraged many times as a gallon of fuel or a pound of food is transported from its point of origin to a forward deployed base of operations. For reasons of inter-operability, the Army must utilize existing and readily available fuel sources such as JP-8 and diesel.

Requesting Member: Congressman MIKE ROGERS (Alabama)

Bill Number: H.R. 3326, Department of Defense Appropriations Act for Fiscal Year 2010
Account: OM, Army

Legal Name of Receiving Entity: Intergraph Corporation

Address of Receiving Entity: 170 Graphics Drive, Madison, AL 35758

Description of Request: Provide \$5,000,000 for the Fort Benning National Incident Management System (NIMS)-Compliant Installation Operations Center. In January 2009, the Department of Defense (DOD) released an instruction sheet (NUMBER 6055.17) on the Installation Emergency Management (IEM) program to establish policy, assign responsibilities, and prescribe procedures for developing, implementing, and sustaining IEM programs at DOD installations. IEM directly supports the Homeland Security Presidential Directive (HSPD)-5, which orders the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). A NIMS-compliant installation operations center provides a unified approach to incident management, standard command, and management structures, as well as creates an emphasis on preparedness, mutual aid, and resource management. Without this system in place, it is very difficult for responders from different jurisdictions to communicate and work together effectively. Because Fort Benning extends across the Alabama-Georgia border, the implementation of a NIMS-compliant installation operations center directly supports HSPD-5 by providing interoperability and cross-jurisdiction capabilities among local and multi-state response agencies. The request will allow Fort Benning to create a NIMS-compliant state-of-the-art operations center. This system will provide Fort Benning with the critically needed capability to track and protect new incidents and existing activities. The final solution will integrate first responder force protection and the fire fighting

common operational picture into one comprehensive command and control/decision support capability that will provide visibility to the commander to gain status and direct response, analyze the current anti-terrorism and force protection mission, and allow for appropriate reporting to other operations centers throughout the country.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DUNCAN. Madam Speaker, consistent with House Republican Earmark Standards, I am submitting the following earmark disclosure information for project requests that I made and which were included within H.R. 3326, "Making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes."

Requesting Member: Congressman JOHN DUNCAN

Account: RDTE—Air Force

Project Amount: \$2,000,000

Legal Name of Requesting Entity: University of Tennessee, 328 Ferris Hall, 1508 Middle Drive, Knoxville, Tennessee 37996

Description of Request: The funding will be used for design, testing, and evaluation of systems needed for the harvesting and storage of green energy. The need for the nation to design, implement, and test systems and processes capable of producing renewable energy at a large scale is vital for the U.S. military and the nation as a whole.

TRIBUTE TO DONNIE D. CHIZEK

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LATHAM. Madam Speaker, I rise today to recognize Mr. Donnie D. Chizek as a member of Troop A, 1st Squadron, 11th Armored Cavalry Regiment. This military unit was recently awarded the Presidential Unit Citation. This rare and prestigious citation honors the Unit's courageous actions in the Republic of South Vietnam.

In 1970 Troop A, 1st Squadron, 11th Armored Cavalry Regiment distinguished itself through a series of serious combat missions over a period of several months. The Presidential Unit Citation has been awarded less than 100 times since its inception in 1941. I am very pleased with the Department of Defense's review and recommendation to recognize this unit with this esteemed honor.

The bravery and sacrifice displayed by Donnie Chizek during his service to our Nation goes above and beyond what we are asked of as citizens of this country. I know that Members of the House of Representatives join me in congratulating Donnie on his well deserved award and wish him the best in his future endeavors.

HONORING THE SERVICE OF U.S. MARINE CPL. NICHOLAS G. XIARHOS

HON. BILL DELAHUNT

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DELAHUNT. Madam Speaker, I rise today so that my colleagues in the House of Representatives can join me in honoring the service of U.S. Marine Corporal Nicholas G. Xiarhos—a loving son and brother, exceptionally dedicated soldier, and a constituent of mine.

On July 23, Nick died after being injured by a roadside explosive while serving in the Garmsir District, an area in the volatile region of southern Afghanistan. If ever there was an individual who went above and beyond to answer the call of service to his country, Nick was that man. He returned from a tour of duty in Iraq this past October only to change battalions so that he could be redeployed to Afghanistan in May. At the time of his death, Nick was serving with the 2nd Battalion, 8th Marine Regiment, and was scheduled to return home around Christmas.

Beloved and admired by his family, peers, fellow men and women in uniform, and his hometown community of Yarmouth, Massachusetts, 21-year-old Nick was the epitome of a true American hero. He eschewed being singled out for his achievements and admirable sacrifices, telling others that he was no different from the thousands of other Marines who shared the same mission. As he told his parents only two weeks before his death, he was living his dream while serving in Afghanistan despite the physical and emotional toll that combat takes on even the most seasoned soldiers.

Six feet tall, athletic, and muscular, Nick had a heart of gold that instinctively drew others to him. During his years at Dennis-Yarmouth Regional High School, he was dubbed "the mayor of DY" for his outgoing, amiable, friendly nature and popularity. As a senior, he received the "Does Most For Others" title—a well-deserved moniker that embodied how Nick approached relationships, his military service, and life in general. Upon returning from Afghanistan, Nick's goal was to attend college and—following in his father, Lieutenant Steven Xiarhos', footsteps—to become a police officer.

Nick's life was one of immense promise, tragically ended too soon. As he is laid to rest tomorrow, I want to extend my deepest condolences to the Xiarhos family—his parents, Steven and Lisa; his younger brother, Alexander; and his twin sisters, Ashlynn and Elizabeth. While he will be truly missed by all those whose lives he touched, Nick's memory and the sacrifice he made for our country will forever live on.

Thank you, Nicholas Xiarhos, for your service. May you rest in peace.

IN RECOGNITION OF WATCHMAN
NEE

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SMITH of New Jersey. Madam Speaker, I rise today to acknowledge the immense spiritual achievement of Watchman Nee, a great pioneer of Christianity in China.

Christianity Today magazine recently honored Watchman Nee as one of the 100 most influential Christians of the twentieth century. Watchman Nee died over thirty years ago but his life and work continue to influence millions of Protestant Christians in China. Today more than three thousand churches outside of China, including several hundred in the United States, look to him as one of their religious and theological leaders.

Watchman Nee was an astonishingly devoted and energetic man, which I think can be seen from a capsule summary of his life. He became a Christian in 1922. In the 1930s, he traveled to Europe and North America, where he delivered sermons and speeches. Later his sermons were collected and published as books. By the late 1940s, Nee had become the most influential Chinese Christian writer, evangelist, and church builder. In 1952, the Chinese government imprisoned Nee and many other Christian leaders for their faith. Nee was never released, though during the 1960s and 1970s several of his books continued to grow in influence and popularity, particularly in the United States, and his best-known book, *The Normal Christian Life*, sold over one million copies world-wide and became a twentieth-century Christian classic. In 1972 he died at the age of 71 in a labor farm; his few surviving letters confirm that he remained faithful to God until the end.

Madam Speaker, it is estimated that China has more than one hundred million Christians, and millions of them consider themselves the spiritual heirs of Watchman Nee. Millions more are rightly proud of the contribution Watchman Nee made to global Christianity—he was the first Chinese Christian to exercise an influence on Western Christians—and indeed of his contribution to world spiritual culture. It is sad that the works of Watchman Nee are officially banned in China—even as they are being discovered afresh by a new generation of Western Christians. It is my hope that Watchman Nee's collected works can be freely published and distributed within China.

After Watchman Nee's death, when his niece came to collect his few possessions, she was given a scrap of paper that a guard had found by his bed. What was written on that scrap may serve as Watchman Nee's testament: "Christ is the Son of God Who died for the redemption of sinners and was resurrected after three days. This is the greatest truth in the universe. I die because of my belief in Christ. Watchman Nee."

RECOGNIZING THE CITY OF
LEANDER, TX

HON. JOHN R. CARTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CARTER. Madam Speaker, I would like to recognize the city of Leander and its staff for their great work within the community for the Adopt-a-Unit Program. The city of Leander adopted troops from the 4th Infantry Division out of Fort Hood, Texas, through the Adopt-a-Unit program. The city offered support to the troops and their families with supplies, care packages, and moral support during their deployment to Iraq over the last year.

I appreciate the work and dedication of the city of Leander staff and commend them for their commitment to the soldiers of the United States Army.

It is an honor to recognize the city of Leander for their great work.

PROTECTING THE SURVIVORS OF
OUR JUDICIAL OFFICIALS

HON. HENRY C. "HANK" JOHNSON, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. JOHNSON of Georgia. Madam Speaker, I am honored to bring to the floor the Judicial Survivors Protection Act of 2009. The bill would provide a limited six month period for incumbent Federal judges to opt into the Judicial Survivors' Annuities System (JSAS) and begin contributing toward a survivors' annuity for their spouses and dependent children.

The JSAS is a critical optional benefit for Federal judges. Currently, unlike the survivors of other Federal employees, judges' spouses and dependent children receive no survivor income benefits unless the judge elects to participate. In addition, the judge must have specifically elected JSAS for a spouse to continue health insurance coverage under the Federal Employees Health Benefits program after the judge's death.

The judges of our Federal judiciary frequently give up lucrative jobs with many benefits for the honor and privilege of serving on our judiciary. Allowing a JSAS open season is a small way to allow judges to provide for their families despite the financial sacrifice of accepting a Federal judgeship.

Judges are bound by their initial decision regarding contributing to JSAS for the remainder of their career. However, circumstances change, and while initially judges may have chosen not to opt into the program due to financial pressure at the time, conflicting priorities such as the need to pay the expense of a dependant education, or simply the failure to plan ahead, this leaves the survivors of forty percent of Article III and non-Article III judges at risk.

Currently only sixty percent of Article III and non-Article III judges participate in JSAS. This bill would provide those forty percent of active or senior Federal judges, who did not initially enroll in JSAS, a limited open season to enroll in the program.

To compensate for the Judge's delay in opting into the program, new enrollees who previously declined to participate in JSAS would pay an enhanced contribution rate of 2.75 percent of their salaries to preserve the financial integrity of the JSAS Fund. Should these new enrollees later retire from the bench, they, like all other retired judges participating in JSAS, will pay the contribution rate of 3.5 percent of their retirement salary.

Additionally, the bill would authorize Federal judges to voluntarily increase their contributions to JSAS in order to enhance the value of their survivors' annuities.

According to the Congressional Budget Office, this bill would carry a negligible cost as any impact on the JSAS system by the new enrollees would be entirely borne by the new enrollees.

Congress has previously authorized such a JSAS open season three times: in 1976, 1985 and 1992. It has been seventeen years since the last open season, and this bill is but a small step towards lightening what is often the financial burden of judicial public service.

The Senate unanimously passed this important legislation. I am proud to join the Senate and send this important measure to President Obama.

HONORING AND RECOGNIZING THE
PASSING OF MR. YOSEMITE, NIC
FIORE

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. RADANOVICH. Madam Speaker, I rise today to pay honor and respect to one of my friends and heroes, Mr. Nic Fiore, who lived a full 88 years of life, and passed away on June 16, 2009 from pneumonia.

Nic was a legendary ski instructor and community leader who taught nearly 140,000 people to ski at Yosemite's Badger Pass Ski Area. Nic served in several different capacities in Yosemite for 57 years after first coming to Yosemite in 1947 from his hometown in Montreal, Canada. Nic originally came to Yosemite for one season but fell in love with the crowned jewel of America's national parks and stayed for the rest of his life, building community, friendship, and family in the area. He is survived by his daughters, Cindy and Nicole, and eight grandchildren.

In describing his experience moving to Yosemite from Canada in 1947, Nic said, "I had never been in love, but the feeling hit me like a ton of bricks. Like a bolt of lightning. Right then and there, down deep, in the corner of my heart, I said to myself, 'I doubt you'll ever leave this place.' And I never have."

In 1956, Nic was named director of the Yosemite Ski School, and in 1963 he was appointed director of the Yosemite High Sierra Camps. During this time, Nic also managed the Wawona and Glacier Point hotels among other concession facilities.

Many of the aspects of Yosemite and Badger Pass Ski Area that are most beloved by myself and families everywhere who have the privilege to visit and enjoy Yosemite National

Park can be attributed to Nic's legacy. Nic was a visionary in making the Badger Pass Ski Area the family-oriented teaching ski facility that it is today by preserving old skiing tradition.

I can attest to what Nic's Yosemite colleagues have said about Nic's generosity of heart, his ability to make everyone who met him feel as though they were his best friend, and his mastery of Yosemite. Nic had a special ability to share his passion and enthusiasm for skiing, and recreation with generations of visitors to Yosemite as well as the permanent Yosemite community.

The list of Nic's accomplishments is long. In 2006, Nic was chosen by the Yosemite Fund as their person of the year, and was designated as "Yosemite's Ambassador-at-Large." In January 2009, Nic was inducted into the California Outdoors Hall of Fame, an enshrinement award presented by the Sportsmen's Exposition. To be considered for this considerable award, nominees must have inspired thousands of Californians to take part in the great outdoors and must have taken part in an overriding range of adventures. I personally cannot think of a more qualified individual to fit that description than Nic.

Nic held the position of executive director of the Professional Ski Instructors of America (PSIA) Western Division. He was recognized as the "Most Valuable Ski Instructor" of PSIA in 1971. Nic also received the "Charlie Proctor Award" in 1986, which honors individuals who have made outstanding contributions to the sport of skiing in Northern California and Nevada. It is the highest award given by the Sierra Chapter of the North American Ski Journalists Association. Additionally, in 1987, Fiore was nominated for the U.S. Ski Hall of Fame, as well as received the "Outstanding Contributions to the Sport of Skiing" award.

In addition to all of these accomplishments, Nic was also an author, writing a best selling book, "So You Want to Ski" along with a newspaper column titled "Ski Tips by Nic Fiore."

Again, Madam Speaker, I rise in recognition of my friend and Yosemite community builder Mr. Yosemite, Mr. Nic Fiore. Nic will be missed by many. His legacy in the Yosemite community will live on, as will his passion and enthusiasm for the sport of skiing.

CELEBRATING THE 120TH ANNIVERSARY OF BISHOP MUSEUM

HON. MAZIE K. HIRONO

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. HIRONO. Madam Speaker, August, 2009 marks the 120th anniversary of Bernice Pauahi Bishop Museum, the State of Hawai'i's Natural and Cultural History Museum. Founded more than a century ago, in the memory Princess Bernice Pauahi Bishop by her husband, Charles Reed Bishop, Bishop Museum has contributed to the world's understanding of the natural and cultural history of the Pacific and Hawai'i. It has collected and preserved nearly 25 million scientific animal and plant specimens and 2.4 million cultural objects that

together help tell the full story of Hawai'i and the Pacific.

Bishop Museum recently completed a major restoration of one of its original buildings, Hawaiian Hall. Listed on the National Register of Historic Places, Bishop Museum's Hawaiian Hall has traditionally housed Hawai'i's most sacred and beloved artifacts. With its volcanic stone exterior and extensive use of native koa wood, Hawaiian Hall is considered a masterpiece of late Victorian museum design.

With this important renovation, hundreds of thousand visitors and local residents will enter the world of Hawai'i. They will hear the oral tradition of oli and mo'olelo. They will experience Hawai'i's deep connection between its natural and cultural worlds. Bishop Museum has served as an essential repository and education institution for over a century.

In honor of this important anniversary and the major restoration of Hawaiian Hall, Congressman ABERCROMBIE and I introduced H. Res. 541, which we are hoping will pass the House in the near future. I urge my colleagues to join me in commending the important efforts of the Museum and in celebrating the 120th anniversary of its founding with the restoration and reopening of its Hawaiian Hall. Mahalo!

BILL TO CLOSE OFFSHORE REINSURANCE TAX LOOPHOLE

HON. RICHARD E. NEAL

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. NEAL of Massachusetts. Madam Speaker, today I am pleased to come before the House to introduce legislation ending the use of excessive affiliate reinsurance by foreign insurance groups to strip their U.S. income into tax havens, avoid tax, and gain a competitive advantage over American companies. In the past, I have offered a number of bills to limit offshore tax avoidance. Today's bill follows on that trend but focuses specifically on one area of the financial services sector.

The financial services industry has, like all us, experienced a tough year with the economic upheaval. As businesses realign, merge, and in some cases, cease operations, the advantages of a no- or low-tax jurisdiction from which to operate is tempting. The benefits of being headquartered in a tax haven can be quite significant for a company with investment income over long periods of time. Use of affiliate reinsurance allows foreign-based companies to shift their U.S. reserves and their investment income overseas into tax havens, thereby avoiding U.S. tax.

The President has recently suggested a number of proposals tightening tax rules for U.S.-based companies operating overseas. Those proposals deserve a thorough review to assess their merits. But before we consider cracking down on the foreign earnings of U.S. companies, we should make sure we are taxing the earnings of foreign groups that do business in the United States the same way we do for those based here. Ending the tax advantage for foreign-based insurance groups from use of affiliate reinsurance was even a platform issue for candidate Obama last year.

There is no doubt that there is a legitimate role for reinsurance. It is a fundamental business technique for risk management and is to be fostered. However, reinsurance among affiliates can serve other purposes as well, including tax avoidance. Just as Congress and Treasury have attempted to measure what is legitimate in debt transactions between affiliates, there have been previous attempts to address the problem of excessive reinsurance between related entities. Unfortunately, as recent data shows, those attempts have been unsuccessful.

Since 1996, the amount of reinsurance sent to offshore affiliates has grown dramatically, from a total of \$4 billion ceded in 1996 to \$33 billion in 2008, including nearly \$21 billion to Bermuda affiliates and over \$7 billion to Swiss affiliates. Use of this affiliate reinsurance provides foreign insurance groups a significant market advantage over U.S. companies in writing direct insurance here in the U.S. We have seen in the last decade a doubling in the growth of market share of direct premiums written by groups domiciled outside the U.S., from 5.1 percent to 10.9 percent, representing \$54 billion in direct premiums written in 2006. Again, Bermuda-based companies represent the bulk of this growth, rising from 0.1 percent to 4 percent. And it should be noted that during this time, the percentage of premiums ceded to affiliates of non-U.S. based companies has grown from 13 percent to 67 percent. Bermuda is not the only jurisdiction favorable for reinsurance. In fact last year, one company moved from the Cayman Islands to Switzerland citing "the security of a network of tax treaties," among other benefits.

Congress first recognized the problem of excessive reinsurance in 1984 and provided specific authority to Treasury under Section 845 of the tax code to reallocate items and make adjustments in reinsurance transactions in order to prevent tax avoidance or evasion. In 2003, the Treasury Department testified before Congress that the existing mechanisms were not sufficient. In 2004, Congress amended this provision to expand the authority of Treasury to not only reallocate among the parties to a reinsurance agreement but also to recharacterize items within or related to the agreement. Congress specifically cited the concern that these reinsurance transactions were being used inappropriately among U.S. and foreign related parties for tax evasion. Despite this grant of expanded authority, Treasury has still been unable to stem the tide moving offshore.

Recently, a coalition of U.S.-based insurance and reinsurance companies has been formed to express their concerns to Congress. With more than 150,000 employees and a trillion dollars in assets here in the U.S., I believe it is a message of concern that we should heed. Last month, they wrote to the leadership of the House and Senate tax-writing committees urging passage of my bill because, as they wrote, "This loophole provides foreign-controlled insurers a significant tax advantage over their domestic competitors in attracting capital to write U.S. business."

That is why I am again filing legislation to disallow deductions for excess reinsurance premiums with respect to U.S. risks paid to affiliated insurance companies that are not subject to U.S. tax. The excess amount will be

determined by reference to an industry fraction, by line of business, which will measure the average amount of reinsurance sent to unrelated parties by U.S. companies. The bill allows foreign groups to avoid the deduction disallowance by electing to be treated as a U.S. taxpayer with respect to the income from affiliate reinsurance. Thus, the bill merely restores a level-playing field, treating U.S. insurers and foreign-based insurers alike. The legislation provides Treasury the authority to carry out or prevent the avoidance of the provisions of this bill.

My colleagues may be thinking that this sounds similar to another provision in the code, and they would be right. The tax code currently tries to limit the amount of earnings stripping—that is, sending U.S. profits offshore through inflated interest deductions—by disallowing the interest deduction over a certain threshold. In the reinsurance context, U.S. affiliates of foreign based reinsurance entities may be sending offshore excessive amounts of reinsurance to strip those premiums out of the purview of the U.S. tax system. My bill limits the deduction for those premiums to the extent the reinsurance to a related party exceeds the industry average.

I hope that in the coming weeks, my colleagues and experts in the industry will carefully review this new proposal and provide constructive commentary on it. A fuller technical explanation of the bill will be posted on my website, which will provide some background on the industry as well as a technical description of the bill. Madam Speaker, I appreciate the opportunity to address the House on this important matter and I assure my colleagues that I will continue my efforts to combat offshore tax avoidance, regardless of what industry is impacted.

THE GENERATING RETIREMENT OWNERSHIP THROUGH LONG-TERM HOLDING

HON. PAUL RYAN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. RYAN of Wisconsin. Madam Speaker, I, along with Congressman ARTUR DAVIS and Congressman JOSEPH CROWLEY, re-introduce today the Generating Retirement Ownership Through Long-Term Holding ("GROWTH") Act of 2009. At a time when our economy is struggling to recover, this bipartisan bill would provide a valuable tool to hardworking Americans saving for retirement and other financial goals.

Mutual fund investors are overwhelmingly middle-income Americans investing for the long term. For many of these investors, mutual funds provide a low-cost, professionally managed, diversified opportunity in which they can save for their own retirement. Currently, investors who buy shares in a mutual fund and hold them for the long term find themselves taxed as they go—even though no fund shares were sold and no cash was received. This legislation allows mutual fund shareholders to keep more of their own money working for them longer by deferring capital gains taxes until

they actually sell their investment. The GROWTH Act makes it easier for these individuals to meet their retirement savings goals.

Most of our Nation's mutual fund shareholders report that retirement is the primary reason why they are saving. More than 29 million Americans are saving through long-term mutual funds held in taxable accounts, either to supplement their employers' retirement plans, or because they do not have access to such plans. Seventy-six percent of mutual fund investors say that their primary financial goal is to save for retirement. At the same time, almost half—about 76.2 million of 158.1 million workers—are not offered any form of pension or retirement savings at work.

Meanwhile, the costs once in retirement are growing. For example, the Employee Benefit Research Institute estimates that, depending on their source of health insurance coverage and their comfort level with having a 50-percent, 75-percent, or 90-percent chance of having enough savings to cover health insurance premiums and out-of-pocket health care expenses in retirement, men retiring at age 65 in 2019 will need between \$114,000–\$634,000, while needed savings for women range from \$164,000–\$754,000.

Mutual fund investors who automatically reinvest are doing the right thing. They are saving for the longer term, contributing to our national economy, and building up their own retirement nest egg. These Americans should be encouraged to save not punished for doing so through a tax on automatic reinvestments. The tax code needs to help, not hinder, saving for retirement. I urge my colleagues to join us in this effort and cosponsor this legislation.

RECOGNIZING THE GREATER LEANDER CHAMBER OF COMMERCE

HON. JOHN R. CARTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CARTER. Madam Speaker, I would like to recognize the Greater Leander Chamber of Commerce for its great efforts within the community and serving as a helpful resource for the Adopt-a-Unit Program in Leander. The city of Leander participated in adopting troops from the 4th Infantry Division, Fort Hood, Texas. The Program provided soldiers and their families back home with supplies, care packages and moral support during their deployment to Iraq over the last year.

I appreciate the hard work and commitment of the Greater Leander Chamber staff and look forward to what great things it will do in the future.

It is an honor to recognize the Greater Leander Chamber of Commerce and its staff.

EARMARK DISCLOSURES

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LATHAM. Madam Speaker, pursuant to the new House Republican standards on ear-

marks, I am submitting the following information.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Alice Road

Amount Provided: \$750,000

Account: FHWA TCSP—Transportation & Community & System Preservation

Recipient: Iowa Dept of Transportation

Recipient's Street Address: 800 Lincoln Way Ames, IA 50010

Description: This funding would be used for the constructing of a 6-lane arterial blvd. as part of a north-south economic development corridor.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Ames Intermodal Facility

Amount Provided: \$350,000

Account: FTA—Buses & Bus Facilities

Recipient: Ames Transit Agency

Recipient's Street Address: 1700 University Blvd. Ames, IA 50010

Description: This project would construct an intermodal transportation facility that would consolidate three essential transportation functions in Ames, IA. within a single, intermodal facility (intercity bus operations, public transit and parking law enforcement). The funds would accommodate the design phase of this project, in support of a multi-modal and "green" transportation resource. Funding would move the project forward.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Ames Transit Facility Expansion

Amount Provided: \$500,000

Account: FTA—Buses & Bus Facilities

Recipient: Ames Transit Agency

Recipient's Street Address: 1700 University Blvd. Ames, IA 50010

Description: The current bus storage facility is built for 25 vehicles; the facility now houses 70 vehicles on the same site, crowding both storage and maintenance operations. The new facility would be built on the existing site or a satellite site.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Earthworks Engineering Research Center—EERC

Amount Provided: \$500,000

Account: Transportation Planning, Research, and Development

Recipient: Iowa State University

Recipient's Street Address: 1750 Beardshear Hall Ames, IA 50011

Description: The EERC is an effort that does research in the area of geo & construction engineering approaches to U.S. civil infrastructure needs. The research initiatives are aimed at finding better ways to evaluate those technologies and techniques used in earth moving related to new and improved transportation infrastructure. This project is all the more relevant as we approach solutions to infrastructure needs.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Iowa Highway 92 Reconstruction

Amount Provided: \$750,000

Account: FHWA TCSP—Transportation & Community & System Preservation

Recipient: Iowa Dept of Transportation

Recipient's Street Address: 800 Lincoln Way Ames, IA 50010

Description: The project would consist of improvements to Iowa Highway 92 located in Warren County, Iowa. Project would begin approx. 1,000' west of Warren County Road R63 and extend east for approximately 1.3 miles to the city of Indianola. This project is necessary because the existing highway no longer meets current roadway design standards, and has areas of limited passing and sight distance. The area has an above average crash rate.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Jefferson, Iowa Streetscape

Amount Provided: \$385,000

Account: HUD EDI

Recipient: City of Jefferson

Recipient's Street Address: 220 Chestnut St. Jefferson, IA 50129

Description: This is phase I of a multi-phase streetscape initiative that includes underground wiring for signal controls, sidewalk re-facing and general improvements from the back of curbs to building fences in a four-block area around the Greene County Courthouse.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Jet Engine Technology Inspection to Support Continued Airworthiness—JET

Amount Provided: \$700,000

Account: Research (FAA)

Recipient: Iowa State University

Recipient's Street Address: 1750 Beardshear Hall Ames, IA 50011

Description: The JET program at Iowa State Univ. develops advanced inspection techniques for jet engine components to enable the use of more fuel efficient engine technologies, and to ensure that new material & design approaches do not compromise safety. Aviation safety is important to the industry, particularly as new materials are driven close to margins of safety.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Marshalltown Bus Replacement

Amount Provided: \$315,000

Account: FTA—Buses & Bus Facilities

Recipient: City of Marshalltown

Recipient's Street Address: 24 N. Center St. Marshalltown, IA 50158

Description: The City of Marshalltown is seeking to replace one "low-floor" bus that is 17 years old. The funding is needed to assist in the purchase of a replacement bus for use as part of the city public transportation fleet.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: Roger Snedden Dr. Extension/Grade Separation—Phase 1

Amount Provided: \$1,000,000

Account: FHWA TCSP—Transportation & Community & System Preservation

Recipient: Iowa Dept of Transportation

Recipient's Street Address: 800 Lincoln Way Ames, IA 50010

Description: This project is oriented toward safety improvement with the reconstruction of Industrial Park Road, including the widening of this heavily traveled road, and planned construction of a railroad overpass. Funding is needed for reconstruction of Industrial Park Rd, in anticipation of overpass construction. The overpass grade separation will allow safe crossing over a busy railroad switchyard, improving safety and environmental impacts.

Bill Number: H.R. 3288—Transportation, Housing and Urban Development, and Related Agencies Appropriations Act, 2010

Project Name: West Grand Avenue Extension

Amount Provided: \$750,000

Account: FHWA TCSP—Transportation & Community & System Preservation

Recipient: Iowa Dept of Transportation

Recipient's Street Address: 800 Lincoln Way Ames, IA 50010

Description: This project is comprised of three roadway segments that will be part of the transportation infrastructure in SE Dallas County, IA. The roadway corridor improvements will provide access from I-35 to a technology park and, ultimately, connect to I-80 and the SW Beltway in Madison County, IA. The funding in the bill is for necessary planning and environmental reports.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Portable Rapid Bacterial Warfare Detection Unit

Amount Provided: \$4,000,000

Account: Research, Development, Test and Evaluation, Defense-Wide

Recipient: Advanced Analytical Technologies, Inc.

Recipient's Street Address: 2901 South Loop Drive, Ames, IA 50010

Description: The project objective is to develop portable instrumentation that provides biological warfare identification in drinking water samples in hours or minutes instead of days. This technology provides the rapid response needed to protect our troops from exposure to harmful agents on the battlefield, and could also have homeland security applications. For example, early bird flu virus identification in remote areas could help avert a pandemic flu scenario. This technology would provide for the rapid detection of biological warfare agents both domestically and internationally.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Shared Vision

Amount Provided: \$3,000,000

Account: Research, Development, Test and Evaluation—Army

Recipient: Mechdyne Corporation.

Recipient's Street Address: 11 East Church Street, Marshalltown IA 50158

Description: The project objective is to develop software and hardware to achieve a capability to provide all levels of military command with access to real-time, visual information about a battle space, for use in mission planning and after action review. The result

will be a battlefield-ready Army Battle Command System that integrates information collected using a wide range of methods (reconnaissance imagery, direct surveillance, sensors, etc.) to create virtual representations of a given area, providing an operational picture for all mission phases. The request will provide funding needed to proceed with field-testing and evaluation of the system, the next stage of development with the U.S. Army.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Wireless Medical Monitoring System (WiMed)

Amount Provided: \$3,000,000

Account: Research, Development, Test and Evaluation—Army

Recipient: Athena GTX

Recipient's Street Address: 3630 SW 61st Street, Suite 395

Description: The purpose of the project is to greatly improve casualty care in combat situations, where medics are unable to effectively monitor injured soldiers' conditions. Current medical triage monitors and vital signs data tracking tools are complex, heavy, and have numerous wires with bulky connections. Wounded soldiers in Iraq will see care within one hour, and in Afghanistan the time may exceed four hours. There are often extensive delays in air evacuations during fire fights and a definitive lack of medical state monitoring. The Wireless Medical Monitoring System ensures that medical triage can be performed effectively by medics on the battlefield, and that medical information about the casualty is retained to improve treatment following evacuation. The system includes a stick-on sensor that integrates pulse oximetry, blood pressure, temperature, skin humidity, and electrocardiograms into a single unit. Information from these units is broadcast to a single monitoring screen used by the medic, using Wi-Fi technology. The U.S. Army and the National Trauma Institute are currently conducting comprehensive clinical trials across numerous Level 1 Trauma Centers using this system.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: HyperAcute Vaccine Development

Amount Provided: \$4,500,000

Account: Research, Development, Test and Evaluation—Army

Recipient: BioProtection Systems Corporation

Recipient's Street Address: 2901 S. Loop Drive, Suite 3360, Ames, IA 50010

Description: The project objective is to develop anti-viral vaccines for use against Ebola, Crimean Congo and other biological warfare agents. Although millions of dollars have been spent on Biological Defense over the past several years, only a handful of vaccines/medications have been developed to counter known threats. Unfortunately, most have proven to be weak and impractical to administer because they require multiple doses for protection or treatment. Importantly, these vaccines would not protect against genetically engineered biological weapons, which are relatively easy to produce. The vaccine technology is being developed to (1) enhance current vaccines, making them more effective and practical for use, (2) generate vaccines for known threats where

a vaccine does not exist, and (3) develop a vaccine platform that could be adapted for newly developed biological agents. This request covers the third year in a three-year development plan for this vaccine technology, which was selected by the Department of Defense to satisfy existing military requirements, and has received funding through the National Institutes of Health, and the Defense Threat Reduction Agency.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Advanced Live, Virtual, and Constructive (LVC) Training Systems
Amount Provided: \$3,500,000

Account: Research, Development, Test and Evaluation—Army

Recipient: Iowa State University
Recipient's Street Address: 1750 Beardshear Hall, Ames, IA 50011–2035

Description: The Virtual Reality Applications Center (VRAC) located at Iowa State University has a scientific team leading research in the development of advanced software prototypes that utilize immersive virtual warfighting environments, in collaboration with the U.S. Army. Keeping up with the unique demands of urban combat and ever-changing environments in counterinsurgency warfare requires flexible and adaptive training systems that can be modified rapidly and deployed effectively in the field. This project is intended to help the Department of Defense meet its training objective to ensure soldiers can improvise and adapt to emerging challenges.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Multi-Utility Materials for Army Future Combat Systems

Amount Requested: \$1,000,000
Account: Research, Development, Test and Evaluation—Army

Recipient: Iowa State University
Recipient's Street Address: 1750 Beardshear Hall, Ames, IA 50011–2035

Description: This initiative is designed to enable Iowa State University, in partnership with Florida A&M University and the South Dakota School of Mines & Technology, to support the U.S. Army in developing and evaluating weapons and protective armor materials, with emphasis on survivability. This includes the development of new materials and non-destructive techniques to assure that the materials have the desired properties to provide the best and most reliable physical protection to the soldier.

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Project Name: Low Cost GPS Receivers
Amount Provided: \$4,000,000

Account: Defense Production Act
Recipient: Rockwell Collins
Recipient's Street Address: 400 Collins Rd., Cedar Rapids, IA 52498

Description: This initiative is funded under the "Defense Production Act," which ensures that certain products are manufactured in America—for national security reasons. The primary objective of the program is to bring production of the "substrate" used to construct military GPS microchips back to the U.S. from overseas. The funding will also further development of the next generation military GPS receiver, which will be smaller, more accurate,

more secure, and cheaper to produce. Cost savings will allow the purchase of a higher number of receivers so that each squad of soldiers could have one. Due to the current shortage of military GPS units, soldiers are purchasing and using commercial handheld devices that are highly vulnerable to electronic interference, jamming, and spoofing.

INTRODUCTION OF THE "MEDICAL DEBT RELIEF ACT OF 2009"

HON. MARY JO KILROY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. KILROY. Madam Speaker, today I introduce legislation, the "Medical Debt Relief Act of 2009," which would protect those hard-working Americans who play by the rules, pay or settle their medical debts, yet find their economic well-being and their credit scores adversely affected for years due to medical debt, large or small, that has gone to collection.

The "Medical Debt Relief Act of 2009" would prohibit all consumer credit agencies and creditors from using paid off or settled medical debt collection in assessing a consumer's creditworthiness.

Medical debt is unique. Americans don't choose when accidents happen or when illness strikes. Medical debt collection issues affect both insured and uninsured.

According to credit evaluators, medical debt collections are more likely to be in dispute, inconsistently reported, and of questionable value in predicting future payment performance because it is atypical and non-predictive.

Nevertheless, medical debt that has been completely paid off or settled can significantly damage a consumer's credit score for years. As a result, consumers can be denied credit or pay higher interest rates when buying a home or obtaining a credit card.

The issue of medical debt affects millions. In fact, according to the Commonwealth Fund, medical bill problems or accrued medical debt affects roughly 72 million working-age adults in American. For 2007, 28 million working-age American adults were contacted by a collection agency for unpaid medical bills.

RECOGNIZING THE CITY OF ROUND ROCK, TX

HON. JOHN R. CARTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CARTER. Madam Speaker, I would like to recognize the city of Round Rock and its staff for their great work within our area with the Adopt-a-Unit Program. The city of Round Rock adopted soldiers from the 4th Infantry Division, Fort Hood, Texas. The city provided troops with supplies and support over the last year during their deployment to Iraq. Jill Goodman and Eric Whitfield were key players in the city's operation to offer support to these soldiers and their families.

I appreciate the work and dedication of the city of Round Rock staff and citizens and look

forward to all that their efforts will bring in the future.

It is an honor to recognize the city of Round Rock for its great work.

TRIBUTE TO MR. JOSEPH CANNON HOUGHTELING

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. ESHOO. Madam Speaker, I rise today to pay tribute to a Bay Area icon, Joseph Cannon Houghteling, who passed away at his home on June 23, 2009, in San Francisco, California, at the age of 84. He was a distinguished American, a dedicated publisher, and a devoted husband, father and grandfather.

Joe Houghteling was born in San Francisco and attended Phillips Academy in Andover, Massachusetts. He graduated from Yale in 1947 and throughout his life lived in Palo Alto, Los Gatos, Atherton and Portola Valley.

In the 1950s, 1960s, and 1970s, Joe Houghteling and his partners published a string of newspapers that included the Los Gatos Times-Observer, The Sunnyvale Standard, The Mountain View Register-Leader, The Gilroy Dispatch, and The Pleasanton Times. He was a California delegate to the Democratic Conventions in 1956, supporting Adlai Stevenson, and in 1960, supporting John F. Kennedy.

He was Northern California Treasurer of the 1960 Kennedy campaign and he actively participated in many other campaigns, including those of Governors Pat and Jerry Brown, Senator John Tunney, Senator DIANNE FEINSTEIN and former Congressman Pete McCloskey. He also served on the State Park Commission, the State Highway Commission, the San Francisco Bay Conservation and Development Commission, and the Metropolitan Transportation Commission.

Joe Houghteling was President of the National Maritime Museum Association in San Francisco from 1992–1994 and served on the boards of many distinguished nonprofits including Stanford Hospital, California Tomorrow, the Planning and Conservation League Foundation, the Coro Foundation, Peninsula School and the California Newspaper Publishers Association.

Joe Houghteling lived his life beautifully, gracefully, and full of commitment and our country and our community are immensely better because of him. I was blessed to know him, to have had his wise counsel and to have his loyal support throughout all the years of my public service.

Madam Speaker, I ask my colleagues to join me in extending our deepest sympathy to Mr. Houghteling's wife, Signa Judith Irwin Houghteling, his daughters, Anne of Palo Alto, Elizabeth of Cambridge, Massachusetts, and Mary of Berkeley, and his grandson, Philip Cannon Houghteling Balboni of Cambridge, Massachusetts. Joseph Cannon Houghteling gave our country a lifetime of service and we are a grateful nation for all he did throughout his special life.

RECOGNIZING 30 YEARS OF LAW
ENFORCEMENT SERVICE FROM
CHIEF RICHARD A. JAMISON

HON. HENRY CUELLAR

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CUELLAR. Madam Speaker, I rise today to publicly celebrate 30 years of service in law enforcement by Chief Richard A. Jamison.

Richard Jamison joined the Converse Police Department on August 23, 1979. Within just 1 year, he was promoted to Corporal in Patrol. Through his hard work and dedication to the job of protecting the citizens of Converse, Mr. Jamison was promoted to Chief of Police on April 24, 1999.

He has shown such a devotion to Converse that he does more than just act as Chief of Police; he also serves his community. Chief Jamison was voted citizen of the year by the Converse Lions Club 2003–2004, for his many service contributions to the community.

He has also supported Project Graduation at Judson High School for 21 years, to protect our high school graduates from the dangers of drunk driving. He has been instrumental in fundraising efforts to support this program.

Madam Speaker, it is a great honor to recognize 30 years of service from Chief Richard A. Jamison. I am proud to be here today to publicly honor this great citizen of the 28th district of Texas.

HONORING THE VIRGINIA GARCIA
MEMORIAL HEALTH CENTER

HON. DAVID WU

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. WU. Madam Speaker, I rise today to recognize the significant and enduring contributions of the Virginia Garcia Memorial Health Center and all community health workers in Oregon.

Virginia Garcia Memorial Health Center was founded in 1975 following the tragic death of 6-year-old Virginia Garcia. Accompanying her parents from Texas to Oregon to work in the strawberry fields, an untreated foot wound turned deadly when Virginia couldn't get basic medical treatment because of linguistic and cultural barriers. In an effort to prevent similar tragedies from occurring, the community came together to establish the Virginia Garcia Memorial Health Center.

As we celebrate Migrant Farmworker Health Day and recognize our special partners—Providence Health System, Marie Napolitano, and Rosalia Ginsberg—it is important to take a moment and reflect on how far we've come.

Today Virginia Garcia employs 300 people and provides high-quality, comprehensive, and culturally appropriate services to more than 30,000 patients a year in Washington and Yamhill counties. It operates four primary care clinics, three dental offices, and two school-based health centers, as well as providing outreach to schools, community centers, and migrant and seasonal farm workers through its mobile clinic.

Without clinics like Virginia Garcia and its network of community partners it isn't clear where many of our region's most vulnerable residents would turn for essential, basic health care. I applaud Virginia Garcia's commitment to providing important health care services to the residents of the 1st Congressional District and stand by its mission to eliminate barriers to access.

It is an honor for me to recognize the Virginia Garcia Memorial Health Center and its special partners for their contributions to health in Oregon.

EARMARK DECLARATION

HON. FRED UPTON

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. UPTON. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3326, the Department of Defense Appropriations Bill for fiscal year 2010.

1. Advanced Digital Hydraulic Drive Systems

Account: Research, Development, Test and Evaluation—Army

Legal Name of Requesting Entity: Eaton Corporation

Address of Requesting Entity: 26201 Northwestern Highway, Southfield, MI

Amount: \$2,500,000

Description of Request: The objective of this project is to develop and demonstrate a hybrid hydraulic drive system on military 4x4 vehicles. This compact drive system will enable vehicles to be operated more safely and effectively on even the harshest terrains, and also save a substantial amount of fuel. Having seen firsthand the challenges vehicles currently face with respect to immobilization, rollover or forced-slow speeds due to weight, the value of such a system is very apparent. The additional weight of important armor results in increased problems with maneuverability, so the reduced weight of the new hybrid system addresses this problem. In addition to reducing the weight of the drive system, this project will also increase fuel efficiency by roughly 60 percent. The increased fuel efficiency will provide clear logistical benefits by increasing vehicle range and decreasing vehicle re-fueling requirements. This is not at the expense of vehicle performance, however, as the reduced weight will actually add to vehicle traction and performance.

Funding Breakdown: Funding for Phase III of this program will be used specifically to (1) develop and demonstrate a laboratory-scale advanced digital hydraulic system and (2) create and demonstrate a retrofit-kit prototype inserted onto a demonstrator vehicle. Approximately 10 percent of the funds will be used for high pressure component and system reliability testing, 10 percent will be used to develop drivetrain-specific parametric models from vehicle drive-test data, 35 percent to develop the retrofit kit and 45 percent to develop the lab-scale system integrating advanced components.

Justification for the use of taxpayer dollars: This project will dramatically increase fuel efficiency in military vehicles, and hence, provide logistical benefits as well as preserve fuel. The new hybrid system will also reduce vehicle weight, which will add to vehicle performance and allow for vehicles to carry increased armor or supplies.

2. University of Michigan Center for the Genetic Origins of Cancer

Account: Research, Development, Test and Evaluation—Army

Legal Name of Requesting Entity: The University of Michigan Comprehensive Cancer Center

Address of Requesting Entity: 1500 E Medical Center Drive, Ann Arbor, MI

Amount: \$2,500,000

I am supporting Rep. JOHN DINGELL's request for funding for the University of Michigan's Center for the Genetic Origins of Cancer. The goal of the Center for Genetic Origins of Cancer is to accelerate the discovery of molecular signatures of cancers and rapidly develop personalized treatments for cancer patients. This initiative's purpose is to deliver the right treatment to the right patient at the right time. Specifically, the funding will be going to three things: integrative oncogenomics, which would identify novel gene fusions in tumors of the breast, prostate, lung, and colon; unique animal models, which would use recent breakthroughs in gene fusion research in animals to mimic tumors in humans; and lastly, to study the functional genomics of cancer stem cells, which are believed to be the cells that actually start the growth of tumors. This is very exciting research, and it could very soon benefit thousands of my constituents, and millions of folks across the country.

Funding Breakdown: The DOD funding will account for roughly 18 percent of funds for this program. 36 percent of the funding will go toward research costs, 30.5 percent of this funding will go toward equipment and cores, 23.5 percent will go to miscellaneous needs, including a sequencing machine, cell sorter, and auto starter.

HONORING RECIPIENTS OF THE
2009 THIRD DISTRICT EXCELLENCE
IN ECONOMIC DEVELOPMENT
AWARD

HON. ADRIAN SMITH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SMITH of Nebraska. Madam Speaker, I rise today to honor ten individuals, organizations and businesses from Nebraska for receiving the 2009 Third District Excellence in Economic Development Award.

Nebraska, like many rural states, unfortunately has seen a "brain drain" in recent years and, now more than ever, needs entrepreneurs and innovators.

In May, I called for nominations for individuals, businesses, and organizations which have helped strengthen Nebraska communities. These entrepreneurs do more than just build successful businesses. They host charity

events, serve on local chambers of commerce, and shape the character of our towns and cities.

The nominations came from many different people, from a teenager starting his own lawn-mowing business to a mainstay in the Nebraska business community. All of the nominees have shown they are striving to help their home towns succeed into the future.

Steve Brown, of Thedford, began an entrepreneurial scholarship for graduating seniors if they return to the community and begin a business, which was matched by the Custer County Chief. He is also the president of the Thedford Area Community Foundation board. The TACF has held a banquet for the past 5 years and has brought in close to \$25,000 every year. They then have given up to \$15,000 back to the community for repairs and improvements.

Since 1977 Adam Broughton has helped promote the City of York, saved jobs, and established and expanded a number of businesses. He has served with the York Chamber of Commerce, the York County Development Corporation, and Sertoma. He was instrumental in obtaining two \$500,000 grants for the community of York, one for Gerber Foods Corporation and the other for Great West Teeuwissen Corporation. Those grants have helped keep over 40 jobs and the businesses in York. Adam helped to start Crystal Lake Foods, which processes food products for the United States and Asian Rim countries.

In less than 4 years, Clark Swihart of Columbus has built a company employing 14 Nebraskans and is a rapidly growing e-commerce company, specializing in unique promotional products—such as custom silicone wristbands, t-shirts, and more. He has created a unique service, jobs, and revenue.

Began as a combined effort of Twin Valleys Public Power District in Cambridge, Southwest Nebraska RC&D in Cambridge, and Trail Blazers RC&D in Red Cloud, the Furnas/Harlan Partnership of Arapahoe is striving to build a unified vision for economic development in Furnas and Harlan counties. The Partnership works with individual communities to help promote the surrounding communities and educate residents to help further their careers.

GROW Nebraska of Holbrook is a non-profit organization which has helped hundreds of small businesses and entrepreneurs in Nebraska for more than 10 years. From training sessions to networking and access to new markets through cooperative ads, GROW has helped Nebraska business grow and succeed. Recently GROW Nebraska was selected as a finalist for the eBay Seller's Challenge. GROW has also introduced a Flavors Project. The project gives people "GROW bucks" and allows them to use them at various participating locations just like cash.

Rich and Kellie Patterson, owners and operators of Hometown Hardware in Kimball, have made a name for themselves through their dedication to customer service and devotion to community. The young couple have been described as an "anchor of our downtown" and in just 2 years have already expanded their store.

Though only in high school, Ryan Grossnicklaus of Aurora owns and operates a lawn mowing company in Aurora and was re-

cently awarded a scholarship by the National Federation of Independent Business Young Entrepreneur Foundation.

Todd Messing of Columbus started his own business, Messinc, in 2004. Todd is involved in the New Neighborhoods Initiative grant process to provide affordable housing to those with low to moderate income. His main goal is to provide assistance to community and economic development using education and volunteerism while keeping a profitable and environmentally-friendly business process.

Finally, Xpanxion LLC of Kearney is an international software development company which has placed a priority on hiring Nebraskans, has opened a quality assurance center in Kearney, and has focused on working closely with the University of Nebraska-Kearney. Xpanxion's has already created 16 full-time jobs and 4 part-time positions, and plan to add more jobs in the future. Xpanxion has helped curb the "brain drain" by hiring employees back to rural Nebraska from places outside of Nebraska.

I am proud to be able to recognize all of the honorees today and I thank them for their service to Nebraska.

HONORING KIMBERLY BRAZIER UPON RECEIPT OF THE GIRL SCOUT GOLD AWARD

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISRAEL. Madam Speaker, I rise today to acknowledge a young woman in my district, Kimberly Brazier.

Kimberly will receive the Girl Scout Gold Award on August 3, 2009. For her project, she made two decorative wall quilts for the Huntington Hills Center for Health and Rehabilitation for senior citizens there to enjoy. I wish to commend Kimberly for her community service.

EARMARK DECLARATION

HON. FRANK A. LoBIONDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LoBIONDO. Madam Speaker, as per the requirements of the Republican Conference Rules on earmarks, I secured the following earmarks in HR 3326:

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 3326

Account: Army—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: (1) Drexel University, (2) Waterfront Technology Center

Address of Requesting Entity: (1) 3141 Chestnut Street, Philadelphia, PA 19104; (2) 200 Federal Street, Suite 300, Camden, NJ 08103

Description of Request: Provide an earmark of \$3.8 million for Applied Communications and Information Networking (ACIN). ACIN enables the warfighter to rapidly deploy state-of-

the-practice communications and networking technology for warfighting and National Security. This funding will build on funding from previous years to fully develop this technology.

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 3326

Account: Air Force—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: Accenture

Address of Requesting Entity: 200 Federal Street, Suite 300, Camden, NJ 08103

Description of Request: Provide an earmark of \$4.0 million for Distributed Mission Interoperability Toolkit (DMIT). DMIT is a suite of tools that enables an enterprise architecture for on-demand, trusted, interoperability among and between mission-oriented C4I systems. This spending will build on funding from previous years to allow DMIT to be extended to Joint and coalition requirements, and address current weaknesses in Air Force management years ahead of current schedules. Adoption by major programs and commercial entities would lead to savings in the \$100 millions on current and future DOD programs.

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 3326

Account: Navy—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: Absecon Mills Inc.

Address of Requesting Entity: Vienna and Aloe Avenues, PO Box 672, Cologne, NJ 08213

Description of Request: Provide an earmark of \$2.5 million for Force Protection—Non Traditional Weaving Application for Aramid (Ballistic) Fibers and Fabrics. By re-evaluating standard industry design and manufacturing techniques for force protection technology, we believe Non Traditional weave designs of Aramid (ballistic) fiber coupled with new applications of microwave plasma treatments can enhance the strength of the fiber and result in enhanced individual mobility, ease of medical access, reduced weight, increased ballistic protection, cost effective savings and weight reduction of ballistic materials currently used.

Requesting Member: Congressman FRANK LoBIONDO (NJ-02)

Bill Number: H.R. 3326

Account: Air Force—Advance Procurement

Legal Name of Requesting Entity: L-3 Communications Systems

Address of Requesting Entity: 1 Federal Street, Camden, NJ 08103

Description of Request: Provide an earmark of \$3.0 million for Senior Scout COMINT (Communications Intelligence) Capability Upgrade. As part of the Senior Scout ongoing mission, there is an immediate need to add improved COMINT capability to detect and characterize new, modern, low-power radio signals at extended standoff ranges in the presence of interference. The current systems are not able to detect these specific signal sets, which limits intelligence collection capabilities.

GOD BLESS, THANK YOU AND GOOD LUCK, LIEUTENANT COLONEL REBECCA LEGGIERI, MILITARY FELLOW TO THE 13TH CONGRESSIONAL DISTRICT OF MICHIGAN

HON. CAROLYN C. KILPATRICK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. KILPATRICK of Michigan. Madam Speaker, I rise today to say thank you and wish continued blessings of God upon U.S. Army LTC Rebecca Leggieri. Lieutenant Colonel Leggieri served as a 90-Day Military Fellow in the office in my 13th Congressional District Office of Michigan in Washington, DC, and is due to report to the Pentagon's Office of Public Affairs in a few days as she continues her service to our Nation.

Lieutenant Colonel Leggieri was invaluable in her ability in educating the office about the valued role that America's servicemembers perform every day to protect our freedom. As a mother, Army warrior and patriot, Lieutenant Colonel Leggieri offered a unique perspective on the impact and effect of the decisions that Congress, in general, and the House Appropriations Committee on Defense, in particular. I am proud that, in the United States of America, women who have ability, character and quality can advance to the upper levels of the military as Lieutenant Colonel Leggieri.

Lieutenant Colonel Leggieri was born in Schenectady, New York to Joseph V. Palowich and the late Monica Palowich. She graduated from Notre Dame-Bishop Gibbons High School in Schenectady, New York where she excelled at basketball, track and swimming. Today, Lieutenant Colonel Leggieri is still involved in athletics with her children and continues to maintain a healthy lifestyle.

Rebecca graduated from Saint Lawrence University in May 1989 with a bachelors of arts degree in English Writing and Government. Lieutenant Colonel Leggieri was a 4-year Army Reserve Officers Training Corps (ROTC) scholarship student at Saint Lawrence University and was commissioned as a Second Lieutenant in the Quartermaster Corps upon her graduation from college. She served in command and staff positions in Quartermaster and Logistics units in New York, Virginia, Nebraska and Arkansas before being assigned to Washington, DC. She later earned a masters degree in Public Communications from American University in May 2004.

Rebecca began her career in Army Public Affairs at the Pentagon in 2002 as the Speechwriter for the Chief of the Army Reserve. Lieutenant Colonel Leggieri then served as the Public Affairs and Media Officer at the White House Office of National Drug Control Policy from June 2004 until June 2005. She is currently serving as the Community Relations Public Affairs Officer for the Army's Chief of Public Affairs in the Pentagon.

While Lieutenant Colonel Leggieri has served for the last 3 months on Capitol Hill as an Army Fellow in the Army Congressional Orientation Program, ACOP, and assigned to me, Congresswoman CAROLYN C. KILPATRICK, I have learned much about the contributions of

our individual servicemembers and their families. I thank the Secretary of the Army and former Congressman Pete Geren and Army Chief of Staff General George W. Casey, Jr. for this wonderful program that is a tremendous benefit to all Members of Congress.

Lieutenant Colonel Leggieri is also very active in the local community, serving for the past 4 years as Public Relations Chair on the Board of Directors for Coles Little League in Manassas, Virginia.

In thanking and wishing the continued grace of God to Lieutenant Colonel Leggieri, I also extend the same to her family. Rebecca is married to COL John Leggieri, also in the United States Army and from New York State. John and Rebecca were married 16 years ago, on July 24, 1993. They have two children, 14-year-old Olivia, who is entering high school this fall and 11-year-old Gabriel, who will be entering middle school.

Thank you Lieutenant Colonel Leggieri for your continued public service to the people of the 13th Congressional District of Michigan, to our Nation, and to the world. May you, your family and all of America's military have God's continued good grace and infinite blessings.

TRIBUTE TO LTJG EDWIN NORTH

HON. DAVE CAMP

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CAMP. Madam Speaker, I rise today to pay tribute to LTJG Edwin North in recognition of the 11 years of honorable service in the United States Navy during and after World War II.

Edwin North started his military career in the U.S. Army ROTC at Michigan State University. In 1943, he decided to join the U.S. Navy where he served with distinction on various ships in the Pacific Theater, including the heavy cruiser USS *Tuscaloosa*. He also served as captain of a Landing Craft Tank, LCT, where amongst his other duties, he ferried sailors, rescued from the sinking of the USS *Indianapolis*, from the USS *Doyle* to the island of Peleliu for treatment. On his LCT he performed other tasks like transporting equipment ship-to-shore, and transporting slave labor survivors, who had been rescued from Japanese capture, from Peleliu Island to resettlement on Koror Island.

In addition, Lieutenant junior grade North served with great honor and distinction in numerous other activities in the Pacific Theater, performing reconnaissance missions and deliveries ship-to-shore on his LCT, mostly in areas of potential danger to life and craft that were still under Japanese control. In another instance, Lieutenant junior grade North was handpicked to be an observer in the turret of an amphibious PBV observation plane. He performed these duties calmly and courageously, gaining praise for his surveying and observation skills in the midst of a high level of danger while reconnoitering active Japanese emplacements and other potential Naval targets on New Guinea. Lieutenant junior grade North was seriously injured in a fire resulting from the collision of his combat ship

with its supply ship. He spent several months in various hospitals recovering from his injuries before returning to duty.

Following his service in the Pacific Theater, Lieutenant junior grade North was assigned stateside to the Great Lakes Naval Training Center near Chicago, Illinois. On January 19, 1954, LTJG Edwin North was honorably discharged from active duty after eleven years of service in the United States Navy. In more recent times, Lieutenant junior grade North served as a volunteer with distinction in the Michigan Governor's Home Guard.

On behalf of the Fourth Congressional District of Michigan, I am honored today to recognize LTJG Edwin North in gratitude for his eleven years of service to our country. I hope the years to come will bring him health, happiness, and special memories with family and friends. We are thankful for his dedication to this nation, and wish him and his family the best.

CONGRATULATING THE PARTICIPANTS OF THE HOUSE FELLOWS PROGRAM

HON. JOHN B. LARSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LARSON of Connecticut. Madam Speaker, I rise today to congratulate the participants of the House Fellows Program. The House Fellows Program, run by the Office of the House Historian, is a unique opportunity for a select group of secondary education American history and government teachers to experience firsthand the inner-workings of Congress. These educators have demonstrated excellence in the classroom, are dedicated to educating our Nation's youth and are truly deserving of our recognition.

One of the goals of the House Fellows Program is to develop curriculum on the history and practice of the House for use in schools. During the program, fellows prepare a brief lesson plan on a congressional topic of their choosing, which is then shared with the other fellows. These plans will become part of a larger teaching resource database on the House. During the school year following their participation in the House Fellows Program, each Fellow is responsible for presenting his or her experience and lesson plans to at least one in-service institute for teachers of history and government.

Since the House Fellows Program began in 2006, 63 teachers from across the country have participated in this innovative program, with 12 more enrolled for this summer. With plans to select a teacher from every congressional district over the next several years, the House Fellows Program will impact thousands of high school teachers and their students and will energize thousands of students to become informed and active citizens.

As a former U.S. history teacher, I believe strongly in the importance of civic education. We must continue our efforts to get our youth involved in the political process in districts across the country. Educating teachers about the "People's House" is one of the best ways

to do that. I congratulate the following educators who are participating in the 7th session of the House Fellows Program:

Ms. Rachel Snell (CAMP, MI-4); Mr. Ronald Hailey (McDERMOTT, WA-7); Ms. Rosemary Quirk (NEAL, MA-2); Ms. Jennifer S. Venable (BARTON, TX-6); Ms. Cheryl Anderson and Mr. David Martin (LEWIS, GA-5); Ms. La-Shanda West (ROS-LEHTINEN, FL-18); Ms. Rhonda Rush and Ms. Jessica Newman (BACHUS, AL-6); Mr. Michael Feldman (CASTLE, DE-AL); Mr. Don Woods (HALL, TX-4); Mr. George Blackledge (TAYLOR, MS-4).

Madam Speaker, I urge all of my colleagues to join me in thanking the Office of the Historian for sponsoring this program. Thanks to Dr. Robert Remini and Dr. Fred Beuttler for their outstanding leadership, and Dr. Thomas Rushford, Dr. Charles Flanagan, Mr. Dave Veenstra, Mr. Anthony Wallis and Mr. Benjamin Hayes for providing the crucial staff support. Thank you also to the Office of the Historian interns: Mr. Maurice Robinson, Mr. Parker Williams, Ms. Kaitlin Utz and Ms. Debbie Kobrin.

HONORING JOHN AND GINNY
McELENNEY

HON. BRUCE L. BRALEY

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BRALEY of Iowa. Madam Speaker, I rise to commend John and Ginny McEleney for their dedication to the City of Clinton and the State of Iowa, and for their leadership in the U.S. auto industry.

John and Ginny McEleney are third generation automobile dealers and their children are continuing this tradition. John became a dealer-operator when he was only 24 years old. Today, he is President of McEleney Autocenter Inc., in Clinton, Iowa, and McEleney Autoplex, Inc., in Iowa City, Iowa.

John is a past chairman of the Iowa Automobile Dealers Association and has served on multiple national dealer councils. In 2003, he was elected to the National Automobile Dealers Association (NADA) Board of Directors and he is currently chairman of the NADA. Over the past months the international auto industry has experienced unprecedented change. Throughout this period John McEleney has been a tireless and effective advocate for his colleagues and the thousands of Americans who work in auto dealerships. He has fought to protect jobs and chart a profitable course for the industry in the future.

The McEleney family and their businesses have made Clinton and communities across Iowa better places to live and work. Madam Speaker, I join the Iowa Automobile Dealers Association, the National Automobile Dealers Association, and the entire Clinton community in thanking John and Ginny McEleney for their generosity and leadership.

HONORING THE SERVICE OF
CLARENCE "CAL" W. MARSELLA

HON. ED PERLMUTTER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. PERLMUTTER. Madam Speaker, I am submitting this statement to express congratulations and gratitude to Clarence "Cal" W. Marsella on the occasion of his retirement as General Manager of the Regional Transportation District (RTD).

Under Mr. Marsella's leadership, RTD built partnerships with local, state and federal officials to realize a vision of an innovative public transit system that meets the unique needs of our region.

During his tenure with RTD, Mr. Marsella oversaw the successful completion of three new light rail lines, including the T-REX light rail project that opened November 17, 2006. In 2004 metro area voters overwhelmingly approved the FasTracks transit expansion program for the eight-county metro area. This represents the largest transit-only voter approved program in the United States. With Mr. Marsella's determination, progress on the FasTracks program has moved ahead swiftly, and construction is currently underway on the West Corridor which runs from downtown Denver to Golden, Colorado.

Mr. Marsella began his transportation career in the highway engineering division of the State of Connecticut Department of Transportation in 1974. He now serves on the National Academy of Sciences Transportation Research Board and regularly lectures at the University of Denver and the University of Colorado masters degree programs in Transportation and Public Administration. He also speaks to numerous groups on the benefits and nuances of public-private partnerships. He was selected by the American Public Transportation Association as the Outstanding Public Transportation Manager in 2006 and, under his leadership, RID was selected as the Outstanding Transportation Agency in North America in 2003 and 2008.

I congratulate and extend my sincere gratitude to Cal Marsella for his service to the Denver region. I wish him continued success and all good fortune in his work ahead.

INTRODUCTION OF THE FAIR
HOUSING COMMEMORATION BILL
OF 2009

HON. ELEANOR HOLMES NORTON

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. NORTON. Madam Speaker, today I rise to introduce The Fair Housing Commemoration Act of 2009 to commemorate The Fair Housing Act (FHA), enacted in April 1968, the last of the three great civil rights acts of the 1960's, with a monument in the Nation's Capitol. The Fair Housing Commemorative Foundation is raising funds and is working with the National Capital Memorial Advisory Commission (NCMAC) to adhere to the requirements

and process established by the Commemorative Works Act of 1986. This may be the first time that a sector of our economy has decided to raise a monument commemorating a statute that regulates some of its practices. The Foundation's precedent is commendable.

Fair housing and the movement to bring equal opportunity in the real estate markets are intertwined with our nation's history. The federal government has both been a part of the problem and an integral part of its solution. Every branch of the federal government has played a key role in our national progress towards fair housing. It is fitting that we commemorate not only the passage of the Fair Housing Act, but also the history of our nation's path towards equal opportunity in housing.

THE NATION'S BEGINNING

The Fifth Amendment to the Constitution establishes a right to own private property that the government cannot take without just compensation. Early immigrants sought a place where they could own and transfer real estate without the arbitrary interference of the government. That right was not universal. Slavery denied basic rights to a whole class of Americans based on race, and reduced some of our people to the subhuman status of property. Among the effects of slavery was the denial of the right to own and use real property.

POST CIVIL WAR

The Civil War and the constitutional amendments ending slavery were accompanied by laws that gave all citizens the same rights as white citizens to own and use real property. The Civil Rights Act of 1866 was our nation's first "fair housing" law. Subsequent years saw that law ignored and severely limited by court decisions, culminating with the philosophy of "separate but equal" in the Plessey v Ferguson case. In addition, Congress and some states passed laws that restricted access to private property ownership and use by Latinos and Asian Americans.

In the early 20th century, social scientists and leaders within the real estate community established guides for neighborhood desirability based on racial composition. Homogeneous communities for white, northern European background residents were seen as best investment for homeowners and others. Some early zoning laws sought to limit, by race, people who could live in certain communities, as did some practices of the real estate sector. Although the Supreme Court, in its 1917 decision in Buchanan v. Worley, struck down these racial restrictions, these racial biases were incorporated into FHA rules and formed the basis for many private agreements to segregate and form racially restrictive covenants.

WW II

Following the Second World War, returning GIs, through the GI bill, were offered a path to homeownership. African Americans and other minority group members were excluded from these GI bill benefits in many communities. The great migration of the middle class to suburbs was largely a white phenomenon, creating segregated white suburbs and large isolated urban minority communities. There was little response by the government or the courts. Most notable, was the Supreme Court

in 1948 ended judicial enforcement of racially restrictive covenants in the case *Shelley v. Kraemer*.

THE CIVIL RIGHTS MOVEMENT

The Civil Rights movement, including Dr. Martin Luther King, Jr.'s work in Chicago, brought renewed attention to housing discrimination. The federal government, first through executive order then through the Civil Rights Act of 1964, banned discrimination in federally funded housing. By 1961, seventeen states had passed fair housing or open housing laws. It was not until April 1968, following the assassination of Dr. Martin Luther King, Jr., that Congress passed the Fair Housing Act.

Also in April 1968, the Supreme Court ruling in *Jones v. Mayer* held that the Civil Rights Act of 1866 prohibited discrimination in private real estate transactions. That law lacked an effective government enforcement mechanism, and covered racial and religious discrimination. Gender discrimination was prohibited in 1974. In 1988, in response to growing awareness of the housing issues faced by families with children and persons with disabilities, the adoption of the Fair Housing Act Amendments established effective government enforcement and extended protections to families with children and persons with disabilities.

Madam Speaker, in light of this long battle for fair housing, I ask that the House pass this bill.

RECOGNIZING BILLIE RAY HUDDLESTON

HON. RALPH M. HALL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. HALL of Texas. Madam Speaker, Billie Ray Huddleston was born in Celina on August 23, 1929. His love for church, family, school and community continues even as he celebrates his 80th birthday.

Billie Ray has lived his entire life in Celina, where he attended Celina High School and graduated in 1946. He then attended North Texas State College, now known as the University of North Texas, and graduated in 1950 with a Bachelor of Science. He taught math for 10 years until deciding to farm full time, first with his father and then with his son, and continues to help his son and grandson as needed.

During his farming years, Billie Ray served on the Celina Cooperative Gin Board for 37 years. He has been a longtime director of the Collin County Farm Bureau and for six years served as a director of the Texas Farm Bureau. During part of this time he served on the Southern Farm Bureau Insurance Boards and continues to be involved in federal and state legislative affairs. He also served on the Project 2000 Committee for long-range planning to carry Texas Farm Bureau into the next century. He has been the recipient of many awards, including the Collin County Conservation Farmer of the Year, Denton Wise County Conservation Farmer of the Year, Collin County Farmer of the Year and the Collin County Farm Bureau Pioneer Award.

In 1955, Billie Ray married Jane Merritt and they have four children: Charles and his wife

Sherry of Celina, Janet and her husband Randy of Celina, Laurie and her husband Russell of Waco, and Mike and his wife Ingrid of Keller. They are the grandparents of 11 beautiful grandchildren.

During the time his children were in the Celina schools he served for 13 years as a trustee of the Celina Independent School District. He was also a member of the Quarterback Club for many years, serving as captain in 1973.

His civic involvement includes serving on the Celina City Council for 2 terms during which the first Comprehensive Plan was formed, and recently he served on the committee for the current comprehensive plan which is in its final stages. Seeing the need for a public park, he was instrumental in securing the land and negotiating the purchase of more than 40 acres, where a wonderful park was dedicated in 2006 to the City of Celina. In 2002 he and his wife, Jane, were awarded the Lifetime Achievement Award from the Chamber of Commerce "in recognition of their continuous service and support." In July of 1976 he was recognized by The American Revolution Bicentennial Commission of Texas for his participation in celebrating the Bicentennial.

Billie Ray has been a member of the First Baptist Church in Celina since 1951 and has served as a deacon for 53 years. He has been such an important and influential member of the Celina community, and his many friends today join his family in wishing a wonderful 80th birthday to this great citizen, Billie Ray Huddleston.

CONGRATULATING THE PLANO EAST AND PLANO WEST JROTC ACADEMIC TEAMS

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SAM JOHNSON of Texas. Madam Speaker, congratulations are in order. This June, the Plano East JROTC Academic team placed fifth in a competition from schools around the globe in Washington, D.C. Out of 1,645 Army JROTC programs, 72 teams (24 academic/48 leadership) from around the globe competed in Level III of the 2009 U.S. Army JROTC Academic and Leadership Bowl competition, the final level of the Army JROTC Academic and Leadership Championship. Plano East JROTC deserves special recognition for their achievement.

In addition, on March 5th, the Plano East and Plano West Senior High School JROTC Academic Teams earned 1st and 3rd place honors, respectively, out of 198 teams/schools, in the U.S. Army JROTC 5th Brigade portion of the 2009 U.S. Army JROTC Academic and Leadership Bowl competition.

The Panther JROTC Academic Team is comprised of: Team Commander c/1LT Zen Ren upcoming Senior, c/CSM James Untiedt upcoming Senior, c/1SG Amber VanHecke upcoming Junior, c/SSG Sabrina Gibson upcoming Junior. The two alternates were Plano East Senior cadets Mary Walker and Harrison Stone.

Competition questions are based on the SAT, ACT, JROTC curriculum and current events. The test is administered jeopardy-style, via the Internet, with a 30 second time limit for each question. The team members are able to quickly read, discuss, and exchange information before finalizing an answer.

According to Major (Ret) John Napoli, Jr., who serves as the Director of Army Instruction for the Plano Independent School District, "we are proud of the academic accomplishments of all our students. This bowl is one of many ways we challenge our students on a daily, weekly, and monthly basis. Our foremost priority in JROTC is to the academic and professional development of all our students. In the last two years alone our graduating seniors have earned over \$4.5 million in college scholarship monies."

The cadets and the Plano East Senior Army Instructor LTC (R) Bernard Aikens are shining examples of the future leadership and military excellence that you can only find in America.

PERSONAL EXPLANATION

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. MARKEY of Massachusetts. Madam Speaker, on rollcall No. 460, I inadvertently did not vote, but intended to vote "yes."

SEVERELY INJURED VETERANS' BENEFITS IMPROVEMENT ACT OF 2009

HON. STEVE BUYER

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BUYER. Madam Speaker, today I join my good friends and colleagues, MIKE MICHAUD of Maine and HENRY BROWN of South Carolina, in introducing the Severely Injured Veterans' Benefits Improvement Act of 2009. This bill will provide increased benefits to our most severely injured veterans.

Madam Speaker, as servicemembers are returning from the Global War on Terror with more severe and complex injuries than in previous conflicts, the services and benefits that the Department of Veteran Affairs provides must change as well in reflection of their needs.

This bill recognizes this need and provides significant increases for these veterans and their families. The bill increases compensation for catastrophically injured veterans who are in need of regular aide and attendance by fifty percent. Qualifying veterans would receive a monthly payment of \$7,552, and those in need of the highest level of care would receive \$8,642.

We are all aware of the impact of attending to daily personal needs such as bathing and eating can have on family caregivers. Increasing the rate of the aid and attendance benefit for veterans would support family caregivers

who experience a loss of income, and allow veterans to remain in their homes.

This legislation would also expand eligibility for aid and attendance benefits to include veterans with service connected residuals of severe traumatic brain injury (TBI). It would permit these veterans in need of constant supervision and assistance to remain in their residences rather than being institutionalized.

More servicemembers of Operation Enduring Freedom and Operation Iraqi Freedom are surviving blast head injuries cause by an IED explosion than in any previous war. These servicemembers and veterans may not have any physical disabilities, but may suffer extreme cognitive disabilities as a result. A veteran with severe TIM can require constant supervision and assistance to perform all activities of daily living. However, current law does not provide veterans with severe TBIs with the same level of compensation that is available to veterans with severe physical disabilities.

Further, the bill codifies a U.S. Court of Appeals for Veterans Claims ruling that protects non-service connected pension payments for elderly, indigent, and severely disabled or house-bound American veterans. The bill also increases this benefit by ten percent.

It would also authorize veterans with severe burns to receive specially adapted auto grants.

Lastly, the bill honors the recipients of our nation's highest award for bravely by doubling the monthly pension given to Medal of Honor Recipients to \$2,000.

Madam Speaker, this bill makes all of these needed improvements without new increases in direct spending. I urge my colleagues to join me in improving the lives of these veterans by co-sponsoring this bipartisan bill.

SUDAN: U.S. POLICY AND IMPLEMENTATION OF THE CPA

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. WOLF. Madam Speaker, I would like to share with our colleagues testimony that John Prendergast, co-founder of the Enough Project, gave yesterday before the House Foreign Affairs Subcommittee on Africa and Global Health on the critical issue of U.S.-Sudan policy, specifically as it relates to implementation of the Comprehensive Peace Agreement (CPA). During the Clinton administration John was director of African Affairs at the National Security Council and special advisor at the Department of State. I respect his views given his long-time involvement in Africa and Sudan.

SUDAN U.S. POLICY AND IMPLEMENTATION OF THE CPA

Thank you Congressman PAYNE and members of this subcommittee for the opportunity to testify on a topic that will help determine the future of millions of people from Sudan and the surrounding region.

At this subcommittee hearing, members will hear a very different message than that which will be communicated at tomorrow's Senate Foreign Relations Committee hearing. Today, this subcommittee's members will hear a bipartisan critique of the current direction of U.S. policy towards Sudan. Rich

Williamson, Roger Winter and I all have negotiated extensively with the regime in Sudan, have roughly a combined six decades in working on or in Sudan, and have a very clear idea of what is required for lasting peace to have a chance in that embattled country.

This hearing comes at a moment in Sudan's history fraught with danger and potential. There is no effective peace process for Darfur, but one could be built with U.S. leadership. The CPA is on the brink, but could be salvaged if U.S. engagement deepens. Next year's elections are at risk, but could become an important opportunity to strengthen opposition parties and democratic structures crucial for the referendum and for Sudan's political future. The referendum itself is doubtful, but its prospects could be enhanced with a credible international roadmap.

The major unknown variable that will help determine whether the dangers or the opportunities get maximized is the unresolved internal debate over the direction of U.S. policy towards Sudan. In the absence of any agreement on the policy, U.S. diplomatic engagement has been energetic, for which Special Envoy Gration should be credited. But the substance of this robust engagement has been fraught with missteps, lack of internal coordination, and an overall aversion to pressuring the ruling National Congress Party (NCP). Sustained pressure leveraged by meaningful and focused sticks is the principal tool that has moved the NCP to change its behavior during the 20 years of its authoritarian rule. This substantial track record of empirical evidence of the value of pressure makes the direction of U.S. diplomacy all the more questionable.

There is also a broader inconsistency in U.S. foreign policy when it comes to Sudan. The Obama administration has resolutely worked to craft more formidable international coalitions to isolate North Korea and Iran for important U.S. policy objectives. However, the U.S. is not doing the same for Sudan, despite the existence of a regime there that is responsible directly or indirectly for the loss of two and a half million lives in the South and Darfur.

U.S. GOALS IN SUDAN AND HOW TO ACHIEVE THEM

In the context of its policy review, the U.S. should spell out clear goals:

(1) U.S. leadership in constructing a more effective Darfur peace process, using as a model the process that led to the CPA involving a lead role for the U.S. and a multilateral support structure that provided international leverage, expertise, and support;

(2) U.S. leadership in supporting the implementation of the CPA, continuing the trend of deeper engagement over the last few months but structuring clear penalties for non-implementation of any of the key provisions;

(3) U.S. leadership in supporting the democratic transformation of Sudan by supporting the electoral process, providing institutional support to opposition parties and civil society organizations, and building the capacity of the Government of Southern Sudan;

(4) U.S. leadership in preparations for the South's referendum in 2011, which will be a make-or-break process for the future of both North and South.

The essential word that repeats throughout all these goals is "leadership." U.S. leadership—multilaterally and when necessary unilaterally—will be an enormously influen-

tial ingredient in a successful transition to peace and democracy in Sudan.

But success will require greater leverage than that which presently exists. The debate internally within the U.S. Government in part rests on the degree to which incentives or pressures ought to be favored instruments for changing the behavior of the Sudanese regime, the Darfur rebels, and the GOSS. It is the view of this panel and the activist organizations that comprise the Darfur movement that the way forward should involve deeper diplomatic engagement that is rooted in multilateral pressures and the credible threat of significant consequences for policies or actions by Sudanese parties that undermine peace efforts and lead to worsening humanitarian conditions. In the absence of these pressures, and if incentives are all that are put forward, then failure is guaranteed.

Success will also require the construction of credible and effective processes that allow for the achievement of U.S. policy goals. First and foremost, the glaring lack of an effective peace process for Darfur calls out for greater U.S. leadership in constructing from the existing elements a revitalized process that has the chance of ending Darfur's war. Secondly, the U.S. should intensify its early efforts to revive the CPA and back these efforts with the construction of clear multilateral consequences for violations or non-implementation of key elements of the deal.

U.S. policy must be shaped by the fact that these complex conflicts have a common core: Flawed governance by a center that exploits and marginalizes an underdeveloped periphery. Not only does the CPA provide a roadmap for resolving the longest and bloodiest of these conflicts, but it also offers a framework for the kind of democratic, structural transformation necessary to alter the root cause of Sudan's many recurring conflicts. The successful model of the CPA could and should be replicated in a revitalized Darfur peace process. The U.S. cannot afford to allow the CPA to fail, nor can it allow the continuation of an ineffective Darfur process that obstructs any real possibility of peace.

PRIORITIES FOR CPA IMPLEMENTATION

The troubling reality is that Sudan's North-South peace remains precarious at best. Given the mounting tensions between the North and South and the spate of violence in the South in recent months, deeper international engagement is required. Renewed Sudanese civil war could bring wholesale violence on a terrible scale while further destabilizing the entire region. I will focus the remainder of my testimony on the key priorities for the U.S. Government in CPA implementation.

I am encouraged by recent positive steps by the Obama administration to prioritize CPA implementation and to revitalize international efforts to urge the Sudanese parties to work on an array of outstanding provisions in the agreement in the remaining year and a half. These new efforts should be followed up with an approach that penalizes failure of one of both of the Sudanese parties to implement key provisions of the agreement. The hard work begins now. It is time for the administration to pursue specific priorities in order to meet the key benchmarks in the crucial final stages of CPA implementation.

The U.S. must direct renewed energy and commitment toward the following strategic priorities:

1. Protect the People: Due to a worrisome upsurge in intercommunal violence, the death toll in the South this year now exceeds the number of violent deaths in Darfur in the

same period, and as elections draw closer, instability may well increase. Tribal clashes are occurring among a heavily armed civilian population that the poorly disciplined southern army has proved incapable of securing. Some of the latest clashes highlight the flaws and dangers of the so-called the Joint Integrated Units, or JIUs, whose presence has often led greater violence, instability, and civilian casualties. The U.S. should take two specific measures to help improve security and decrease the risk of further violence in communities throughout the South:

Work with the U.N. Security Council to ensure that the United Nations Mission in Sudan (UNMIS) has the necessary capacity to fulfill its mandate and protect civilians. The United States should lead efforts within the U.N. Security Council to strengthen UNMIS' ability to support the CPA, but this support must be matched with clearer strategic vision by UNMIS on how it can best allocate its resources to operationalize its mandate amidst ongoing security threats throughout the South. Other guarantors of the CPA can support UNMIS' efforts by contributing to coordinated programs such as security sector reform within the SPLA.

Encourage the Government of Southern Sudan (GoSS) to take leadership in promoting local peace-building initiatives to defuse tensions between communities that have taken up arms against each other.

2. Build the "peace dividend": Since the signing of the CPA, progress has been slow in providing basic infrastructure and services to the peripheral areas of Sudan. Insecurity and underdevelopment remain a fact of life for most Sudanese. As long as that is the case, the southern government will have difficulty consolidating the peace and holding together an ethnically divided South with competing political visions. The GoSS has also been hit hard by the financial crisis, and is in need of significant economic support, but this support should be aimed specifically at capacity building efforts that can strengthen the fledgling government. Additional investments in agriculture and micro-credit would make a difference on the ground for the people of southern Sudan, more than two million of whom have returned home to very little after decades of war.

3. Defuse North-South tensions: A number of contentious issues between the North and South must be resolved in next year and a half, all of which necessitate robust support from the international community in order to keep the negotiations and processes on track. The U.S. should direct renewed energy and commitment toward the following strategic priorities:

Urge meaningful reforms from the Sudanese parties before the 2010 elections. The United States and other key actors, operating on a tight timeline, need to lower their expectations for the election and develop a multilateral strategy to press the Government of National Unity—the ruling National Congress Party in particular—to enact meaningful reforms regardless of who wins in 2010, revitalize CPA implementation, and establish a framework for talks in Darfur that are consistent with the power-sharing provisions of the CPA. There also has to be a clear and unified international posture with regard to addressing the issue of Darfur, given the near-impossibility of holding a free and fair ballot there.

Keep the parties on track in the dual processes of implementing the legal ruling on the boundaries of the Abyei region and demarcating the North-South border. Two crucial issues regarding contested borders between

Sudan's North and South need sustained attention from the international community. The failure to establish clear international penalties for a failure to implement these key CPA provisions such as the demarcation of the disputed North-South border has been a clear drag on the CPA. However, last week's legal decision on the boundaries of Abyei—an oil-rich, contested region along the disputed North-South border within Sudan—is a crucial litmus test of the parties' will to implement the CPA moving forward. Now that the ruling on Abyei has been accepted by both parties, the U.S., the U.N., and the rest of international community must follow through on its commitments to help implement the ruling and monitor the status of the demarcation of the Abyei boundaries.

Encourage negotiations between the NCP and SPLM on long-term wealth-sharing arrangements before the 2011 referendum. Track-two diplomatic efforts can get both parties to consider various scenarios for wealth sharing after the referendum and mitigate the likelihood that these discussions will short circuit into a zero-sum game leading directly to conflict after the referendum. Discussions of access to land for populations with diverse needs and livelihoods and planning for mutually beneficial development of oilfields in the contested border region could ease current tensions over border demarcation and generate momentum for further cooperation.

Urge passage of the referendum law before the elections. Applying pressure on Sudan's Government of National Unity to urge the National Assembly to review and pass the law on the southern referendum before the elections could reduce tensions between the parties after the elections and enable preparations for the referendum to begin now. Once the law is passed and the Referendum Commission is created, potential disputes, such as questions over whether or not certain populations—such as southerners in Khartoum—are eligible to vote, can be addressed before tensions escalate in the immediate run-up to the referendum.

4. Prevent a return to war: The likelihood of a return to war between the North and South, or of conflict breaking out within the South, is real. An arms race between the Northern and Southern government is just one warning sign of a tenuous situation that could explode into outright conflict. Several preventive measures can mitigate the risks of violence in the run-up to the 2010 general elections and the 2011 referendum:

Enhance efforts to professionalize and modernize the SPLA. The SPLA has struggled to transition from a guerilla movement to a formal army, a process complicated by attempts to integrate southern militias that opposed the SPLA during the war. To ensure that the south is stable and the GoSS can deliver a peace dividend, the SPLA must continue to modernize through a well-supported process of security sector transformation that improves discipline, command and control, capacity, and competency. Toward this end, the Obama administration should explore the sale of an air defense system to the GoSS. Although introducing new weapons systems into a volatile military environment could be interpreted as contrary to donors' responsibility to make unity attractive, it is in the interests of lasting stability that the GoSS spend money on defense wisely. Unlike the aforementioned refurbished tanks, an air defense is non-offensive and helps level the playing field by neutralizing the north's major tactical

advantage in the event of renewed hostilities.

COMPREHENSIVE PEACE: THE ONLY OPTION IN SUDAN

Ending genocide in Darfur and fulfilling the promise of the Comprehensive Peace Agreement requires a comprehensive approach to Sudan rather than reactive crisis management. The U.S. must lead the international community in working now to ensure that the CPA does not collapse and spark a devastating new round of conflict in Sudan. With a significant diplomatic reinvestment in the CPA that prioritizes protecting civilians, building peace in the South, and defusing tensions between the North and South, the U.S. can help prevent the catastrophic consequences of a potential collapse of the CPA.

HONORING DARRELL "SHIFTY" POWERS

HON. RICK BOUCHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BOUCHER. Madam Speaker, I rise today to honor a southwest Virginia resident whose service to this Nation will long be remembered. On June 17, 2009, Darrell "Shifty" Powers, a distinguished World War II veteran, passed away. I would like to take this occasion to recognize his many contributions through his military service to our great Nation. Mr. Powers, who was portrayed in the HBO documentary film "Band of Brothers," is a true American hero from southwest Virginia.

A native of the Dickenson County, Town of Clinchco, Virginia, Mr. Powers volunteered for the United States Army during the early stages of the Second World War in 1942. He was quickly assigned to the newly formed 506th Parachute Infantry Regiment and began training at Camp Toccoa, Georgia. Each day, the new recruits would train by running 6 miles up and down the Currahee Mountain. As a result of the steadfast dedication of Mr. Powers and the other members of what came to be known as Easy Company, the regiment was quickly transformed into one of the Army's toughest fighting units.

In 1943, after completion of parachute school at Ft. Benning, Georgia, the 2nd Battalion of the 506th Parachute Infantry was attached to the 101st Airborne Division and was transferred to England, where they would spend a year preparing to invade the European continent.

At about 1 a.m. on June 6, 1944, Mr. Powers and the other members of Easy Company boarded a plane which transported them across the English Channel in order to parachute into Normandy behind German fortified positions. Shortly after landing, Mr. Powers and 2 fellow soldiers realized that they were a day's walk from their intended drop zone. The Airborne troops spent almost a week fighting German soldiers before they were sent back to England to prepare for an invasion of Holland.

In September 1944, Mr. Powers' unit, along with Polish and English divisions, parachuted into Holland to secure a road for tanks and supply shipments to prepare for a push across

the Rhine River into Germany. During the attack, the English troops landed in a German tank division and were immediately killed. Mr. Powers and the rest of Easy Company spent the following 3 months fighting for control of the same road, laying low during the day and moving at night.

After securing the road and moving out of Holland, Easy Company was then ordered to defend the town of Bastogne, Belgium, when they learned that German troops had counter-attacked along the Adrennes forest. For nearly a week, the undermanned and under-supplied Easy Company fought off a much larger German force. Easy Company lost 16 men during that week of fighting at Bastogne, and 34 more during fighting at Normandy and Holland.

A little more than a month after Hitler's forces were pushed back in mid-January, General Dwight Eisenhower met with Mr. Powers' unit in France and awarded them the Distinguished Unit Citation for holding Bastogne.

Soon after, Mr. Powers earned enough combat points to step away from the front lines of battle and return home to southwest Virginia. Mr. Powers was on his way out of combat when the truck he was riding in collided head-on with another Army truck, killing one soldier and badly injuring Mr. Powers.

After recovering from these injuries he returned home to work for Clinchfield Coal Company in Dickenson County, Virginia, for 33 years. Mr. Powers rarely spoke of the horrors of the combat he faced until producers came to him with the "Band of Brothers" HBO miniseries idea. After the success of "Band of Brothers," Mr. Powers often would receive countless expressions of support and thanks for the role he and his combat unit played in World War II. Upon Mr. Power's passing his online obituary received comments from people across the Nation and several individuals from Europe paying tribute and expressing deep appreciation for the sacrifices he made to help free Europe during World War II. In his later years, Mr. Powers dedicated a great deal of time to speak to current soldiers stationed or returning from Iraq and Afghanistan about his experiences in war and life.

The outstanding dedication and sacrifice that Mr. Darrell "Shifty" Powers displayed during his time with the United States Army will be remembered not only by countless citizens in my congressional district in southwest Virginia but also by citizens across this country and across Europe. The effects of his service to our country will be forever lasting. I want to honor the passing of a great Virginian and a great American.

MEDICARE VA REIMBURSEMENT ACT OF 2009

HON. BOB FILNER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. FILNER. Madam Speaker, I recently introduced H.R. 3365, the Medicare VA Reimbursement Act of 2009. This legislation authorizes the establishment of a Medicare VA reimbursement program where HHS reimburses

the VA for the provision of health care to Medicare eligible veterans for the treatment of non-service-connected conditions at VA medical facilities.

Today, there are veterans who have earned VA health care benefits with their service to our country, as well as Medicare benefits, by paying into the Social Security system during their working years. Even though these individuals have clearly earned both of these benefits, current law unfairly prohibits them from using their Medicare benefits at VA facilities even though they may feel more comfortable seeking care among their fellow veterans from VA providers who specialize in caring for veterans.

This is also inconsistent with the authorities granted to other Federal entities such as the Indian Health Service (IHS) and the Department of Defense's (DoD) TRICARE for Life that are allowed to bill Medicare. IHS and DoD are able to augment their resources with Medicare collections and reinvest the extra funding back into their programs and services. H.R. 3365 would provide equity in such billing practices among the Federal entities. In other words, the VA would be able to access an important new source of revenues from Medicare which may be reinvested to further strengthen the VA's health care system.

In detail, this legislation requires the Secretaries of VA and HHS to establish a Memorandum of Understanding (MOU) no later than six months after the date of the enactment of the Act. The MOU must establish such program elements as the frequency of reimbursement, the billing system, the data sharing agreement, and the payment rate.

H.R. 3365 also provides some guidelines on setting the payment rate so that the terms that contributed to the failure of the Medicare DoD Subvention Demonstration Project are not repeated again. For example, this legislation prohibits setting a reimbursement rate which is less than 100 percent of the amount that Medicare would pay a participating provider. It also prohibits annual caps on reimbursement and does not allow for a maintenance of effort requirement, which refers to the requirement that VA maintain a certain level of spending before they can be reimbursed from HHS.

Finally, H.R. 3365 requires an annual report to Congress providing program data, as well as a triennial GAO report assessing the program impact.

I urge the support of all Members for this important legislation.

THE INTRODUCTION OF THE GANDHI-KING SCHOLARLY EXCHANGE INITIATIVE ACT OF 2009

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LEWIS of Georgia. Madam Speaker, I am proud to introduce the Gandhi-King Scholarly Exchange Initiative Act of 2009. The purpose of this legislation is to create three international initiatives that take the philosophy and examples of Mahatma Gandhi and Dr. Martin Luther King, Jr. and apply them to current day issues.

In recent years, increasing youth violence has been the center of national headlines. Gangs, drug abuse, stabbings, shootings, bullying, unnecessary harm and heartache plague schools and communities from Atlanta to Chicago and in unsuspecting urban, rural, and suburban areas all around and in between. In response to this alarming trend, I introduced the SAFETY through Nonviolence Act, a bill that would teach the doctrine of non-violence in thought, words and actions to students, educators, local police, and community leaders. In reality, Madam Speaker, violence, human rights abuses, discrimination, unprecedented poverty, and terrorism are devastating every corner of our globe, and despite so much progress, much work remains.

In February, I led a congressional delegation with my good friend, the Gentleman from Alabama (Mr. BACHUS) to India to commemorate the 50th anniversary of Dr. Martin Luther King, Jr. and Mrs. Coretta Scott King's visit to the country. With an official send-off from Secretary Clinton, the delegation was welcomed by the Indian government and Indian people. Martin Luther King, III, his wife, Mrs. Arndrea Waters, and outstanding musicians from the Thelonius Monk Institute of Jazz also celebrated this historic visit with concerts, meetings, and ceremonies across the country.

The congressional delegation also met with Indian government officials, business leaders, and non-governmental organizations on issues of terrorism, democracy, human rights, child labor and trafficking, poverty, and international conflicts. Each of us returned to the United States inspired and determined in our own way to see how we could apply our experiences, our shared history, and the legacies of these two great men to some of the issues facing the international community. How can we build a new generation that understands the benefit of peace?

This legislation responds to that question. The Gandhi-King Scholarly Exchange Initiative Act of 2009 would create an undergraduate, graduate, and post-graduate student exchange program in which students would travel to significant sites of the American Civil Rights Movement and the Indian Independence Movement. They would then develop proposals on how to apply the philosophies of Mahatma Gandhi and Martin Luther King, Jr. to modern issues such as human rights, peaceful conflict resolution, civil rights, and democracy.

The second initiative created by this bill is a professional training module for international state, local and national government employees from conflict regions to develop international conflict solutions based on Gandhian principles.

Last but not least, the Gandhi-King Scholarly Exchange Initiative Act would develop an annual public diplomacy forum to be held alternately in the United States and India which will focus on the philosophies of Mahatma Gandhi and Martin Luther King, Jr. in the resolution of global conflicts.

I believe that each person must ask themselves how we can make this little piece of real estate that we call Earth, a little cleaner, a little greener, a little safer, a little more peaceful. Gandhi once said that, "If we are to reach real peace in this world, and if we are

to carry on a real war against war, we shall have to begin with the children." The Gandhi-King Scholarly Exchange Initiative Act of 2009 does just that and a little bit more.

Madam Speaker, I hope all of my colleagues will support this good, common-sense legislation that should be a cornerstone of our public diplomacy efforts.

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed recorded votes on the House floor on Tuesday, July 7, 2009.

Had I been present, I would have voted "aye" on rollcall vote No. 478 (on motion to suspend the rules and pass H. Con. Res. 135), "no" on rollcall vote No. 479 (on motion to suspend the rules and pass H.R. 1129).

HONORING MS. JANE MARKHAM

HON. MIKE QUIGLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. QUIGLEY. Madam Speaker, I rise today in honor of Ms. Jane Markham, a dedicated member of my district office staff. Jane's last day as a Congressional Aide and District Representative in our office will be August 1, 2009, and she deserves our wholehearted appreciation for her work.

Jane Markham began her career working for Congress in 1997 as District Director and Field Representative for Congresswoman Darlene Hooley and in 2003 she came to Chicago, Illinois to work for Congressman Rahm Emanuel, serving as a Congressional Aide and District Representative. She was instrumental to my transition into Congress and has served the needs of countless constituents of the 5th District.

While Jane's dedication and integrity will be sorely missed, her infectious personality and jovial attitude will be irreplaceable. Her sense of humor and vivacity are her trademark and our district staff will be at a loss without her unfaltering ability to make a person smile. Jane's family has always been a priority in her life. She and her husband David Cameron are the proud parents of their children, Mira and Julia.

We thank Jane for her time in our office, both as a co-worker tirelessly dedicated to constituent services and as a friend. We wish her all the best in the future knowing wherever that she may be, Jane will be going there with a confidence and liveliness that will be felt by all.

EARMARK DECLARATION

HON. W. TODD AKIN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. AKIN. Madam Speaker, in accordance with House Republican Conference standards, and Clause 9 of Rule XXI, I submit the following member requests for the record regarding H.R. 3327, Department of Defense Appropriations Act, 2010.

Project: Hyperspectral Imaging for Improved Force Protection (HYPER-IFP)

Account: Department of Defense, Army, RDT&E (CERDEC, NVESD, Special Projects)
Legal Name of Requesting Entity: Clean Earth Technologies, LLC.

Address of Requesting Entity: 13378 Lakefront Drive, Earth City, MO, USA

Description of Request: To provide \$2,000,000 for the Hyper-IFP (Hyper spectral Sensor for Improved Force Protection) Program. The introduction of a Hyper-IFP in FY08 is allowing the detection and recognition of humans (with a near zero false alarm rate) and providing indication of other certain physiological triggers that can indicate that a person is under extreme stress such as contemplating "bad" behavior. To date successful development, test and evaluation has been done in the lab, though these systems have not been fully optimized for theatre operation or for costs. The continued funding of Hyper-IFP will operationalize and integrate the knowledge gain in the lab and apply it in a true-fielded application at an affordable cost. The Hyper-IFP system will also be environmentally hardened to allow field deployment and allow integration with other FP sensors in the last quarter of 2009. Hyper-IFP is focused on the missions of Perimeter Security, Suicide Bomb Detection and Urban Route Recon. Utility will be demonstrated through an evaluation in both the Southwest border and contingency mission in Southwest Asia. This effort will require leveraging the current Force Protection sensor suite designs for the missions sites to maintain interoperability. In the end, this request focuses on both achieving data verification, and the delivery of sufficient hardware to validate the Technical Data package for re-procurement as well as demonstrate the system's ability to deploy to DoD/DHS users for the missions described. The Night Vision Electronic Sensors Directorate, Ft. Belvoir Virginia, is very supportive of this project.

Project: Aircrew Body Armor and Load Carriage Vest System

Account: Other Procurement—U.S. Air Force

Legal Name of Requesting Entity: Eagle Industries

Address of Requesting Entity: 1000 Biltmore Drive, Fenton, MO 63026

Description of Request: To provide \$3,000,000 to issue the Aircrew Body Armor Load Carriage Vest System, an integrated body armor vest system, to aircrew personnel. The system provides fire retardancy and ballistics protection from a wide array of threats including small arms fire, fragmenting shrapnel and spall, while decreasing the heat stress and weight burdens faced by airmen. Cur-

rently issued aircrew flight equipment survival vests are not body armor-compatible due to weight, heat, and survivability concerns. Current issue is not fire retardant and fails to meet the present needs of the U.S. Air Force. Of the \$3 million, approximately 25% is for materials; 25% is for labor; and 50% is for armor and armor integration.

This request is consistent with the intended and authorized purpose of the U.S. Air Force-Other Procurement account. If funded in full, this is a one-time funding request with the goal of the Air Force using internally budgeted funding to continue fielding the system to aircrew personnel.

A TRIBUTE TO TUMBLEWEED SMITH

HON. RANDY NEUGEBAUER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. NEUGEBAUER. Madam Speaker, I would like to take this time to recognize distinguished writer, speaker, and entertainer, Bob Lewis, better known as Tumbleweed Smith. Tumbleweed Smith is both creator and producer of the renowned radio program The Sound of Texas. August 1, 2009 will mark the celebration of 40 prosperous years on the air, making The Sound of Texas the longest running syndicated radio program in Texas.

In his 40 years of interviews, Tumbleweed Smith has accumulated the largest private collection of oral history in the United States. His one-man shows have been performed all over Texas, as well as six other states, and three other countries.

In addition to being an influential entertainer, Tumbleweed Smith has won international recognition for his advertising and production work. His honors include two CLIO advertising awards, the Governor's Award for Tourism, the West Texas Chamber of Commerce Cultural Achievement award and two Freedom Foundation awards.

The Texas House of Representatives has recognized Tumbleweed "for creating a priceless resource of Texas folk tales, lore and wisdom." He was honored by the Texas House of Representatives in 1999 for his outstanding communication skills and radio service to West Texas. In 2008 he was recognized by the Texas State Senate for celebrating his 10,000th program of The Sound of Texas.

Mr. Lewis resides in Big Spring, TX with his wife Susan and they have two sons, two daughters-in-law, and four grandsons. He writes a syndicated weekly news column and teaches radio production in the Permian Basin. Tumbleweed Smith is a true gem to West Texas. I am proud to honor his achievements and look forward to more of his unique and entertaining work in the future.

TAXPAYER RESPONSIBILITY, ACCOUNTABILITY, AND CONSISTENCY ACT

HON. JIM McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. McDERMOTT. Madam Speaker, earlier today I introduced legislation—the Taxpayer Responsibility, Accountability, and Consistency Act. The aim of this legislation is to reverse the growing trend of the misclassification of employees as independent contractors. Independent contractors serve a legitimate purpose in our workforce, our economy, and in many business models. These contractors are important to our economy and often provide the flexibility that many businesses need. Some employers, however, are using a loophole that exists in the Internal Revenue Code to treat workers that are actually employees as contractors in order to reduce their own tax liability and avoid federal and state labor law. When employees are misclassified as contractors, responsible companies lose business, workers lose rights and protections, and the federal and state governments lose out of billions of dollars in much-needed revenue.

This legislation is similar to the measure I introduced last year, along with Representatives RICHARD NEAL, and JOHN TIERNEY. I am pleased we have joined together again this Congress to reintroduce this initiative. Our efforts to construct this bill were informed by information obtained through public hearings on this issue in the House Committee on Ways and Means and the House Committee on Education and Labor.

The Taxpayer Responsibility, Accountability, and Consistency Act would close the tax loophole that allows employers to misclassify employees as contractors at will. It aims to put all employers on a level playing field, protect workers, and reduce the federal budget deficit. The intention of the bill is not to deny businesses the ability to use legitimate independent contractors; instead it is to ensure that laws that determine what an employee or independent contractor is are evenly applied. They are not today.

I recognize that this issue is one that has vexed the Congress for some time and that forging the necessary degree of consensus to address this problem will be difficult. I intend for the legislation introduced today to serve as a basis for discussion and look forward to working with many stakeholders to perfect the bill and help push for its passage.

RECOGNIZING TREENA TUBBS

HON. MICHAEL K. SIMPSON

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. SIMPSON. Madam Speaker, I rise today to pay tribute to Treena Tubbs of Malad, Idaho. Treena is celebrating her twentieth year of work for the U.S. Government. She began her career with the USDA–FSA in the Malad office. After three years, she was recruited to

work for the Veterans Administration. She traveled to Pocatello to work at the Veterans Affairs Community-based Outreach Clinic of the George E. Wahlen Department of Veterans Affairs Medical Center in Salt Lake City, Utah.

Treena quickly became known as a friendly and helpful assistant to the veterans who came to the clinic for services. Throughout her career, she has proved herself to be a compassionate ally of those who have bravely served their country and now are in need of medical care. By contributing her time and talents, Treena has ensured a brighter future for our veterans.

It is not enough for Treena to assist in meeting the needs of veterans during office hours. She always makes time from home to help fill out paperwork, answer questions, and remind of appointments. Because it is often difficult to remember all the questions while in the doctor's office, Treena welcomes calls at home to clarify issues the veteran may have regarding his or her care.

The son of one veteran tells of Treena calling in the evening to make sure his father was alright, as he had missed his appointment that day. Another vet said he spent several hours asking questions at Treena's kitchen table on a Saturday.

Although the drive from Malad to Pocatello is difficult, Treena makes it to the clinic unless the winter roads become truly impassable.

In keeping with her commitment to make positive contributions to her community and her sincere willingness to serve, Treena has recently been appointed to the Oneida County Hospital Board.

Madam Speaker, I am proud to have a constituent in my district who is dedicated to improving the lives of our veterans and who devotes her time in selfless service to others.

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed some recorded votes on the House floor on Wednesday, July 29, 2009.

Had I been present, I would have voted "no" on rollcall vote No. 655 (on agreeing to H. Res. 685), "present" on rollcall vote No. 656 (on motion to table the Boehner Privileged Resolution).

HONORING MR. DAVID HAWPE

HON. BEN CHANDLER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CHANDLER. Madam Speaker, I rise today in recognition of one of Kentucky's premier journalists, a man who has shaped countless events and policies in the Commonwealth of Kentucky for decades, Mr. David Hawpe. After 40 years of public service jour-

nalism, tough reporting, and insightful analysis as editorial director, he will retire on August 14, 2009. I cannot begin to adequately describe the immeasurable contributions Mr. Hawpe has made to better the lives of all Kentuckians.

After graduating from the University of Kentucky in 1965 with a focus in journalism, Mr. Hawpe began his career as a reporter for the Associated Press and then moved to the The St. Petersburg Times in Florida, where he was an editorial writer.

In 1969, he came back to his home state and took charge of the Hazard bureau of The Courier-Journal in Eastern Kentucky, and in 1972, he moved to the Louisville home office. Mr. Hawpe held many positions, including editorial writer, assistant regional editor, managing editor and editor of The Courier-Journal and also served as city editor of the former afternoon newspaper, The Louisville Times.

Through his decades of reporting, Mr. Hawpe's influence can be seen in nearly every corner of the state.

He covered the Hyden mine disaster in 1970, bringing to light the many hazards and realities of coal mining. In later years, he played a significant role in strengthening laws and regulations governing the mining industry, and attacked abuses related to the broad form deed and strip mining.

Through his reporting and advocacy, he helped bring about new regulations of toxic chemicals, improved school bus safety, better enforcement of drunk driving laws, and reform in the medical license system.

Through his and his colleagues' legislative coverage, Mr. Hawpe and his coworkers literally helped reshape the Kentucky General Assembly—my home state's legislative body—into a more influential, co-equal branch of state government. In conjunction with formidable investigative reporting, Mr. Hawpe also played a critical role in the momentum to rewrite Kentucky's campaign finance laws.

And also, very notably, Mr. Hawpe has been instrumental in the reform of Kentucky's public education system. Through his direction of relentless and informed reporting, he helped convince the public that Kentucky was in need of meaningful, extensive higher education reform, which paved the way for the 1997 Kentucky Higher Education Reform Act. He has been credited by many, including a former governor and key policy makers, with being the main force behind this historic legislation.

In light of these achievements, it should be no surprise the newspaper won four Pulitzer prizes under his direction.

Mr. Hawpe is a member of the Kentucky Journalism Hall of Fame and has long been a strong advocate for ethics and diversity initiatives. A Nieman Fellow at Harvard, he was also prominent in national news organizations, having served as president of the Associated Press Managing Editors Association.

Through Mr. Hawpe's editorials and columns, he has been called "the voice and conscience of The Courier-Journal" and, in my opinion, in many ways, he has been the voice and conscience of reform and good policy in the Commonwealth of Kentucky.

Over the years, he has held individuals and institutions accountable for their actions, reined in unfair practices, and been an unwavering advocate for the underprivileged. Mr.

Hawpe will be sorely missed, but the impact of his work will be felt in my state, and, indeed the nation, for many years to come.

Madam Speaker, there is no doubt in my mind that he has made our great state even better.

EARMARK DECLARATION

HON. RODNEY ALEXANDER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ALEXANDER. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the Commerce, Justice Science, and Related Agencies Appropriations Act, 2010, H.R. 2847.

Congressman RODNEY ALEXANDER

H.R. 2997

ARS

Louisiana State University located at 156 Thomas Boyd Hall, Baton Rouge, LA 70803

Formosan Subterranean Research—\$2,600,000. The Formosan subterranean termite has infested 32 of the 64 parishes in Louisiana, with the most severe infestations in the New Orleans and Lake Charles areas. This insect has caused millions of dollars worth of damage including over \$300 million in New Orleans alone. Clearly, it is the most costly pest in the state and the management of this termite is essential to Louisiana's economic well-being. For the last seven years, the LSU AgCenter has participated in the USDA/ARS project, Operation Fullstop. The AgCenter is the lead agency in management programs for this termite in the French Quarter and 16 public schools in Orleans and Jefferson parishes. The AgCenter has received approximately \$10.4 million since the initial appropriation in FY 1998. Sixty-six percent (66%) or (\$6,874,724) of these funds has been pass-through money to the pest management professionals (PMPs) and thirty-four percent (34%) or (\$3,520,606) has been used to conduct research and extension educational programs. During the past year, the AgCenter received \$750,000 for research and extension activities. Plans for 2010 include expansion from 77 blocks currently to the entire French Quarter (95 blocks), funding permitting. Termite numbers in the French Quarter have been reduced 75% in Part 1 blocks and 50% in other blocks after two years in the program. Plans for 2010 also include an education program with residents in New Orleans to develop neighborhood programs, in which residents would receive education, inspections, and program evaluation from the AgCenter. Significant numbers of property owners outside the program are adopting the French Quarter model of the program. Research would include use of molecular methods (mainly microsatellite genotyping) to determine colony affiliations of termites. This permits tracking of colony movement and permits assessment of colony elimination after treatment and floods (Katrina), i.e., are colonies detected after treatment survivors or new colonies. Research would also include use of molecular

markers to establish colony origin and flight range of alates. This aids in understanding termite swarm behavior. Extension would continue to provide the critical tasks of educating the citizenry on all aspects of integrated pest management (IPM) of structural pests. Results of research and education outreach conducted within this request will benefit the State of Louisiana and the rest of the nation in combating the spread of the Formosan Subterranean Termite and in educating the public regarding its control.

Congressman RODNEY ALEXANDER

H.R. 2997

ARS

USDA Sugarcane Lab, 5883 USDA Road, Houma, LA

ARS Sugarcane Research \$3,654,000. The domestic sugarcane industry and others are interested in developing cellulosic opportunities to reduce our dependence on foreign sources of fossil fuel. The ARS's Sugarcane Research Laboratory (SRL) scientists at Houma are involved in a multidisciplinary team effort to develop superior varieties of sugarcane, for both sugar production and for the bio-energy industry that is evolving across the southeast. Additionally, the SRL is developing production practices needed for profitable production of sugarcane for both sugar and energy. The current facilities are not designed to handle an expanded program and lack many of the safeguards (environment, employee, and security) required by current federal standards.

Congressman RODNEY ALEXANDER

H.R. 2997

NIFA SRG

Louisiana State University located at 156 Thomas Boyd Hall, Baton Rouge, LA 70803

Aquaculture \$150,000. Louisiana contains one of the most diverse aquaculture industries in the U.S. The state continues to lead the nation in production of crawfish, oyster, alligator, and pet turtle sales. Catfish production has declined in recent years but is still important. The total farm-gate value of aquaculture production in 2007 exceeded \$281.6 million. Research is needed to: 1) enhance crawfish harvesting technology and efficiency and to improve crawfish broodstock reproduction, 2) to further develop tools to facilitate genetic improvement of cultured finfish, 3) to determine the economic potential and effective culture techniques to facilitate the development of a marine baitfish industry, 4) to further refine finfish nutrition and feeding practices so that feed cost is reduced and water quality is improved, 5) to further protect cultured aquatic species from disease, and 6) to develop new value-added aquaculture food products and waste by-products.

Congressman RODNEY ALEXANDER

H.R. 2997

NIFA SRG

Louisiana State University located at 156 Thomas Boyd Hall, Baton Rouge, LA 70803

Tillage Silviculture \$188,000. This special grant addresses critical environmental concerns in Louisiana. Alternatives to traditional tillage in southwest Louisiana rice production are needed to improve floodwater quality, reduce soil erosion, and reduce production costs. Stand establishment and early-season plant density have been shown to be critical

components of a reduced tillage system. Development of herbicide-resistant rice varieties has allowed drill seeding of rice, which increases flexibility with nutrient and vegetation management. However, the effect of rotational crops on rice grain yield and soil physical condition is not well understood and requires more research. Cotton and corn production are major components of the agricultural economy in northeast Louisiana. Reduced tillage practices and herbicide tolerant crops are being adopted to sustain soil productivity and reduce surface water contamination and are improving production efficiency. However, conservation tillage systems provide a favorable microenvironment for insect populations, which have the potential to limit economic value. Basic biological information is needed on insect population dynamics in reduced tillage systems. The animal waste management component of this project will develop data and systems that allow proper use of waste products and dairy lagoon effluent in two areas of the state. The dairy industry in southeast Louisiana and the poultry industry in north Louisiana will benefit from research on pasture runoff, background indicator organisms, optimum land disposal rates for poultry litter, and new uses for poultry litter particularly as it relates to forest productivity. Treatment alternatives that generate additional revenue to the dairy and poultry operator will also be explored. Critical environmental concerns relative to agriculture and forestry production practices on water quality will also be addressed. Enhanced research on Best Management Practices (BMPs) will help reduce both point and non-point source discharges associated with crop, animal, and timber production activities.

Congressman RODNEY ALEXANDER

H.R. 2997

NIFA SRG

Louisiana State University located at 156 Thomas Boyd Hall, Baton Rouge, LA 70803.

Wetland Plants \$188,000. Since the 1930s, 1,000,000 acres of Louisiana wetlands have been lost by human activities and natural forces such as the hurricanes of 2005. This directly affects U.S. security, navigation, energy consumption, and food supply. The potential for loss of life, industry, ecosystems, and infrastructure is enormous. The Coastal Plants Program (CPP) represents a major commitment to focus proven scientific technologies and outreach capabilities on issues critical to restore the coastal wetlands of Louisiana. This program combines the expertise of AgCenter plant breeders, ecologists, and other plant and soil scientists to facilitate the development and utilization of improved native plant resources to preserve remaining marshes and stabilize those that are being re-created. This project will develop strategies for genetic improvement leading to the economic and rapid establishment of critically important wetland plant species over large areas of threatened and reclaimed coastal wetlands. Native populations will be characterized and a genetic improvement program conducted to develop superior varieties/populations with enhanced value in the restoration and protection of wetlands. Plant cloning and molecular biology will facilitate genetic characterization and genetic improvement and provide superior plant materials to Louisiana's developing commercial

wetland plant and seed industry. On-site marsh research will address issues concerning beneficial use of dredge material, sediment nourishment of deteriorating wetlands, and factors influencing vegetative response.

Congressman RODNEY ALEXANDER
H.R. 2997

Animal and Plant Health Inspection Service
Louisiana State University located at 156
Thomas Boyd Hall, Baton Rouge, LA 70803

Blackbird Management \$94,000. Blackbird depredation of rice is a serious economic problem facing rice producers in Louisiana. Depredation of rice occurs at planting and just prior to harvest; however, the most serious problem is depredation of rice seed and seedlings at planting. Yield losses due to blackbird depredation have been estimated to vary from 77 million pounds in 1995 to slightly over 93 million pounds in 2002. Economic losses associated with blackbird damage have been estimated to average \$9.3 million annually from 1995 to 2002. Damage does not occur uniformly across the state; consequently, severe economic losses may be experienced by some producers due to the concentration of blackbirds in a given area. The use of DRC-1339 has resulted in reducing the extent of damage and the magnitude of economic loss. DRC-1339 is a selective avicide specific to blackbirds, grackles, and starlings. As a result, reduction in blackbird damage to rice is achieved with little or no effect upon other bird species.

Congressman RODNEY ALEXANDER
H.R. 2997

Animal and Plant Health Inspection Service
Louisiana State University located at 156
Thomas Boyd Hall, Baton Rouge, LA 70803

Best Management Practices \$267,000. Of more than 2,600 agricultural producers trained through Louisiana's Master Farmer program, 92 have completed the third tier of the program which ends with certification from the Louisiana Department of Agriculture and Forestry. This represents a high benchmark in performance, which requires completion of eight hours of classroom instruction, participation in a Model Farm field tour, and development and implementation of an NRCS Resource Management System plan to address potential or occurring pollution. With the assistance of USDA programs and other technical assistance, these producers have installed research-based BMPs to address environmental issues. These certified producers manage more than 16,000 acres of Louisiana farmland, all within a 50-mile radius of 303d listed impaired state waters. In addition, multi-state collaboration has resulted in the development of a template by the Louisiana Master Farmer Program that can be used by other states to develop similar programs, focusing on curriculum development, implementation and lessons learned. Land area impacted by targeted programs is 1,020,507 acres.

Congressman RODNEY ALEXANDER
H.R. 3082

Army
Fort Polk, LA 71459
Multipurpose Machine Gun Range
\$6,400,000. Construct a standard design MPMG Range, required to train and test soldiers on the skills necessary to zero Squad Automatic Weapon, Machine Guns, 40mm

Automatic Launcher, and Sniper Weapons to detect, identify, engage and defeat targets in a tactical array.

INTRODUCTION OF H.R. 3329, THE LOOK-BACK ELIMINATION ACT OF 2009

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. LEWIS of Georgia. Madam Speaker, I am proud to introduce the Look-Back Elimination Act of 2009.

I am proud to serve on the Ways and Means Committee Subcommittee on Income Security and Family Support led by Chairman MCDERMOTT. I would like to thank Chairman MCDERMOTT, my good friend, the Gentlewoman from Nevada (Ms. BERKLEY), and all of my colleagues on the Subcommittee for their hard work in the areas of child welfare and foster care.

Today, American families are struggling in ways not seen since the Great Depression. Rising unemployment, health care costs, and a struggling economy are all taking their toll, and children in the foster care system must not be forgotten during these very difficult times.

When Congress passed welfare reform legislation in 1996, they eliminated the existing Aid to Families with Dependent Children (AFDC) program, which was a cornerstone of President Franklin D. Roosevelt's New Deal, and replaced it with the Temporary Assistance for Needy Families program, or TANF. At the same time, Congress locked the income eligibility requirement for federal foster care and adoption assistance benefits at the various existing 1996 income thresholds established by States under the now nonexistent AFDC program. This is known as the look-back standard.

Since that time, the federal law has not been changed, and despite changing economic realities like inflation and wage growth, states cannot update their income eligibility requirements. As a result thousands of children in foster care and adoption assistance programs are ineligible to receive federal benefits.

Last year Congress passed and the President signed legislation to phase out the look-back standard for children in the adoption assistance program. The bill I am introducing today would assist the other children affected by the look-back standard—those in the foster care system. We need to help these children, and we need to help them now.

The look-back standard sets the income limit for eligibility at thirty-one percent of the federal poverty level—a level so low that even a parent's part-time job at minimum wage could render a family ineligible. As a result, states are prohibited from using federal funds to assist those most in need. In my home state of Georgia almost sixty percent of children in the child welfare system cannot receive federal IV-E assistance. Thousands more foster care children across the country are ineligible to receive benefits. This is wrong; it is just plain wrong.

Foster care children need this support, and states are struggling to juggle services to try and prevent children from falling through the cracks. You just cannot put a price on helping a child. We must have this oversight corrected. I urge all of my colleagues to join me in supporting this commonsense legislation.

HEREFORD WWII POW CHAPEL

HON. RANDY NEUGEBAUER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. NEUGEBAUER. Madam Speaker, I rise today in recognition of the rededication of a Texas Historical Landmark, Camp Hereford Italian Prisoner of War Camp memorial chapel. This World War II monument has survived more than 64 years as a symbol of the shared history that binds Texas, the United States, and Italy together.

During World War II, the Hereford POW camp stretched across 800 acres in Castro and Deaf Smith counties in West Texas. It was the second largest United States POW camp built during World War II. An estimated 5,000 Italian POWs were held at the site between February 1943 and June 1946, when the last of the POWs were repatriated.

In 1945, the Italian POWs received permission from the U.S. military to pay for and build a chapel within the camp to serve as a marker for the burial site of their fallen soldiers. In honor of their five comrades who died while interned, skilled artisan Italian prisoners constructed the thirteen-foot-square chapel. After the war, the deceased were exhumed and returned to Italy, leaving the chapel abandoned and vulnerable to deterioration.

In 1988, former POWs donated money, original sketches, and photographs for the first major restoration of the chapel. The project was completed in time for a reunion held in Hereford in June, 1989. In 1992, the Texas Historical Commission declared the chapel a Recorded Texas Historical Landmark.

In spite of its historical significance, the chapel was severely vandalized in 2008. Thanks to financial support from the Committee for Italians Living Abroad and the volunteer effort of Castro and Deaf Smith county residents, the chapel has once again been restored to its original beauty. The Castro County Historical Commission and Committee for Italians Living Abroad will co-host a rededication ceremony Saturday, August 8, 2009.

The restoration of this monument stands to preserve the history of the mutual regard that developed between the prisoners and their captors in rural Texas, and I congratulate the community for preserving this piece of history.

HONORING MRS. ERNESTINE
NEITZEL

HON. DAVID WU

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. WU. Madam Speaker, I rise today to pay tribute to a woman who has made a very

generous contribution to Oregon's coastal health and to the recovery of Pacific salmon and steelhead.

Mrs. Ernestine Neitzel has spent almost all her life living in the Necanicum River valley within the first congressional district of Oregon. She moved to Oregon from Colorado in 1925 at the age of four. Her father had purchased some farmland on the edge of the Necanicum River where they grew vegetables to be sold at local stores in Seaside, Oregon.

In 1945, Ernestine married Mr. Herbert Neitzel, who had recently returned from serving in World War II. Together, they purchased an additional 25 acres of farmland adjacent to the existing farm and expanded it to include dairy cows. During this time, Ernestine also delivered bread to the soldiers stationed at Fort Lewis, Oregon and worked in several stores in Seaside.

In the fall of 2008, Ernestine made the decision to give her family farmland back to the Necanicum River. Before being cultivated, this land was prime estuarine and rearing habitat for Pacific salmon and steelhead. Now, she is working with individuals and organizations within the state of Oregon to restore the land to its pre-developed state. Upon completion, this new wetland and estuarine habitat will help strengthen runs of migratory Pacific salmon and steelhead as well as resident rainbow trout.

Ernestine and the Neitzel family have a long history in the Necanicum River Valley and have dedicated their lives to enriching the surrounding communities. With this contribution, she leaves a legacy of environmental conservation and dedication to the restoration of a natural resource that is an essential component to our way of life in the Pacific Northwest.

EARMARK DECLARATION

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DUNCAN. Madam Speaker, I submit the following.

Requesting Member: Congressman JOHN DUNCAN

Account: RDTE—Defensewide

Project Amount: \$2,000,000

Legal Name of Requesting Entity: Lentix, 800 South Gay Street, Suite 1625, Knoxville, Tennessee 37929

Description of Request: The funding will be used for the development of a very high resolution benchmarking vision system for long-range surveillance with focus on SOCOM and Navy tracking needs.

EARMARK DECLARATION

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARTON of Texas. Madam Speaker, I rise today to submit documentation consistent with the Republican Earmark Standards.

Requesting Member: Congressman JOE BARTON

Bill Number: H.R. 3326 Department of Defense Appropriations Bill

Account: Navy RDT&E

Legal Name of Receiving Entity: Carbon-Carbon Advanced Technologies (C-CAT)

Address of Receiving Entity: 4704 Eden Road, Kennedale, TX 76060

Description of Request: I have secured \$4,000,000 in funding to be used for the continuation of the fabrication development process by refining the design and manufacturability, improving the necessary subscale hardware durability and finally, conducting a full scale demonstration of the hypersonic weapons system at an approved test facility as it relates to the Strike Weapon Propulsion (SWEAP) system.

HONORING BRIANNA LIND AND ERIKA SCHREIBER UPON RECEIPT OF THE GIRL SCOUT GOLD AWARD

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISRAEL. Madam Speaker, I rise today to acknowledge two young women in my district, Brianna Lind and Erika Schreiber.

Brianna and Erika will receive the Girl Scout Gold Award on August 6, 2009. For their project, they put together a project to inform the public on global warming, global climate change, and risk management.

PERSONAL EXPLANATION

HON. J. GRESHAM BARRETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. BARRETT of South Carolina. Madam Speaker, unfortunately I missed some recorded votes on the House floor on Thursday, July 23, 2009.

Had I been present, I would have voted "aye" on rollcall vote No. 620 (on agreeing to the Hensarling of Texas Part A Amendment No. 2 to H.R. 3288), "aye" on rollcall vote No. 621 (on agreeing to the Latham of Iowa Part A Amendment No. 3 to H.R. 3288), "no" on rollcall vote No. 622 (on agreeing to the Frelinghuysen of New Jersey Part A Amendment No. 7 to H.R. 3288), "aye" on rollcall vote No. 623 (on agreeing to the Blackburn of Tennessee Part A Amendment No. 8 to H.R. 3288), "aye" on rollcall vote No. 624 (on agreeing to the Jordan of Ohio Part A Amendment No. 10 to H.R. 3288), "aye" on rollcall vote No. 625 (on agreeing to the Neugebauer of Texas Part A Amendment No. 11 to H.R. 3288), "aye" on rollcall vote No. 626 (on agreeing to the Stearns of Florida Part A Amendment No. 12 to H.R. 3288), "aye" on rollcall vote No. 627 (on agreeing to the Flake of Arizona Part B Amendment No. 1 to H.R. 3288), "aye" on rollcall vote No. 628 (on agreeing to the Flake of Arizona Part B

Amendment No. 4 to H.R. 3288), "aye" on rollcall vote No. 629 (on agreeing to the Flake of Arizona Part B Amendment No. 7 to H.R. 3288), "aye" on rollcall vote No. 630 (on agreeing to the Flake of Arizona Part B Amendment No. 8 to H.R. 3288), "aye" on rollcall vote No. 631 (on agreeing to the Flake of Arizona Part B Amendment No. 9 to H.R. 3288), "aye" on rollcall vote No. 632 (on agreeing to the Flake of Arizona Part B Amendment No. 10 to H.R. 3288), "aye" on rollcall vote No. 633 (on agreeing to the Flake of Arizona Part B Amendment No. 11 to H.R. 3288), "aye" on rollcall vote No. 634 (on agreeing to the Hensarling of Texas Part C Amendment No. 3 to H.R. 3288), "aye" on rollcall vote No. 635 (on agreeing to the Hensarling of Texas Part C Amendment No. 4 to H.R. 3288), "aye" on rollcall vote No. 636 (on motion to recommit with instruction to H.R. 3288), "no" on rollcall vote No. 637 (on passage to H.R. 3288).

EARMARK DECLARATION

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. YOUNG of Alaska. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the FY 2010 Department of Defense Appropriations Act.

Bill Number: H.R. 3326—Research, Development Test & Evaluation, Air Force.

Legal name and address of entity receiving earmark: Fairbanks North Star Borough, 809 Pioneer Road, Fairbanks, AK 99701.

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Funding will be used to undertake necessary follow-up engineering studies of a synthetic liquid fuels facility at/or near Eielson Air Force Base. These studies will address the environmental, technical and economic feasibility of a facility benefits, technical and economic feasibility of a synthetic liquid fuels facility and the environmental benefits and economic and technical feasibility of the transportation and sequestration of carbon dioxide to enhance crude oil recovery in northern Alaska.

This project will supply the U.S. Air Force and other military branches a secure supply of synthetic fuels to operate fighters, bombers and other aircraft and military equipment. It will help the Air Force to achieve its stated goal of certifying its fleet of aircraft on a synthetic fuel blend and purchasing 50 percent of its fuels in the form of a synthetic fuel blend by 2016.

Description of matching funds: Funding will go to supplement funds from P.L. 110-329.

Appropriated Amount: \$3,000,000.

Project Name: Synthetic Liquid Fuels.

Detailed Finance Plan: Of the \$3 million, all will go to the Fairbanks North Star Borough to be expended to study the technical, economic and environmental feasibility of the transportation and sequestration of carbon dioxide to enhance crude oil recovery in northern Alaska produced by a synthetic fuel facility located in the vicinity of Fairbanks Alaska.

Bill Number: H.R. 3326—Research, Development Test & Evaluation, Defense Wide.

Legal name and address of entity receiving earmark: Kachemak Research Development, Inc., 59584 East End Road, Homer, AK 99603.

Description of how the money will be spent and why the use of federal taxpayer funding is justified: Kachemak Research Development, Inc. is a woman owned, HUBZone, 8(a) entity. AutoScan, an under vehicle inspection system developed by KRD, is a stationary system that captures the entire undercarriage image of vehicles, ranging in size from passenger vehicles to semi-trucks. Because of the unique capabilities of AutoScan, vehicles do not need to maintain a constant speed as they travel across the system. Funding will be used for product enhancement and beta testing of AutoScan generation 2 and 3 architecture. As part of the inspection protocol at every military base, CONUS and OCONUS, the undercarriage of every delivery vehicle must be inspected. Standard inspection protocols have been comprised of a mirror-mounted stick or search pits. AutoScan makes it possible for inspection personnel to maintain a safe stand-off distance. Additionally, it stores images for later comparison and analysis if needed. And it provides one, complete, clear image of any vehicle's under-side in real-time and capabilities that no similar system is able to provide.

Description of matching funds: KRD profit is reinvested back into the company to provide facilities that are needed to perform the work. KRD investment exceeds \$750,000 to-date.

Appropriated Amount: \$3,000,000.

Project Name: Under-Vehicle Inspection System.

Detailed Finance Plan: Of the \$3M, roughly 25% will go to administrative support within OSD and the contracting agency. The remaining 75% of the funding, \$2.25M, will cover labor: \$1,290,000; materials (including equipment and fabrication) \$238,000; benefits \$262,000; OH \$214,000; technical consulting \$112,000; \$31,000 travel; \$95,000 installation and beta testing of generation 2 and 3 AutoScan before fielding.

HONORING YVONNE DESOUSA
UPON RECEIPT OF THE GIRL
SCOUT GOLD AWARD

HON. STEVE ISRAEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. ISRAEL. Madam Speaker, I rise today to acknowledge a young woman in my district, Yvonne Desousa.

Yvonne will receive the Girl Scout Award on August 3, 2009. For her project, she put together sewing squares decorated by younger girl scouts for children at Huntington Hospital. I wish to commend Yvonne for her community service.

EARMARK DECLARATION

HON. JEFF FORTENBERRY

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. FORTENBERRY. Madam Speaker, pursuant to the Republican Leadership standards on member requests, I am submitting the following information regarding the earmarks I received as part of the FY10 Defense Appropriations Bill:

Requesting Member: Congressman JEFF FORTENBERRY

Bill Number: H.R. 3326, FY10 Defense Appropriations Bill

Account: RDT&E, Army/Medical Technology/Program Element #: 0602787A/Line Item #: 28

Project Name: Understanding Blast-Induced Brain Injury

Amount: \$3,000,000

Name and Address of Requesting Entity: University of Nebraska-Lincoln located at 302 Canfield Administrations Building, Lincoln, Nebraska 68583

Description: Most of the head and brain injuries occurring in current combat situations result from roadside explosions, but there is currently only limited understanding of blast-induced traumatic brain injury. This funding would be used to model how blast waves from explosions cause short- and long-term brain injury to warfighters and to develop devices and equipment to mitigate the damage. This research will lead to devices for improved detection and optimized equipment designs to protect against multiple insults to the brain from the blast impact and blast waves.

Requesting Member: Congressman JEFF FORTENBERRY

Bill Number: H.R. 3326, FY10 Defense Appropriations Bill

Account: RDT&E, Air Force, University Research Initiatives, PE 0601102F, Line 2

Project Name: Safeguarding End-User Military Software

Amount: \$1,500,000

Name and Address of Requesting Entity: University of Nebraska-Lincoln located at 302 Canfield Administrations Building, Lincoln, Nebraska 68583

Description: Military software increasingly is being created by "end-user programmers," who use programming tools such as spreadsheets, military planning systems, and Matlab simulations to create software. This unvalidated software runs critical day-to-day operations and often is not dependable. The funding would be used to develop advanced software engineering safeguards that can be embedded in software programmed by military personnel to help them prevent and detect errors and produce more dependable military systems that save lives and money. Prototype safeguards implementing algorithms and mechanisms will be built and validated through carefully designed studies. These safeguards will be convenient for users and help them reason through the dependability of software as they develop it, protecting programmers and operators from errors and saving millions of dollars in programming development costs.

EARMARK DECLARATION

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. TIAHRT. Madam Speaker, in accordance with the February 2008 New Republican Earmark Standards Guidance, I submit the following in regards to H.R. 3288, the Fiscal Year 2010 Transportation, Housing and Urban Development, and Related Agencies Appropriations Act.

FEDERAL AVIATION ADMINISTRATION—NATIONAL INSTITUTE FOR AVIATION RESEARCH (NIAR) WICHITA STATE UNIVERSITY

H.R. 3288, the Fiscal Year 2010 Transportation, Housing and Urban Development, and Related Agencies Appropriations Act contains \$1,000,000 for facilities and equipment to expand the capabilities of its National Institute for Aviation Research (NIAR) to conduct Advanced Materials Research in support and improvement of its ongoing aviation safety research in the areas of metallic and nonmetallic structures, crashworthiness, and aging aircraft effects. The entity to receive funding for this project is Wichita State University located at 1845 Fairmount St, Wichita, Kansas, 67260.

FEDERAL AVIATION ADMINISTRATION—NATIONAL INSTITUTE FOR AVIATION RESEARCH (NIAR) WICHITA STATE UNIVERSITY

H.R. 3288, the Fiscal Year 2010 Transportation, Housing and Urban Development, and Related Agencies Appropriations Act contains \$1,000,000 for technical personnel, facilities and equipment at the National Institute for Aviation Research to provide a comprehensive education and training initiative for composite airframe maintenance and airworthiness awareness. The entity to receive funding for this project is Wichita State University located at 1845 Fairmount St, Wichita, Kansas, 67260.

FEDERAL HIGHWAY ADMINISTRATION—INTERSTATE MAINTENANCE DISCRETIONARY—CITY OF WICHITA, KS: INTERSTATE 235/US 54 AND I-235/CENTRAL AVENUE INTERCHANGE

H.R. 3183, the Fiscal Year 2010 Transportation, Housing and Urban Development, and Related Agencies Appropriations Act contains \$750,000 for preliminary engineering and right-of-way costs for the reconstruction of the Kellogg (US-54) and Central interchanges on I-235 in western Wichita. The entity to receive funding for this project is the City of Wichita, located at City Hall, 455 North Main, Wichita, KS 67202.

FEDERAL HIGHWAY ADMINISTRATION—SURFACE TRANSPORTATION PRIORITIES CITY OF WICHITA, KS: 21ST STREET NORTH RAILROAD OVERPASS

H.R. 3183, the Fiscal Year 2010 Transportation, Housing and Urban Development, and Related Agencies Appropriations Act contains \$500,000 for an elevated roadway overpass along 21st Street North from Broadway to I-135 in order to eliminate the lengthy vehicular traffic delays and vehicle entrapment issues associated with multiple at-grade rail crossings located along this segment of a busy east-west arterial city street. The entity to receive funding for this project is the City of Wichita located at 1845 Fairmount St, Wichita, Kansas, 67260.

COMMEMORATING THE VOTING
RIGHTS ACT OF 1965

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DAVIS of Illinois. Madam Speaker, as we enter into the month of August, I would like to take this opportunity to commemorate the anniversary of The Voting Rights Act of 1965. On August 6, 1965, President Lyndon Johnson signed the Voting Rights Act into law. The date marks a pivotal moment in our country's progress in extending equal membership in the political processes to every American. The right to vote is a fundamental principle of all democracies. Yet, in our great nation whose founding fathers and documents boasted of its creation to promote equality, there was a substantial period of history during which minority men and women were barred from that very right. The Fifteenth Amendment to the Constitution guarantees the right to vote for every citizen, but the discriminatory practices of Jim Crow in the antebellum south used taxes, literacy tests, gerrymandering, and language discrimination to prevent Blacks from voting and taking part in the government. Without the right to vote, many African Americans were subject to intolerable injustices and appalling prejudice.

The Voting Rights Act represents a culmination of the great efforts of civil rights organizations and activists to inform the nation of the extensive disenfranchisement taking place throughout the country. The anniversary of the enactment of this historic law provides an opportunity to acknowledge these activists. Most notably, their tremendous dedication and uncompromising pursuit of equality took the form of peaceful marches from Selma to Montgomery that were met with vicious attacks by state and local police forces. These events caught the attention of the President and Congress, contributing to a commitment to new civil rights legislation to counter the resistance and discrimination laws within the states. The enactment of the Voting Rights Act in 1965 allowed African-Americans across the country to finally have a say in the functioning of the country. Today, I celebrate the anniversary of this law as a reflection of what our country represents: a nation pledged to representing the views, values, and beliefs of all the people it serves.

HEALTH CARE

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. McCOLLUM. Madam Speaker, on July 20th, I held a health care hearing in the Minnesota State Capitol to discuss the challenges and opportunities for health care reform presents for Minnesota. Representatives from patient advocate groups, health plans, hospitals, health plans, County Commissioners, and State House Representatives were in attendance. The speakers discussed the need to ex-

pand preventative care, to end the practice of denying coverage for pre-existing conditions, and to improve access to quality, affordable care.

In hearing I heard over and over again that the current flawed Medicare reimbursement formula is harming Minnesota. The people of Minnesota want health care reform that addresses the three major challenges in health care reform—cost, quality, and access—none of which can be addressed without fixing the Medicare reimbursement formula. I support moving towards a system that ensures that all patients will receive evidence-based, quality care as the standard.

OPENING STATEMENT BY CONGRESSWOMAN

BETTY McCOLLUM

FEDERAL HEALTH CARE REFORM: OPPORTUNITIES
AND CHALLENGES FOR MINNESOTA

Good morning. Thank you all for joining me for this morning's hearing.

My goal today is to hear from a distinguished and diverse group of Minnesota experts on the subject of health care reform in Washington. I want to hear not just a view of the need for national reforms—but more specifically—the opportunities, challenges, costs, and consequences for Minnesota as we reform our nation's health care system.

Let me start by saying I support President Obama's goal of reforming health care with a focus on reducing cost, increasing access, and ensuring quality care for all Americans. The current system is not sustainable for our families, businesses, tax payers, or the providers of health care. In addition, almost 50 million Americans are uninsured and too often left to access care in the emergency room where it is too expensive and too late.

As we look ahead I want to maintain a system where people can keep their doctors and private insurance plans if they are working well for them.

I support a public insurance option that will expand the opportunity for coverage and create a competition in the marketplace to keep premium costs down and ensure quality care.

I believe we have both an opportunity and an obligation to ensure every child in America is not only covered by insurance but able to access the care they need to grow up healthy, safe and successful.

We can do all of these things, but I have a concern—a major concern. Comprehensive health care reform in my opinion must mean that all 50 states move forward under any legislation passed by Congress and signed by President Obama. In other words—I want a bill in which no state is left behind—and that means Minnesota.

In Minnesota we are doing a lot of things right. And, each and every one of the people testifying today is contributing to making health care in Minnesota successful. We are not perfect and I want to see even greater strides forward here at home, but when compared to many other places across the U.S. we are doing a good job.

In Congress health care reform is dominating the agenda and we are at a crucial time.

Minnesota's successes must not only be acknowledged, they should be rewarded. Instead, the legislation currently proposed has the real potential to actually harm Minnesota's delivery of health care and that is simply unacceptable.

About fifteen years ago while serving here in the Minnesota House of Representatives I worked on the issue of geographic disparities in Medicare reimbursement. The flawed and

discriminatory formula that funds Medicare continues to penalize Minnesota tax payers and patients, doctors, hospitals, counties and the entire health care sector which is providing high quality, low cost care.

If the health care reform legislation moving through Congress simply extends the existing out-of-date Medicare reimbursement system into the future—rewarding high cost, low quality states while continuing to penalize Minnesota—then this is not reform.

Even worse, if this flawed Medicare reimbursement formula is extended as the basis of a public insurance option this will not only penalize Minnesota, it will undermine and deteriorate the very success our state has attained in delivering quality, low cost care.

In Congress, I have been outspoken about Minnesota's unfair treatment among the leaders of the Democratic Caucus and Chairmen Waxman, Rangel and Miller who are writing the bill.

I have distributed a letter I sent to Democratic leadership, signed by 19 other Democrats. Let me read from the letter:

"We represent states in which the quality of care exceeds the national average and per-beneficiary fee-for-service Medicare costs are substantially lower than the national average. Our 'low-cost, high quality' states are setting the national standard for Medicare, yet we are penalized by the current Medicare reimbursement formula. Furthermore, any public insurance option that is based on Medicare's current reimbursement formula would only result in an unacceptable further penalization of our states."

I was pleased to have Congressmen Walz, Ellison, and Oberstar join me on this letter because we got the attention of the leadership.

The next day I was invited by Speaker Pelosi to a meeting with leadership and the three committee chairman—Chairmen Waxman, Rangel, and Miller and Majority Leader Steny Hoyer to discuss this issue. In the meeting a study of the Medicare reimbursement formula was offered ... and quickly rejected. I made it clear that we don't need to study this problem; it has been studied to death. Now is the time to fix the formula.

I'm committed to working with President Obama and leaders in Congress to pass health care reform that works to make our system meet the needs of all Americans. But this doesn't mean I will allow Minnesota to be left behind or disadvantaged because we are a leader.

Our group of twenty Democrats will again be meeting tomorrow. My message to leadership is clear—I want to pass health care reform but I will not vote for a bill that hurts Minnesota while benefiting other states. That is not reform, but rather a recipe for disaster.

In closing, this is the most important legislation I've worked on in my nine years in Congress.

It must meet Minnesota's needs and if it does not it will be difficult for our delegation to support it.

In my first year in Congress—2001—education reform legislation was passed called "No Child Left Behind." It was championed as a bill that would transform public education—except for one thing—I was sure it was going to hurt Minnesota and set back the reforms we already had in place. I was the only Democrat on the Education Committee to vote against "No Child Left Behind" and eventually 8 of the 10 members of the Minnesota delegation voted against it.

I want health care reform but I will not put my constituents and the State of Minnesota at a disadvantage or perpetuate a system that penalizes the excellent health care we deliver in our state.

I feel a sense of urgency as I return to Washington this afternoon. Your testimony today I hope will reinforce the need for reform and the need to ensure Minnesota's best interests are reflected in any legislation that is considered by Congress.

Thank you and I look forward to hearing your testimony.

TESTIMONY FROM BROCK NELSON, REGIONS HOSPITAL, CEO

Thank you Congresswoman McCollum for the opportunity to be here today and share our thought on health care reform legislation currently being debated by the United States House of Representatives.

My name is Brock Nelson. I am the CEO of Regions Hospital in St. Paul. Regions Hospital is part of the HealthPartners family of non-profit health care organizations.

Let me start by stating clearly, We wholeheartedly support President Obama's call for healthcare reform, and agree with his position that "the status quo is the one option that is not on the table". We applaud Congress and the White House for their ongoing efforts to obtain universal coverage for all Americans.

Legislation in the House is bold in its effort to obtain universal coverage through expanded subsidies and requirements on both individuals and business to provide coverage. Bold action is necessary if you want to address the problem of 50 million Americans who currently lack health coverage.

Unfortunately, these efforts to provide coverage for all will ultimately fall short unless Congress takes equally bold action to address how we pay for health care in this country. Our system currently rewards volume over value, and poor outcomes over good outcomes. We must change that equation if we want to make health care affordable in this country.

We urge you to insist that reform legislation includes a method that pays for value and quality, rather than the quantity of medical procedures. Currently, Medicare pays the most to less than one-half of the health care markets in a minority of states that generally provide poorer outcomes, safety, and service at higher cost, and much less to most of the country where providers demonstrate generally better outcomes, safety and service at lower cost. We believe that insertion of a measurement of value into the payment system is a critical step to change provider behavior throughout the country and "bend the cost curve" in U.S. health spending without compromising health.

Much of the discussion in Washington has focused on a "public option" and the development of an "exchange" or "gateway" to help deliver that option. We are not opposed to these mechanisms and in fact they could provide a benefit for parts of the market. But any new federal mechanism to provide coverage must operate under the same rules and market controls that exist today. A public option, like the current House proposal, that is based off of Medicare payments or an exchange that tilts the rules in favor of the public plan are bad choices and potentially devastating for local, non-profit health care markets like Minnesota.

'Pay for value' is the only tactic that will "bend the cost curve" in U.S. health spending, improve the quality of care that our

citizens deserve, and create a long and healthy future for both the American people and the American healthcare system.

Congresswoman McCollum, you have been fearless in your efforts to address the geographic inequity in Medicare and these underlying problems in our payment system. Thank you! Please keep fighting and please let us know what we can do to provide help and support in your efforts.

TESTIMONY OF MELISSA WINGER, CHAIR OF FAMILY ADVISORY COUNCIL, CHILDREN'S HOSPITALS AND CLINICS OF MINNESOTA

I am the current Chairperson of the Family Advisory Council at Children's Hospital and have been involved with the Council for 11 years. Through the council I have met many families who have a similar story as mine.

Thirteen years ago my son Devin was born with a complex chromosome disorder: he is missing 45 genes on chromosome number 4 and has an extra 30 genes on chromosome 6.

Devin has 17 medical conditions involving all organ systems. This has required over 40 surgeries and procedures and double that of hospitalizations all at Children's Minneapolis.

He sees over a dozen pediatric specialists who have all been able to treat his unique needs.

All of his care has been coordinated and family centered which is something that Children's value with ALL their families and patients.

We are currently treating a virus in his bone marrow and a deficiency in the immune system and he is getting IVIG infusions. He also had a Brain Aneurysm in his carotid artery repaired and needs to have annual testing involving high tech imaging to make sure the aneurysm continues to be stable. He also receives genetic testing to be able to pinpoint potential problems before he even starts to have symptoms.

If Children's could no longer provide this care for him, I am not sure he would survive. The aneurysm could return or his immune system could fail to respond to common infections.

I have my son today because of Children's. Through the outpatient rehab clinics he learned to walk, communicate, and manage tube feeds so he is no longer fully dependent on his feeding tube. He goes to school and performs in music shows and enjoys every minute of it!

I worry about my son, what if he gets sick? What if his bleeding disorder becomes too much to handle? What if he has difficulty with his respiratory condition? I am instantly reassured that Children's is just a few miles away with everything needed to care for him and make him well again.

There are hundreds if not thousands of families in this state who have depended on the specialty care that Children's provides when their child needed medical attention like my little Devin. Children's has never given up hope for Devin, I have certainly never given up hope and at the end of the day I hope that our lawmakers won't give up on my son.

I may hear one day "that there is nothing more we can do for Devin," as hard as that sounds I will have to somehow accept that. However if that statement starts with "because of budget cuts there is nothing more we can do for Devin," I will never be able to accept that.

I see things as a wall going up between my son and the care he needs at Children's. Everytime there is a Cut to Medicare funding. Everytime a service or prescription is

denied. Everytime complex regulation and policy put into place. That wall continues to rise to the point the care my son needs may no longer be available.

My son and I are caught in a never-ending circle. He gets sick, he misses days of school, I am unable to go to work. If we can access the best pediatric effective, high quality, safe care that Children's provides, he can recover return to school and live up to his full potential and I can continue to work without being emotionally and financially ruined.

I know these are tough times and difficult decisions need to be made. But I urge you not to make decisions about health care that will effect the care my son so desperately needs and deserves.

TESTIMONY OF ALAN L. GOLDBLOOM, MD, PRESIDENT AND CHIEF EXECUTIVE OFFICER, CHILDREN'S HOSPITALS AND CLINICS OF MINNESOTA, MINNEAPOLIS/ST. PAUL, MN

I wish to thank Representative McCollum for inviting me to testify on behalf of Children's Hospitals and Clinics of Minnesota. I appreciate the opportunity to give a voice to children in the health care debate.

This is an exciting time in America. We have an unprecedented opportunity to reform the health care system and expand coverage to all. We applaud Congress for working toward this goal, but also want to remind lawmakers that expanding health insurance coverage doesn't automatically guarantee access to quality care. No matter what we do on the coverage side, if we don't also address Medicaid reimbursement levels, many patients will still find it hard to get the care and services they need.

Thus far, much of the debate has focused on Medicare. I will focus more on Medicaid. Medicaid is the single largest insurer of children in the United States. Throughout the country, children, and the children's hospitals that treat them, are particularly vulnerable to the impact of inadequate Medicaid reimbursement. At Children's of Minnesota, we served more than 42 thousand children on Medicaid in 2008.

Children's is the state's largest provider of care to children with cancer, heart disease, severe prematurity, and complex surgical conditions. We pride ourselves on superb outcomes, and are committed to turn no child away, regardless of insurance status.

Medicaid represented 40 percent of our revenue last year. Six years ago it was 30%. For most adult hospitals that number is closer to 10 percent, and often less. Yet Medicaid pays only 80% of our cost. Moreover, while the number of children relying on Medicaid insurance seems to increase each year, we have seen the reimbursement rates erode year by year, usually because of state budget cuts. As the gap between cost and reimbursement increases, our ability to provide necessary care is increasingly threatened.

Much of the health care reform debate has focused on reimbursement rates for Medicare—coverage for our seniors. It is generally 20-30% lower than private plans. The fact is that Medicaid rates are 30% lower than Medicare! Across the country, on average, Medicaid pays about 71% of the cost of care, if you exclude disproportionate share (DSH) payments. If you include those DSH payments it gets up to 77%. If coverage is expanded, but the rates continue to reimburse below the cost of care, then it will be even harder to assure appropriate access to care.

Here in Minnesota, we have an additional problem. The hospitals in our state have justly earned a reputation for providing some of the highest quality and lowest cost

care in the nation. Our reimbursement rates are among the lowest in the country. We are therefore extremely concerned about legislative proposals that would apply across-the-board cuts to existing reimbursement rates, without taking into account the value of care already being delivered. The simple message to Minnesota appears to be: "Thanks for leading the nation in keeping costs down and providing the highest quality care. As a reward for those efforts, we are going to cut your reimbursement even further!"

If health care reform is going to ensure real access to health care for children, Congress needs to address a number of issues.

First, health care reform bills must include provisions to set Medicaid reimbursements at a rate that is at least comparable to Medicare. Ideally, Medicaid should cover the true costs of care. The America's Affordable Health Choice Act of 2009 does propose to increase primary care physician payments under Medicaid to 100% of Medicare by 2012. But that won't be sufficient. To ensure true access to care, Medicaid must reimburse specialists and hospitals at this level as well. For the sickest children, access to specialist care in children's hospitals is essential.

Second, we need to protect Disproportionate Share Hospital payments, which help expand access to care by closing the gap between Medicaid reimbursements and actual costs. If more people are covered, but the reimbursement rates remain significantly below cost, then the need for DSH payments will in fact be even greater.

Finally, health care reform needs to help eliminate disparities, and address the unique health and developmental needs of children including coverage for the Early Periodic Screening, Diagnosis, and Treatment (EPSDT) Program.

The investment in children's health makes a difference that lasts for 70 or 80 years, not only in productive lives, but in avoidance of long term health costs. No other health care expenditure has that kind of return on investment. The needs of children must be front and center in this debate.

Again, thank you for allowing me to speak before you today. I am happy to answer any questions you may have.

HEARING ON "MAKING SENSE OF IT ALL: AN EXAMINATION OF USPS'S STATION AND BRANCH OPTIMIZATION INITIATIVE AND DELIVERY ROUTE ADJUSTMENTS"

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. KUCINICH. Madam Speaker, I submit the following statement I made in the Subcommittee on the Federal Workforce, Postal Service, and the District of Columbia.

[Subcommittee on Federal Workforce, Postal Service and the District of Columbia, July 30, 2009]

HEARING ON "MAKING SENSE OF IT ALL: AN EXAMINATION OF USPS'S STATION AND BRANCH OPTIMIZATION INITIATIVE AND DELIVERY ROUTE ADJUSTMENTS."

(By Rep. Dennis J. Kucinich)

As an ardent supporter of the Post Office, I am deeply concerned about USPS' financial

condition and I appreciate the magnitude of the task ahead of the Postal Service to ensure its survival.

As you know, on July 16th, the Postal Service announced that 16 Post Office Branches in the Greater Cleveland Area would be reviewed for possible consolidation. After reading the testimony and the GAO report for this hearing, and after hearing from my constituents, I have several concerns. I am concerned that final decisions regarding each branch under consideration for consolidation will be made without full community participation and input. I am concerned that people in my community and communities across the country will face a significant and unnecessary reduction in access to crucial services. I have concerns about the private sector taking over the services that these facilities provide—because privatization of a public need like postal service rarely goes well. The review process must be done at the local level and must consider the unique demands on each individual facility to ensure that the concerns of the community, customer, postal workers and effects on the local economy are fully considered.

Mr. Small, can you please address those concerns? Specifically, how does the Postal Service ensure community participation in the decision making process? How does it use demographic and socio-economic data in making the recommendation to consolidate or close any postal facility? How do I know that any reduction in facilities will not allow private companies to take over the services that will be lost?

(he will give an answer that will likely not be sufficient to address the concerns)

Mr. Small, I thank you for your answer but I remain very concerned. I have here a letter addressed to you asking specific questions about the postal service's decision-making process. I would like to respectfully ask your cooperation in providing the answers. May I count on your help?

PERSONAL EXPLANATION

HON. ROSA L. DeLAURO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. DeLAURO. Madam Speaker, due to the death of a close friend, I missed a series of votes on the FY10 Department of State, Foreign Operations, and Related Programs Appropriations Act and also two suspension bills—H. Con. Res. 127; and H. Con. Res. 131.

Had I been present, I would have voted "aye" on the following rollcall numbers: 511; 512; 513; 514; 515; 516; 519; 521; 523; 525. I would have voted "no" on rollcall numbers: 517; 518; 520; 522; 524.

CONGRATULATING CONTINENTAL AIRLINES ON ITS 75TH ANNIVERSARY

HON. PETE OLSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. OLSON. Madam Speaker, I would like to recognize Continental Airlines on their 75th

anniversary. Continental was founded 75 years ago as a mail service by Walter T. Varney and Louis Mueller.

Continental has risen to one of the most respected commercial passenger airlines flying more than 2750 flights daily to more than 260 destinations on five continents.

They have been named for the fifth time, in as many years, as the Best Airline in North America at the OAG Airline of the Year Awards;

In addition, Continental has been rated as the top airline on Fortune magazine's annual industry list of World's Most Admired Companies for six consecutive years.

I would like to congratulate Continental and their employees on their 75th anniversary and look forward to many more years of flying to come.

HONORING THE LIFE OF NEW YORK STATE SENATOR OLGA A. MÉNDEZ

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. RANGEL. Madam Speaker, I rise today to ask my colleagues to take some time out to honor an incredible community leader and important figure on the national stage, Olga A. Méndez.

Méndez, who passed away Wednesday, July 29 after a long battle with breast cancer, was the first Puerto Rican woman elected to state legislature in the mainland United States, serving in the New York State Senate from 1978 to 2004. She was a passionate leader and legislator that fought for not just the people of her beloved East Harlem, but for all people of humble backgrounds. We became good friends working for our constituents and while we may not have seen eye-to-eye on all issues over the years, there was never a doubt that she gave everything she had to public service.

Born in Mayaguez, Puerto Rico in 1925, Olga earned a bachelor's degree at the University of Puerto Rico and eventually earned her a doctorate in education from Yeshiva University after she moved to New York in the 1950s. She soon became involved in community issues and politics, going from being a Democratic convention delegate in 1972 and a deputy commissioner of the Agency for Childhood Development in New York City to the office of the New York State Senate in 1978.

The first Puerto Rican woman elected to state legislature in the mainland United States, Olga was soon on the frontlines of numerous battles to make sure that people were given the resources and opportunities to improve the lives of their families and their communities, no matter where their country of origin or their background. At a time when so few women occupied positions of power on any level, she smashed stereotypes and opened doors so that a new generation of leaders could be more diverse and open-minded.

In her 26 years in Albany, Olga brought in thousands of dollars in state funds to her district. We became good friends, collaborating

together to bring not just city and federal aid to East Harlem and the South Bronx, but also private dollars to assist residents, especially families and seniors. As she worked hard to reduce truck emissions and the alarming rates of asthma in urban neighborhoods, she also reached out to developers on initiatives that would create jobs and expand opportunities for local business. Those seeds are continuing to bear fruit, most recently in projects like the East Harlem Automall and East River Plaza, a facility along the river on E. 116 St. that will soon open with tenants Home Depot and Costco. The fact that she was willing to risk her standing late in her political career to switch parties was just another example of her willingness to do anything for her constituents.

Madam Speaker, I will be among many in New York and across the Nation that will miss Olga's passion and straight from the hip commentary. I know that she will be leading the cheers in heaven when we see our native daughter, Judge Sonia Sotomayor, finally confirmed as a Supreme Court Justice. Thankfully, Olga's legacy can be found in her numerous legislative victories, including our state minimum wage, various worker protection laws and in the dozens of education, health and affordable housing projects that she helped fund. And it will certainly be remembered as we see a new cadre of Latinas ascend into our Nation's leadership circles, their achievements built on the foundation of expectations she helped create.

I am submitting a July 30, 2009 tribute editorial from New York's premier Spanish-language newspaper, *El Diario/La Prensa* which describes Olga's career and importance to our community.

[From *www.eldiariiony.com*, July 30, 2009]

A LEGENDARY PIONEER

As New York stands ready to celebrate one of its daughters joining the Supreme Court, it also mourns the loss of one of its most fearless leaders.

Yesterday, former New York State Senator Olga Méndez died at the age of 84 after a long battle with cancer. Méndez represented El Barrio and sections of the South Bronx in the Senate until 2004, after serving for 13 consecutive terms.

Born in Mayaguez, Puerto Rico, Méndez understood well the challenges Judge Sonia Sotomayor has faced and will continue to face as a Hispanic woman. The judge withstood grilling from white, male conservatives and she will become one of only two female justices on the Court.

In 1978, Méndez made history as the first Puerto Rican woman elected to a state legislative office in the United States. Her victory in representing Puerto Ricans and a district the state neglected should have landed the wide respect of her colleagues. Instead, Méndez, one of only a few women then in the state senate, found herself wrestling with the boys' club politics of New York.

Méndez was brash, bold and aggressive because she had to be. She cut her teeth in the Senate and became a battle-ready politician. And she balanced what few politicians were able to do well—an on-the-ground constituency services with the ability to achieve critical legislative negotiations. This, in a Senate that was controlled by Republicans during the entire 26 years she served.

Despite all of the disadvantages, Méndez successfully fought for an increase in the state's minimum wage, ushered in legisla-

tion that provided basic rights to migrant farm workers, and secured funding for senior citizen centers. She also fought for resources for early childhood development and gained bipartisan support for affordable housing and economic development initiatives in her district.

Méndez provoked many criticisms, some valid. She opposed abortion rights and was accused of making homophobic statements about a political opponent. Controversies like her party switch contributed to her eventual political demise.

In 2002, she registered as a Republican in a bid to bring resources to her district, a maneuver that today seems to be acceptable depending on who is making the move. Méndez complained that Democrats were taking Latinos for granted and saw herself as handling the business of her district.

For her faults, the legendary senator, who was widowed early and had no children, sacrificed a family life for the political commitment she made. She used her rich background in education, her political experience, and above all, her passion for her community to help many people.

Méndez never minced her words. Anyone who came into contact with her was left with a lasting impression. But it would be a mistake to remember Méndez as simply a colorful personality instead of who she truly was—a fierce politician who did not back away from a bare-knuckled fight.

HONORING THE DEATH OF MATTHEW GLOMB, A RESIDENT OF GREATER PRINCE WILLIAM, VA

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to recognize the lifelong commitment to public service of Matthew Glomb, a devoted father and husband, a loyal friend to his colleagues, and an admired member of greater Prince William, VA.

Mr. Glomb pursued a career in the U.S. Coast Guard's Corps of the Judge Advocate General, serving at one point as a Military Judge. Following his tenure with the Coast Guard, Mr. Glomb continued his service to our Nation in the Aviation-Admiralty Office of the U.S. Department of Justice, where he specialized in maritime law.

Tragically, Mr. Glomb was fatally struck by lightning on Monday, July 27, 2009, at the age of 49. He was jogging along the beach of Southern Shores, NC, in the Outer Banks while vacationing with his son at their family beach house. He died instantly, leaving behind his wife and two children.

Mr. Glomb is remembered by those closest to him as a man of deep faith who immediately cared about everyone he met, and he will forever be revered as having an unparalleled sense of humor, and an unwavering commitment to serving others.

Madam Speaker, I ask my colleagues to join me in recognizing the accomplishments of this dedicated public servant and in expressing our condolences to the entire Glomb family.

PERSONAL EXPLANATION

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. DAVIS of Illinois. Madam Speaker, I was unable to cast votes on the following legislative measures on July 27, 2009. If I were present for rollcall votes, I would have voted yea on each of the following:

Roll 647, July 27, 2009: On Motion to Suspend the Rules and Agree, as Amended: H. Res. 593, Recognizing and celebrating the 50th Anniversary of the entry of Hawaii into the Union as the 50th State;

Roll 648, July 27, 2009: On Motion to Suspend the Rules and Pass, as Amended: H.R. 1376, Waco Mammoth National Monument Establishment Act of 2009; and

Roll 649, July 27, 2009: On Motion to Suspend the Rules and Pass, as Amended: H.R. 1121, Blue Ridge Parkway and Town of Blowing Rock Land Exchange Act of 2009.

EARMARK DECLARATION

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Mr. TIAHRT. Madam Speaker, in accordance with the February 2008 New Republican Earmark Standards Guidance, I submit the following in regards to H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act:

Department of Education (DOE)—Arkansas City Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for Arkansas City Public Schools, Arkansas City, KS, for technology upgrades, professional development, and development training/technical assistance in the Fund for the Improvement of Education (FIE) Account. The entity to receive funding for this project is Arkansas City Schools, Unified School District 470, at 2545 Greenway, Arkansas City, KS 67005.

This funding will allow for the purchase of additional technology to be used by both students and teachers, provide for professional development and teacher training in the use of this technology, and technical assistance.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Augusta Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for USD 402, Augusta, KS Public Schools for technology upgrades in the Fund for the Improvement of Education (FIE) Account. The entity to receive funding for this project is USD 402, Augusta Public Schools, 2345 Greyhound Drive, Augusta, KS 67010.

This funding will allow for the purchase of additional technology to be used in classrooms across the district.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Independence Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for Independence Public Schools, Independence, KS, for technology upgrades and teacher training in the Fund for the Improvement of Education (FIE) Account. The entity to receive funding for this project is Independence Unified School District 446, at P.O. Drawer 487, 517 N 101h, Independence, KS 67301.

This funding will allow for the purchase of technology to be used in math and science curriculum across the district, and provide for teacher training in the use of the technology.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Newton Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for USD 373, Newton, KS, Public Schools for technology upgrades in the Fund for the Improvement of Education (FIE) Account. The entity to receive funding for this project is USD 373, Newton, Kansas Public Schools, at 308 East 1st Street, Newton, KS 67114.

This funding will allow for the purchase of technology to be used in the district's Distance Learning Lab, and high school library.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Wellington Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for USD 353, Wellington, KS Public Schools for technology upgrades and teacher training in the Improvement of Education (FIE) Account. The entity to receive funding for this project is USD 353 Wellington, at 221 S. Washington, Wellington, KS 67152.

This funding will allow for the purchase of in-classroom technology and teacher training and technical assistance in the use of that technology.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Butler County Public Schools

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$250,000 for USD 490, Butler County, KS, for technology upgrades and teacher training at the El Dorado, KS school system in the Improvement of Education (FIE) Account. The entity to receive funding for this project is USD 490, Butler County, KS, at 124 West Central, El Dorado, KS 67042.

This funding will allow for the purchase of technology to be used in conjunction with the establishment of a student technology program at the district middle school, and related teacher training.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Butler Community College

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$500,000 for But-

ler Community College, El Dorado, KS, for the purchase of equipment in the Higher Education account. The entity to receive funding for this project is Butler Community College, 901 South Haverhill Road, El Dorado, KS 67042.

This funding will allow for the purchase of equipment to facilitate training necessary to model, render and interact with 3-D objects in the fields of architecture, bio-medicine, engineering, manufacturing, and unmanned aircraft systems.

No matching funds are required for this Department of Education project.

Department of Education (DOE)—Coffeyville Community College

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$500,000 for Coffeyville Community College, Coffeyville, KS, for their Native American Center, including the purchase of equipment, in the Higher Education account. The entity to receive funding for this project is Coffeyville Community College, 400 West 11th, Coffeyville, KS 67337.

This funding will provide for equipment and technology, travel and operating expenses necessary to plan, establish, train educators, recruit students, and fundraise for the Native American Center and scholarship program.

No matching funds are required for this Department of Education project.

Department of Health and Human Services (HHS)—University of Kansas Medical School—Wichita

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$500,000 for the University of Kansas School of Medicine, Wichita (KUSM—Wichita) for development of the Clinical Skills Simulation Laboratory, including curriculum development and purchase of equipment, in the Health Resources and Services Administration—Health Facilities and Services account. The entity to receive funding for this project is KUSM—Wichita, 1010 North Kansas, Wichita, KS 67214.

No matching funds are required for this Department of Health and Human Services project.

Department of Health and Human Services (HHS)—World Impact Good Samaritan Clinic

H.R. 3293, the Fiscal Year 2010 Labor, Health and Human Services, and Education Appropriations Act contains \$1,000,000 for the World Impact Good Samaritan Clinic in Wichita, KS, for facilities and equipment, in the Health Resources and Services Administration—Health Facilities and Services account. The entity to receive funding for this project is World Impact's Good Samaritan Clinic at 3701 E. 13th Street, Wichita, KS 67208.

The funding would be used to expand and renovate its facilities to address the dramatic growth in medical and dental needs of the impoverished.

No matching funds are required for this Department of Health and Human Services project.

IN APPRECIATION OF JOHN CARVER'S LIFETIME OF SERVICE

HON. JACKIE SPEIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, July 30, 2009

Ms. SPEIER. Madam Speaker, mention John Carver's name on the San Francisco Peninsula and, odds are, you will be met with a smile. The long-time resident, business executive and philanthropist has helped more people than even he is aware and has shaped his community through his generosity, his leadership and his time.

John was born in Oakland and moved to the Peninsula with his family as a boy. After graduating from Stanford University, he married the love of his life, Susan Haigh Carver. Together, they raised three children, Thomas, Amy and Jonathan and have since been blessed with seven grandchildren: Jessica, Matthew, Christian, Ian, Caleb, Danika and Liam. This year, John and Susan will celebrate fifty years of marriage.

To know John Carver is to be in awe of him. His sense of humor is legendary and, while I did not know him as a young man, seeing John at 75 makes me only wonder what energy and passion he must have exhibited in his twenties and thirties.

John worked in retail most of his professional career, serving stints at Macy's, JC Penney and Bullock's. But John's home and heart was with the Gap, helping build the locally-based retailer into the global powerhouse it is today. For more than 25 years, John served in a variety of positions and it is through his work at the Gap that so many came to know his generosity, good-nature and phenomenal leadership abilities.

Madam Speaker, I have come to know John well in recent years, being privileged to serve with him on the board of the Philanthropic Ventures Foundation, an organization that is responsible for pumping more than \$70 million into worthy causes and non-profits around the Bay Area. But John's community involvement hardly stops there. He has also given his time, resources and knowledge to organizations as diverse as the Thacher School, Mills-Peninsula Hospital Foundation, Family Service Agency of San Mateo County, Hillsborough Beautification Foundation, SF Jobs for Youth, Coyote Point Museum, American Cancer Society, and A Better Chance.

John's greatest impact, however, might very well be the thoughtful and patient mentoring he has provided for dozens of Bay Area men and women. Whether it is career advice, help in making an important decision, or just sharing the wisdom of a man who has done it all, John is eager to help and always more than generous with his time.

Madam Speaker, I am privileged to call John Carver my friend and fortunate to represent him in the United States Congress. My only wish is that our earth was blessed with more John Carvers.

HONORING MARTHA DODD
BUONANNO'S LIFE

HON. NANCY PELOSI

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. PELOSI. Madam Speaker, I rise today to pay tribute to a beloved friend of mine and many in this body, Martha Dodd Buonanno.

Martha Buonanno would best like to be remembered as a mother, grandmother, and wife. She died after a brief illness on July 6, 2009. Her five children, Helena, Bernard, Carolyn, Jody, and Margaret, and 17 grandchildren surrounded their father Bernard Buonanno crying and laughing as they celebrated the life of this remarkable woman.

Her love of family and children led her to volunteer for many worthy organizations in Rhode Island. She was a mentor in Providence public schools with the VIPS program; she served on the boards of the Providence Preservation Society and the RI Association of the Blind. She was proud to chair the research center at the University of Connecticut that had been named in honor of her father: Thomas J. Dodd.

Martha and I became friends more than 50 years ago at Trinity College in Washington, DC. We shared in common that we both came from political families—in fact, when we first met, both of our fathers were running for Senate.

But our friendship grew over many years because we had so much more in common: Martha loved to travel, she loved to laugh, and always, Martha loved Democratic politics. In fact, Martha volunteered on every single one of her brother, Senator CHRISTOPHER DODD's, campaigns. She adored all her siblings: CHRIS, Tom, Carolyn, Jeremy, Nick.

Martha Dodd Buonanno had a strong connection to this House, where her father and her brother served. She lived and raised her family in Providence and was admired by our colleagues PATRICK KENNEDY and JIM LANGEVIN, and Senators JACK REED and SHELDON WHITEHOUSE. Her roots were in Connecticut and Congresswoman ROSA DELAUNO and Congressmen JOHN LARSON, JOE COURTNEY, and CHRIS MURPHY join me in expressing condolences to the Buonanno and Dodd families.

It is a fitting tribute to Martha's life that more than 3,000 people attended her wake, lining the streets for more than seven hours. Her funeral mass was moved from her parish to another simply to be able to accommodate everyone. Those who came to pay their last respects to Martha included Vice President BIDEN, United States Senators, and a Governor; but Martha would have been equally proud to know that children that she tutored, neighbors from her block, and friends from growing up joined that day. As I know well, when Martha made a friend, she stayed friends with them forever.

Although Martha was always a sparkling personality, she became even more so when she met Bernie. Their love, and their children and grandchildren, are her lasting legacy.

I hope it is a consolation to her family that all of her classmates at Trinity College loved her for more than 50 years, and will miss her.

I am honored to place in the RECORD the extraordinary eulogy of her beloved brother, Senator CHRIS DODD, which captures her spirit and honors her life.

A TRIBUTE TO MY FABULOUS SISTER MARTHA
(By Christopher J. Dodd)

Before sharing some brief comments about my sister Martha, I want to observe that anything I say will only pale in comparison to the incredible comments of Martha and Bernie's children, and the outpouring of love and friendship that over 3,000 people shared for over 7 hours at last evening's wake.

It was obviously a great tribute to Martha—but it is also a great tribute to all who waited for hours to say good by to this bright, shining lady.

Now, let me begin with the obvious: My sister Martha is one fabulous gal!

And so we gather today to celebrate the life of a spectacular wife, a devoted mother, an over-the-top grandmother, a trusted friend, a tireless community activist, a political confidant, an amazing spark plug of a woman, and the best sister a sibling could ever hope to have.

When most people lose loved ones, they instinctively wish they could have had just a little more time with them. The Dodds and the Buonannos were lucky enough to be with Martha constantly in the last days of her life.

And those last days were beautiful. Even as I say these words, they sound so inherently contradictory.

Yet for a little more than a week, my sister insisted on spending time alone with each of her five children and their spouses, each of her 17 grandchildren, each of her five siblings, as many of her close friends as were available, and, of course, Bernie.

How many of us have lost someone without ever having a chance to say goodbye, or the chance to tell them how much they meant to us?

Martha left us with remarkable dignity, grace, and courage. She had the incredible gift of deep, deep faith. She was truly at peace.

And even though Martha has left us, we remain brightly lit by the incandescent life she led. Frankly, as sad as we are today, it's hard not to be overwhelmed with joy and love when we think about a life filled with such vitality and vigor, curiosity and compassion.

Martha was a few years older than me. At least, that was the case until about twenty years ago. I was always the younger brother until one night at the Dunes Club in Narragansett, when she introduced me as her older, white-haired brother.

But, for most of our lives, she made for one heck of a big sister.

I learned early how special my sister Martha was.

One summer afternoon, decades ago, we were about to head off for a family vacation. Our bags were packed, the station wagon was full, and all of us were itching to get out of town—but Martha's 8th-grade championship softball game was running late. So we all waited together and watched.

In the bottom of the ninth, with the bases loaded and her team behind, my sister Martha hit a grand slam home run to win the game and the championship.

As I sat next to her on that car trip for our family vacation, I was filled with the kind of awe you only feel when you're a fourth-grader with the requisite dreams of being a sports hero and you've just watched your twelve-year-old sister win the big game.

Every time I drive by that softball field in West Hartford, Connecticut, I can't help but think back to the day I officially, and forever after was dazzled by my big sister.

Nothing Martha ever did was shy or tentative. When she was just a toddler, during World War II, she once devoured our entire family's monthly ration of butter. And when our father wrote home from Nuremberg, Germany, in 1945, he always made sure to ask how "Miss Butter" was doing.

Over the years, Martha never lost her love of a good meal, but the most important part of any meal, any occasion for that matter, was always the company with which she enjoyed it.

If Martha were your dinner partner, you never had a better or more enjoyable time in your life. She was that much fun.

Like most people with a vibrant spirit and a contagious personality, she made a lot of friends in her life.

If you asked her, she'd tell you that our sister Carolyn was her best friend in the world. Martha had a lot of great friends, because when she made friends, she kept them forever.

I want to acknowledge the presence of several of my Senate colleagues who were with us last evening and today.

Speaker Nancy Pelosi is here with us today. She and Martha became friends in college, and have been close ever since.

I have never known two people who were better friends to their friends than my sister Martha and her friend Nancy D'Alesandro Pelosi.

I want to also thank my good friend, and a Martha Dodd Buonanno fan, Vice President, Joe Biden, for making the effort to be with us yesterday.

Here also with us today are friends from high school, friends from college, friends she made during her 45 years in Rhode Island, and friends she accumulated at every stop along the way.

Martha was fiercely loyal and compulsively competitive.

She was a natural politico. She was involved and present in every part of every campaign I ever ran for Congress or the United States Senate. She was my unflinching advocate, my unyielding supporter.

And when I ran for President—a very brief run, you may recall—she showed up all over South Carolina, Iowa, and New Hampshire—and anywhere else there was a debate or forum or town hall meeting.

No matter where we were, she put the hard sell on anyone she encountered.

Even as her health was failing last week, she promised me that she would tear into any opponents I might have from wherever she was.

And in light of my present political circumstances, I told her there'd be no lack of opportunity to use her talents.

However, along with Martha's loyalty came the requirement that you stay true to yourself. So, she had no problem calling me anytime to tell me in no uncertain terms when I was screwing up.

Once, she called me and practically jumped through the phone. "Why did you vote with Jesse Helms?" she asked.

I asked her, "Well, what issue are you talking about?"

"I don't care WHAT the issue is! I just can't believe you voted with Jesse Helms!"

It is important to point out that Martha could be non partisan in her outrage. She had a similar outburst once when I voted with my friend Bella Abzug!

When she was in her last days in the hospital in Boston, I received a very kind phone

call from President Barack Obama, who was concerned about her failing health and wanted me to pass along his and the First Lady's thoughts and prayers.

After the call, I walked back into Martha's hospital room, and said in the presence of her family that I had just received a very important phone call—but I didn't want to be a name-dropper.

Martha opened one of her blue eyes, and said in a voice we could all appreciate, "Oh, go right ahead and drop the name."

When I told her who had called, and what the message was, she opened the other blue eye, laughed, and said, "You know, you shoulda beaten that guy."

I told President Obama that story when he called from Italy on Tuesday to express his condolences. The President roared with laughter at Martha's reaction.

Martha and Bernie have been such a magical couple—which, of course, doesn't mean they always had the same tastes. Which may have had something to do with the magic.

Martha, as you all know, loved to travel, which you'd expect of someone with such an adventurous spirit.

Her favorite spot was the Dominican Republic, but there wasn't anywhere in the world she wouldn't explore.

For Bernie, on the other hand, as Martha loved to say, "foreign travel" meant going from Providence to Westerly. And a trip to see the Red Sox, the Celtics, or the Patriots was a voyage on par with space travel.

So, as all of you know, Martha would travel on occasion by herself—to India, to Ireland, to Mexico and Europe.

On one occasion, she became fascinated with the Lewis and Clark expedition, and decided to follow their trail west—with a group of complete strangers. Or, at least, they were complete strangers when they started out.

It didn't take long for them to become lifelong friends, one of whom is here with us today.

Even with all the energy she devoted to campaigning and to the many, many efforts she made in this community, Martha would always say, "My sole ambition is my family."

In one of those wonderful, quiet moments last week, when she knew the end was near, she said to me, "My ambition has always been my family, and I have fulfilled every ambition."

Martha and Bernie have been remarkable parents, and the proof exists in their children. They are all frighteningly bright. They are all remarkably successful. They are all unbelievably well-balanced. And those were their mother's descriptions when she was being modest.

Now, children can be gifted intellectually and athletically just by winning the genetic lottery—but when children grow up with decency, kindness, and humanity, you know that's a direct result of great parenting.

These five young men and women are the mirror reflection of their parents. And nothing, absolutely nothing, gave my sister Martha greater satisfaction than their goodness.

Together, these five children are raising 17 terrific children of their own.

When our parents passed away, Martha was the magnet that kept us all in the same orbit. As we all know, once our parents have passed, it can be hard to get the family together.

That didn't happen with us, because we all knew that if there was a holiday, there was going to be a get-together at Martha's house.

There was going to be good food, and a lot of it.

And there was going to be a lot of laughter, raucous debate, conversation, and the sheer joy of each other's company.

Her favorite holidays, by far, were Christmas Eve, the Fourth of July, and Thanksgiving.

In fact, she never let anything get in the way of bringing her family, including her siblings, closer together—not even the law.

Now, what I'm about to tell you could never happen in my State of Connecticut. Martha once started building a structure on their property in Narragansett which, as far as the local zoning commission knew, was a tool shed.

She managed to avoid suspicion, even when the tool shed started to get way too big to be plausibly intended for just tools.

Martha got even more brazen with time, as the tool shed acquired extra rooms.

And, really, the jig should have been up when she added plumbing to that tool shed.

But Martha was nothing if not bold, and she got away with building that guest house for our sister Carolyn to stay in when she'd come and visit. Once it was clear that the zoning commission was not about to mess with Martha Dodd Buonanno, she even put up a sign calling it "Aunt Kitty's Cottage."

Martha was so proud of our brother Tom's years at Georgetown, and his time as our ambassador in Costa Rica and Uruguay.

She never ceased in her amazement of her best friend, my sister Carolyn's achievements reviving American Montessori, and her forty years of teaching.

The photos chronicling the growth of her wonderful family, taken by our brother Jeremy, which hang in their home, reflect Martha's respect, admiration, and love of her brother.

And the tales, travels, and exploits of our brother Nick kept her, in Martha's words, laughing and breathless for years.

I already miss my charismatic, funny, lively, beautiful sister.

But she touched so many people so deeply that I don't think she'll ever really be gone. I'm going to see her in the faces of her children and grandchildren.

I'm going to hear her voice whenever I'm on the campaign trail or casting a vote in the Senate—particularly when she would disagree with me.

And I'm going to feel her presence every time we celebrate a holiday, every time we share a meal, every time I drive by that softball field in West Hartford and remember just how incredible it was to grow up with Martha.

Since moments like this never give you a chance to express all of your emotions, let me just say, on behalf of all of us, thank you, Martha, for everything.

All of us love you, all of us miss you, and all of us were so lucky to be touched by your generous spirit.

ENERGY AND WATER DEVELOPMENT AND RELATED AGENCIES

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. McCOLLUM. Madam Speaker, I rise today in support of the Fiscal Year 2010 Energy and Water Development and Related Agencies Appropriations Act (H.R. 3183). This Appropriations Act makes important investments to move America toward a clean energy

economy. I thank Chairman OBEY, the House leadership, and my colleagues on the House Appropriations Committee for their hard work on this legislation.

A transition to clean, renewable sources of energy is critical for America's national security, economic prosperity, and environmental stewardship. One of the most effective strategies for reducing America's dependence on foreign oil and polluting fossil fuels is to decrease our energy consumption. This bill invests \$2.25 billion in Energy Efficiency and Renewable Energy programs at the Department of Energy, a 14 percent increase over fiscal year 2009. This funding will enhance the development of next-generation vehicle technologies, support research on conservation technologies for buildings and industry, and help struggling families save money and energy through the weatherization assistance program.

Improvements in energy efficiency must be coupled with the development of new, 21st century energy technologies. This bill invests \$4.9 billion for the Office of Science—funds that will support development of new energy technologies to modernize America's economy and reduce our dependence on fossil fuels. As we develop these new energy technologies, our country must have a modern energy grid equipped to transport clean energy across the country. This bill provides \$208 million—52 percent over 2009—for modernization of our energy grid. This will allow wind energy produced in my state of Minnesota to be transported to areas across the country that have high energy demand but fewer or less accessible renewable energy resources.

While this bill is very strong overall, I have concerns that it could do more to move our country toward a permanent storage solution for our accumulating nuclear waste. After spending 20 years and billions of dollars on Yucca Mountain, the federal government is about to suspend this project and start over. Finding a long-term solution to America's nuclear waste storage problem is the federal government's responsibility, and I urge this Congress and this Administration to make this issue a priority.

The Energy and Water Development and Related Agencies Appropriations Act of 2010 is a significant step toward a clean, secure energy future for America. I urge my colleagues to support passage of this bill.

EARMARK DECLARATION

HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BILBRAY. Madam Speaker, I submit the following.

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: H.R. 3288—Department of Transportation, and Housing and Urban Development and Related Agencies Appropriations Act, 2010

Account: Department of Transportation, Federal Highway Administration, Interstate Maintenance Discretionary

Legal Name of Requesting Entity: City of San Diego, CA

Address of Requesting Entity: 202 C Street, San Diego, CA 92101

Description of Request: I secured \$1,000,000 to fund initial construction work for an interstate highway interchange improvement project of regional and national significance, which will widen I-5 and connect it with S.R. 56 in San Diego, significantly improving mobility of goods and people. The I-5 corridor is the primary north-south link between Southern California—San Diego, Los Angeles, Orange County—and Mexico, and S.R. 56 is one of the few east-west freeways serving the San Diego region. The vicinity of the interchange project experiences extensive, recurrent traffic congestion, with average daily counts of 261,000 vehicles (including 10,000 trucks), projected to reach 430,000 vehicles daily within 20 years. Environmental and design work for the project is complete, and additional construction funding is programmed in current Regional and State Transportation Improvement Plans for future federal, state, and local highway funding allocations. Local and State sources will finance at least 20 percent of the total project cost. The project addresses the authorized purposes of the Department of Transportation Interstate Maintenance account, which includes funding for the addition of new interchanges.

WASHINGTON ARMY AND AIR
NATIONAL GUARD

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. REICHERT. Madam Speaker, today I rise in honor of the members of the Washington National Guard, including the 81st Brigade Combat Team that began returning from serving in Iraq on July 29, and thank them for their tireless and brave service in defense of our nation.

Coming from all communities, backgrounds and professions of Washington State, members of the Army and Air National Guard of Washington continuously serve this country at home and abroad. The 81st, headquartered in Seattle, mobilized on August 18, 2008 and is composed of 2,478 citizen-soldiers from Washington, helped by an additional 843 soldiers from the California Army National Guard, eighty soldiers from the Texas Army National Guard and twelve soldiers from the Montana Army National Guard. While deployed, the 81st served as convoy security, force protection, and conducted provincial reconstruction and base operations missions. Previously, the 81st served in Iraq from March, 2004 to March, 2005.

As the 81st continues its journey home over the next few weeks, I pray for their safety and their transition back to civilian life. The service all the men and women of the Washington Army and Air National Guard provide abroad and at home engenders hope, faith and security in the people of Washington. Therefore, as a representative of the 8th District of Washington and along with the rest of the Wash-

ington congressional delegation, I applaud and honor the sacrifice and service of the Washington Army and Air National Guard and wish them Godspeed on their journey back home.

EARMARK DECLARATION

HON. BILL POSEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. POSEY. Madam Speaker, pursuant to the Republican Leadership standards on earmarks as well as in accordance with Clause 9 of Rule XXI, I am submitting the following information regarding earmarks for my Congressional District as a part of H.R. 3326 Department of Defense Appropriations Act, 2010.

Requesting Member: Congressman BILL POSEY and Congresswoman CORINNE BROWN

Project Funding Amount: \$3,000,000

Bill Number: H.R. 3326, Department of Defense Appropriations Act, 2010

Account: OM,A

Legal Name of Requesting Entity: Florida Manufacturing Extension Partnership.

Address of Requesting Entity: Florida Manufacturing Extension Partnership located at 1180 Celebration Boulevard, Celebration, Florida 34747.

Description of Request: The funding will be used by the Florida Manufacturing Extension Partnership for the Defense Job Creation and Supply Chain Initiative. This project will create or retain defense manufacturing jobs in Florida while providing Department of Defense response capability to demand surges and reduced risk of supply-chain disruptions.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable.

Requesting Member: Congressman BILL POSEY

Project Funding Amount: \$935,000

Bill Number: H.R. 3326, Department of Defense Appropriations Act, 2010

Account: OM,A

Legal Name of Requesting Entity: Florida Institute of Technology

Address of Requesting Entity: Florida Institute of Technology, located at 150 West University Boulevard, Melbourne, Florida 32901.

Description of Request: The funding will be used to provide new, upgraded training space for Army and Air National Guard Reserve Officers Training Cadet Corps.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or ex-

ceeds all statutory requirements for matching funds where applicable.

Requesting Member: Congressman BILL POSEY

Project Funding Amount: \$4,000,000

Bill Number: H.R. 3326, Department of Defense Appropriations Act, 2010

Account: RDTE,DW

Legal Name of Requesting Entity: Soneticon, Inc.

Address of Requesting Entity: Soneticon, Inc., located at 1045 South John Rodes Boulevard, West Melbourne, Florida 32904

Description of Request: The funding will be used to enhance currently installed systems for continued operations.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable.

TEXAS S. CON. RES. 22

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering Senate Concurrent Resolution 22, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

SENATE CONCURRENT RESOLUTION NO. 22

Whereas, The Medal of Honor is the nation's highest decoration for valor in combat awarded to members of the United States armed forces; generally presented to recipients by the president of the United States on congress's behalf, it is often called the Congressional Medal of Honor; and

Whereas, First authorized in 1861 for United States Navy and Marine Corps personnel and for United States Army soldiers the following year, Medals of Honor are awarded sparingly and bestowed only on those individuals performing documented acts of gallant heroism against an enemy force; and

Whereas, Since congress authorized the award, 70 Medals of Honor have been accredited to the State of Texas, yet other Texans have similarly distinguished themselves by acts of courageous gallantry in combat no less deserving of such recognition; one such individual is Marcelino Serna, a native of Mexico whose unflinching and selfless bravery and acts of uncommon valor on the battlefields of World War I made him one of Texas' most decorated heroes; and

Whereas, Born in the Mexican state of Chihuahua in 1896, he came to the United States as a young man in search of a better life, working various jobs in Texas, Kansas, and Colorado; and

Whereas, In 1917, Mr. Serna was working in Colorado when the United States, unable to remain neutral any longer while war raged in Europe, declared war on Germany; later

that year, federal officials in Denver, Colorado, gathered a group of men and held them until their draft status could be verified; and

Whereas, Included in this group, Mr. Serna chose not to wait for such verification and instead volunteered for service in the United States Army; after only three weeks of training, 20-year-old Private Serna was shipped to England, where he was assigned to the 355th Infantry of the 89th Division, a unit that was to see action in some of the most arduous campaigns of the war; and

Whereas, By the time the unit arrived in France, Private Serna's status as a noncitizen had come to light, and he was consequently offered a discharge from the army; given the opportunity to return home, Private Serna refused the discharge, choosing to stay with his unit as it began its advance toward the Meuse River and Argonne Forest in northeastern France; and

Whereas, At Saint Mihiel, Private Serna's unit was moving through thick brush when a German machine gunner opened fire, killing 12 American soldiers; with his lieutenant's permission, Private Serna, a scout, continued forward, dodging machine-gun fire until he reached the gunner's left flank; and

Whereas, Having come through a hail of bullets unscathed, despite being hit twice in the helmet, Private Serna got close enough to lob four grenades into the machine-gun nest, killing six enemy soldiers and taking into custody the eight survivors, who quickly surrendered to the lone American soldier; and

Whereas, This encounter was followed shortly by an even more astounding feat when, during his second scouting mission in the Meuse-Argonne campaign, Private Serna captured 24 German soldiers with his Enfield rifle and grenades, an episode that began when he spied a sniper walking on a trench bank; and

Whereas, Although the sniper was about 200 yards away, Private Serna shot and wounded him, then followed the wounded German's trail into a trench, where he discovered several more enemy soldiers; opening fire, Private Serna killed three of the enemy and scattered the others in that initial burst; and

Whereas, Frequently changing positions, Private Serna fooled the enemy into thinking they were under fire from several Americans, keeping up the ruse until he was close enough to lob three grenades into the German dugout; in about 45 minutes of furious action, Private Serna managed to kill 26 German soldiers and capture another 24, whom he held captive by himself until his unit arrived; and

Whereas, Enduring several months of combat action largely unharmed, Private Serna was shot in both legs by a sniper four days before the Armistice; while he was convalescing in an army hospital in France, General John J. Pershing, commander-in-chief of the American Expeditionary Forces, decorated Private Serna with the Distinguished Service Cross, the second highest American combat medal; and

Whereas, Private Serna also received two French Croix de Guerre with Palm medals, the French Medaille Militaire, the French Commemorative Medal, the Italian Cross of Merit, the World War I Victory Medal, the Victory Medal with three campaign bars, the Saint Mihiel Medal, the Verdun Medal, and two Purple Hearts; and

Whereas, Discharged from the army in 1919, Marcelino Serna settled in El Paso, where he became a United States citizen, entered the civil service, and lived out his re-

tirement years until his death in 1992; although he lived the most ordinary of lives after the war, Mr. Serna was, for a brief moment in time, an extraordinary hero whose remarkable feats of bravery under fire elevated him into the pantheon of American heroes; and

Whereas, In 1993, Texas Congressman Ronald D. Coleman introduced a measure in the 103rd Congress to waive certain statutory time limits on awarding the Medal of Honor and thus bestow on Marcelino Serna the proper recognition he so richly deserves; unfortunately, the measure did not receive a proper hearing, thereby denying the legacy of Mr. Serna its proper place in history; now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby respectfully urge the Congress of the United States to reopen consideration of this case to posthumously award the Medal of Honor to World War I hero Marcelino Serna; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to the congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

HONORING JACKSON POLICE CHIEF RICK STAPLES

HON. JOHN S. TANNER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. TANNER. Madam Speaker, I rise today to honor Rick Staples, a long-time public servant who will retire as Chief of the Jackson Police Department on September 18. Under Chief Staples, the Jackson Police Department has dedicatedly served our community, and his leadership has proven to be an example for both veterans and new officers alike.

Rick Staples was born and raised in Madison County, which I am honored to represent in this Chamber. After graduating from Jackson High School in 1970, he attended college at Jackson State Community College before graduating from the prestigious Northwestern University Police Administration training program.

Following his graduation from the Northwestern University Police Administration training program, he attained the rank of lieutenant and worked his way up through the ranks until, on October 12, 1989, Rick was promoted to Chief of Police, a position he has held ever since.

During his tenure serving West Tennessee, our law enforcement professionals have seen sweeping changes, from the computerization of records to the complete restructuring of the department. Chief Staples has managed a staff of 253 employees, an annual budget of more than \$15 million and been responsible for providing police services to a population of more than 62,000 residents. He helped create the Gang Task Force and Violent Crimes Task Force as well as start the first Citizen's Police Academy in Tennessee.

Among Chief Staples' proudest accomplishments is the partnership developed between the police department and our community. In 1994, the city council called for a crime summit between the officers and the residents of Jackson. The result was the establishment of the Community Policing Program, which has allowed for the relationship between the officers and the community to continue to grow, something in which Chief Staples takes tremendous pride.

In addition to his service to the Jackson Police Department, Chief Staples has volunteered as a Critical Incident Debriefing for the Tennessee Public Safety Network as well as a personal security guard for celebrities at high-profile, local events such as the Cerebral Palsy Telethon and the Miss Tennessee Pageant.

Chief Staples' retirement is not an end to his service to the public. He has found a new challenge, accepting a position with a security firm located in Baghdad, Iraq. I trust that he will perform his new job with the same dedication, professionalism and perseverance as he has in his current position.

Madam Speaker, I have long been proud to call Ricky Staples my friend. I thank you and our colleagues for joining me in expressing gratitude for his service protecting West Tennessee families, congratulating him on his retirement, and wishing him the best as he begins an exciting and important opportunity.

IN MEMORY OF JAY CRISCIONE

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. WILSON of South Carolina. Madam Speaker, on July 29th, South Carolina and Lexington County lost a long time friend and leader with the passing of Jay Criscione. Our community has been enhanced as world-class due to his vision on behalf of young people and our senior citizens.

Joey Holleman of The State newspaper in South Carolina has thoughtfully penned the following tribute to Mr. Criscione.

[From the State]

LEXINGTON RECREATION LEADER DIES

(By Joey Holleman)

Jay Criscione, who directed the Lexington County Recreation and Aging Commission through more than two decades of rapid growth, died Wednesday after a battle with cancer. He was 61.

Criscione started with the recreation agency in 1973, soon after he graduated from Clemson. He took over as executive director in 1986.

Criscione steered the agency toward projects that drew from large geographic areas—the four leisure centers, the Oak Grove and Pine Grove softball complexes, and a national-caliber tennis center. He reasoned that the softball and tennis projects would give the county double benefits. Local players could use the facilities, and local businesses would benefit from regional and national tournaments held at the venues.

"He was a pioneer in the softball craze of bringing in national tournaments," said Jim Headley, director of the S.C. Recreation and

Parks Association. "What he did with Oak Grove and then Pine Grove inspired Rock Hill, Florence and Aiken to enter the softball market. He saw sports tourism as an economic engine."

Adept at working every financing angle, Criscione landed state grants that paid most of the construction cost for a horse arena in South Congaree and multiple senior centers. He also helped convince County Council to approve multimillion-dollar construction bonds.

"He had a vision for the county," said Larry Mack, longtime chairman of the recreation commission. "He worked real hard to supply the needs of the people for recreation."

In recent years, Criscione had been slowed by multiple bouts with various cancers. He is survived by his mother, Juanita R. Criscione of Chester, a daughter and son-in-law, Ramsey and Trent Goodman of Lexington, a sister, Paulette Criscione of Lexington, and two grandchildren.

UNITED STATES NUMBERED HIGHWAY SYSTEM

HON. EARL BLUMENAUER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BLUMENAUER. Madam Speaker, the United States Numbered Highway System—from US 1 to US 830—was the first set of nationally recognized highways in the country. During the Great Depression, federal and state governments put people to work improving and extending the nation's roads and highways. The U.S. numbered highways carried the bulk of intercity vehicular traffic and people migrating west. These highways helped our country win the Second World War, allowing great flexibility in ferrying soldiers and materials across the nation, supplementing the nation's fixed rail system.

Communities all across America sprung up around these numbered highways, which came to serve as Main Streets in many of these towns. The system reached its apex in 1956, but with the creation of the Interstate System and subsequent growth of suburban communities, many of these once great highways have decayed. As a result, many of the U.S. numbered highways can be characterized as "orphan highways," receiving little or no federal investment. These highways, however, continue to serve local areas with critical connectivity and economic links, and are often the heart of Main Street America.

To create an assistance program that is tailored to the redevelopment of community Main Streets which are or were part of the United States Numbered Highway System, I have introduced the Orphan Highway Restoration Act. This legislation creates a new program to provide Federal funds to assist states and local governments in their efforts to rehabilitate or repair the Main Street sections of the orphan highways running through their towns. The bill provides a needed boost to state and local transportation departments by committing important new resources to revitalize local economies and communities. It creates redevelopment opportunities that benefit local businesses and labor, improve safety on our roads, and creates jobs.

I look forward to working with my colleagues to pass this important legislation and to reinvest in the communities that make America great.

EARMARK DECLARATION

HON. MARY FALLIN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. FALLIN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the FY 2010 THUD Appropriations bill:

I, Congresswoman MARY FALLIN, requested and received \$1,000,000 for Bus Facility Renovation to The Central Oklahoma Transportation and Parking Authority located at 300 SW 7th Street, Oklahoma City, Oklahoma 73109. This funding will be used for to repair and replace water cooling tower and correct drainage problems at historic Union Station. Improve the lighting and exhaust systems at the maintenance garage and upgrade the oil and lube room facilities.

CONGRATULATING MR. FRANK GOLDER ON THE OCCASION OF HIS 100TH BIRTHDAY

HON. PAUL E. KANJORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. KANJORSKI. Madam Speaker, I rise today to ask you and my esteemed colleagues in the U.S. House of Representatives to pay tribute to Mr. Frank Golder, of Bloomsburg, Columbia County, Pennsylvania, on the joyous occasion of his 100th birthday celebration that will occur on August 8.

Long a legendary figure in the fields of education and athletic development in northeastern and central Pennsylvania, Mr. Golder has distinguished himself as a mentor and a role model to generations of young Pennsylvanians who looked to him with respect and admiration.

After graduating from Bloomsburg High School in the 1920s where he developed his love for basketball and baseball, Mr. Golder went on to star in those sports from 1927 to 1931 during his years at then Bloomsburg Normal School, later Bloomsburg University.

He went on to become a teacher and an athletic coach at Hughesville High School during which he earned his master's degree from Columbia University.

His teams won two West Branch League titles at Hughesville.

Mr. Golder moved to Bloomsburg High School in 1937 where he was named head basketball coach. In 19 seasons in charge of the basketball program, his squads won 10 Susquehanna Valley League crowns and, during one three-year stretch, he won 40 consecutive league games. His team, The Panthers, also captured four District Four championships.

Mr. Golder was also responsible for establishing Little League Baseball in Bloomsburg in the late 1940s. He also started baseball at Bloomsburg High School where he coached that sport for seven years.

For 13 years, Mr. Golder was a member of the PIAA District Four Board of Directors and was chairman of that organization for three years.

After serving as principal of Bloomsburg High School for 14 years, he retired in 1975.

During his remarkable basketball coaching career, Mr. Golder endeared himself to hundreds of aspiring young athletes with his disciplined approach to the importance of learning the fundamentals of the sport and his reputation as a coach who inspired excellence through a calm, reasoned, approach.

The Bloomsburg Press Enterprise described him as an extraordinary gentleman and a fine coach when including him as one of the top local sports figures of the 20th century in 1999. He was inducted into the Bloomsburg University's Sports Hall of Fame in 1988.

Mr. Golder continues to reside in Bloomsburg with his wife, Myra. The couple has one daughter and two grandchildren.

Madam Speaker, please join me in congratulating Mr. Golder on this wonderful occasion. For his entire life, Frank Golder has demonstrated the highest ideals for a role model and he encouraged his students to rise to excellence both on and off the field of competition. His contributions to generations of our citizens have greatly improved the quality of life and his legacy lives on with those he has inspired.

IN HONOR AND RECOGNITION OF THE 90TH BIRTHDAY OF MAR- GUERITE JOHNSON

HON. ROBERT J. WITTMAN

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. WITTMAN. Madam Speaker, I rise today to honor and recognize Marguerite Johnson of Fredericksburg, Virginia, as she celebrates her 90th birthday.

Mrs. Johnson has touched many lives through teaching, volunteering, and as a leader in her church. As a former teacher and principal of more than twenty-six years, Mrs. Johnson understands that a strong education is the key to success and instilled this in her students. She also demonstrated the importance of community service and citizenship, encouraging her students to volunteer and help those in need in the community. After retiring in 1984, Mrs. Johnson continued her commitment to education by volunteering as a teacher's assistant for special needs students at Tree of Life Christian Preparatory School in Fredericksburg.

Mrs. Johnson was a 4-H Club and Girl Scout leader devoted to promoting the importance of citizenship, leadership and strong values. She was also a Pathfinder leader in her church. As a Master Guide, the highest ranking position in Pathfinders, Mrs. Johnson promoted youth leadership, encouraged community involvement, planned outreach activities

and taught camping, survival training skills, nature and conservation classes.

Mrs. Johnson enjoys the outdoors and being surrounded by nature. She has traveled extensively throughout the country camping and hiking in many of our national parks including Pike National Forest, Mount Rushmore National Memorial, Redwood National Park, and the Grand Canyon National Park. Mrs. Johnson also enjoys the Shenandoah National Park where she recently celebrated her 90th birthday surrounded by family and friends.

Mrs. Johnson has touched many lives in her lifetime. She truly loves her family and has an unwavering faith in God. Her generosity has encouraged and strengthened the faith and lives of family, friends and members of her church and local community.

Madam Speaker, I am honored today to recognize Mrs. Johnson in celebration of her 90th birthday. I hope the years to come will bring her health, happiness and special times with family and friends.

EARMARK DECLARATION

HON. GARY G. MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GARY G. MILLER of California. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the FY 2010 Defense Appropriations Bill.

Requesting Member: Congressman GARY G. MILLER

Bill Number: H.R. 3326

Account: Navy—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: L-3 Power Paragon

Address of Requesting Entity: 901 E. Ball Road, Anaheim, California 92805

Funding Secured: \$2,000,000

Description of Request: This project is a design build prototype for a hybrid electric drive (HED) for the CG 47 Class Cruisers for the U.S. Navy. This project contributes to the future of environmentally sound, fuel-efficient propulsion. The Navy believes that this improvement would realize a significant savings per year per ship. This HED for surface combatants such as the CG 47 would significantly reduce fuel costs, increase ship endurance and range, produce less environmental emissions, increase ship survivability through reduce signatures, and provide increased overall ship electric power generation capacity. This installation would leverage advances in lighter weight and more efficient electric propulsion technologies that have resulted from the Office of Naval Research investments over the last several years.

Requesting Member: Congressman GARY G. MILLER

Bill Number: H.R. 3326

Account: Army—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: Athena GTX

Address of Requesting Entity: 10291 Trade-mark Street, Rancho Cucamonga, CA 91730

Funding Secured: \$3,000,000

Description of Request: This project will complete the development of a Wireless Medical Monitor (WiMed) allowing a combat medic to monitor vital signs and triage wounded soldiers in real time. Current medical triage monitors and vital signs data tracking tools are complex, heavy, and have bulky connections. They are also large, costly, and difficult to use. Using proven technology, the WiMed provides increased capability at a much lower cost. By streamlining casualty care and providing patient trend data, life saving decisions lead to earlier interventions and improved outcomes. Prototypes have demonstrated WiMed's ability to improve critical care by linking all patient care within the same wireless systems and platforms already in service. Once placed on a patient at the point of wounding, WiMed stays with that patient throughout triage and care. WiMed works with standard blood pressure cuffs or a simple highly mobile forehead stick-on sensor and integrates many inputs, including: pulse oximetry, blood pressure, temperature, skin humidity, and electrocardiogram. The patient's state is broadcast via Wi-Fi technology to any number of users with linked platforms anywhere in the world at any time and they can receive vital signs information on any number of casualties that have the WiMed monitoring equipment placed on them. Continued funding for this project will greatly improve combat casualty care outcomes.

Requesting Member: Congressman GARY G. MILLER

Bill Number: H.R. 3326

Account: Navy—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: Sabtech

Address of Requesting Entity: 17320 Dahlgren Road, Dahlgren, Virginia 22448

Secondary Address: 23231 La Palma Avenue, Yorba Linda, California 92887

Funding Secured: \$5,000,000

Description of Request: The United States Navy's Aegis ship modernization plan includes modernization of the ships' basic hull, mechanical, and electrical equipment, and modernization of their combat systems. In both areas, the Navy plans to install new systems or components that are more capable than the ones they are to replace. Some of the planned changes are intended to permit naval ships to be operated with a smaller crew, thereby reducing their annual operation and support costs. Planned changes to the ships' combat systems are intended to, among other things, begin shifting their Aegis computers and software to a more open architecture meaning, in general terms, an arrangement that uses non-proprietary computers and software. The Navy believes that moving to an Aegis open architecture will permit the Aegis system to be updated over the remainder of the ships' lives more easily and less expensively, using contributions from a variety of firms. This funding will be used to conduct a demonstration to remove existing Legacy NTDS computer interfaces found in Baseline 7, Cruiser Modernization, and Aegis Modernization. This request was also submitted to the House Armed Services Committee in order to secure authorization statutes in the Fiscal Year 2010 Defense Authorization Act.

Requesting Member: Congressman GARY G. MILLER

Bill Number: H.R. 3326

Account: Navy—Research, Development, Test, and Evaluation

Legal Name of Requesting Entity: Naval Health Research Center

Address of Requesting Entity: 140 Sylvester Road, San Diego, California 92106

Funding Secured: \$3,000,000

Description of Request: In the United States, prostate cancer is the most common cancer in men, with an incidence rate of 16 percent of the general population. The primary treatment of prostate cancer usually includes radical prostatectomy surgery, which provides a good management of the local tumor in most of the patients. Unfortunately, in 15 to 40 percent of patients, recurrent prostate cancer is possible within five years of surgery. Though recurrent prostate cancer following failure of local control is not curable, patients with recurrent cancer are perfect candidates for immunotherapy, a new approach that is still under clinical investigation for oncology applications. The U.S. Navy, through its Naval Health Research Center in San Diego, California, is in a unique position to advance immunotherapeutic approaches for prostate cancer that have so far shown efficacy in animal models. With Fiscal Year 2009 funding, the U.S. Navy Cancer Vaccine Program implemented a Phase 1A/1B clinical trial of its developed vaccine for prostate cancer patients at the Veterans Medical Center. Forty-eight U.S. military veterans who have received previous treatment (surgery, radiation or radioactive seed implants) and now have a rising PSA participated in the study. With proof of minimal toxicity of the PSA vaccine in the Phase 1A clinical trial, a second clinical trial of patients with rising PSAs and nonpalpable biopsy confirmed prostate cancer would be initiated with Fiscal Year 2010 funding. This program will have direct benefits for the health care options of our nation's active Armed Forces, retired veterans, and the general American population.

INCLUSION OF THE HARVARD KENNEDY GRADUATE SCHOOL BULLETIN, WINTER 2009, HONORING WARREN I. CIKINS

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to include into the RECORD the Harvard Kennedy Graduate School Bulletin for Winter 2009, honoring the public service of Warren I. Cinkins. Warren has spent 50 years as a dedicated public servant. He started out in this body, as a legislative assistant to former Congressman Brooks Hays of Arkansas. His public service spanned stints in the Kennedy White House, with the Commission on Civil Rights, with the U.S. Agency on International Development, with the Equal Opportunity Commission, and with Chief Justice Warren Burger. Warren also was one of my predecessors on the Fairfax County, Virginia, Board of Supervisors, ably serving his constituents.

The article I am including in the record provides an example of a truly exemplary public servant, and the value of one person's dedication. In it, Warren is quoted as saying, "I was committed to making a difference." Madam Speaker, I have known him for many years and I can proudly attest that Warren Cikins has indeed made a positive difference in his community and in our nation.

HARVARD KENNEDY GRADUATE SCHOOL BULLETIN
WINTER 2009

Warren Cikins MPA 1954 remembers how his decision to attend the Kennedy School—then the Littauer School—was met with skepticism by peers and mentors alike. His closest friends from his undergraduate days at Harvard were going into medicine, business, and law. His father had dreamed of his becoming an engineer, and one of his government professors wondered aloud: "Why go here? Make a lot of money, then go into public service."

But he never doubted his career choice. His ambition, he says, began as a boy, living in Dorchester, Massachusetts, listening to President Franklin Delano Roosevelt on the radio talk to the American people.

"It was always my intent to serve the public; I was committed to making a difference," says Cikins, 78, who grew up in a devout Orthodox Jewish household. Nothing, it seemed to him, could be more important than the work of the public servant.

Looking back, Cikins says he has no regrets. His career, spanning more than 50 years and including work with all three branches of government, overlapped with many of the country's pivotal events. In his first full-time job after the Kennedy School, he served as legislative assistant to Arkansas Congressman Brooks Hays when Hays intervened in Governor Orval Faubus's attempt to block the integration of Little Rock's Central High School—an effort that would later cost Hays his seat.

Cikins served with Hays in the Kennedy White House after first serving as Hays' assistant when he was appointed Assistant Secretary of State for Congressional Relations. At the Commission on Civil Rights in 1964 Cikins helped bring about the enactment of the Voting Rights Act of 1965. He followed with stints at the United States Agency for International Development (USAID), where he sought to attract highly qualified minorities, and at the Equal Employment Opportunity Commission (EEOC).

A self-described moderate liberal, Cikins fought throughout his career for those who had no voice. And he did it, he says, by looking for the similarities he shared with his colleagues rather than the differences. In his 2005 memoir, *In Search of Middle Ground*, Cikins writes, "My style was always one of outreach. I believed in bipartisanship, bridge-building, compromise, and civility. Confrontational approaches were an anathema to me."

He put this advice to great use and success as a two-term elected member of the Fairfax County (VA) Board of Supervisors, on which he served from 1975 to 1980. Local politician Gerry Hyland, who worked with Cikins, noted in a profile in the local newspaper: "Warren is viewed as a person who cares and who works toward consensus. The will of the group is going to prevail above his own point of view."

It is in the compromises, he says, that the work gets done, repeating often a truism he attributes to Hays, his former boss and mentor: "Half of something is better than all of nothing."

As a senior administrator at the Brookings Institution, where he spent more than 15 years, Cikins continued to promote outreach and conciliation by establishing, among many programs he created there, a highly successful annual seminar on the administration of justice, which sought to resolve differences between the three branches of government, and the Newly Elected Members of Congress seminar, an effort that helped bring new members of Congress up to speed. Towards the end of his career at Brookings, he devoted much of his energy to bringing greater attention to improving criminal rehabilitation.

In his 2001 class report marking the 50th anniversary of his graduation from Harvard, Cikins wrote that he considered his work in improving the criminal justice system, in cooperation with Supreme Court Chief Justice Warren Burger, one of his greatest accomplishments. Quoting Dostoyevsky, Cikins noted in his memoir, "Civilization will be judged by how it treats its wrongdoers."

Cikins's personal life reflects these same values. He remains close to his friends from high school at Boston Latin, many of whom went on with him to Harvard. Recently with his wife of 44 years, Sylvia, Cikins celebrated the 80th birthday of his longtime Kennedy School friend, Mark Cannon MPP 1953, a Mormon and political conservative. And Cikins regarded Hays, whose Baptist faith ran as deep as Cikins's did in Judaism, as one of the most influential and inspirational people in his life. They remained close until Hays's death in 1981.

Of the many accolades recognizing his contributions to public service that he's received over the years, from prominent figures that include Supreme Court Justices Burger and William Rehnquist, a letter he recently received from former New York Congressman and Harvard alumnus Amo Houghton, a Republican, says it most succinctly:

"You were the role model; you're the person who constantly tried to bring us back toward the center, and I thank you for it . . . you're a great example."

TEXAS H. CON. RES. 73

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering Senate Concurrent Resolution 73, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

SENATE CONCURRENT RESOLUTION

Whereas, In 1965, President Lyndon B. Johnson signed into law the Higher Education Act establishing the Guaranteed Student Loan Program; although this program has undergone many changes through the years, including the adoption of a new name, the Federal Family Education Loan Program, it has consistently served the State of Texas as the most important method of delivering financial aid to students and families; and

Whereas, The Texas Guaranteed Student Loan Corporation, established as the state's guarantor in 1979, has delivered nearly 14 million loans to students and families at no

cost to the state; these loans, exceeding \$63 billion, represent approximately two-thirds of the direct financial aid awarded to Texas students pursuing their educational goals; the Federal Family Education Loan Program has not only provided loans but also created many jobs in the state, and it has become a significant economic engine through its focus on education completion and job creation; as the need for an educated workforce has increased in Texas, this public-private partnership has been at the forefront of education financing; and

Whereas, The not-for-profit and for-profit lenders in the Federal Family Education Loan Program have led in educational outreach efforts to the state's most disadvantaged populations through programs that seek to encourage academic achievement, promote financial literacy, and provide information on making college affordable; such assistance has enabled more Texans to fulfill their goals of achieving a better life, while enriching the state in the process; and

Whereas, The Federal Family Education Loan Program ranks as the most successful and popular education loan program in the state and nation; in Texas, more than 94 percent of student loan dollars are delivered through the program and over 85 percent of secondary education institutions have chosen to participate in the program; nationally, more than 81 percent of student loan dollars are delivered through the program; and

Whereas, For over four decades, the Federal Family Education Loan Program has promoted local participation in the education of our citizens, and this successful partnership between government and the private sector serves a vital function in delivering financial aid to Texas citizens and making significant contributions to our economy; now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby respectfully urge the United States Congress to maintain the Federal Family Education Loan Program and continue to refine and improve this crucial public-private partnership; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,
Speaker of the House.

PATSY SPAW,
Secretary of the Senate.

ROBERT HANEY,
Chief Clerk of the House.

Approved: Rick Perry, Governor.

EARMARK DECLARATION

HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BILBRAY. Madam Speaker, I submit the following.

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Account: USAF, Research and Development
Legal Name of Requesting Entity: General Atomics Aeronautical Systems

Address of Requesting Entity: 14200 Kirkham Way, Poway CA 92064

Description of Request: I was able to secure \$1,500,000, for the Predator C. In July 2008, I took a trip to Iraq and Afghanistan to assess the current conditions on the ground. In a meeting with General David D. McKiernan, former Commander of International Security Assistance Force (ISAF) and former Commander, U.S. Forces Afghanistan (USFOR-A), he emphasized that the most important tools needed to successfully conduct operations are more "eyes in the sky," also known as unmanned aerial vehicles (UAV). Most importantly, this request will help save lives through better intelligence gathering and greater strike capabilities. Furthermore, Predator C means more jobs contributing to San Diego's local economy. Predator C will provide the USAF and other customers with an additional covert capability, enhanced by much higher operational and transit speeds for quick response and quick repositioning for improved mission flexibility and survivability.

THE CITY OF SAMMAMISH

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. REICHERT. Madam Speaker, as the Representative of the Eighth Congressional District of Washington, it is my privilege to serve a vibrant cross-section of citizens in both rural and urban settings. And in some cases, I represent residents who are making a swift transition between the two. This is especially true of Sammamish, a city of 40,000 that was recently named by Money magazine as the 12th "best place to live" in the entire country.

I rise today to congratulate Sammamish on this great and well-deserved achievement. Nestled neatly on the eastern shore of Lake Sammamish and surrounded by a mix of urban, rural and beautiful open spaces, Sammamish is as beautiful as it sounds.

Some of the qualities noted for their newly-awarded distinction include the excellent schools, safe neighborhoods and beautiful natural setting of the city. Of course, since I often have the opportunity to visit Sammamish, I can definitely attest to that truth. Historically a place of timber and agriculture, Sammamish, barely ten years old, has impressed the entire Pacific Northwest region with its rapid, elegant and responsible development. The quality of life, the political leadership and the energy of its residents make Sammamish a very special place.

Perhaps most impressively, Sammamish has invested heavily in infrastructure and an expanding menu of city services without undermining its financial footing. Through careful budgeting and long-term planning,

Sammamish is moving ahead without leaving responsible habits behind. As evidence, Sammamish recently received Standard and Poor's highest bond rating—AAA.

I am proud to represent such a city in Congress and look forward to continue working with Sammamish residents and elected leaders to continue to make it one of the best places to live long into the future. Working cooperatively, the residents and leaders of Sammamish have created an exceptional place to live and visit in a short period of time. I congratulate Mayor Don Gerend, the city council and staff and residents of Sammamish for creating such a wonderful place to live for long-time residents and newcomers, alike.

RECOGNIZING THE WORK OF JIM MCCANN

HON. PATRICK J. TIBERI

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. TIBERI. Madam Speaker, with great pleasure I rise to recognize the distinguished career of my constituent, Jim McCann.

For several decades, Jim served the Central Ohio community as the principal of Westerville North High School, passionately dedicating himself to the education of thousands. We all should strive to make a difference in this world, and Jim brought a remarkable level of energy and decency to his job, winning admiration from the community for his commitment to "The Warrior Way."

After retiring, Jim continued to give back to the youth of Central Ohio by serving as a chairman of my academy selection board. From that position, Jim took an active role in mentoring applicants, often staying in touch with them years after their first interview. To this day, Jim continues to serve his community in a number of civic committees, while also still educating and guiding many youths in the Westerville and Central Ohio area through his home school program.

Through commendable volunteer work and civic leadership, Jim stands as a pillar of the Westerville, Ohio community. Therefore, I am very pleased to thank him for all he has done for our area.

I offer my congratulations to Jim McCann for a career spent in service to others. I hope the spirit he daily brings forth in his life and work continues to inspire us to action and a renewed commitment to our country.

EARMARK DECLARATION

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GERLACH. Madam Speaker, pursuant to the Republican Leadership standards on earmarks regarding earmarks I received as part of H.R. 3170, the Financial Services and General Government Appropriations Act, 2010.

West Chester University's Entrepreneurial Leadership Center, West Chester, PA—

\$150,000 to create the Entrepreneurial Leadership Center, which will sponsor faculty-lead teams of students to provide the expertise start-up small businesses need to succeed; at the same time, students will learn the skills they need to become entrepreneurs. The project will encourage the development of emerging small businesses.

TRIBUTE TO RUTH L. TUCKER

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LATHAM. Madam Speaker, I rise today to congratulate Ruth L. Tucker on the celebration of her 100th birthday on July 22, 2009.

Ruth was an aspiring writer and a teacher at Pisgah country school. Her reputation as a quality teacher and writer has been recognized at Winterset High School where the Ruth L. Tucker Writing Award scholarship has been established in her honor. Ruth is known for her hospitality and being an excellent cook. She is also a member of the United Methodist Church in Winterset, Iowa.

There have been many changes that have occurred during the past one hundred years. Since Ruth's birth we have revolutionized air travel and walked on the moon. We have invented the television and the Internet. We have fought in wars overseas, seen the rise and fall of Soviet communism and the birth of new democracies. Ruth has lived through eighteen United States Presidents and twenty-two Governors of Iowa. In her lifetime the population of the United States has more than tripled.

I congratulate Ruth Tucker for reaching this milestone of a birthday. I am extremely honored to represent Ruth in the United States Congress and I wish her happiness and health in her future years.

RECOGNIZING MS. ABIGAIL ALLEN, MY FIRST NOMINEE TO THE HOUSE PAGE PROGRAM

HON. EMANUEL CLEAVER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CLEAVER. Madam Speaker, I proudly rise today in recognition of Ms. Abigail Allen, a young woman who has served as my first nominee to the House Page program. She is a resident of the Fifth District of Missouri, which I am honored to represent.

On July 5, 2009, Ms. Allen began her Page duties. This Saturday, August 1, 2009, Ms. Allen will return to her home town of Lee's Summit, Missouri, with a wealth of knowledge that she learned as a participant in the House Page Program which I hope she will share with her family and friends.

Ms. Allen is a student at Blue Springs South High School in Blue Springs, Missouri. She is a member of the cross country team, track and field team, Young Democrats and most importantly a member of the National Honor

Society. Ms. Allen is also a member of the St. James United Methodist Church Youth Group in Kansas City, Missouri.

It has been my pleasure to have Ms. Allen as a House Page. She has represented the Fifth District of Missouri well.

Madam Speaker, please join me in expressing our appreciation to Abigail, as well as all the other Pages that have served in this chamber, for they are truly the future leaders of our country.

IN HONOR OF BILLY POST

HON. SAM FARR

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. FARR. Madam Speaker, I rise today to honor the memory of Billy Post, a remarkable American who died last Sunday after nearly 89 years in Big Sur. He was a renaissance man, who both helped build Big Sur into one of the planet's premier visitor destinations, and preserve its wild landscapes, vibrant community, and unique history. But over and above all of his life's accomplishments, he stood out as a profoundly humble and gentle man with a keen sense of old fashioned sense of courtesy and manners. All of us who had the pleasure of meeting Billy came away awed by this man of history.

Billy Post was born in Big Sur before the highway was built that connected Big Sur to Carmel. His great-grandfather, William Brainard Post, came from Connecticut as one of the first American settlers of Big Sur in the 1860s. His great-grandmother, Anselma Onesmio, was a native Costanoan from Carmel Valley. I once heard Billy tell the story that his great-grandmother's great-grandmother had seen the first Spanish ships to approach the Monterey Bay and thought they were giant white birds. Billy Post grew up on his family's original homestead ranch, rising every morning at 4:00 to tend livestock and milk cows before heading to school. He attended UC Davis for a time but WWII cut short his dreams of becoming a veterinarian. Billy joined the Marine Corps and spent time in the Pacific at Okinawa, Saipan, Tinian, and was one of the first Americans to see Nagasaki following the atomic bomb attack.

Once Billy Post returned home he helped build the Rancho Sierra Mar cafe and campground that his family ran on the ranch. He also worked many years for Caltrans as a highway electrician, paying close attention to the natural world around him, the wild creatures and plants and especially horses. He combined these passions by offering pack trips on horseback into Big Sur's wilderness backcountry. He married in his mid-thirties and had two daughters named Gayle and Rebecca. His marriage later ended and he raised his two daughters as a single father. In 1969, Billy married Luci Lee, the love of his life and mother of two daughters from a previous relationship. Together, they built a life with their four girls, and eventually moved into a new house on the Ranch nearby.

Over the years, it grew difficult to hold onto the old style of ranching. In the early 1980s,

Billy and Luci entertained the idea of converting the ranch into a full service inn that would preserve the integrity of his family's ranch and the region's history. A handshake and a glass of Jack Daniels sealed the deal. Since Billy Post had operated heavy machinery almost all his life and could fix just about anything, he did much of the initial grading work for the new Inn. Opened in 1992, the Post Ranch Inn has developed into one of the top spa resorts in the world known particularly for its innovative architecture that embraces the dramatic beauty of its coastal Big Sur setting. Much of this grew from Billy Post's own personal vision. To the end of his life, he remained a regular fixture around the Ranch grounds, making it a point to join guests at breakfast at the Inn's Sierra Mar restaurant several times a week to share lore about Big Sur's land and people.

He was preceded in death by his daughter Nancy Downing. He is survived by his beloved wife Luci, three daughters, Linda J. Lee, Gayle Forster, and Rebecca Post; seven grandchildren, Pamela Patterson, Gregory Paley, Anna Vargas, Gabriel Forster, and Richard, Shane and Daniel Forster; and seven great-grandchildren.

Madam Speaker, I would like to extend our nation's deep gratitude for Billy Post's brave service to the United States Marine Corps, and to his own community. I know I speak for every Member of Congress in offering our condolences to Luci, his three surviving daughters, his seven grandchildren, and all Post family members and friends upon this great loss.

"WHAT HAPPENED TO MEDICAL CHARITY OF YEARS PAST?"

HON. PHIL GINGREY

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GINGREY of Georgia. Madam Speaker, I submit the following:

[From the Marietta Daily Journal, July 28, 2009]

WHAT HAPPENED TO MEDICAL CHARITY OF YEARS PAST?

(By Cecil Toole, MD (Ret.))

Re Bill Kinney column, "Cobb's sick getting well, thanks to Good Samaritan," July 19 MDJ

In 1961 or 1962, I met the original "Good Samaritans" of Marietta and Cobb County, when I joined their group as a visiting resident in obstetrics from Piedmont Hospital in Atlanta. All of them were on the staff of a forgotten Kennestone Hospital in Marietta, where they conducted many free pre-natal clinics, free medicines for eligible patients, and free deliveries for those same patients in a hospital that agreed to not charge "clinic patients" for hospital service.

Those mysterious and economically foolish services were done by charitable doctors such as Dr. Meaders, Dr. Reilly, Drs. George and Murl Hagood, Dr. Remer Clark, Dr. Colquitt, Dr. Mussara, Dr. Pete Inglis, Dr. Mainor, Dr. Parker, Dr. W.H. Perkinson, Dr. Looper, Dr. Clingbell, Dr. Stafford, Dr. Mitchell, Dr. McClure and Dr. Clonts, to name a few, without ever sending a bill to

their "clinic patient." Ineligible patients might be sent a bill through a collection agency. (And by the way: the IRS never-ever allowed such "charity" done by those same doctors, to be deducted.) I was fascinated to learn how those doctors survived Economics 101 when none of their clinic patients needed, or carried, "affordable health insurance."

At Piedmont Hospital where I was a resident, the hospital took care of all of the hospital expenses of the unwed mothers from the Florence Crittenden Home. I was also told that none of them had "health-insurance." I can tell you this. As far as the TLC (Tender Loving Care) given to the "clinic-patients" and the "private patients," the treatment from the staff and the nurses was identical. The care was always excellent.

I hope if you ever get to meet the genius who invented "affordable health care," that you will remember to ask this question, "Does charity have a place in today's health-care?" The "Obama Bidens" don't want, or need, your charity. They insist on asking everybody, including the jobless, the helpless and the hopeless, to pay cash for their own "health-care" even if the cash has to be a personal loan from the government.

Just to show their good intentions, if those indigent groups can't repay their "medical care" loans, the great socialist government will identify and prosecute them, for the crime of "unpaid debts." Aren't medical science and "health-care," when mixed with Socialism, wonderful?

EARMARK DECLARATION

HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BILBRAY. Madam Speaker, I submit the following.

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: H.R. 3288—Department of Transportation, and Housing and Urban Development and Related Agencies Appropriations Act, 2010

Account: Federal Highway Administration, Transportation & Community & System Preservation

Legal Name of Requesting Entities: City of Escondido, California/City of San Marcos, California

Address of Requesting Entities: 201 North Broadway, Escondido, CA 92025/1 Civic Center Drive, San Marcos, CA 92069

Description of Request: I received \$500,000 to widen the Nordahl Bridge where it intersects SR-78. This widening project is a key to the greater SR-78 infrastructure/capacity improvement project that is decreasing congestion in both San Marcos and Escondido in preparation for the new public Palomar Pomerado Hospital.

The Cities of San Marcos and Escondido have requested funding for the project, and the project is supported by the San Diego Association of Governments and CALTRANS. Funding assistance will provide a sensible, long-term solution to the interchange by widening and lengthening the existing overpass bridge structure at Nordahl Road and SR-78 to accommodate capacity improvements planned for SR-78 while also addressing congestion on local streets.

\$5,000,000 will be obligated in FY 2010, and will fund preliminary engineering, environmental review, right-of-way acquisition and construction costs for the project. The regional project is the #1 priority for both the City of Escondido and the City of San Marcos and is not only the subject of a MOU between the cities, but also a draft cooperative agreement with Caltrans District 11. It is supported by the region's metropolitan planning organization, the San Diego Association of Governments and is included in the San Diego Regional Transportation Plan.

HONORING THE TENTH ANNIVERSARY OF THE CHILDREN OF THE VILLAGE NETWORK OF SUMTER COUNTY, ALABAMA

HON. ARTUR DAVIS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. DAVIS of Alabama. Madam Speaker, I rise today to honor the achievements of the Children of the Village Network, a non-profit organization based in my District, in Sumter County, Alabama. I commend the Children of the Village Network on their 10th Anniversary and would like to underscore the positive impact that this organization has had on my District.

The Children of the Village Network was established by District Judge Tammy Montgomery based on the time honored premise that "it takes a whole village to raise one child." This network has created a family resource center for residents of Sumter County that provides life skills training, parenting classes, job readiness training, a food bank and educational scholarships. The organization drives home the importance of academic excellence for the youth of Sumter County, awarding 13 scholarships since 2000 and providing for additional enrichment activities to promote independence and incentivize academic achievement.

After ten years of commitment to the residents of Sumter County, the success of the Children of the Village Network has been widely recognized for its success in contributing significantly to improving the quality of life in Sumter County. Thank you, Madam Speaker and may God bless the Children of the Village Network and Judge Montgomery with continued success.

—EXPRESSING THE SENSE OF THE CONGRESS THAT A POSTAGE STAMP SHOULD BE ISSUED TO COMMEMORATE THE WAR OF 1812 AND THAT THE CITIZENS' STAMP ADVISORY COMMITTEE SHOULD RECOMMEND TO THE POSTMASTER GENERAL THAT SUCH A STAMP BE ISSUED

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. DINGELL. Madam Speaker, the War of 1812, also referred to as "America's Second

War of Independence," was a defining conflict in our Nation's history that today is often overlooked.

Today, I am introducing the War of 1812 Commemorative Stamp Act, a resolution which urges the United States Postal Service (USPS) to issue a postage stamp commemorating the War of 1812. With the bicentennial of the War of 1812 just three years away, issuing such a stamp is a fitting tribute to those who heroically defended our Nation's borders and secured a lasting independence from Great Britain.

Much of our popular American culture is a product of the War of 1812. It inspired the Star Spangled Banner, the first appearance of Uncle Sam, and the phrases "Don't Give up the Ship," "Remember the Raisin," and "We have met the enemy and they are ours."

The War of 1812 also has a great significance to the 15th Congressional District of Michigan and the citizens of Monroe, Michigan. Located in Monroe is the River Raisin Battlefield, the site of a major engagement that occurred during the American campaign in the winter of 1813 to retake Fort Detroit from the British. The Battle took the lives of nearly a thousand American Regulars and Militia in what was then known as Frenchtown.

This bloody event, arguably the largest land engagement of the War of 1812, gave birth to the emotional rallying cry "Remember the Raisin," which prompted thousands to volunteer for General William Henry Harrison's spring 1813 campaign.

The people of Monroe dedicated themselves for years to restore the integrity of the battlefield in hopes of turning it into a national park and a place where history-lovers across the country could come to commemorate this landmark battle. In a show of its commitment, Monroe turned over the land to the federal government for free. Finally, after years of work, we were able to pass legislation to turn this important site into the River Raisin National Battlefield Park.

Madam Speaker, I'm certain there are similar sites throughout the country that represent part of our American history. I urge my colleagues to join me in my efforts to give the War of 1812 the recognition it deserves.

EARMARK DECLARATION

HON. JOHN SULLIVAN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. SULLIVAN. Madam Speaker, consistent with House Republican Earmark Standards, I am submitting the following earmark disclosure and certification information for three project funding requests that I made and were included within the text of H.R. 3326, the Department of Defense Appropriations Act, 2010.

Project: Fire Suppression System

Project Amount: \$1,425,000

Account: RDT&E Army

Legal Name of Requesting Entity: Global Safety Labs

Address of Requesting Entity: 4129 South 72nd E. Ave., Tulsa, OK 74146

Description of Request: This initiative will provide financial resources for testing and

evaluating military applications of Arctic Fire Freeze. Arctic Fire Freeze is a fire suppressant product that has been used by the steel industry for approximately 10 years. Funding provided by this request will be used to conduct rigorous military testing and evaluation. The use of Arctic Fire Freeze in military vehicles and equipment and by ground troops could significantly reduce burn-related injuries and fatalities.

Project: High Density Power Conversion and Distribution Equipment

Project Amount: \$1,500,000

Account: RDT&E Navy

Legal Name of Requesting Entity: Westwood Corporation, L-3 Communications

Address of Requesting Entity: 12402 East 60th Street, Tulsa, OK 74146

Description of Request: Navy power switchboard technology has remained essentially the same for nearly 50 years. This technology is passed largely on past Navy applications (with lower power needs) and commercial practices (which are less volume and weight sensitive). The Navy's power needs (e.g., sensors, weapons, house loads) have escalated and the newest power architecture designs have added additional concerns (e.g., higher frequencies), but the size and weight of the power distribution equipment are still limited. The inline switchboard technology simplifies the switchboard arrangement to greatly decrease size, weight, and lifecycle cost. In summary, this will provide the Navy with technology that will result in \$0.25 M/per year per destroyer/cruiser in maintenance savings plus an additional \$1 million per ship in overhaul savings. Additional savings are estimated in size and weight at 50 tons per ship and a space savings of 1000 sq.ft. Fuel savings due to the decreased weight are anticipated to be significant given the cost of fuel.

Project: Lightweight Composite Structure Development for Aerospace Vehicles

Project Amount: \$3,000,000

Account: RDT&E Navy

Legal Name of Requesting Entity: Advanced Composites Group

Address of Requesting Entity: 5350 South 129th Street, Tulsa, OK 74134.

Description of Request: Funding would improve, qualify, and test advanced composite materials. The military has a demonstrated need for a domestic source of new advanced carbon fibers and testing protocols. Second-source qualification of composite materials only currently available from foreign suppliers will allow military suppliers to have access to lower cost domestic sources of composite materials.

IN HONOR OF MR. GENE COX

HON. ALLEN BOYD

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BOYD. Madam Speaker, I rise today to honor and pay tribute to an individual whose dedication to the youth of our Nation and whose contributions as a highly successful high school football coach in Florida meant so much to generations of young men. He prepared hundreds of young men to face the

world and taught them discipline, excellence, and the desire to strive to be the best they could be in life. We have been very fortunate to have Gene Cox as a strong, dedicated, persevering, and committed leader.

Coach Cox passed away on Monday, March 30, 2009, in Tallahassee, and he is being honored by the establishment of the Gene Cox Memorial Football Scholarship at Leon High School, which will provide continued support of deserving youth.

Gene Cox grew up in Lake City, Florida, moved to Leon County in 1963, and became one of the nation's most successful football coaches. He even served as my football coach briefly in my younger days. Not only was he a great coach, he was a veteran of the Army National Guard and an active member of East Hill Baptist Church. His long term leadership in the Fellowship of Christian Athletes showed many the true foundations of living and serving. He was also the loving husband to Patsy, father to three sons and a daughter, and grandfather to five.

Gene Cox had a tireless passion and intensity to his role as coach and mentor to our youth. I am proud to commend this man who meant so much to north Florida and to the many young men throughout this country who he coached and led.

TEXAS H. CON. RES. 86

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering House Concurrent Resolution 86, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

HOUSE CONCURRENT RESOLUTION NO. 86

Whereas, The men and women who have served in this nation's armed forces are entitled to ready access to the best possible medical care; and

Whereas, For the more than 100,000 veterans living in the Rio Grande Valley, the nearest U.S. Department of Veterans Affairs hospital is in San Antonio, as much as 300 miles and a five-hour trip away, and the lack of a VA hospital in the Valley has long imposed great hardships on veterans in that region and on their families; and

Whereas, Veterans requesting appointments at the facility in San Antonio typically wait months to be seen, even for serious conditions; for those who cannot drive themselves, or who cannot afford to drive, van transportation is provided by veterans service groups; the lengthy trip, however, adds to the patients' physical distress; no ambulances are available to convey veterans to San Antonio, which makes the journey especially difficult for those who are bed-ridden; and

Whereas, Once veterans arrive in San Antonio, they often wait hours for an appointment that may take only 15 minutes, or they may find that their appointment has been canceled; they may also discover that they need to stay overnight, which adds to the time-consuming nature of their trip and to its expense; and

Whereas, For veterans who must go to San Antonio several times a month, the time lost to travel can make it difficult to hold a job; the demands of such a trip also place a great burden on family members who have to take time off from work, and possibly arrange for child care, to drive a veteran to San Antonio, and who may need to make such trips for many years; the cost of gas and meals, in addition to the expense of lodging, if that is required, substantially exceeds the prescribed travel allowance; and

Whereas, The current facilities for veterans health care in the Valley are manifestly inadequate; the VA presently operates several outpatient clinics in the region, but these do not offer the full range of services, including testing and therapy, available in San Antonio; moreover, the VA has failed to pay the bills of many veterans who have had to seek emergency care at a local hospital; in addition, although there are plans to contract with area hospitals to provide some inpatient veterans care, the medical personnel in those facilities are unlikely to have the necessary expertise in treating the injuries and psychological trauma sustained by combat veterans; and

Whereas, In recent years, local veterans organizations have formed the Veterans Alliance of the Rio Grande Valley to help raise awareness of this issue; and

Whereas, Veterans who live in the Valley, veterans from out of state who make their home in the Valley during the winter months, and U.S. veterans who reside in Mexico all sorely need and clearly deserve a fully staffed, full-service veterans hospital in far South Texas; now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby affirm its support for the establishment of a veterans hospital in the Rio Grande Valley; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the secretary of the U.S. Department of Veterans Affairs, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to the Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

**TESTIMONY GIVEN BY EZEKIEL
LOL GATKUOTH REGARDING THE
COMPREHENSIVE PEACE ACCORD
(CPA) IN SUDAN**

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. WOLF. Madam Speaker, I would like to share with our colleagues testimony that Ezekiel Lol Gatkuoth, head of the Government of Southern Sudan Mission to the United States, gave yesterday before the Tom Lantos Human Rights Commission regarding the importance of full implementation of the Comprehensive Peace Accord (CPA) in Sudan.

His perspective is invaluable as a diplomat and Southern Sudanese leader who experienced firsthand the horrors of the twenty-plus year civil war between the North and the South which left more than 2 million dead in Southern Sudan.

TESTIMONY OF EZEKIEL LOL GATKUOTH HEAD OF THE GOVERNMENT OF SOUTHERN SUDAN MISSION TO THE UNITED STATES BEFORE THE TOM LANTOS HUMAN RIGHTS COMMISSION (TLHRC)

Honorable Co-Chairman Frank R. Wolf, Honorable Co-Chairman James P. McGovern, and Members of Tom Lantos Human Rights Commission, thank you for organizing this Hearing at this important juncture in Sudan's history and in the quest for peace and stability through the full implementation of the Comprehensive Peace Agreement (CPA), and thank you for inviting my testimony.

Since its inception in 1983, the SPLM Vision was and continues to be that of a new Sudan built on a new basis. A Sudan unlike the old Sudan, that is based on equal citizenship regardless of race, religion, ethnicity or gender, where all citizens share rights to equitable political, social, economic and cultural development. A Sudan built on the historical diversity of its peoples and experiences, and one that accords its citizens the right to self-determination.

This vision was and is still a vision of transformation, for after 42 years of war in a span of 54 years, the fact remains that the only way for Sudan to be at peace with itself, the region and the world, is by the democratic transformation of its systems of governance, and the steering of its political and cultural dispensation towards acceptance of its realities and the diversity of its people.

This vision of transformation is in large part embodied in the 2005 accord, the CPA. The gap that exists between what was envisaged by the SPLM and what was ultimately agreed upon is mainly because of concessions made in the spirit of compromise that governs mediated negotiations of peace settlements. However, the main drive towards the democratic transformation of Sudan remains intact. Its elements are enshrined in the conditions of the implementation of the CPA and consequently in the Interim National Constitution of the Sudan and the provisions of the CPA implemented thus far.

The National Congress Party/National Islamic Front (NCP/NIF) by signing the CPA, had committed itself to: the principle of peace through the democratic transformation of the Sudanese Government and State apparatus at all levels, even through a general elections; the right of self-determination for the people of Southern Sudan and Abyei; and the right to popular consultation for the people of Nuba Mountains and Blue Nile.

However, four years into the interim period, the deliberate non-compliant and obstructionist posture of the NCP with regards to some of the CPA's most transformative and significant provisions represent a great obstacle to the achievement of peace, and is a dangerous abandonment of the partnership with the SPLM that requires a shared commitment to the spirit and letter of the CPA. This is a perilous trend that makes the threat of war—an all encompassing war is likely to ignite throughout the marginalized areas of Sudan, a much more realistic possibility than that of the promise of peace through transformation.

I will not attempt to list out all the unimplemented provisions of the CPA, but rather refer you to the Mid-Term Evaluation Report of the Assessment and Evaluation Commission (AEC) which chronicles about 35 recommendations for the parties (the NCP and the SPLM) to be in compliance with the CPA. It is worthy to mention here, however, the AEC highlighted the following as "critical for the sustainability of the CPA and

unity arrangements"—the resolution of Abyei; the North-South Border demarcation; preparations for the 2010 elections and democratic transition; preparation for the 2011 Referendum, and Post Referendum; and Security Sector Reform, mainly Joint Integrated Units (JIUs) and Disarmament, Demobilization and Reintegration (DDR).

Human rights abuses during the Sudanese Civil war are documented and can be summed up in mentioning the 2.5 million dead and 5 million displaced through direct bombardment and military action, and mainly through the proxy militias used by the government to kill, rape and displace civilians, and who also employed tactics such as the deliberate poisoning of water sources and burning of crops. In addition to that, there were the countless inhumane methods used by the State and its proxies to discriminate against and exploit those who are forced into displacement residing in other parts of the country, and strip them from the citizenship rights, basic human rights and dignity.

It was the belief of the SPLM that human rights abuses would subside after the signing of the CPA, because of the countless measures it provides for the safeguarding of the rights of all the citizens of Sudan. However, because of the control the NCP continues to refuse to relinquish over the state apparatus, especially the national security organs, and its refusal to allow the liberalization of the National Security Act and the removal of Media Censorship, many citizens have been subjected to unlawful harassment, arrest, and/or detention for long periods of time without due process and for reasons of political suppression and disregard to freedoms of speech and assembly. Moreover, the rights of Non-Muslims in the capital city, especially Non-Muslim women who don't comply with the Muslim dress code, is continuously curtailed and abused with impunity.

In Southern Sudan, there have been three incidents (of many others) I will mention here, that were in stark violation of the CPA that led to massive loss of life and countless human rights abuses; these are mainly the Malakal Incidents of 2007 and 2009 and the Abyei Incident of May 2008. Firstly, these were a result of the failure of the DDR, although completed in the South, to hold, mainly because of the continuous rearming of civilians and proxy militias by the NCP, to be deployed within the borders of Southern Sudan to create instability and conflict. Secondly, it is a result of the lack of the integration and joint training of the JIU components of the Sudanese Armed Forces (SAF) and the (Sudanese People's Liberation Army (SPLA), to become the nucleus of the future Army of a united Sudan, as envisaged by the CPA.

The JIUs were to be funded by the Government of National Unity (GONU), but to date, no funding has been disbursed for that purpose. Furthermore, the SAF component of the JIUs is problematic because it is mainly made up of militias used by the NCP during the civil war, now usurped into SAF.

In keeping with the dangerous trend of the destabilization of the South, and in an attempt to rally support against the conduct of the referendum, the NCP has intensified its arming of civilians and groups hostile to the Government of Southern Sudan, and especially those hostile to the SPLM to instigate conflict and create instability. There have been prevalent incidents in Southern Sudan, the Nuba Mountains, Blue Nile, and surprisingly in even in Southern Kordofan, leading to confrontation with local law and

order agencies, and/or armed civilians, and that leads to loss of life.

In regards to Darfur, it is essential that we acknowledge the fact that since peace is indivisible, the conflict in Darfur is in contradiction to the principles of the CPA which is embedded in the Interim National Constitution of Sudan.

There have been considerable human rights abuses, human loss and displacement since the recent Darfur conflict begun in 2003. The people of the United States have to be commended for raising their voices in solidarity with the people of Sudan in Darfur. However, there is a need for all to realize that the conflict in Darfur is a political problem that could only be solved with a political resolution, and the CPA provides the model that would address the root causes of the conflict in Darfur. Additionally, the CPA also provides the instruments of democratic transformation that if there is a cessation of hostilities in Darfur could begin to address the base of the problems of marginalization, i.e., the upcoming elections of 2010.

There is an important link between the CPA and Darfur, the developments in and around the issues of Darfur have political implications for the CPA and the obstruction of the implementation of the CPA leaves no hope for a peaceful resolution to Darfur.

The SPLM and the people of Southern Sudan are in solidarity with the cause and suffering of the Darfuri people. That is why the SPLM is committed to playing the role afforded to it by history and experience to unite the movements of Darfur to a small number that would have a consolidated position for peace in Darfur. We have made considerable progress in this endeavor and are seeking the support of the international community members who are committed to peace in Darfur.

The United States of America, the Trokia (United States, United Kingdom and Norway), the Inter-governmental Agency for Development (IGAD) and other Countries witnessed, engaged in the process of negotiations of, and signed as guarantors, the CPA. The United States played a pivotal role especially in the deadlocked issue of Abyei, making it possible for the CPA to be signed. It is important that the international community and the US especially understand that peace in Sudan is of strategic interest to them, because of its regional, continental, and global importance, and because of the implications that resumed conflict would bring to the fore. Peace is indivisible, and war knows no boundaries, and so, the only way for peace to be achieved in Sudan is through the democratic transformation of the country's system of governance, which is possible only through the full implementation of the CPA.

There is a need for the recommitment of the parties to the spirit and letter of the CPA, first by restoring some confidence and trust between themselves as partners by taking good faith measures to address some issue of great concern to the other party; and second by working towards fulfilling the 'making unity attractive' objective of the CPA through fostering North-South links and projects of development along the North-South Border. As it stands today, unity has not been made 'attractive' for the people of Southern Sudan, and the people of Abyei. According to the National Democratic Institute's (NDI) reports on its focus group research in Southern Sudan and the three areas, it is forecasted that 90% of Southern Sudan would opt for secession, and the people of Nuba Mountains and Blue Nile in overwhelming numbers confuse the right to pop-

ular consultation with the right to self-determination.

The upcoming 2010 elections will be a major indicator of the future of Sudan. It is also an opportunity for 'making unity attractive'. Therefore, it is crucial that the two parties commit themselves to the conduct of a free and fair general election on the dates set by the National Elections Commission; and for the National Elections commission and all of its instruments to be supported and funded to conduct all necessary preparations on a timely fashion, the GONU should fulfill its Elections financial responsibilities per the CPA, and the international community should avail the resources it had pledged for elections support. The resolution of the census dispute is of paramount importance to the conduct of elections, for which the parties with the help of the international community must work earnestly and expeditiously to reach.

In conclusion, the malady of Sudan since independence is not only that it is a nation state because of a border imposed on its peoples and nations, but also because of an installed government that doesn't reflect its peoples' diversity, represent their aspirations, or serve their interests, nor did it ever attempt to do so. Alternatively, the state discriminated against its newly found citizens in policy and action and chose to suppress their valid claims to equity of political and cultural representation, and socio-economic development, by extreme force and genocidal tactics and wars. Therefore, the process of 'making unity attractive' is important to the spirit of the right to Self-determination reflected in the CPA, because only then will the people of Southern Sudan have two viable choices one of a united Sudan under new basis, and the other of a separate nation-state. It is imperative that the unity that has not been made attractive in the last 4 years of the interim period of the CPA, be made attractive, otherwise, the people of Southern Sudan will have only one option, to opt for secession, choosing to build a new state that would fulfill their quest for a transformed governance system; equity of citizenship, political representation, and socio-economic development; and respect for their basic human rights.

It is imperative that while a serious attempt to 'make unity attractive' is undertaken, the parties to the CPA and the international community led by the United States, IGAD and the Trokia commit themselves the timely conduct of the referendum and to respecting its outcome, whatever it is. It is also important that the parties and the international community envisage the post-referendum challenges and opportunities—especially across the oil and security sectors; political issues like border access right for nomads and seasonal migrants; economic issues like national assets and debts; and international issues like treaties around the Nile water—and begin to set plans to address them.

Sudan is at cross-roads; one road would lead to either a united New Sudan on a new basis, or two democratic nation-states, and another would lead to war and devastation with major regional and international implications. It is up to the two parties and the Sudanese people to decide what is to become of Sudan and the help and engagement of the international community is crucial during the next few months to come.

PERSONAL EXPLANATION

HON. ADAM SMITH

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. SMITH of Washington. Madam Speaker, on Thursday, July 30, 2009, I recorded an incorrect vote on the Tierney amendment to the FY 2010 Department of Defense Appropriations Bill. I intended to vote "aye" on rollcall vote No. 663.

RECOGNIZING THE 60TH WEDDING ANNIVERSARY OF JOHN RICHARD AND MABEL WARREN

HON. JEFF MILLER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MILLER of Florida. Madam Speaker, on behalf of the United States Congress, it is an honor for me to rise today in recognition of Dr. John Richard and Mrs. Mabel Warren on the occasion of their 60th wedding anniversary.

Dick and Mabel Warren first met in 1948 as students at Stetson University in DeLand, Florida. Dick Warren served his country faithfully in World War II as an Army Signal Corpsman during the France and German invasions. After returning home, he began his studies at Stetson, where he was the founding President of the school's Lambda Chi Fraternity chapter. He graduated in 1949 with a bachelor of arts in French. Mabel first attended Mount Berry College in Georgia, and then moved to Stetson after two years, where she met her future husband. She graduated from Stetson with a bachelor of arts in Elementary Education.

Teaching has always been a part of the Warrens' lives, and both Dick and Mabel went on to earn master's degrees in the field of education. In 1973, Dr. and Mrs. Warren settled in Niceville, Florida where they have remained ever since. Dr. Warren became part of the faculty of Okaloosa Walton Community College, now known as Northwest Florida State College, where he retired as Dean of Humanities in 1997. Mrs. Warren taught elementary education for 34 years and spent the last 21 years of her teaching career at Longwood Elementary School in Shalimar, Florida. Both Dick and Mabel continue to be an active part of the Northwest Florida community, giving their time and service to others.

Madam Speaker, on behalf of the United States Congress, I am proud to recognize Mr. and Mrs. Warren on their 60th wedding anniversary. My wife Vicki and I would like to wish all the best to Dick and Mabel, as well as their children, Barbara, Richard, and Mary Jane, and their nine grandchildren. They are truly an outstanding family from the First District of Florida.

HONORING THE CHESTER COUNTY COUNCIL OF BOY SCOUTS OF AMERICA ON THEIR 90TH ANNIVERSARY

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GERLACH. Madam Speaker, I rise today to honor the Chester County Council of Boy Scouts of America, which is celebrating its 90th Anniversary.

Founded in 1919, the Chester County Council began with 15 Troops and approximately 300 scouts. During the last 90 years, the Council has helped enrich the lives of boys and young men through activities geared toward building character, developing leadership skills and instilling a commitment to serving others.

The Council has a stellar history with long-standing traditions, including camping at the Horseshoe Scout Reservation and the Sunday chapel service "overlooking the valley of the Octoraro."

The Council has thrived for nine decades due to dedicated volunteers, leaders and alumni who graciously commit countless hours mentoring and leading the youth of Chester County. And the exceptional support from community and business leaders combined with tremendous programs and facilities make the Council one of the premiere scouting organizations in the nation.

Madam Speaker, I ask that my colleagues join me today in congratulating the Chester County Council of Boy Scouts of America on reaching a very special milestone and offering best wishes for continued success in mentoring generations of local youth and building a stronger community and nation.

HONORING THE LIVES OF SPEC. DANIEL P. DREVNICK, SPEC. JAMES D. WERTISH, AND SPEC. CARLOS E. WILCOX IV

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. McCOLLUM. Madam Speaker, I rise to remember three servicemen from the Minnesota National Guard's 34th Red Bull Infantry Division and to pay tribute to their lives. The deaths of Spec. Daniel P. Drevnick of Woodbury, Spec. James D. Wertish of Olivia, and Spec. Carlos E. Wilcox IV of Cottage Grove are a tragedy for our entire country. They lost their lives in a missile attack near Basra, Iraq on July 16, 2009.

Specialists Drevnick, Wertish, and Wilcox served this nation with honor and courage. They departed from Minnesota in February with more than 1,000 Minnesota National Guard soldiers. In Iraq, their duties included providing logistics and communications for more than 16,000 U.S. and multi-national coalition forces.

Daniel, James, and Carlos are Minnesotan and American heroes. We will be forever

grateful for their military service. They made the ultimate sacrifice for our nation and a more peaceful world.

Madam Speaker, please join me in paying the highest respect to Spec. Daniel P. Drevnick, Spec. James D. Wertish, and Spec. Carlos E. Wilcox IV. Their families, friends, and comrades in Iraq have my deepest sympathies for their profound loss.

HONORING THE LIFE OF SALLY CROWE

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to honor the life of Sally Crowe, the longtime House of Representatives Members Dining Room hostess. Sally passed away this July 12th at the age of 92. She began working as a cashier in the Longworth cafeteria in 1951, moving to the Members' Dining Room in the 1960s, where she remained ever since. In 2003, Sally received the John W. McCormack Annual Award of Excellence in recognition of her outstanding service to the House.

Sally was extraordinarily devoted to her job and to the institution of the House of Representatives. I first met Sally thirty years ago. She was a warm, engaging individual who infused this House with Irish wit and wisdom. She was a wonderful example of the talented, professional and dedicated federal employees who serve their country with distinction and honor.

Madam Speaker, I would like to offer my sincerest condolences to the family and friends of Sally Crowe, as well as my greatest appreciation for her many years of service.

EXPRESSING GRATITUDE TO JAMES PAUL LATTURE III

HON. JOHN S. TANNER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. TANNER. Madam Speaker, I rise today to acknowledge Paul Latture III, who has served as the President and CEO of the Jackson Area Chamber of Commerce since May 2002. Paul is leaving the position next week for a new opportunity in Rutherford County, Tennessee. Paul has helped expand West Tennessee's industrial base, including the recruitment of companies such as Bodine Aluminum/Toyota, and by working with existing industries to encourage expansion.

Paul is a graduate of the University of Mississippi, where he received a Bachelor of Arts in Marketing. Before joining the Jackson Area Chamber, he served as Assistant Commissioner for the Tennessee Department of Economic and Community Development, Executive Vice President for Economic Development for the Clarksville-Montgomery County Industrial Development Board, and Director of Membership Development and Governmental Affairs for the Memphis Regional Chamber of Commerce.

He is a graduate of the Institute for Organization Management, sponsored by the United States Chamber of Commerce, and is an active member of CoreNet Global, the American Chamber of Commerce Executives, and the Tennessee Economic Partnership (TEP). Paul is a 2005 graduate of WestStar. He is past president of the Tennessee Chamber of Commerce Executives (TCCE), past president of West Tennessee Chamber of Commerce Executives, and serves as vice president for the Tennessee Industrial Development Council (TIDC).

Paul and his wife Jennifer have two daughters, Abby and Claudia.

Madam Speaker, I hope you and our colleagues will join me in thanking Paul Latture III for his service and wishing him and his family all the best.

A TRIBUTE TO THE VOLUNTEERS
OF WOODSTOCK, NEW YORK

HON. MAURICE D. HINCHEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. HINCHEY. Madam Speaker, I rise today to pay tribute to the volunteers of Woodstock, New York, which is part of the 22nd Congressional District that I proudly serve. Once a year, the Woodstock community joins to honor those members who have given their time and energy to help others. This year, I am proud to commemorate the Fifth Annual Woodstock Volunteers' Day. In the American tradition of "lending a hand," I am delighted to recognize this community's activist history and continued commitment to altruism.

Although people began settling in its mountainous land long before the American Revolution, Woodstock was officially named a township in 1787. At the turn of the twentieth century, Woodstock was a quaint, farming town and an upstate escape for artists and craftspeople. Since those early days, Woodstock has maintained a notable relationship between artists and non-artists, enabling people of all generations to work hand-in-hand for the sake of the community. A Woodstock historian writes, "More recently, the artists and local people have worked together to better the town, joining in efforts to support the library, local planning, local schools, and governments. Woodstock has become truly a melting pot of a tremendously diverse group of people working together for a better way of life."

The Fifth Annual Woodstock Volunteers' Day will pay homage to a number of volunteers and volunteer organizations, including the Woodstock Rescue Squad, Meals on Wheels, Family of Woodstock, Woodstock Fire Companies No. 1, 2, 3, 4 and 5, as well as their Auxiliaries, the Daily Bread Soup Kitchen, the Woodstock Food Pantry, all volunteers for the Town of Woodstock, Friends of the Library, the Woodstock Historical Society and the Boards of the various arts organizations with the Woodstock Arts Consortium.

There is an unparalleled value in the act of giving oneself voluntarily. Volunteerism provides an appreciation for community, instills a

respect for life and humanity, and creates a bond that transcends generations. The Woodstock community has demonstrated a strong history and distinguished appreciation for this value, thus I extol their achievements. As thankful members of the Woodstock community gather to recognize the selfless acts of neighbors and friends, let us recognize the voluntary daily acts of kindness here in Woodstock and throughout America that strengthen our foundation. Madam Speaker, it gives me great pleasure to recognize the volunteers of Woodstock, New York as they celebrate the Fifth Annual Woodstock Volunteers' Day.

EARMARK DECLARATION

HON. BRIAN P. BILBRAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BILBRAY. Madam Speaker, I submit the following.

Requesting Member: Congressman BRIAN BILBRAY

Bill Number: H.R. 3326—Department of Defense Appropriations Act, 2010

Account: OPAF, Line 12

Legal Name of Requesting Entity: California National Guard

Address of Requesting Entity: 9800 Goethe Road, Box 42, Sacramento, CA 95826

Description of Request: I received \$6,000,000 to upgrade the Eagle Vision III system which is operated by the 147th Combat Communications Squadron, in San Diego, California. Eagle Vision is a mobile commercial satellite imagery collection and processing system which has proven itself as a resource in the war on terror and a homeland defense asset. The Eagle Vision III system has supported missions with AFNORTH, NORTHCOM, the Federal Emergency Management Agency (FEMA) and the U.S. Geological Survey Agency (USGS) during natural disasters, CALFIRE/CalEMA, and the Army Strategic Command (ARSTRAT). In fact, it directly and indirectly supported 2009 Midwest flooding, and Hurricanes Fay, Gustav, and Ike and has participated in numerous military exercises. By providing the One-meter Electro-optical CARTOSAT 2 and the 2.5 meter CARTOSAT 1 and One-meter SAR system (RADARSAT II) upgrades, Eagle Vision III will have the same capabilities as newer versions of the system. The upgrades will provide the direct downlink of two separate imaging satellites allowing operators access to satellites with different orbitologies, and more frequent access to imagery during each day. Also, with a one-meter capability, imagery analysts will be able to identify specific information regarding roads, bridges, dams and other critical infrastructure which is very important to "first responders" during disaster situations.

HONORING MARISSA KAHN

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GRAVES. Madam Speaker, I proudly rise today to recognize Marissa Kahn. On July 16, 2009, Marissa received a Gold Medal while competing at the National Family, Career and Community Leaders of America National Leadership Conference. This is the highest award in the nation for her FCCLA event.

She has been very active with her local chapter and has contributed greatly to her area through her service. Not only has she distinguished herself through her involvement, she has earned the respect of her family, peers, and community.

Madam Speaker, I proudly ask you to join me in commending Marissa Kahn for her accomplishments with the National Family, Career and Community Leaders of America and for her efforts put forth in achieving the highest distinction in the National Leadership Conference competition.

EARMARK DECLARATION

HON. MARY FALLIN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. FALLIN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3170—Financial Services Appropriations Act and Amendments I submitted and received the following funding.

I, Congresswoman MARY FALLIN, requested and received \$1,000,000 for The Oklahoma City National Memorial Foundation located at 620 N. Harvey Avenue, Oklahoma City, OK 73102. This is the installment of a congressional authorization of which \$3 million was appropriated in Pub. L. 108-447 enacted 12/8/04 (H.R. 4818) for FY 2005. The authorization for the present request was passed by Congress in H.R. 2673 and signed into law January 23, 2004, which amended Pub. L. 105-58 to match non-federal funds raised/received by the Foundation for a permanent endowment. The purpose of the endowment is to ensure the financial stability of the Foundation for future operation and maintenance of the Memorial and Museum and to execute outreach and educational programs.

HONORING THE MEMORY OF
CAROL BROOKS CASEY

HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BONNER. Madam Speaker, the city of Mexia and indeed all of Monroe County recently lost a dear friend, and I rise today to honor her and pay tribute to her memory.

Carol Brooks Casey was a beloved citizen with a long and distinguished record of community service.

Carol, a renowned radio announcer, began her 32-year broadcasting career in 1977 at WMFC station in Monroeville. Although she initially professed a disinterest in radio, Carol possessed self-confidence, determination, and graciousness that earned her the affectionate title "The Voice of Monroe County." Her radiant presence brought joy to those with whom she worked and earned her "star status" among her frequent listeners.

A leader for a host of philanthropic causes, Carol was honored by the local Kiwanis Club as its "2008 Citizen of the Year." She served as chairwoman for the Chamber of Commerce Christmas Parade, was one of the organizers of Excel's Pioneer Days, established a Christmas toy drive for children, and helped promote the national Angel Tree organization. She was also an active member in a number of civic organizations, including: the American Cancer Society, Peddlin' for a Cure, the American Red Cross, Kiwanis Club of Monroeville, and the Monroeville/Monroe Chamber of Commerce, among others. She also organized the first Veteran's Day Parade in Monroe County in 2007.

Madam Speaker, I ask my colleagues to join me in remembering a dedicated community leader, a generous friend, and an inspirational voice for Monroe County and Southwest Alabama. Carol will be dearly missed by her family—her husband, Mike Casey; her son, Calvin Casey; her daughter, Adrienne Casey; her three sisters, Helen Tucker, Land Watford, and Wanda Brooks; and her brothers, Mike Brooks and Cliff Brooks—as well as the countless friends and devoted listeners she leaves behind.

Our thoughts and prayers are with them during this difficult time.

Madam Speaker, I ask that the following poem—written by Reverend Wayne McMillian, pastor of the Mexia Baptist Church, as a tribute to Carol—be entered into the CONGRESSIONAL RECORD:

A VOICE IN THE WIND

The Morning Dove arose with the dew
Her voice on the wind like pigeon flew
Bringing music, joy, and laughter she knew
Would brighten a dull and somber world.

She knew us well, that voice on the wind
The hand she held of many a friend
Through concerts, charities and raffles send
Help to the needy in this crippled world.

Now the Morning Dove from here has flown
Her voice on the wind, in a celestial dome
Yet the Waves she rode right here at home
Will be her legacy in that perfect world.

IN MEMORY OF MARY ALICE ETHRIDGE

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. SAM JOHNSON of Texas. Madam Speaker, I rise today in memory of, Mary Alice Ethridge, 61, the executive director of the Rowlett Chamber of Commerce, who passed away recently after a two year battle with

colon cancer. I extend to all of her friends and family my deepest sympathy for their loss.

According to the Rowlett Lakeshore Times, "She took a medical leave of absence from the chamber earlier this year but did not speak publicly about her condition. Ethridge's daughter, Laura Morris, said her mother was a constant source of encouragement.

"My mother was my best friend and my inspiration in life and spirituality," Morris said. "There was no challenge too big. If someone told me no, my mother taught me to find a way to make it yes, but always with grace and dignity. She taught me that friendships are one of the greatest gifts a person can give another person, and that one can never have too many friends."

"Ethridge served as the executive director of the Rowlett chamber for more than 20 years, and she helped the chamber grow from a one-room office to its current building along Main Street. She helped develop the Leadership Rowlett program and the annual casino night fund-raiser.

"Chamber board member Staci Mauldin said she will never forget Ethridge's unwavering commitment to the community. 'I'll most remember her for her dedication to the chamber and the business community here,' Mauldin said. 'It was something that was very near and dear to her heart.'

"Besides working at the chamber, Ethridge also enjoyed gardening and enjoying her home. She and her husband, Robert, were married about 40 years. Ethridge was also involved with the Alpha-Nu Sorority, Keep Rowlett Beautiful, Crimestoppers, and the Rowlett Arts and History Foundation.

"Above all, Ethridge enjoyed a good laugh. "The one thing that will always be with me will be her contagious laugh and beautiful smile," Morris said. "We loved to make each other roll with laughter. I miss her deeply already."

While representing the wonderful community of Rowlett, I had the honor of getting to know Mary Alice. She touched many of us in such a positive way that her life will never be forgotten by those of us who had the privilege to know her. Mary Alice was an outstanding individual and she will be dearly missed. I ask all Members, please join me in honoring the distinguished memory of Mary Alice Ethridge.

HONORING EDWIN AND JEAN KRUPA ON THEIR 50TH WEDDING ANNIVERSARY

HON. DANIEL LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LIPINSKI. Madam Speaker, I rise today to honor Edwin and Jean Krupa on the occasion of their 50th wedding anniversary. Jean worked in my Congressional District Office for years, and her dedicated service and hard work made her both a valuable asset and someone who is a pleasure to know.

The love and dedication required through 50 years of marriage are truly worth celebrating. I am pleased to recognize them on this milestone, and wish them a continued life of adventures and fond memories.

I ask my colleagues to join me in honoring Jean Krupa and her husband Edwin Krupa on the occasion of their 50th wedding anniversary.

A CENTURY OF SERVICE: ROBBINSDALE FIRE DEPARTMENT, ROBBINSDALE, MN

HON. KEITH ELLISON

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ELLISON. Madam Speaker, I rise today to recognize the extraordinary services provided by the Robbinsdale Fire Department throughout the past 100 years. Established in 1909; the Robbinsdale Fire Department has dutifully responded to fire calls, assisted neighboring communities, extinguished structure fires, grass fires, vehicle fires, responded to gas leaks, hazardous material spills, and advocated fire prevention through inspections and community education. The members of the fire department are residents of Robbinsdale who serve and protect their families, friends, and neighbors 365 days a year, regardless of the perilous nature of their work.

I applaud their dedication and service to their community. The professionalism of the Robbinsdale Fire Department is an inspiration to those they serve. Their commitment to public service is honorable and I encourage all who encounter past, present or future members of the Robbinsdale Fire Department to thank them for their selfless service to their city. On behalf of the residents of Minnesota's Fifth Congressional District, I commend the members of the Robbinsdale Fire Department for their hard work and sacrifice and wish them well in their next century of service.

TRIBUTE TO DR. ROBERT E. KELEHER

HON. KEVIN BRADY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BRADY of Texas. Madam Speaker, I rise today to offer a tribute to Dr. Robert Keleher of the Joint Economic Committee, who is retiring this week from government service. Bob has been a valued member of the committee staff since 1996, when he joined our staff as Chief Macroeconomist. Bob's keen mind, deep knowledge of economics, and high research standards have made him a tremendous asset to the committee for many years.

After receiving his Ph.D. in economics from Indiana University and a position as a bank economist, Bob joined the Federal Reserve Bank of Atlanta, rising as a research officer and senior economist to become Head of Macro and International Economics. In addition to his research in monetary economics, Bob also conducted research applying classical principles of economics to taxation, emphasizing the importance of reducing marginal personal tax rates to create incentives for healthy economic growth.

Bob also served as the senior Macroeconomist of President Reagan's Council of Economic Advisers in 1985 and 1986. He then moved on to become a special monetary and economic advisor to Vice Chairman Manuel Johnson, Board of Governors of the Federal Reserve. Leaving the Federal Reserve in 1991, he became Chief Economist of Johnson Smick International.

Bob joined the committee in 1996 under Chairman Jim Saxton and continued his research in many areas including international and domestic monetary policy. Bob's early and prolific work on inflation targeting composes the body of almost all Congressional analysis of this policy in the 1997–2006 time period. The significance of Bob's research was enhanced even more as the Federal Reserve moved toward a policy of more explicit inflation targeting over the last five years. Bob's work on international monetary policy contributed to important reforms of the International Monetary Fund.

In addition to his expertise in the field of economics, Bob also distinguished himself as a fine person of great integrity and judgment. I know I can speak for all of my colleagues on the Joint Economic Committee in congratulating Bob upon his retirement and thanking him for his service to the United States Congress.

STOPPING IDENTITY THEFT

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. COBLE. Madam Speaker, as a longtime member of the House Judiciary Committee, I am deeply concerned about the urgent need to protect Americans from rampant identity theft. During my six years as Chairman of the subcommittee that dealt with intellectual property matters, we often addressed issues affecting this criminal activity.

Identity theft occurs when someone is able to use another person's identifying information, including their name, Social Security number, or credit card number, without that person's permission, to commit fraud or other crimes. It is even a threat to our national security.

The Federal Trade Commission announced on February 26 that identity theft was the most reported complaint in 2008. The FTC estimates that as many as nine million Americans have their identities stolen each year.

Our government has begun a review that puts the focus on protecting the nation's digital infrastructure against cyber-attacks. I commend the Obama Administration for recognizing this major problem and for beginning to take constructive steps to deal with it.

If you are interested in learning more about this important matter, I urge you to read a column that was written by Michael J. Schultz for the Washington Times on February 20.

"President Barack Obama named Melissa Hathaway to lead a major review of this nation's cybersecurity. Her selection reflects the administration's desire to protect the government's information technology systems from security threats.

"The General Accounting Office characterized the government's computer system as a

"high risk" area. This was underscored when the Federal Aviation Administration recently admitted its computer system was "hacked" and that the 48 files breached contained the names and Social Security numbers of more than 45,000 employees.

"While it is critical that the government's information networks be protected from terrorists and hackers alike, it is equally important that the administration's review also focus on ways to better protect every American's digital identities, especially when they use credit cards or the Internet.

"Digital identity misuse or theft leaves victims exposed to fraud that could lead to physical, emotional and financial harm. People from all walks of life have been victimized with those least able to absorb the punishment among the hardest hit.

"A recent survey by Jupiter Research concluded a total of 10 million Americans were victims of identity fraud in 2008, at an average cost of \$496. Of these, 19 percent were defrauded while conducting online transactions.

"Millions of other Americans have suffered financial losses when their credit cards have been compromised. In addition, thousands of merchants have lost merchandise or funds when credit cards have been misused or stolen cards presented to make a purchase. Online merchants lost more than \$10 billion in 2007 due to identity fraud.

"The misuse of prepaid cards presents yet another massive problem. Millions of stored value cards (gift cards, payroll cards, prepaid cards) have no Federal Deposit Insurance Corp. protection when they are stolen and thus thieves can spend them as easily as cash, depleting the true owner of their hard-earned savings.

"Most Americans do not realize that debit cards, which often carry the insignia of a credit card, do not offer the same protection as regular credit cards, and may only learn this when the cards are stolen.

"Unfortunately, the dangers go far beyond potential financial losses. A recently well-publicized case involved a 14-year-old girl who committed suicide when an adult pretended to be a boy on MySpace and then dumped her in a degrading way.

"Another example of the misuse of digital identities occurs when already overworked 911 call centers get "swatted" by prank callers able to imitate another number. These types of "pranks" severely limit first responders' ability to act in times of crisis, which places the entire community at risk when real emergencies require responses by fire or police departments.

"The upcoming review by the Obama administration should also address the sad truth that many of the so-called protections are inadequate to the dangers. For example, PINs or passwords often offer relatively little identity validation or protection. And most people have so many different passwords they frequently write them down and keep them with their cards, so when one is stolen the protection is often gone with it.

"Professional hackers can easily steal credit card information from individuals as well as from larger systems. More than 100 million credit card accounts were exposed when Heartland Payment Systems had its data centers breached in December 2008, enabling the thieves to subvert any current anti-fraud technology present. TJX Corp. had millions of credit card accounts exposed when they had their data centers breached.

"RBS WorldPay, one of the largest payment processors in the world, also had millions of accounts stolen when their data centers were breached.

"Clearly the old methods of automated protection are no longer adequate. Thus, we must implement systems that better validate digital identities to protect us as individuals and companies.

"Just as the government was wrong in allowing loose self-regulation of the financial, automotive and mortgage industries, it also has been far too lax in ensuring protection for consumers and companies that use payments cards of any type on the Internet.

"As a direct result of these conditions, we have seen a precipitous increase in reported credit card and Internet fraud. All users are at risk, but it is our children who are most vulnerable.

"The upcoming review of cybersecurity has the immediate responsibility to provide broadly defined protection. In addition to improving how to better protect our infrastructure from potential homeland security breaches from those with ill intent toward the United States, the administration should address how to use validated digital identities to prevent the abuses that have caused significant harm to individuals and businesses."

TEXAS H. CON. RES. 183

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering House Concurrent Resolution 183, as passed by the 81st Legislature, Regular Session, 2009, of the State of Texas, into the CONGRESSIONAL RECORD.

HOUSE CONCURRENT RESOLUTION

Whereas, The oil and natural gas exploration industry has been a significant part of the state's economy since the early 20th century; today, Texas is the leading producing state for oil and natural gas in the country, accounting for 21.3 percent and 27.8 percent of total U.S. production, respectively; and

Whereas, Texas producers provide more than 200,000 jobs for Texas citizens, with an average pay that is almost three times higher than the average paid by all other industries; during fiscal year 2008, Texas producers paid over \$5 billion in taxes and fees to the state's general revenue fund; and

Whereas, Natural gas is a highly valued, clean fuel that has become a mainstay of electricity production and other industrial operations in Texas, while oil continues to constitute the backbone of the state's industrial sector and fuels virtually all of the state's transportation system; and

Whereas, Renewable energy sources offer great promise for Texas' long-term energy needs, but the technology that would make these sources abundant is in its infancy, and until that technology is adequately developed, renewable energy sources will remain dispersed and unable to deliver base load capacity; and

Whereas, Conservation can help satisfy the state's energy needs, and action to reduce customer demand is the quickest way to meet energy needs in the short term, but a growing economy and population will require more energy than can be saved through more efficient energy use; and

Whereas, To keep pace with increased demand, independent producers completed

more than 11,000 wells in Texas in 2008, and in the two-year period 2007-2008, they increased the production of natural gas in Texas by more than 12 percent; and

Whereas, In addition to generating high-quality jobs, independent producers help to reduce America's dependence on Middle East oil by exploring for domestic resources and providing stable supplies of cost-effective energy to consumers; and

Whereas, Independent producers rely on longstanding tax provisions to plan their activities and to explore for new wells to offset declining production from older ones; without the development of new wells, energy supplies would decline and the costs to consumers would rise; and

Whereas, President Barack Obama's initial budget includes provisions deleting the intangible drilling costs deduction, percentage depletion allowance, geologic and geophysical costs deduction, and domestic production activities deduction, and the elimination of these provisions would cripple this state's energy jobs, reduce small businesses' access to capital, and harm royalty owners; and

Whereas, Intangible drilling costs (IDCs) typically include expenditures for physical items with no salvage value, as well as other costs associated with preparing and completing a well for the production of oil, gas, or geothermal steam or water; producers have long been able to deduct IDCs as current business expenses, rather than depreciate or amortize them over the life of the well; IDCs are actually similar to research and development costs, for which most manufacturing businesses are able to take a tax credit, rather than a deduction; and

Whereas, The percentage depletion allowance, also known as the small producers exemption, was created in the 1920s to encourage oil and natural gas exploration, which is an inherently high-risk venture; the exemption is available only to the smallest producers and allows them to deduct 15 percent of their gross income from oil and gas properties; and

Whereas, Geologic and geophysical (G&G) costs relate to the surveys that producers conduct or commission in order to locate and develop oil and natural gas reserves and to minimize unnecessary drilling; G&G costs may be amortized over the first 24 months of the life of a well; and

Whereas, The domestic production activities provision allows businesses a tax deduction for qualified production activities that are based in the United States; the deduction helps to preserve American jobs and American small businesses; and

Whereas, Major integrated companies are not eligible for the IDC deduction, percentage depletion allowance, or domestic production activities deduction, and they are subject to a seven-year amortization schedule for G&G work; consequently, "big oil" is not impacted by the proposed budget changes; and

Whereas, President Obama has stated his intention to support the development of jobs, promote the use of clean-burning energy, and reduce America's dependence on foreign oil, yet his budget proposals would lessen the ability of independent producers to help meet those three goals: Now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby respectfully urge the United States Congress to reject the provisions of President Barack Obama's budget that would eliminate the intangible drilling costs deduction, percentage depletion allowance, geologic and geophysical costs deduc-

tion, and domestic production activities deduction and to encourage instead the development of Texas oil and natural gas; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to Congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,
Speaker of the House.

ROBERT HANEY,
Chief Clerk of the House.

PATSY SPAN,
Secretary of the Senate.

Approved: RICK PERRY, *Governor.*

MEDICAL LIABILITY REFORM

HON. SCOTT GARRETT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GARRETT of New Jersey. Madam Speaker, I rise today to discuss one aspect of health care reform that, unfortunately, has not received a lot of attention by the Democrat majority. That is the issue of medical liability reform.

Recently, I spent a couple of days in my district in New Jersey touring hospitals, physician group practices, and long-term care facilities. When talking to the physicians at these facilities, I asked them, "What issue would you most like to see addressed in health care reform legislation?" In every single facility I visited, medical liability reform was either at or near the top of the list.

We know that the surge in malpractice lawsuits over the past 30 years has had a profoundly negative impact on the practice of medicine. And while, obviously, I feel that patients should be compensated for gross negligence by physicians, there is little doubt that our current tort system is broken. More than 60 percent of liability claims against physicians are dropped, withdrawn, or dismissed without payment. In 2007, the average cost of defending these claims was \$18,000 per case.

This has pushed the cost of liability insurance through the roof. The American Medical Association (AMA) has listed my home state of New Jersey as a "crisis state" for medical liability. Doctors face liability insurance premium increases that far outpace the already high rate of medical inflation. Some high-risk specialties, such as obstetrics or emergency, face annual premiums of over \$100,000 per year. According to a survey conducted by the American College of Obstetricians and Gynecologists (ACOG), the lack of affordable liability insurance forced 70 percent of OB/GYNs to make changes to their practice. Liability concerns also forced between seven to eight percent of OB/GYNs to stop practicing obstetrics.

But more important than the direct costs of our tort system are the indirect costs. One pediatrician I spoke to said that he would "just like to practice medicine without feeling like a lawyer was looking over my shoulder all the time." The anxiety that our physicians face from confronting potential lawsuits seriously affects the doctor-patient relationship. Additionally, it drives up the cost of health care by encouraging the practice of "defensive medicine." The AMA estimates that defensive medicine adds somewhere between \$84-\$151 Billion per year in health care costs to our system. As another doctor I met with said, "I can waste money like you've never seen. When someone comes into my hospital and needs treatment, I can order every test, every procedure known to man, simply to protect myself from a lawsuit."

Even President Obama, in his recent address to the AMA has admitted that medical liability is a serious issue. But despite the support of the President, the medical establishment, and the overwhelming majority of Americans, of the 1,018 pages of H.R. 3200, the America's Affordable Health Choices Act, there is not a single page on medical liability reform.

Madam Speaker, this issue is simply too important for us not to address. Any serious attempt to reform our health care system must reform medical liability.

GOOD NEWS IN NEWARK

HON. DONALD M. PAYNE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. PAYNE. Madam Speaker, like all urban centers, my home city of Newark faces many challenges. We are working hard to improve the quality of life for residents by moving forward in the area of affordable housing and health care, better schools, child care, and services for seniors. We are also proud of the fact that Newark welcomes visitors not only from other parts of our state, but also from around the nation and the world. As we continue our successful economic development efforts, I would like to draw to the attention of my colleagues here in the U.S. House of Representatives an article which highlights the good news for Newark.

NEWARK AT NIGHT: IT'S NOT A SURPRISE ANYMORE THAT THE CITY IS ALIVE AFTER DARK (Posted by Philip Thomas, Lawrence P. Goldman and Jeff Vanderbeek/Star-Ledger Guest Columnists, July 09, 2009)

Not too long ago, something you wouldn't necessarily have thought of happened in Newark. It was extraordinary.

On a crisp November evening, a sold-out house of 2,800 people filled Prudential Hall at the New Jersey Performing Arts Center for a stunning concert by The 5 Browns, a family of Juilliard-trained, young virtuoso pianists, along with the New Jersey Symphony Orchestra.

Just down the street, another 19,000 people were doing something that happens in every great American city, but hadn't in Newark for quite some time—attending a major league sporting event; in this case, a rousing hockey game where the New Jersey Devils

skated past the Toronto Maple Leafs by a score of 3-2.

It was just a few days after the Prudential Center opened in downtown Newark and it was the city's first test of how it would move multiples of thousands of people through downtown streets. Newark passed with flying colors. And it was the first of many electrifying nights with multiple venues alit and Newark abuzz with activity.

Just recently, Newark Symphony Hall played host to a daylong conference on reimagining its future. What became clear through the day is the unmistakable rebirth of Newark at night. There can no longer be any doubt. Newark is alive and kicking up its heels at night and on the weekends.

For quite some time, the Newark Museum and Symphony Hall were in a lonely vanguard. There was little life in the downtown core and Newark's lingering reputation from years past did not help. Too many office workers raced out of the city at night, almost never touching city sidewalks because of the hermetically sealed tubes between the towers, the parking decks and Penn Station.

Happily, though, much has changed in the last decade. Like Cleveland and Pittsburgh, two similar cities formerly down on their luck, we have seen real change in Newark and it is exciting to be a part of it.

Since opening night, NJPAC has attracted some 6 million visitors, the vast majority in the evening and on weekends. As we like to say, "That's 6 million people coming to the building that wasn't going to be built in the city that no one was going to come to."

Similarly, since opening less than two years ago, Prudential Center has drawn nearly 3 million visitors to Newark, virtually all at night or on the weekend. As we like to say, "That's 3 million people coming to the Rock that couldn't be built in a city that no one would dare come to."

In fact, even in the worst economy in three generations, Devils attendance is up almost 15 percent from their best year in the Meadowlands. Perhaps more important is how long their fans are staying—on average over an hour longer than they did at the Meadowlands. That means they are dining at Newark restaurants and spending more time—and money—in the city.

Newark Symphony Hall is poised to experience a resurgence. The recent conference was a promising start. Its vibrancy is essential to enlivening the south Broad Street end of Newark and creating stability for not only the visitors, but for the people who reside in the neighborhood as well.

This bodes well for the housing and commercial development that is picking up steam and for continued economic investment in this part of the city. If Newark is to sustain its momentum, the entire length of Broad Street must become the centerpiece of significant redevelopment to elevate Newark to the next level of visitor interest.

Combined, last year nearly 2 million visitors came to spend an evening in Newark attending events at the three venues. But there is more we must achieve.

In Cleveland, for example there are now six successful theaters in Playhouse Square and the Quicken Arena brought LeBron James and the Cavaliers from the suburbs to the city. The Rock and Roll Hall of Fame has enticed tourism from far beyond Cleveland. What was once a desolate downtown is now delightful. Hotels, office development and retail followed.

That's what we are aiming for in Newark. We have world-class facilities. We have fine restaurants—many of them brand new and

participating in Newark's second annual restaurant week this month—and entertainment venues that dot the area around NJPAC and the Prudential Center, but we are not finished.

Cities are meant to be filled with all kinds of people coming together to celebrate, relax, revel and enjoy one another. That's now happening big time in Newark today. And that's very good news for all of us in New Jersey.

TRIBUTE TO THE LIFE AND LEGACY OF DR. A.D. PINKNEY, FORMER PRESIDENT OF THE INDIANAPOLIS NAACP

HON. ANDRÉ CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CARSON of Indiana. Madam Speaker, I rise today to pay tribute to the life and legacy of Dr. A.D. Pinkney, former president of the Indianapolis National Association for the Advancement of Colored People. He passed away this month, at the age of 85.

Dr. Pinkney was an iconic civil rights leader who brought visionary changes that forever altered the racial landscape of Indianapolis, Indiana. Under his leadership, the NAACP brought two landmark cases before federal courts, which were instrumental in forcing the city to desegregate. The first ruling forced black students from the Indianapolis Public Schools area to be bused to township system schools. The second ruling by federal courts forced suburban townships to expand public housing options for people of color.

Through great courage and dedication, Dr. Pinkney opened the doors for our generation to come forward and serve our community as proud and honorable citizens. He was instrumental in breaking down ethnic and racial barriers, so that people of color may live a prosperous life of liberty and equality.

His passing is a great loss to the Indianapolis area community. I ask my colleagues to join me in honoring Dr. A.D. Pinkney for his service.

PERSONAL EXPLANATION

HON. JOHN H. ADLER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ADLER of New Jersey. Madam Speaker, due to a meeting at the White House on Friday, July 30, 2009, I missed two votes. I would have voted as follows: Motion to recommit on H.R. 2479—"no"; final Passage of H.R. 2479, the Food Safety Enhancement Act of 2009—"yes."

EARMARK DECLARATION

HON. MARY FALLIN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. FALLIN. Madam Speaker, pursuant to the Republican Leadership standards on ear-

marks, I am submitting the following information regarding earmarks I received as part of H.R. 3133, the Energy and Water Development and Related Agencies Appropriations Act. I requested \$2,300,000.00 and received \$250,000.00 for the Statewide Comprehensive Water Plan at the Oklahoma Water Resources Board located at 3800 North Classen Boulevard, Oklahoma City, Oklahoma 73118, which is a multi-year study to provide technical assistance to the state of Oklahoma in updating the Oklahoma Comprehensive Water Plan. The OWRB envisions that, combined with federal cost-shared funds, the OWRB could work with local water suppliers in evaluating their system conditions, long-term needs, and develop a strategy to meet their needs over a 50-year time horizon. The plan would also address the long-term needs of other water use sectors.

HONORING DR. MODESTO "MITCH" MAIDIQUE

HON. MARIO DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MARIO DIAZ-BALART of Florida. Madam Speaker, I rise today to honor a true leader, activist, champion of education and a dear friend, Dr. Modesto "Mitch" Maidique, President of Florida International University in Miami, Florida.

Dr. Maidique is the longest serving university president in the State of Florida and the second longest serving research university president in the country. For more than two decades, he has dedicated his life to FIU, its students, faculty and staff, and has transformed it into one of our nation's leading institutions of higher education. As he prepares to retire next week, it is a privilege to pay tribute to this visionary and extraordinary leader.

He began his service to FIU in the College of Business Administration as a professor of management and in 1986 was named FIU's fourth President. Under his leadership, enrollment at FIU has more than doubled, growing to more than 38,000 students and today ranks among the 20 largest universities in the United States. The university added 22 doctoral programs and 18 undergraduate programs during Dr. Maidique's presidency. It serves not only Floridians, but students from across the nation and world and has cultivated successful alumni and leaders in our community.

His tenacity and perseverance led to the establishment of the College of Law, College of Engineering and the School of Architecture and most recently, the historic opening of the new FIU College of Medicine, one of only three medical schools established in the last 25 years. The university also added a Division I-A football team in 2002. FIU's sponsored research funding has also grown from \$6 million to nearly \$110 million and the institution's endowment experienced exponential growth from less than \$3 million to more than \$105 million.

Prior to his tenure at FIU, Dr. Maidique co-founded Analog Devices Inc., Semiconductor Division. He also served as CEO of Collaborative Research, now Genome Therapeutics,

and as senior partner in Hambrecht & Quist Venture Partners. He was also the past chairman of The Beacon Council, Miami's economic development authority and has testified before Congress on the issues of energy conservation and energy financing. President George H.W. Bush appointed him to the President's Educational Policy Advisory Committee and he served in a similar capacity for President George W. Bush. He later served on the Secretary of Energy's Advisory Board and has served for eight years as a member of the Commission on Presidential Scholars. The Hispanic Business Journal has named him among America's 100 Most Influential Hispanic Leaders.

He received his B.S., M.S., E.E. and Ph.D. degrees from the Massachusetts Institute of Technology and completed the Harvard Business School's Program for Leadership Development. He is also a contributing author to ten books and has co-authored a New York Times bestseller.

I have always considered Florida International University to be one of the fundamental pillars of South Florida. During my years in the Florida State Legislature, and now in Congress, I have enjoyed working closely with Dr. Maidique in the efforts to create the College of Law, the Engineering Campus, expanding the library and research capabilities, and securing millions in federal funding, among other accomplishments. I have witnessed the work of this great leader first hand and today I thank him for his service. His legacy will endure generations and is sure to be felt for decades to come.

My dear friend Mitch Maidique exemplifies the true meaning of public service and has put the needs of the University, our community's University, above all else. Madam Speaker, I ask that you join me in celebrating his legacy and career, thanking him for his invaluable service and wishing him well in the years to come.

TRIBUTE TO THE LATE EUGENE AMOS

HON. DENNIS MOORE

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MOORE of Kansas. Madam Speaker, I rise today pay tribute former Kansas State Representative Eugene "Gene" Amos, who died on July 24th.

Gene Amos, the owner of the Amos Funeral Home, served in the Kansas House of Representatives from 1987 to 1993, representing a district that was centered on the city of Shawnee. Earlier this year, he received the Shawnee Chamber of Commerce's Lifetime Achievement Award for advancing the interests of Shawnee, which bears the imprint of his "good deeds, kind words and solid values", the Chamber stated. Born in Liberal, Kansas, he moved to Shawnee with his family in 1945, attended Shawnee Mission Rural High School and graduated from Kansas City Missouri Junior College and the Kansas City College of Mortuary Science. After serving in the U.S. Navy during the Korean War, he mar-

ried Margaret Zoll in 1953 and joined his father's funeral business.

In addition to serving as president of the Kansas Funeral Directors Association and president of the State Board of Embalmers, Gene was an active member of the Shawnee Chamber of Commerce, the Shawnee Historical Society, the Shawnee Optimist Club, and Optimist International, where he served as president and district governor. He was a member of Merriam Christian Church, serving as a deacon, elder and chairman of the board. Additionally, he served as president and member of the Delaware Crossing Chapter of the Sons of the American Revolution. He often spoke to groups on the history of Shawnee, politics, the funeral business and family research, and he taught genealogy at Johnson County Community College. In 2007, he was named Shawnee Citizen of the Year by the Knights of Columbus Council 2332. He also was a charter member of the Ancient Form Masonic Lodge, and was a member of Scottish Rite Bodies, Abdallah Shrine, Beatrice Chamber, and Order of the Eastern Star.

As a member of the Kansas House of Representatives, Gene served on the education, public health and agriculture committees. According to the Kansas City Star, when the Kansas Legislature approved a resolution earlier this year recognizing Amos, lawmakers recalled his humor: "One legislator told how Amos would pass out business cards to fellow committee members who he said appeared lifeless. He once took the pulse of a sleeping legislator and said he was looking for a new client. Then the mood in the legislative chamber that day turned more somber, according to a transcript of the proceedings. Frank Weimer, who served with Amos as a state representative, spoke of Amos' honor, generosity and integrity. 'There isn't a man on this earth I respect more than Gene Amos,' Weimer said."

Madam Speaker, Gene Amos is survived by: his wife, Margaret; son, Gregg Amos; daughters, Joni Plumm and Amy Ruu (John); sister, Paula Ramona Upton; six grandchildren and one great grandson. I have known Gene for many years and considered him a good friend. I join his many friends, neighbors and professional colleagues in celebrating his life and mourning our loss.

RECOGNIZING THE BRAVE MEN AND WOMEN WHO SERVED IN THE VIETNAM WAR AND HONORING THEIR SERVICE TO THE NATION

HON. EMANUEL CLEAVER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CLEAVER. Madam Speaker, I rise today in recognition of the brave men and women who served in the Vietnam War. It has been 50 years since our first casualties. In 1959, Major Dale Richard Buis and Master Sergeant Chester M. Ovnan were ambushed and killed by Ho Chi Minh Vietnamese. By 1963, 100 advisors had lost their life in Vietnam. After President Kennedy's assassination, history would be left to President Johnson,

who would lead Americans into one of the most tumultuous times in our history.

In 1964, the reported Gulf of Tonkin incident resulted in a Congressional Resolution that allowed President Lyndon B. Johnson to wage war without a formal declaration. By 1965, the conflict heightened and more Americans were subject to the draft. Casualties escalated from 17,000 to 35,000 a month. In January of 1968, the North Vietnamese launched the Tet Offensive, though Americans were able to obtain a military victory and recapture most of the area. However, politically the tide of support was turning in the United States, and the draft continued as protests became louder. Richard Nixon was elected President and began covert bombing of Cambodia in 1969. By 1973 the last American troops left Vietnam.

As our American military was sent to do battle in a civil war, they had no idea of the life altering experience that would change them and their country forever. Vietnam Veterans are the children of the greatest generation. And like their fathers and mothers they did their job for their country, engaging the enemy on land, in the air, and on water—many fighting to their death. In battle survival depended on each other. They became numb from the constant threat of the war, witnessing their friends injured or killed. Brave medics in the field and the doctors, nurses and corps men at hospitals worked tirelessly and risked their lives to save countless soldiers. There was little time to mourn those that died because no one knew what tomorrow would bring. How bravely they answered the call only to be scorned by many of their fellow countrymen and women when they returned home.

Now fifty years later, we have a better understanding of the extraordinary sacrifice made by this generation of patriots. We question, how then could we as a nation fail to understand that the soldier follows the orders of the Commander-in-Chief. To disagree is our given right but to fail to support our troops who are sent to battle should never happen again. Over 58,000 Americans died in Vietnam; 14,095 were just 20 years of age and several of them were my college classmates. Those men and women had their dreams and names forever etched in stone as a reminder that their sacrifice was their life. Even those that survived did not return unscathed. Many returned home with physical and emotional pains of war to a country that had turned a deaf ear to their needs. Those Vietnam Veterans, like the generation before, came home to raise their families and continued to contribute to our country. Many have passed away, but all have left their imprint on their families and our nation.

For those families still waiting for the return of their soldiers, it has been a long, mournful time. Recently John Adam was returned home after missing for 41 years. On May 22, 1968, twenty-year-old Air Force, Senior Master Sergeant John Adam disappeared while serving in Vietnam. His remains were located near Laos and identified through DNA. Now one family has closure; however, many of our veterans remain missing and the prayers continue.

So, on September 12, 2009, fifty years after the first casualty in Vietnam I, as the United States Representative of Missouri's 5th District, will host a Town Hall event at the Truman

Library in Independence, Missouri, to honor the men and women who courageously served in that war—to finally give them the respect and honor they deserve as heroes of our country. Madam Speaker, please join me in thanking and appreciating the sacrifices of a great generation of American Patriots, our Vietnam Veterans.

TEXAS H. CON. RES. 120

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering House Concurrent Resolution 120, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

HOUSE CONCURRENT RESOLUTION

Whereas, South Texas is on the front line of the battle against the fever tick, a pest that threatens to inflict catastrophic losses on the beef industry should it continue to spread beyond a permanent quarantine zone established along the Rio Grande in 1943; and

Whereas, Historically, the fever tick ranged across the entire southeastern United States, reaching as far north as Maryland and Pennsylvania; the tick can carry and transmit a parasite that causes cattle tick fever, which kills up to 90 percent of infected cattle; in 1893, the Texas Animal Health Commission was founded to fight this scourge, and in 1907 the United States Department of Agriculture established the National Cattle Fever Tick Eradication Program; by then, the tick had already caused direct and indirect economic losses estimated to equal more than \$1 billion in today's dollars; and

Whereas, The eradication program had successfully contained the fever tick to an 852-square-mile quarantine zone by 1943; the tick was never eliminated in Mexico, however, and personnel from the USDA Tick Force have maintained a high level of vigilance to fight continuous reintroduction; after the pest was detected beyond the zone in 2007, five temporary preventive quarantine areas were established, covering more than one million acres in Starr, Zapata, Jim Hogg, Maverick, Dimmit, and Webb Counties; and

Whereas, In March 2008, the Texas Department of Agriculture requested some \$13 million to fight the spread of fever ticks; the USDA released \$5.2 million, and in January 2009 it committed another \$4.9 million in emergency funds, but sustained funding over the long term is essential; moreover, the National Fever Tick Eradication Strategic Plan, developed and approved by the USDA in 2006, has never been implemented and funded, and Dr. Bob Hillman, the state veterinarian and executive director of the Texas Animal Health Commission, has warned that fever ticks are a national livestock threat that requires an all-out assault; and

Whereas, The fever tick has gained substantial ground in this state, but the Texas Department of Agriculture, the Texas Animal Health Commission, and the USDA Tick Force continue working diligently with cattle owners to save a key component of the Lone Star State's agricultural economy and prevent the battlefield from extending to

other states; if the fever tick is not contained, the cost to the cattle industry could easily approach \$1 billion a year and lead to rising food costs for consumers: Now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby memorialize the Congress of the United States to make eradication of the fever tick in South Texas a priority and continue to provide appropriate funding and resources for this effort; and be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all members of the Texas delegation to Congress with the request that this resolution H.C.R. No. 120 be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

GUILLEN GONZALEZ
TOUREILLES LEIBOWITZ,
King of Zavalá.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,
Speaker of the House.

ROBERT HANEY,
Chief Clerk of the House.

I certify that H.C.R. No. 120 was adopted by the Senate on May 27, 2009, by a viva-voce vote.

PATSY SPAU,
Secretary of the Senate.

APPROVED: June 19, 2009. Rick Perry,
Governor.

CRITICAL ISSUES FACING SUDAN

HON. JAMES P. MCGOVERN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MCGOVERN. Madam Speaker, Sudan has been ravaged by intermittent civil war for four decades. Over the last 20 years, more than two million people have died in Southern Sudan due to war-related causes and famine, and millions more have been displaced from their homes. In January 2005, after two and a half years of negotiations, the Sudan People's Liberation Movement (SPLM) of the South and the Government of Sudan signed a final peace agreement known as the Comprehensive Peace Agreement (CPA). According to the United Nations, U.S. officials and Sudan observers, the implementation of the CPA has been selective and at times deliberately slow. With national elections scheduled for April 2010, the implementation of the CPA is critical.

Yesterday, on Thursday, July 30, 2009, the Tom Lantos Human Rights Commission held a hearing on "Ensuring the Human Rights of the People of Sudan: Implementation of the 2005 Comprehensive Peace Agreement." The distinguished witnesses testifying before the Commission were Ezekiel Lol Gatkuoth, Head of Mission, Government of South Sudan Mission in the United States; Roger Winter, former Special Representative on Sudan, Department of State; John Norris, Executive Director, the ENOUGH Project; and Amir Osman, Senior Director of Policy and Government Relations, Save Darfur Coalition.

Mr. Osman, a native of Sudan, fled his home country in 2003 because his work on human rights had put his life at risk. He was resettled in the United States in 2006 through the United Nations High Commissioner on Refugees, moved to Washington, D.C., and joined the Save Darfur Coalition. It is my privilege to share his testimony with my colleagues.

SAVE DARFUR COALITION—TESTIMONY OF
AMIR OSMAN

Good afternoon. Chairman McGovern, Chairman Wolf, thank you very much for inviting me to testify today on this very important issue before this very important commission. I appreciate the opportunity to talk about the critical issues currently facing my home country of Sudan.

It was a difficult decision for me to flee Sudan in 2003. I left because my work on human rights had put my life at risk. As a refugee living in Egypt, I continued to advocate for peace, justice, and democracy in Sudan at the American University in Cairo and the Cairo Institute for Human Rights Studies. I specifically focused on the genocide in Darfur during those years.

After being resettled to the United States in 2006 through the UNHCR, I moved here to Washington and joined the Save Darfur Coalition to aid its international advocacy efforts. As co-senior director of policy and government relations, I help design and implement the coalition's international policy, advocacy and outreach to foreign governments, and international partner organizations in Europe, Africa, and the Middle East. I also focus on the human rights situation in Sudan and the peace processes in Darfur and South Sudan.

During the past decade, President Omar al-Bashir and his inner circle have transitioned from an ideologically driven regime to one whose primary aim is self-preservation. The regime now makes human rights compromises when it feels compelled to do so. The regime's continued abuses have been well-documented by human rights organizations. Regular warnings have been issued about illegal detentions, unfair trials, press censorship, and the routine harassment of journalists. In addition, current laws do little to protect victims of gender-based crimes.

The most urgent human rights challenge in Sudan today, however, continues to be the crisis in Darfur. Three million displaced civilians continue to suffer as a result of the genocide that began in 2003. While the systematic destruction of villages has largely ended, the people of Darfur continue to live in a lawless, dangerous environment, where rape continues to be a daily terror.

On March 4th, the Sudanese government demonstrated its ability to cut off humanitarian aid at any moment from the 4.7 million Darfuris who depend on it.

The mass violence committed by the Sudanese government several years ago has been replaced with the harassment, detention, torture, and murder of Sudanese civil society leaders. This violence led a significant number of the Sudanese human rights defenders to flee the country shortly after March 4th. Such abuses must be stopped.

The suffering in Darfur resembles in many ways the war in Southern Sudan. Both Darfuris and Southern Sudanese have experienced the bombing of villages and mass civilian displacement. The Sudanese government's use of humanitarian aid as a weapon of war and its divide and rule tactics amongst Southern rebels have also been repeated in Darfur.

At the same time the Sudanese government was launching its genocidal campaign in Darfur, it was negotiating with the SPLM an end to the conflict in the south. Bashir made the calculation that the international community would turn a blind eye to Darfur in the effort to get the CPA signed. His calculation turned out to be largely correct.

Bashir's favorite tactic is to delay true reforms by creating crises that distract the international community, allowing Bashir to never actually fulfill any of his promises. The international community enables Bashir by focusing on the crisis of the moment rather than a comprehensive solution. The NCP is using cooperation on the implementation of the CPA as leverage to resist international pressure on Darfur. And it is working.

The United States and the international community have failed to develop policies suited for dealing with a regime which lacks a fundamental willingness to transform into the democratic state envisioned by the CPA. Sudan issues will not be resolved satisfactorily between just the NCP and SPLM or the NCP and the Darfuri rebels. All of Sudanese civil society must be empowered to participate in these processes.

The United States must understand that Sudan's crises cannot be managed forever or resolved individually. Only when the international community demands serious judicial and democratic reforms will there ever be a chance to resolve South Sudan and Darfur and move towards lasting peace. Policymakers have too often focused on the South to the detriment of Darfur, or Darfur to the detriment of the South. But Darfur and South Sudan are not separate problems; they are the result of a single problem: the undemocratic, centralized, and abusive nature of the ruling regime. Only when this problem is addressed will peace be forthcoming.

There is an urgent need for a coherent and comprehensive strategy to guide Sudan to a more democratic and peaceful future. Such a strategy requires that important and difficult choices be presented to the NCP. The Sudanese government must be forced to choose between cooperation and confrontation.

If they cooperate by ending the violence in Darfur, ensuring accountability through cooperation with the ICC, and fully implement the CPA, they may be allowed to reap the benefits of becoming a responsible member of the international community. If they continue to delay implementation of the CPA and continue to attempt to divert and distract the international community by using one conflict as leverage against the other, they must face real consequences.

While we here in Washington sit and debate policy, the people of Sudan continue to suffer. This policy debate should not be complicated. The United States and its allies must force Sudan's hand and then commit to seeing this through. We have played Bashir's game too long to be fooled any longer.

MINNESOTA HEALTH CARE

HON. BETTY McCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. McCOLLUM. Madam Speaker, on July 20th, I held a health care hearing in the Minnesota State Capitol to discuss the challenges

and opportunities for health care reform presents for Minnesota. Representatives from patient advocate groups, health plans, hospitals, health plans, County Commissioners, and State House Representatives were in attendance. The speakers discussed the need to expand preventative care, to end the practice of denying coverage for pre-existing conditions, and to improve access to quality, affordable care.

In the hearing, I heard over and over again that the current flawed Medicare reimbursement formula is harming Minnesota. The people of Minnesota want health care reform that addresses the three major challenges in health care reform—cost, quality, and access—none of which can be addressed without fixing the Medicare reimbursement formula. I support moving towards a system that ensures that all patients will receive evidence-based, quality care as the standard.

I would like to enter the testimony from the hearing witnesses from this event into the CONGRESSIONAL RECORD.

TESTIMONY OF REPRESENTATIVE THOMAS HUNTLEY

Good morning Rep. McCollum. I commend you for holding this hearing on the need for national health care reform.

Minnesota is one of the nation's healthiest states with one of the highest insured rates in the nation. Investments in coverage for low-income families, strong public health initiatives, and a primarily non-profit insurance system have all contributed to our state's reputation for a health care system that provides high-quality care at a relatively low-cost compared to other states. Yet due to rising costs, our state's current system is unsustainable without substantial payment reform at the federal level.

In 2008, health care leaders from around the state collaborated on comprehensive health care reform legislation that mirrors many of the proposals being discussed at the federal level: an individual insurance mandate, investment in prevention, insurance market reforms, and care coordination incentives for providers. One of the central components of the legislation—and the one that has the most potential for cost-savings—was payment reform. There was a bipartisan consensus that transforming the health care system must start with changing the way we pay for health care. Without substantial cost containment at the state and federal levels, neither Minnesota, nor the United States, can hope to afford the costs of universal coverage.

The underlying payment structure fails to adequately meet the care needs of patients and undermines health care providers' attempts to provide high quality health services. Our entire health care system's payment regimen is built on Medicare standards that emphasize a "tyranny of the visit" philosophy which pressures providers to increase volume, does not value quality, and prioritizes specialty care at the expense of primary care. In too many instances, the result is inappropriate care provided to patients which does nothing more than increase total health spending.

In order to begin to contain costs, Minnesota's legislation included a number of reforms that restructure the payment system, moving us away from Medicare-based standards and toward a system that promotes quality-care and transforms the way health care is delivered and received. The payment reform included three components to both

hold providers accountable and encourage evidence-based, high-quality health care. At each level there was an emphasis on the need for transparency for both providers and consumers.

1. Explicitly pay providers for the quality of care they provide.

2. Encourage care coordination through a medical home model that improves access to primary care.

3. Establish a system of accountability for the total cost of care through bundled care pricing.

Without similar, or even more aggressive payment reforms in Medicare, our health care system's growth will be unsustainable. Medicare's participation is essential in order to create a critical mass of payers in the new system. Providers in Minnesota have spoken up regarding the disincentives in the current payment system to develop new strategies to provide more efficient forms of health care. For instance, in Minnesota a number of health care systems have initiated new approaches to managing chronic conditions including congestive heart failure, hypertension and diabetes. While their patient outcomes have dramatically improved and they have seen reductions in hospitalization, these systems have consistently lost money because the current Medicare-based payment structures do not reimburse for non-office visit treatment.

Similar reforms are also being discussed in Congress. A Call to Action released by Senator Baucus in November outlined the need for pilot programs around accountable care organizations in Medicare as a way of testing new payment structures. Similarly the House Tri-Committee bill authorizes the Secretary of Health and Human Services to develop new cost containment methodologies including accountable care organizations and medical homes. In Minnesota we have already started down this path and should be rewarded for our innovation.

Representative McCollum, I know you are aware of the situation health care providers face in Minnesota. I want to thank you, as well as Minnesota Representatives Oberstar, Paulsen, Walz and Ellison, for your recent letter on this issue. As the health care reform bill moves through the House, I know you will be a strong voice for the change we in Minnesota deserve. I fear that if Congress waits to enact real payment reform that we all will pay the price.

As we all know there is no silver bullet to solving our nation's health care crisis. We must work together to achieve the kind of health care system we all deserve. The consequences of doing nothing will leave us with an impossible situation. We must begin to change the system we have into a system that works. This is a unique opportunity to make a difference; a point in time that will not last forever.

President Obama made the case in his February Address to Congress this year stating "... a century after Teddy Roosevelt first called for reform, the cost of our health care has weighed down our economy and the conscience of our nation long enough. So let there be no doubt: Health care reform cannot wait, it must not wait, and it will not wait another year."

TESTIMONY OF REPRESENTATIVE ERIN MURPHY

Good morning. My name is Erin Murphy. I am a registered nurse and a State Representative from district 64 A in St. Paul. Thank you for holding this hearing in Minnesota and for the invitation to testify today.

We must reform health care in America. In the middle of the debate, it may seem impossible to traverse the sharp policy and political questions before us but we must. The status quo is unsustainable and unacceptable. While individuals expect and often receive excellent care and cure, American lacks a coherent system of care delivery and payment. The result is a highly fragmented system delivering fragmented episodes of care. Too little attention is paid to the ultimate goal of health.

Americans are paying a high price for underwhelming individual and population outcomes. We are in that rare moment of opportunity to change course. We must change course.

I am delighted to have the opportunity to share with you a perspective from Minnesota. As you well know, Minnesota is an innovator and has long led the nation's efforts in health policy, value and reform. Along with our upper Midwestern neighbors, we are a high value low cost state.

We must reform the nation's health care delivery and payment systems to set the foundation for continued innovation and demonstration in Minnesota. We must embed what we know is working in Minnesota and the upper Midwest to deliver high value for lower relative cost across the Country. Finally, we must ensure that every American is covered so they get the right care at the right time for a good price.

COVERAGE

For many years we have focused on coverage as a primary solution. That so many Americans lack coverage for needed care is wrong, plain and simple. That health care is so expensive that necessary treatment of disease is financially out of reach for so many is wrong, plain and simple. Relying on the emergency room as the primary point of care for the uninsured is wrong, plain and simple.

Getting everyone into coverage is imperative, morally and financially. An individual mandate and guaranteed issue of coverage, regardless of preexisting condition will yield more coverage with shared responsibility between individuals and insurers. A public option will give Americans a choice between private coverage and a publicly backed coverage.

A public option provides opportunity to further drive delivery and payment reforms. If the public option cements the status quo in terms of payment and delivery, it will compound the problems with which we are already struggling. But if the public option serves to propel reforms, it enhances efforts to deliver better care for a better price.

Minnesota has worked over two decades to assure coverage employing Medicaid, Minnesota Care and General Assistance Medical Care. The Governor's line item veto of General Assistance Medical Care has undermined 20 years of effort in Minnesota. I ask that Congress consider this as it contemplates any state maintenance of effort. Maintenance of effort is an important means to balance state and federal efforts. Allowing state flexibility in policy reform while maintaining access provides state policymakers with the tools necessary for continued innovation.

DELIVERY REFORM

Our fragmented delivery system is providing fragmented care and we are paying a high price. Care for those with chronic conditions such as diabetes and heart disease accounts for upwards of 60 percent of all Minnesota's health care costs. This stark fact has served as a focal point in Minnesota. We must pursue policies to prevent the onset of

disease and invested in care that will keep those with chronic conditions healthy and out of the hospital.

PAYMENT REFORM

Current payment is weighted to specialists and procedures and away from interventions to maintain health. For example, a surgeon is paid more for the amputation of a diseased diabetic limb than is a primary care provider for disease management preventing the loss of the limb.

Medicare sets the standard in payment. I urge the inclusion of large scale payment reform such as accountable care organizations or a total cost of care model. Without similar, or even more aggressive payment reforms in Medicare, our health care system's growth will be unsustainable. Medicare's participation is essential in order to create a critical mass of payers in the new system.

Short of large scale change, I urge state flexibility in Medicare payment. A Minnesota or upper Midwest demonstration in payment will permit us to demonstrate the Congress and the nation the means to deliver high quality care for a better price.

Achieving significant health care reform in this country has for decades been a uniquely challenging and complex issue. The grind between dogged political frames has proved insurmountable for policy makers. Entwined state and federal policy and funding, limits state policy reform efforts and calls for federal action. The urgency of growing costs and shrinking access compels our action. 40 years ago, America put a man on the moon, a seemingly unachievable goal. We did that—and we will do this too. We must.

Thank you for your courage and hard work. I stand with you in your efforts to enact federal reform while promoting and protecting the value the care delivered in Minnesota.

TESTIMONY OF REPRESENTATIVE MARIA RUUD

Good morning Rep. McCollum. Thank you for holding this hearing on federal health care reform. I appreciate the opportunity to be here today.

I have been a Nurse Practitioner for 21 years and am serving my third term in the Minnesota House of Representatives.

Health care reform can only occur if we enact true payment reform. With the current system there is a disincentive to provide the care needed. Paying for more tests, more procedures, and more visits rewards waste and inefficiency. The focus needs to change from reimbursement based on volume to reimbursement based on outcome.

Part of the reason our health care system has been able to function for as long and as well as it has is because there are a number of individuals who are deeply committed to serving their patients well. But our current payment system is making it increasingly difficult to deliver effective care.

For example, pay for production—pay for the number of patients seen or procedures performed—drives costs up and is a disincentive to provide the appropriate care at the appropriate time.

We have evidence-based medicine to inform providers, about what the most effective option is for the patient to achieve a healthy outcome. Access to preventative care and screenings, early and consistent management of chronic health conditions.

It comes down to providing the incentives that will help us achieve the goals we seek—well-being and healthy outcomes.

Now is the time to be bold. To align the incentives with the outcomes we desire. Providers want to do it—it is their calling to provide the most effective care possible.

TESTIMONY OF SHANE DAVIS, SECRETARY-TREASURER, SEIU HEALTHCARE MINNESOTA

Good Morning Representative McCollum: At this critical moment, while Congress is deciding to pass quality affordable healthcare for all, I want to sincerely thank you for this opportunity to testify. I would also like to publicly acknowledge your good work in supporting the principles of healthcare reform, put forward by Health Care for America-Now, an important coalition SEIU is proud to support.

My name is Shane Davis; I am the Secretary-Treasurer of SEIU Healthcare Minnesota. We represent more than 17,000 healthcare workers around the state of Minnesota. Our Members, by the thousands, work every day and night for companies currently recognized nationally as models of high-quality, low-cost healthcare, such as Allina, HealthPartners, and the Mayo Clinic. The Minnesota recipe for high-quality, low-cost healthcare includes workers having a real voice on the job. This encourages labor and management to work in partnership; increasing productivity and putting patient care experiences and health outcomes first.

Those of us who bargain contracts have first-hand experience in how badly we need health care reform. The ability to bargain for higher wages, for training funds to upgrade the skills of our members, for higher pensions so that workers can look forward to a secure and dignified retirement has been deeply compromised by escalating health care costs. We've heard that the CEO of Starbucks complains that he spends more money buying health insurance for his employees than he does buying coffee beans. Well, in our industry, as health care workers, it's not coffee bean prices that are outstripped by the cost of health insurance, it's training and upgrade funds, for instance, that would help our members move up career ladders, just so that we can hold on to health insurance.

Our members' stories about how badly they need health care reform are much like the stories of many other Minnesotans. Last month, Pam Bundy told us about her son, a former construction worker who was diagnosed with liver cancer. After months of illness and treatments, he lost his job, exhausted his COBRA benefits, maxed out his credit card with co-pays for treatment, was told he needed to pay cash when he came in for chemotherapy, and ultimately lost his home to foreclosure because of the crushing debt-load that was inevitable. Our members cannot wait for health care reform. Millions like Pam's son cannot wait for healthcare reform. We urge you to reject the siren song of delay and pass a bill.

SEIU believes that a public plan option is an essential and necessary component of real health care reform. It provides an alternative to private insurance and applies competitive pressure to the rest of the insurance industry. Research by the Commonwealth Fund shows that including the public option with other health care reform measures can help save another 77 billion to 1.8 trillion dollars over the next ten years. We are encouraged that a public plan has been included in health care reform legislation passed by the Senate HELP committee, the House Ways and Means committee, and the House Education and Labor committee. SEIU has strongly supported votes to approve these bills.

Once Congress has met the challenge of producing a final bill that includes a public plan option, then Congress has the opportunity to structure the best possible public

plan. The deficiencies of our current payment system are well known. As the Dartmouth Atlas Project has highlighted, Medicare reimbursements currently reward high cost, low quality states, and penalize low cost, high quality states. For example, in Miami, Medicare will spend \$15,000 per patient per year, while here in Minnesota, that figure is \$7,000, less than half the reimbursement, with no difference in patient outcome. We must change how health care is paid for, so that we reward quality outcomes rather than quantity of services. If such changes are incorporated into a strong public plan option, it should reduce the overall cost to taxpayers and produce improved care across the nation. Our task is to make the most of this opportunity for payment reform, while still meeting the immediate challenge of passing real healthcare reform, including a public plan option.

Thank you very much for holding this hearing to ensure that Minnesota's voice is heard in this debate on health care reform.

IN RECOGNITION OF JIM
HAMILTON

HON. JOE WILSON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. WILSON of South Carolina. Madam Speaker, I wish to recognize Jim Hamilton of Columbia, South Carolina, for his 46 years of service as airport manager of the Columbia Owens Downtown Airport.

Jim has been an active member of our community—participating in many diverse organizations and working to educate the community on aviation, the dangers of drug abuse, and supporting efforts to transport children with disabilities and those suffering from severe burns to Shrine hospitals throughout the country. He has even volunteered his time as an emergency standby pilot for flights to transport transplant candidates and critically ill patients.

For 13 years, Jim has driven a bus each Wednesday morning to bring elderly individuals to shop for groceries and even successfully convinced some of his fellow citizens to contribute refreshments for the bus ride. On behalf of the Columbia Owens Downtown Airport, Jim has fought to secure funding for a reconstruction and redesign of the airport as well as safety upgrades.

In recognition of his tireless service to the community, Jim has been honored twice with the Order of the Palmetto by two separate governors—the state's highest civilian honor—as well as numerous other honors and awards.

I commend Jim Hamilton for his service to our community and his dedication to his fellow citizens.

HONORING THE REV. DR. C.T.
VIVIAN OF ATLANTA

HON. JOHN LEWIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LEWIS of Georgia. Madam Speaker, today I rise to honor a warrior for civil rights

and social justice, a veteran of the modern-day Civil Rights Movement, a resident of the 5th Congressional District, and a friend. In a few days, we in Georgia will be honoring the life of the Reverend Dr. Cordy Tindell Vivian, better known as C.T. Vivian, who will turn 85 years old on July 30, 2009.

Born in 1924, Vivian grew up in Macomb, Illinois and was raised by his mother and grandmother. Even though Illinois was not segregated by law, C.T. Vivian was keenly aware that the customs and traditions of racism and discrimination pervaded his life. As a young man Vivian wanted to find a way to make an impact on society, so after leaving college he began working with youth at Carver Community Center in Peoria, Illinois. As a young man deeply influenced by the church and the visionary faith of his grandmother and mother, Vivian recognized the power of non-violence as a tool for social change. He joined a successful non-violent movement in Peoria in 1947 to integrate restaurants in the city, which brought down barriers in all public eating establishments throughout the city.

In 1955, C.T. Vivian was called to the ministry and enrolled in what would some years later become my alma mater, American Baptist Theological Seminary in Nashville, Tennessee. That same year, he began working with a new subdivision of Martin Luther King Jr.'s organization established by the Rev. Kelly Miller Smith called the Nashville Christian Leadership Conference. The NCLC began training Nashville college students in the discipline and philosophy of non-violence and was involved in organizing the first student sit-ins and marches in the city in 1960.

Vivian's experiences in Peoria helped provide leadership for student organizers in Nashville, and in 1961, he joined the Freedom Rides, after the Congress for Racial Equality (CORE) had suspended their efforts. One bus had been set on fire in Anniston, Alabama. Freedom Riders had been surrounded by an angry mob in a church in Montgomery, Alabama. Attorney General Robert Kennedy had called in the National Guard to protect riders traveling from Montgomery to Jackson, Mississippi. CORE suspended its efforts to test the desegregation of interstate transportation. In spite of these dangers, Vivian joined a new attempt to renew the rides on a bus trip from Nashville to Jackson. Martin Luther King Jr. asked Vivian to join the executive staff of his organization, the Southern Christian Leadership Conference. He worked with SCLC campaigns in St. Augustine, Florida; Danville, Virginia; and Chicago, Illinois. Vivian was in Birmingham in 1963, participated in the Mississippi Freedom Summer Project in 1964 and came to Selma in 1965.

In Selma, he worked with the voter registration efforts that the Student Non-Violent Coordinating Committee already had in progress, and would serve as a lead protestor, persistently confronting Sheriff Jim Clark on the steps of the Selma, Alabama courthouse at the head of a band of non-violent marchers seeking to register and vote. He was arrested and jailed in Selma several times.

In February 1965, Vivian was a speaker at a non-violent, peaceful night-time rally meant to support protestors jailed in Marion, Alabama. The marchers were ambushed by a

violent posse who killed military veteran and Marion native Jimmie Lee Jackson. Efforts to commemorate Jackson's death ultimately became the historic Selma to Montgomery march which culminated in the passage of the Voting Rights Act. The act opened up more free and fair access to the ballot box for all African Americans, as well as other Americans of color, and it resulted in the election of literally thousands of black elected officials in subsequent years, including the first African American president of the United States, Barack Obama.

Following the death of Martin Luther King Jr., Vivian formed an organization dedicated to the training of African American youth called Vision, which ultimately became known as Upward Bound, an educational program that provides college students with scholarships. After working with SCLC, Vivian organized campaigns against racism and advocated for racial justice. He has worked to found other organizations, including the Black Action Strategies and Information Center, the Center for Democratic Renewal, and the C.T. Vivian Leadership Institute, all based in Atlanta. In 2008 he led the Yes We Care campaign, which contributed over \$500,000 to Morris Brown University, a fiscally challenged historically black university in the city. He is the author of *Black Power and the American Myth*.

The Rev. Dr. C.T. Vivian has served as an inspiring leader, an electrifying minister, and a force for good in our society. As a participant in the modern-day Civil Rights Movement, he successfully implemented the discipline and philosophy of non-violent social resistance that helped to transform America forever. For this role, C.T. Vivian must be seen as one of the authors of a new chapter in American history that hastens the advent of a society based on simple justice that values the dignity and the worth of every human being, or the Beloved Community. For his eloquence, insight, vision, persistence, determination and courage, we commemorate the service of C.T. Vivian on his 85th birthday.

HONORING PASTOR BRENDA
TIMBERLAKE

HON. G.K. BUTTERFIELD

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BUTTERFIELD. Madam Speaker, I rise to recognize Pastor Brenda Timberlake's deep commitment to improving the lives of others and the community. On September 18, 2009, friends, family and well wishers will gather in Cary, North Carolina to celebrate Pastor Timberlake's 60th birthday and her 30 years of ministry.

Over the years, Pastor Timberlake and her late husband, Bishop Mack Timberlake, engaged in a great number of important efforts and projects that continue to help and serve the community.

Among the many successful endeavors undertaken by Pastor Timberlake include: establishing the Christian Faith Center Academy to provide Christian-based education to students from kindergarten through 12th grade; constructing the Royal Pavilions of Creedmor, a

28-unit housing complex for the elderly and disadvantaged; collaborating with the North Carolina Department of Public Health to reduce infant death rates and provide assistance to single mothers through the Family First of Granville County program; and establishing the Raven's Nest Food Bank.

Madam Speaker, these are but a few of Pastor Timberlake's many efforts. I ask that my colleagues join me in recognizing her accomplishments as her friends and family celebrate her birthday, ministry and achievements.

Pastor Timberlake continues to serve as exceptional community leader. Please join me in expressing gratitude for her service to the community and in wishing her continued success as she celebrates her birthday.

TRIBUTE TO MR. RALPH J.
INFANTE

HON. TIM RYAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. RYAN of Ohio. Madam Speaker, I rise this evening in recognition of Mr. Ralph J. Infante of Niles, Ohio. Mr. Infante passed away May 26, 2009. Mr. Infante was a life-long resident of the Mahoning Valley. He leaves his wife, Angeline Ragozine Infante, whom he was married to for 60 years. He also leaves 4 sons, 2 daughters, a sister, 2 brothers, 14 grandchildren, 5 great-grandchildren, and many friends from around the valley.

Mr. Infante worked for many years in the Mahoning Valley. He graduated from Niles McKinley High School in 1947 after serving in World War II. Mr. Infante was a Veteran of the United States Navy, who served in the South Pacific Theater during World War II. He received an Honorable Discharge from the Naval Service of the United States of America on the 29th day of April, 1946 at the U.S. Naval Personnel Separation Center, Great Lakes, Illinois. He served with honor and distinction during his time of service in the U.S. Navy.

Mr. Infante was employed as a die setter at Faull and Son Tool and Die Co. for 26 years. He was also employed for the City of Niles as a Municipal Court Bailiff and worked for the waste water treatment plant for 15 years, retiring in 1990. He was also very active in local politics, serving as Niles 3rd Ward Councilman for 5 years.

Mr. Infante was truly a great part of the community. He was an honorary lifetime member of the Niles Men's Democratic Club and the Italian Fraternal Home of Girard. He was a charter member of the Italian American War Veterans Post 39 in Girard and The Bagnoli Iripino Club, as well as a lifelong member of Our Lady of Mt. Carmel Catholic Church in Niles.

Mr. Infante was an avid Cleveland Browns fan and enthusiast of The Ohio State University. Although his beloved wife, Angeline, was a Cleveland Indians fan his beloved team was the New York Yankees. His six children would be split down the middle (3 New York Yankee fans and 3 Cleveland Indian fans) which made for interesting family dinner conversations and

game day exchanges. Some of their biggest disagreements came when the Yankees and the Indians played each other.

Mr. Infante will always be remembered, as his high school yearbook proclaimed, "Never Failed a Friend and Never Feared a Foe."

INTRODUCTION OF THE SALMON
SOLUTIONS AND PLANNING ACT

HON. EARL BLUMENAUER

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BLUMENAUER. Madam Speaker, few issues are more controversial or contentious than the issue of dam removal on the Snake River system. Some have argued because they don't like certain possibilities that they don't want to know about them. This whistling past the graveyard is both unrealistic and unwise. Things we don't like sometimes are options, and we should know the facts.

That is why I am pleased to co-sponsor the Salmon Solutions and Planning Act with my colleagues JIM McDERMOTT and TOM PETRI. This is an important piece of legislation that will provide policymakers in the Pacific Northwest and around the country with additional information necessary to aide in the recovery of Columbia Basin salmon.

The legislation requires the Army Corps of Engineers, Department of Transportation, Department of Commerce, and Department of Energy to study the environmental, infrastructure, and economic issues associated with removing the four Lower Snake River dams. The bill also includes language authorizing the Secretary of the Army to remove the dams. This language is intended to clarify that lower Snake River dam removal is within the Corps' authority. It is important to note this bill contains no "trigger language" that would mandate dam removal.

Salmon are a significant ecological, economic and cultural resource for the Northwest and indeed the entire country. These fish once supported the world's most productive salmon watershed. Unfortunately, wild salmon and steelhead in the Columbia and Snake Rivers have been in decline for decades, with thirteen stocks now listed under the Endangered Species Act. Not only has this decline had negative impacts on the watersheds of the Pacific Northwest, it wreaks havoc on salmon-dependent communities and local economies.

Since coming to Congress, I have supported funding for habitat restoration, reforming hatchery practices, and re-examining our harvest practices, all measures that can contribute to salmon recovery. However, with salmon populations continuing to decline, it's clear that what we have been doing for the past 20 years has not been working. I have called for an approach that evaluates all science-based recovery options, including dam removal. This legislation represents an important piece of that analysis.

Some have equated knowing the facts with actually triggering the process to remove the dams. My support for this legislation is not support for dam removal. My position over the years on this has been consistently to support

evaluating all options for salmon recovery. The studies authorized by the bill will help us determine the consequences of dam removal not only for Northwest salmon, and but also for transportation, energy, and irrigation in the region.

Like other Pacific Northwest residents, I have a deep interest in coming to a resolution on salmon recovery. The stress and uncertainty created by illegal biological opinions and the involvement of the judicial system not only harms fish, but also the farmers, fishermen, Tribes, ports, union members, and others whose livelihood depends on the Columbia River system.

This legislation is an important step in having the facts about our options for restoring self-sustaining, fishable populations of Northwest salmon.

PERSONAL EXPLANATION

HON. CAROLYN MCCARTHY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mrs. MCCARTHY of New York. Madam Speaker, yesterday and today, I missed 26 votes. Had I been present, I would have voted as follows.

Rollcall No. 661, on Agreeing to the Murtha Amendment to H.R. 3326, I would have voted "Yea."

Rollcall No. 662, on Agreeing to the Flake Amendment to H.R. 3326, I would have voted "No."

Rollcall No. 663, on Agreeing to the Tierney Amendment to H.R. 3326, I would have voted "No."

Rollcall No. 664, on Agreeing to the Flake Amendment #1 to H.R. 3326, I would have voted "No."

Rollcall No. 665, on Agreeing to the Flake Amendment #258 to H.R. 3326, I would have voted "No."

Rollcall No. 666, on Agreeing to the Flake Amendment #389 to H.R. 3326, I would have voted "No."

Rollcall No. 667, on Agreeing to the Flake Amendment #432 to H.R. 3326, I would have voted "No."

Rollcall No. 668, on Agreeing to the Flake Amendment #439 to H.R. 3326, I would have voted "No."

Rollcall No. 669, on Agreeing to the Flake Amendment #449 to H.R. 3326, I would have voted "No."

Rollcall No. 670, on Agreeing to the Flake Amendment #553 to H.R. 3326, I would have voted "No."

Rollcall No. 671, on Agreeing to the Flake Amendments En Bloc to H.R. 3326, I would have voted "No."

Rollcall No. 672, on Agreeing to the Campbell Amendment #1 to H.R. 3326, I would have voted "No."

Rollcall No. 673, on Agreeing to the Campbell Amendment #8 to H.R. 3326, I would have voted "No."

Rollcall No. 674, on the Motion to Recommit with Instructions to H.R. 3326, I would have voted "No."

Rollcall No. 675, on Passage of H.R. 3326, I would have voted "Yea."

Rollcall No. 676, on Agreeing to the Resolution H. Con. Res. 172, I would have voted "Yea."

Rollcall No. 677, on Agreeing to the Resolution H. Res. 691, I would have voted "Yea."

Rollcall No. 678, on the Motion to Suspend the Rules and Pass, as Amended, H.R. 2728, I would have voted "Yea."

Rollcall No. 679, on the Motion to Recommit with Instructions to H.R. 2749, I would have voted "No."

Rollcall No. 680, on Passage of H.R. 2749, I would have voted "Yea."

Rollcall No. 681, on the Motion to Suspend the Rules and Pass, as Amended, H.R. 1752, I would have voted "Yea."

Rollcall No. 682, on the Motion to Suspend the Rules and Pass, H.R. 3435, I would have voted "Yea."

Rollcall No. 683, on Agreeing to the Frank Amendment to H.R. 3435, I would have voted "Yea."

Rollcall No. 684, on Agreeing to the Garrett Amendment to H.R. 3435, I would have voted "No."

Rollcall No. 685, on the Motion to Recommit with Instructions to H.R. 3435, I would have voted "No."

Rollcall No. 686, on Passage of H.R. 3435, I would have voted "Yea."

A SPECIAL BIRTHDAY MESSAGE
TO MRS. INIS PUCKETT OF TENNESSEE

HON. LINCOLN DAVIS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. DAVIS of Tennessee. Madam Speaker, I rise today to honor and celebrate the life of Inis Puckett on the occasion of her 100th birthday.

Inis Beasley Puckett, the oldest of six children, was born to E.J. and Lecie Fly Beasley, on August 12, 1909, on a farm in Primm Springs, Tennessee. She moved to Centerville with her family when she was 16 years old.

The family quickly became active members of the Centerville Church where her father served as Bible school teacher, treasurer, Sunday school superintendent, song leader and Elder for 30 years until his death in 1958. Her mother died in 1981.

Inis has been a member of the Centerville Church for 82 years. She has taught many Sunday classes, Vacation Bible Study classes, and served as supervisor of the primary department for 20 years.

Inis graduated from Hickman County High School and George Peabody College. Her teaching career, spanning 43 years, began at Bon Aqua teaching third and fourth grades, then to Little Rock for all eight grades, then to McFarlan for all eight grades. There, she rode the bus to Five Points, walked two miles and built the fire in the wintertime. After school, she walked back to the highway, and after dark, caught the bus home. She was transferred to Haley's Creek with all eight grades for 5 years. She then moved to Centerville Elementary School where she taught first grade for 32 years.

After her retirement, she worked with her dad and husband in Beasley Furniture Store until it closed in 1979.

Inis and Paul Puckett were married on April 12, 1934. Paul died on their 60th wedding anniversary. Inis' sight began to deteriorate in 1981. She has had 13 surgeries on her eyes with little success.

In her lifetime she has enjoyed many activities such as gardening, baking and still enjoys playing the organ. Due to the failure of her eyesight, she has memorized 56 selections.

Her present residence has been her home for 67 years.

I ask that my colleagues rise and join me today in wishing Inis a happy birthday as she continues to grace us with her rich, full presence in Tennessee.

TEXAS H. CON. RES. 79

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering House Concurrent Resolution 79, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

HOUSE CONCURRENT RESOLUTION

Whereas, Border communities, such as Laredo, contend with heightened responsibilities in the world today, and since the advent of the North American Free Trade Agreement in 1994, Laredo has become the busiest United States port of entry from Mexico and the sixth-largest customs district in the country, with more than \$167 billion in total trade in 2007; while the heavy flow of international commerce is a boon to the local economy, it presents tremendous challenges to the first responders who protect the state and the nation as well as their own community; and

Whereas, The Bureau of Transportation Statistics calculated that more than 1.5 million trucks and 300,000 rail containers crossed through Laredo in 2006, and according to Texas Department of Transportation estimates, truck tonnage will increase by some 250 percent by 2030; about half of this cargo includes hazardous material, and more than 60 million square feet of warehouse space in the city also contains significant amounts of hazardous materials, creating a tempting target for terrorists and enormous potential for a disaster that could not only endanger public health but also disrupt major transportation systems and negatively impact the national economy; and

Whereas, Relatively isolated on its side of the border, Laredo is 150 miles from the nearest sizable U.S. city, and its police, fire, and public health personnel are the primary emergency responders for a region of more than 3,000 square miles; this includes a long stretch of the Rio Grande, which is the primary drinking water source for Laredo, Nuevo Laredo, and other communities in the Rio Grande Valley, making swift response to any contamination extremely critical; in addition, the United States-Mexico Border Health Commission has recognized the region as among those most vulnerable to perils such as bioterrorism and epidemics; and

Whereas, The Laredo Police Department has increased vigilance over border activity since the attacks of September 11, 2001, and confronts an escalating threat from violent international drug traffickers, who have been linked to terrorism; the fire department responds to a wide range of emergencies along the Rio Grande, from the rescue or recovery of individuals who have attempted to cross into the United States to bomb threats; and

Whereas, The emergency response system in Laredo requires a higher level of funding to ensure public safety and meet homeland security imperatives; for instance, the city has only one hazardous materials response unit, purchased in 1991 and long overdue for upgrades; it lacks a detection system for chemical, biological, radiological, nuclear, and high-yield explosive weapons, as well as for quick assessment and management of industrial accidents; among other urgent needs are enhanced police staffing, improved radio coverage in remote areas, and construction of a secure regional emergency operations center where safety personnel and local, state, and federal government officials can coordinate decisions and resources in a crisis; and

Whereas, With an estimated population of 217,000, Laredo is a much smaller city than other major United States ports; its own budget is accordingly limited, and at the same time, its size has been an impediment in the pursuit of federal assistance; homeland security funding formulas currently use census figures rather than threat risk in determining eligibility for such programs as the Urban Areas Security Initiative and Targeted Infrastructure Capability Grants Program, and, as a land port, Laredo is likewise ineligible for the Port Security Grant Program, even though it processes more international shipments than such grant recipients as Mobile, Alabama, and Lake Charles, Louisiana; and

Whereas, Laredo, as the nation's second-busiest land gateway, shoulders unique law enforcement, public safety, and national security burdens far out of proportion to the size of its population; increased federal funding is necessary to strengthen first response where local agencies with strained budgets are responsible for protecting our nation's critical infrastructure and addressing international threats; now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas hereby respectfully urge the United States Congress to refine Department of Homeland Security policy to consider risk levels as well as population size in assessing the financial needs of first responders in border communities along the international boundary created by the Rio Grande; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to the congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,
Speaker of the House.

ROBERT HANEY,
Chief Clerk of the House.

PATSY SPAW,
Secretary of the Senate.

Approved: RICK PERRY, Governor.

EARMARK DECLARATION

HON. PETER J. ROSKAM

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ROSKAM. Madam Speaker, pursuant to Republican standards on disclosure for Member project requests, I am submitting the following information regarding projects I support for inclusion in H.R. 3183, the Energy and Water Development and Related Agencies Appropriations Act of 2010.

Congressman PETER J. ROSKAM: H.R. 3183, Army Corps of Engineers, Construction account for the continuation of work on the Des Plaines River, IL. The entity to receive the \$3,300,000 in funding for this project is the U.S. Army Corps of Engineers, Chicago District, 111 N. Canal Street, Suite 600, Chicago, IL 60606. It is my understanding that the funding would be used to continue work on the Des Plaines River projects authorized by the Water Resources Development Act of 1999 (Public Law No. 106-53). Funding for this project would be used to continue Phase I of the authorized Des Plaines River Project. Specifically, construction will move forward on the expansion of Big Bend Lake and lowering the normal lake level to obtain an additional 587 acre-feet of storage. Material excavated from the expansion must be removed from the site. Two storm sewer lines, which currently empty into Big Bend Lake, a 96-inch and 24-inch, will be rerouted directly to the Des Plaines River. Recurrent flooding along the Des Plaines River causes an estimated average annual damage of more than \$25 million (69 percent traffic damages, 20 percent residential damages, 8 percent commercial/industrial/public damages, 3 percent emergency services costs). Statutory authorization for this project is provided in the Water Resources Development Act of 1999 (Public Law 106-53), and a Project Cooperation Agreement has been signed by the Army Corps of Engineers and the Illinois Department of Natural Resources.

Congressman PETER J. ROSKAM: H.R. 3183, Department of Energy, Energy Efficiency and Renewable Energy, Solar Technology account for Solar Lighting for the Forest Preserve District of DuPage County. The entity to receive the \$300,000 funding for this project is the Forest Preserve District of DuPage County, 3S580 Naperville Road, Wheaton, IL 60189. It is my understanding that the funding would be used to install an on-grid solar panel energy collection system to provide power for lighting of one of the entire Danada Forest Preserve Campuses. The Danada Forest Preserve is a high visibility public facility that is used for meetings, wedding events, youth equestrian programs and a soon to be visitor center with native plant demonstration gardens. This campus is home to the Danada House, an equestrian facility, and staff offices. The lighting project is necessary to facilitate night programming while improving safety and security. The solar lighting project would be an educational

component that would tie well into the sustainability initiatives currently being proposed for the entire facility. Additionally, the project would serve as a helpful demonstration of solar technology and capacity in the Chicagoland region.

Congressman PETER J. ROSKAM: H.R. 3183, Department of Energy, Energy Efficiency and Renewable Energy, Building Technologies account for a Green Roof for the DuPage County Administration Building. The entity to receive the \$250,000 in funding for this project is DuPage County, 421 N. County Farm Road, Wheaton, IL 60187. It is my understanding that the funding would be used to replace a roof in need of repair with one that is environmentally friendly and energy efficient. The objective for implementation of Green Roof Technology is to reduce energy costs for county campus facilities and to promote and implement new environmental technology. The Jack T. Knuepfer Administration Building roof is currently leaking and is in great need of repair. The roof has been identified to be structurally sound to support a low profile vegetated Green Technology roof system. With the installation of a green roof, the R value, or thermal resistance will increase, thereby contributing to cooler roof temperatures in the summer months, decreasing solar loading effects which transfer heat into the building, ultimately resulting in considerable energy savings, which is good for the environment and taxpayers.

Congressman PETER J. ROSKAM: H.R. 3183, Army Corps of Engineers, Construction account for the McCook and Thornton Reservoirs, IL. The entity to receive the \$25,000,000 in funding for this project is the U.S. Army Corps of Engineers, Chicago District, 111 N. Canal Street, Suite 600, Chicago, IL 60606. It is my understanding that the funding would be used to continue ongoing design and construction of the McCook Reservoir, as authorized under the Water Resources Development Act of 1988 (Public Law 100-676). The McCook Reservoir is currently under construction, and when completed will have a total capacity of 10 billion gallons, provide more than \$90 million per year in benefits to 3.1 million people in 37 communities, protecting 1,240,000 million structures. The District is proceeding with planning, design and ultimately construction of the Thornton Reservoir under the Section 211 provision of the 2007 WRDA. This provision will allow the District to complete the project, seek reimbursement for the federal share, and bring the flood protection and CSO storage benefits to 556,000 people in 15 communities by 2014. Completing the McCook and Thornton Reservoirs and bringing them fully on-line is crucial to local communities, the health of Lake Michigan and its tributaries, and to the economic development of the region. Without timely completion of the project, communities will face decreased drinking water allocations, significant decreases in water quality and thousands of homes will be vulnerable to flooding. In fact, this project will provide more than \$130 million per year in benefits to over 3 million Illinois residents and once complete will protect over 1.3 million structures from flooding. The McCook and Thornton Reservoir projects are a key component of the Chicago

Underflow Plan (CUP), the flood control element of the District's Tunnel and Reservoir Plan (TARP). TARP is the long-term comprehensive flood pollution control solution for Chicago and its 51 surrounding communities, and includes a series of underground tunnels and storage reservoirs designed to address combined sewer overflow discharges. This system has been enormously effective in achieving its goal as evidenced by the elimination of 85 percent of the combined sewage pollution in a 325 square mile area.

Congressman PETER J. ROSKAM: H.R. 3183, Army Corps of Engineers, Construction account for the Chicago Sanitary & Ship Canal Dispersal Barriers. The entity to receive the \$7,275,000 in funding for this project is the U.S. Army Corps of Engineers, Chicago District, 111 N. Canal Street, Suite 600, Chicago, IL 60606. It is my understanding that the funding would be used to operate Barrier I, complete construction of Barrier II, and prepare designs for making Barrier I permanent, as authorized by the Water Resources Development Act of 2007 (Public Law 110-114). Historically, the Great Lakes and the Mississippi River were separated naturally by a landmass, but since the completion of the Chicago Sanitary and Ship Canal, aquatic species can move freely between the two water systems. This dispersal barrier is needed to keep the invasive species Asian Carp from reaching Lake Michigan and infesting the larger Great Lakes ecosystem. A temporary dispersal barrier (Barrier I) has been operating for nearly seven years, and construction of a permanent barrier (Barrier IIA) will be completed this year. Funding in the amount of \$5.0 million is needed to operate Barrier I, complete construction of Barrier II, and prepare designs for making Barrier I permanent.

IN HONOR OF COLONEL THOMAS F. MACLEISH

HON. MICHAEL N. CASTLE

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CASTLE. Madam Speaker, it is with great pleasure that I rise today to recognize Colonel Thomas F. MacLeish. On July 1, Colonel MacLeish retired from his position as Superintendent of the Delaware State Police after more than 30 years of service to the residents of Delaware.

A graduate of Wilmington University and the F.B.I. National Academy, Colonel MacLeish joined the Delaware State Police in 1977 and quickly rose through the ranks. During his tenure as Superintendent, Colonel MacLeish was tasked with overseeing 671 troopers and over 200 civilian employees. The Delaware State Police flourished under Colonel MacLeish's leadership as he stressed law enforcement with an attitude of professionalism and compassion.

The State of Delaware saw many accomplishments under the leadership of Colonel MacLeish. Some of these include the creation of the Delaware Information & Analysis Center, the initiation of the Child Predator Task Force, the formation of the Sex Offender Apprehension and Registration Unit, and moving

the State Bureau of Identification to a larger and updated location at the Blue Hen Corporate Center. Colonel MacLeish also oversaw the formation of the Cultural Diversity Counsel within the State Police. The purpose of this group is to enlighten police officers in various matters of diversity. Additionally, during his tenure with the State Police, Colonel MacLeish served on many councils and organizations such as the Council on Police Training, the Delaware Police Chiefs Council, the International Association of Chiefs of Police, Camp Barnes—which provides underprivileged children the fun, quintessentially American experience of attending summer camp at no cost to the camper or their family—and others.

I thank Colonel Thomas MacLeish for his many years of tireless effort in keeping Delawareans safe. While Colonel MacLeish has been an asset to the State of Delaware and his dedication will be sorely missed, I am confident that even in retirement he will continue to be a pillar of integrity and diligence in our community.

EARMARK DECLARATION

HON. MARY FALLIN

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. FALLIN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3293, the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2010. I requested and received \$200,000.00 for Operation Servicemen Success at the Oklahoma City Community College located at 7777 South May Avenue, Oklahoma City, Oklahoma 73150. This program will provide additional personnel to support Veterans and service members attending OCCC, through a full time Coordinator of Veterans Services, a special population licensed counselor, career advisors, clerical support and tutoring services. Expansion of services for service members enrolled in classes at OCCC should be promoted to these students by the Veterans Services Office functioning as a centralized source of information and referral. To succeed in college, it is critical that veterans have a successful transition from the military into campus life. The aim of this program is to provide intensive transitional and support services for military veterans as many veterans have a difficult time readjusting to civilian life and translating their military service into applicable college and career goals. This service provides enhanced and specialized support services to military veteran students from the time they commit to attending the OCCC through the end of their education and beyond.

I requested and received \$350,000.00 for the Proton Cancer Therapy Research and Education Center at Oklahoma State University in Stillwater, Oklahoma 74078. Oklahoma State University and ProCure Treatment Centers Inc. have formed a public-private partnership for training, education and research in proton therapy for the treatment of cancer. In

many situations cancer treatment by means of precisely directed beams of energetic protons is the most effective therapeutic alternative to more traditional surgical and radiation cancer treatment procedures. ProCure is currently completing construction of a multi-million dollar, proton treatment facility in Oklahoma City, dedicated to the treatment of cancer. It will allow access to world-leading technology for patients in the central region of the United States and is the first of several such centers planned by ProCure throughout the country in the coming years. We propose to place Oklahoma at the forefront of proton cancer treatment by establishing a world-class, research and education center at OSU, in partnership with ProCure, in order to train accredited personnel in this next-generation cancer treatment modality. Scientists at the world-renowned Radiation Physics Laboratory at OSU have been conducting research in the characterization and monitoring of proton beams used in cancer therapy for over fifteen years. The OSU group has recently teamed with ProCure to establish a research and training program at OSU. The requested federal funding will build from the existing private funding to establish a leading national center of excellence. Establishing a proton therapy center in the middle of Oklahoma will be of tremendous benefit to the citizens of this state and surrounding states. There are estimated to be over 250,000 cancer patients nationwide, and over 3,000 each year in a 250 mile radius of Oklahoma City, many of whom can benefit from proton radiation therapy.

I requested and received \$300,000.00 for Oklahoma State Health Mobile Clinic and Medical Response at Oklahoma State University, Center for Health Systems at 1111 West 17th Street, Tulsa, Oklahoma 74107. This project seeks to do two things: (1) expand and enhance the OSU Center for Health Science's health information technology system, including its telemedicine and distance learning as well as electronic medical records network, and (2) bring diagnostic and medical services to geographic regions in Oklahoma where even telemedicine is not yet feasible or reasonably located by use of a mobile clinic. The mobile clinics will be available to provide medical services in response to natural or man-made disasters.

RECOGNIZING CHANHASSEN, MINNESOTA, FOR BEING NAMED ONE OF THE TOP 5 "BEST PLACES TO LIVE IN AMERICA" BY MONEY MAGAZINE

HON. JOHN KLINE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. KLINE of Minnesota. Madam Speaker, I rise today to congratulate the community of Chanhassen, a town I am proud to say is part of Minnesota's Second Congressional District.

In naming Chanhassen one of the top 5 "Best Places to Live in America," Money magazine confirmed what many of us in the great state of Minnesota already knew; Chanhassen is an outstanding city.

As the nation's economy has faltered, Chanhassen has flourished. From 2000 to 2008 Chanhassen averaged a 28 percent job growth rate, providing its residents with the economic security necessary to raise their families.

Along with providing economic security, Chanhassen's 11 freshwater lakes and 34 parks offer a pristine wilderness retreat that epitomizes the land of 10,000 lakes.

With its strong economy and Minnesota beauty, it is no surprise Chanhassen was named the second best small town in America.

Congratulations, again, to the entire community of Chanhassen for earning this prestigious distinction. You are second in the nation, and first in our hearts.

EARMARK DECLARATION

HON. WALLY HERGER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. HERGER. Madam Speaker, pursuant to the House Republican standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3183, the Energy and Water Development and Related Agencies Appropriations Act, 2010

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, Construction General

Legal Name of Requesting Entity: State of California, Department of Water Resources

Address of Requesting Entity: 1416 9th Street, Sacramento, CA 95814

Description of Request: Provide an earmark of \$15,000,000 for the Sacramento River Bank Protection Project. This project is located within the limits of the existing Sacramento River Flood Control Project (SRFCP) in Northern California. The integrity of various sections of Sacramento River and tributary levees has become seriously eroded, so much so that the State of California issued a statewide emergency declaration to address the levee deficiencies. Much progress has been made to correct the system's weak points, due to support from Congress, the Administration, and the State of California. Additional federal and state funding is required to continue corrective work throughout the Sacramento River system. \$163,000,000 of the total project cost (\$510,700,000) will be borne by the non-federal sponsors.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, General Investigations

Legal Name of Requesting Entity: Reclamation District 2140

Address of Requesting Entity: PO Box 758, Hamilton City, CA 95951

Description of Request: Provide an earmark of \$400,000 to enable the Corps of Engineers to complete Preconstruction Engineering and Design (PED) for this ecosystem restoration and flood control project. The Hamilton City,

CA flood damage reduction and ecosystem restoration project (P.L. 110-114, Sec. 1001(8)) will provide significantly enhanced flood protection to 2,600 area residents and nearby agricultural lands, and will restore approximately 1500 acres of riparian habitat along the Sacramento River.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, General Investigations

Legal Name of Requesting Entity: State of California, Department of Water Resources

Address of Requesting Entity: 1416 9th Street, Sacramento, CA 95814

Description of Request: Provide an earmark of \$1,100,000 to enable the Corps to complete the Sutter feasibility study and allow state and local interests to initiate corrective work identified by the Corps' study using state and local funds. The non-federal share of the total project cost (estimated \$8,258,000) is estimated to be \$4,100,000.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, Construction General

Legal Name of Requesting Entity: State of California, Department of Water Resources

Address of Requesting Entity: 1416 9th Street, Sacramento, CA 95814

Description of Request: Provide an earmark of \$600,000 to be coupled with dedicated State of California funds and enable the Corps of Engineers to complete the project's Limited Reevaluation Report and continue construction and mitigation work for this flood protection effort. This important project includes levee repair and reconstruction along the Sacramento and Feather Rivers, specifically consisting of installation of landside berms with toe drains, ditch relocation, embankment modification, and slurry cut-off walls to address seepage and levee boil issues which threaten the performance of flood control structures that protect close to \$100 million worth of public infrastructure and private property.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, Construction General

Legal Name of Requesting Entity: Yuba County Water Agency

Address of Requesting Entity: 1220 F Street, Marysville, CA 95901

Description of Request: Provide an earmark of \$1,000,000 to strengthen the federal levee system up to a 200-year level flood protection for communities in Yuba County, California. To date, local interests and the State of California have invested \$246,500,000 in the project and the related, advanced improvements. These interests anticipate an additional expenditure of up to \$118,200,000, for a total estimated non-Federal investment of \$364,700,000. With total project costs estimated to be approximately \$445,000,000, the only anticipated federal construction contribution will be \$33,000,000 for improvements to the Marysville ring levee, a figure that is well below the authorized 65-35 percent cost-share ratio. When completed, the Yuba River

project will provide the highest levee of flood protection for any community in California's Central Valley.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3183

Account: Army Corps of Engineers, General Investigations

Legal Name of Requesting Entity: State of California, Department of Water Resources

Address of Requesting Entity: 1416 9th Street, Sacramento, CA 95814

Description of Request: Provide an earmark of \$150,000 to investigate the feasibility of increasing the level of flood protection for the urbanized area in the City of Woodland, and possibly some nearby unincorporated lands in Yolo County, from a 1 in 10-year level of flood protection to greater than 1 in 100-year level of flood protection. The non-federal sponsors will share 50% of the total project cost.

IN RECOGNITION OF THE 103RD BIRTHDAY OF MRS. PAULINE M. ELLIOTT

HON. MIKE ROGERS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ROGERS of Alabama. Madam Speaker, I would like to request the House's attention today to pay recognition to the special life of Mrs. Pauline Elliott of Anniston, Alabama.

The daughter of Lena Geneva Rosamond Morrison and James Edward Morrison, Pauline Morrison Elliott was born on August 13th, 1906. Pauline is the first of six children, and today is the sole survivor of her siblings. Mrs. Pauline Morrison Elliott was married to Mr. William Hoyt Elliott of Rome, Georgia for sixty-seven years.

Mrs. Elliott was an active member in the Broadmoor Church of God serving as the clerk, a Sunday school teacher, and a member of the choir. Because of the Elliotts' dedicated service, Broadmoor Church of God added a new wing to the church in honor of Hoyt and Pauline Elliott.

Since joining Harvest Church of God, this past Mother's Day Mrs. Elliott was honored with an award for being the eldest mother in their congregation. She resides with one of her three nieces, Ms. Helen Chastain Bennett, in Anniston, Alabama.

Today I would like to wish Mrs. Pauline Elliott a very Happy 103rd Birthday.

EARMARK DECLARATION

HON. WALLY HERGER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. HERGER. Madam Speaker, pursuant to the House Republican standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3288, the Transportation, Housing, and Urban Development, and Related Agencies Appropriations Act, 2010.

Requesting Member: Congressman WALLY HERGER

Bill Number: H.R. 3288

Account: Federal Highway Administration, Federal Lands (Public Lands Highways)

Legal Name of Requesting Entity: Butte County Association of Governments

Address of Requesting Entity: 2580 Sierra Sunrise Terrace, Suite 100, Chico, CA 95928

Description of Request: Provide an earmark of \$2 million for the Forest Highway 171 widening project. This project will upgrade a 9.6 mile section of roadway that crosses federal lands between communities of Inskip and Butte Meadows from a one-lane gravel road to a paved two-lane route. These improvements are necessary to provide an emergency evacuation route for Upper Ridge residents who are surrounded by federal forest lands that have not been properly managed to mitigate the threat of catastrophic wildfire. The need for this project is greater than ever considering the Humboldt Fire and Butte Lightning Complex Fires that swept through the ridge and surrounding areas last summer destroying homes and forcing thousands of people to evacuate the area. The project will also increase the chances for effective efforts to control instances of wildfire by cutting in half the response time for fire backup support services. The total project cost is approximately \$21,000,000. The county is using its State Transportation Improvement Program (STIP) dollars (approximately \$2,665,000) for the project. It has received a \$5,000,000 grant from the Federal Highway Administration's Federal Lands Highway Program, \$5,800,000 in SAFETEA-LU, \$980,000 and \$998,450 in the FY08 and FY09 appropriations bills.

VOLUNTEERING IN AMERICA 2009

HON. JASON CHAFFETZ

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CHAFFETZ. Madam Speaker, volunteering in America 2009 found that a total of 61.8 million Americans volunteered through an organization in 2008.

For the fourth year in a row, Utah was the top volunteer state with a volunteer rate of 43.5%. With a whopping 62.9% volunteer rate, Provo, Utah again led the nation in volunteering rates from mid-sized cities.

Every day millions of Americans are helping to solve some of our toughest challenges. Instead of turning inward, Americans are responding to tough times by reaching out to help others in need.

Volunteering is a great way to address pressing community needs and the people of Provo, Utah are demonstrating that on a daily basis.

During this prolonged economic recession, the need of volunteers is growing. I am proud of the many Provo city residents who are pitching in to help.

TRIBUTE TO DR. SANKU S. RAO,
M.D.

HON. FRANK D. LUCAS

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LUCAS. Madam Speaker, I am pleased to commend the service of my constituent Dr. Sanku S. Rao, M.D., who recently completed a one-year term as President of the American Association of Physicians of Indian Origin (AAPI).

Dr. Rao has practiced Gastroenterology and Internal Medicine in Enid, Oklahoma at St. Mary's Regional Medical Center since 1979. He is a member of the American Society of Internal Medicine, serves as Chairman of the Oklahoma Blood Institute, is President-Elect of the Garfield County Medical Association, and is Board Certified by the American Board of Internal Medicine.

Dr. Rao was elected President of AAPI for 2008–2009. AAPI has entered its 28th year, and with 15,000 members, it is one of the largest ethnic medical associations in the nation. Dr. Rao is truly committed to the Indian American community and serves as a vital link between the medical communities in the U.S. and India. As President of AAPI, Dr. Rao organized the Indo-U.S. Healthcare Summit in New Delhi, India in January 2009. Medical specialists from the U.S., India, and the UK discussed prevention, treatment and the management of six major diseases including heart disease, diabetes, infectious diseases, HIV, tuberculosis, and allergies, and promoting better maternal child health care. Dr. Rao established a free endoscopy clinic at a hospital in Hyderabad, India and has assisted young Indian American physicians to secure residency positions in the U.S.

Dr. Rao exemplifies the success story that has made Indian American physicians so vital to our health care system. He graduated Valuedictorian of St. Paul's High School in Hyderabad and received his medical degree with distinction from the Institute of Medical Sciences in Hyderabad. He completed his medical residency and fellowship in New York and has been a longtime resident of Oklahoma. He lives in Enid with his wife, Dr. Sanku Rohini, and has two children, Archana and Ameet Rao.

I want to congratulate my constituent Dr. Sanku Rao for his able service as the national President of the American Association of Physicians of Indian Origin.

INTRODUCTION OF THE WATERFRONT BROWNFIELDS REVITALIZATION ACT

HON. LOUISE McINTOSH SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. SLAUGHTER. Madam Speaker, today I am proud to introduce the Waterfront Brownfields Revitalization Act. This bill will authorize a much needed grant program to assist communities that are overcoming the

unique challenges of waterfront brownfields and foster innovative approaches to remediation.

America's industrial heritage was established along the banks of its rivers, lakes and coasts. Our nation's vast and interconnected natural water system helped provide the power that fueled our rise to international prominence, and allowed us to move our manufactured goods efficiently to all corners of the country. However, that legacy also includes many decades of environmental contamination on the waterfront. Abandoned factories, dilapidated mills and underutilized ports can be found along the shores of many metropolitan areas. As localities seek to reconnect with their waterfronts and revitalize their downtowns, brownfield barriers threaten to derail community efforts to create jobs, promote recreational opportunities, restore the ecology, increase tourism, and grow their tax base.

Waterfront brownfields present challenges beyond typical environmental assessment and cleanup projects. Hydrology, water quality, wetlands, endangered species, habitat, dredged materials, flooding, environmental infrastructure, navigation, and other considerations must be carefully addressed so as not to exacerbate existing site contamination. Typically, waterfront brownfields require the involvement of multiple governmental agencies. As such, waterfront brownfields require special attention and resources to overcome their larger hurdles.

In my own district, the city of Rochester, NY is currently working to revitalize its beautiful waterfront, while attempting to cope with the unique challenges that waterfront brownfields present. The city is undertaking a major community revitalization strategy to redevelop its port and waterfront area into a mixed use development, which will include housing, commercial, retail, and educational uses, enhanced recreation, new parks and open space, and improved public access to Lake Ontario, the Genesee River and the surrounding ecosystem. However, because the Port of Rochester was used extensively for industrial purposes from the late 1800s into the first half of the 20th century, significant environmental remediation will be required prior to redevelopment.

Initial investigations have found that more than ten acres of the site contain up to several feet of slag from a former iron works. Portions of the site are impacted from petroleum releases and unsuitable fill materials. Old Genesee River deposits on the site and bank sediments have been shown to contain high levels of heavy metals cadmium and silver as well as pesticides and furans. The marina must also be dredged. Before the waterfront reuse can proceed, the Port of Rochester must first address an estimated \$500,000 in environmental assessment issues related to contaminated sediments, beneficial reuse of sediments, groundwater contamination, and waste characterization related to the construction of the marina—and an unknown level of remediation.

Madam Speaker, Rochester is not alone in facing these types of complicated and expensive challenges to redevelopment. Cities all across the country are dealing with similar roadblocks as they try to engage incorporate waterfront real estate into their redevelopment

plans, from Yuma, AZ and Portland, OR in the west, to Savannah, GA, and Philadelphia, PA in the east, and almost everywhere in between where lakes and rivers exist.

My bill recognizes that the federal government can be an effective partner to communities interested in reconnecting with their waterfronts. Specifically, this legislation would authorize the U.S. Environmental Protection Agency to establish a waterfront brownfields pilot demonstration program to provide localities and other eligible entities with up to \$500,000 to assess and cleanup waterfront brownfields. The bill would also establish an interagency taskforce on waterfront brownfields restoration to identify barriers and potential solutions to waterfront brownfields revitalization, and seek methods for federal interagency collaboration on such projects.

As cities across the country struggle to thrive in a changing global economy, and as our domestic manufacturing continues to diminish, it is imperative that Congress do all that it can to help these cities redevelop and succeed. Industrialization and manufacturing helped make this country the power that it is today, but as manufacturing has moved overseas it has not only taken jobs and changed the economic base of many industrial cities, it has also left behind decades of contamination. This legislation will give these cities the support they need to redevelop in an environmentally safe way, and utilize their waterfront as an incredible economic asset.

**HONORING THE MEMORY OF
HALLIE BOTTER WYNNE**

HON. JO BONNER

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. BONNER. Madam Speaker, the city of Mobile and indeed all of South Alabama recently lost a dear friend, and I rise today to honor her and pay tribute to her memory. Hallie Botter Wynne was a beloved citizen who, for 97 years, lived a spirited life dedicated to her family, friends, and a multitude of community endeavors.

Hallie Wynne loved life. Her adult years were characterized by her vivacious pursuit of countless interests, the evidence of her rich life. When she graduated from Murphy High School in 1930, she had lettered in several sports and distinguished herself as a varsity basketball standout. Soon after, she co-founded the Ladies Auxiliary of the Gulf Fishing and Boating Club in Mobile. The active life Mrs. Wynne began as a young woman continued into her adult years; she became an avid sailor out of the Buccaneer Yacht Club alongside her husband of 51 years, Red Wynne, Sr. In all of her recreation, she excelled: she was recognized as a champion skeet shooter and known to friends as a formidable poker player.

Her energy and spirit overflowed to the community, and Mobile came to know Mrs. Wynne as a respected businesswoman. As general manager of Chin Laundry and Dry-cleaners, she beautifully served the community of Mobile until the birth of her children. She and her husband owned nationally-recognized Wynne's Kennel where they bred and

showed championship English bulldogs and cocker spaniels, dogs that made the couple immensely proud.

Of all her accomplishments, however, Mrs. Wynne was most proud of the legacy of her family. Those who know her well can attest that family was her first love. Born one of eight children and married 51 years, Mrs. Wynne certainly understood family. And as an enthusiastic Alabama football fan, she made certain that each of her children and grandchildren attended the University of Alabama. In the company of those most dear to her, she graciously entertained guests, and friends knew her as the epitome of a hospitable, Southern lady. It is said that rarely a day went by that she did not welcome visitors into her home.

Madam Speaker, I ask my colleagues to join me in remembering a gracious host; a devoted family figure; and a respected woman of Mobile. Hallie will be dearly missed by her family—her daughter, Hallie Wall; her son, William W. Wynne, Jr.; her son, Phillip Andrew Wynne, Sr.; her granddaughters, Nancy Wynne Wall and Hallie Elizabeth Wynne; her grandson, Phillip Andrew Wynne, Jr.; a sister, Evelyn Botter Biretta Wilson; and a number of nieces, nephews, and great nieces and nephews—as well as the countless friends she leaves behind.

Our thoughts and prayers are with them during this difficult time.

EARMARK DECLARATION

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GERLACH. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3183, the Energy and Water Development and Related Agencies Appropriations Act, 2010.

The Electric Power Research Institute, Palo Alto, CA—\$1 million to develop ultra fast power processor for Smart Grid. Silicon Power located in Malvern, PA is a partner on this project.

EARMARK DECLARATION

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. SMITH of New Jersey. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the FY 10 Energy and Water Development Appropriation Act.

Requesting Member: Rep. CHRISTOPHER H. SMITH

Bill Number: H.R. 3326

Project name: Intelligence, Surveillance and Reconnaissance (ISR) Simulation Integration Laboratory

Account: Research, Development, Test and Evaluation, Army Account

Legal Name of Requesting Entity: RF PRODUCTS, INC.

Address of Requesting Entity: 1500 Davis Street, Camden, NJ 08103

Description of Request: Provides additional operational connectivity capabilities onboard aircraft that work to ensure the safety of ground personnel and prevent unplanned events including fratricide and wrong target hits. This capability will allow more information to be transmitted to the aircraft, such as an injured soldiers' medical record, or to the ground forces, such as real-time enemy locations.

Project name: Marine Mammal Detection System to Support Navy Training

Account: Research, Development, Test and Evaluation, Navy Account

Legal Name of Requesting Entity: Integrated Systems Solutions, Inc. (ISSI)

Address of Requesting Entity: Naval Air Warfare Center Aircraft Division, Route 547, Building 195/Hangar 6, Lakehurst, NJ 08733

Description of Request: Providing the Navy with new technology to track marine mammals in coastal training areas from the air—providing habitat protection, offering environmentally enhanced tracking alternatives and saving training time and money. The funding will be allocated as follows: \$1,618,477 for salaries; \$148,715 for expendables such as aviation fuel; \$83,800 for direct travel; \$107,864 for direct material such as sensors and other electronic equipment; and \$41,144 for support equipment vehicles.

TEXAS H. CON. RES. 38

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering Senate Concurrent Resolution 38, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

SENATE CONCURRENT RESOLUTION

Whereas, During the Vietnam War, the United States military sprayed more than 19 million gallons of Agent Orange and other herbicides over Vietnam to reduce forest cover and crops used by the enemy; these herbicides contained dioxin, which has since been identified as carcinogenic and has been linked with a number of serious and disabling illnesses now affecting thousands of veterans; and

Whereas, The United States Congress passed the Agent Orange Act of 1991 to address the plight of veterans exposed to herbicides while serving in the Republic of Vietnam; the Act amended Title 38 of the United States Code to presumptively recognize as service-connected certain diseases among military personnel who served in Vietnam between 1962 and 1975; this presumption has provided access to appropriate disability compensation and medical care for Vietnam veterans diagnosed with such illness as Type II diabetes, Hodgkin's disease, non-Hodgkin's lymphoma, chronic lymphocytic leukemia, multiple myeloma, prostate cancer, respiratory cancers, and soft-tissue sarcomas; and

Whereas, Pursuant to a 2001 directive, United States Department of Veterans Affairs policy has denied the presumption of a service connection for herbicide-related illnesses to Vietnam veterans who could not furnish written documentation that they had "boots on the ground" in-country, making it virtually impossible for countless United States Navy and United States Air Force veterans to pursue their claims for benefits; many who had landed on Vietnamese soil could not produce proof due to incomplete or missing military records; moreover, personnel who had served on ships in the "Blue Water Navy" in Vietnamese territorial waters were, in fact, exposed to dangerous airborne toxins, which not only drifted offshore but also washed into streams and rivers draining into the South China Sea; and

Whereas, Warships positioned off the Vietnamese shore routinely distilled seawater to obtain potable water; a 2002 Australian study found that the distillation process, rather than removing toxins, in fact concentrated dioxin in water used for drinking, cooking, and washing; this study was conducted by the Australian Department of Veterans' Affairs after it found that Vietnam veterans of the Royal Australian Navy had a higher rate of mortality from Agent Orange-associated diseases than did Vietnam veterans from other branches of the military; when the United States Centers for Disease Control and Prevention studied specific cancers among Vietnam veterans, it found a higher risk of cancer among United States Navy veterans; and

Whereas, Agent Orange did not discriminate between soldiers on the ground and sailors on ships offshore, and legislation to recognize this tragic fact and restore eligibility for compensation and medical care to United States Navy and United States Air Force veterans who sacrificed their health for their country is critical; and

Whereas, When the Agent Orange Act passed in 1991 with no dissenting votes, congressional leaders stressed the importance of responding to the health concerns of Vietnam veterans and ending the bitterness and anxiety that had surrounded the issue of herbicide exposure; the United States Congress should reaffirm the nation's commitment to the well-being of all of its veterans and direct the United States Department of Veterans Affairs to administer the Agent Orange Act under the presumption that herbicide exposure in the Republic of Vietnam includes the country's inland waterways, offshore waters, and airspace; now, therefore, be it

Resolved, That the 81st Legislature of the State of Texas respectfully urge the Congress of the United States to restore the presumption of a service connection for Agent Orange exposure to United States Navy and United States Air Force veterans who served on the inland waterways, in the territorial waters, and in the airspace of the Republic of Vietnam; and, be it further

Resolved, That the Texas secretary of state forward official copies of this resolution to the president of the United States, to the speaker of the house of representatives and the president of the senate of the United States Congress, and to all the members of the Texas delegation to the congress with the request that this resolution be officially entered in the Congressional Record as a memorial to the Congress of the United States of America.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,

Speaker of the House.
PATSY SPAW,
Secretary of the Senate.
ROBERT HANEY,
Chief Clerk of the House.

Approved: Rick Perry, *Governor.*

HONORING JULIE REICHERT

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GRAVES. Madam Speaker, I proudly rise today to recognize Julie Reichert. On July 16, 2009, Julie received a Gold Medal while competing at the National Family, Career and Community Leaders of America National Leadership Conference. This is the highest award in the Nation for her FCCLA event.

She has been very active with her local chapter and has contributed greatly to her area through her service. Not only has she distinguished herself through her involvement, she has earned the respect of her family, peers, and community.

Madam Speaker, I proudly ask you to join me in commending Julie Reichert for her accomplishments with the National Family, Career and Community Leaders of America and for her efforts put forth in achieving the highest distinction in the National Leadership Conference competition.

EARMARK DECLARATION

HON. JOHN ABNEY CULBERSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CULBERSON. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of H.R. 3183, the FY 2010 Energy and Water Development and Related Agencies Appropriations Act.

Requesting Member: Congressman JOHN CULBERSON

Bill Number: H.R. 3183

Account: U.S. Army Corps of Engineers' Construction General account

Legal Name and Address of Requesting Entity: Harris County Flood Control District at 9900 Northwest Freeway, Suite 220, Houston, TX 77092.

Description of Request: Provide an earmark of \$11,018,000 to the Harris County Flood Control District. It is my understanding that the funding would be used for construction of a flood damage reduction project along Brays Bayou in Harris County, Texas.

Requesting Member: Congressman JOHN CULBERSON

Bill Number: H.R. 3183

Account: U.S. Army Corps of Engineers' Investigations account

Legal Name and Address of Requesting Entity: Harris County Flood Control District at 9900 Northwest Freeway, Suite 220, Houston, TX 77092.

Description of Request: Provide an earmark of \$100,000 to the Harris County Flood Control District. It is my understanding that the funding would be used for construction of a flood damage reduction project along White Oak Bayou in Harris County, Texas.

Requesting Member: Congressman JOHN CULBERSON

Bill Number: H.R. 3183

Account: U.S. Army Corps of Engineers' Investigations account

Legal Name and Address of Requesting Entity: Harris County Flood Control District at 9900 Northwest Freeway, Suite 220, Houston, TX 77092.

Description of Request: Provide an earmark of \$100,000 for the Harris County Flood Control District. It is my understanding that the funding would be used for oversight of a flood damage reduction project aimed at reducing the loss of life, injury, and property destruction in the Buffalo Bayou in Harris County, Texas.

Requesting Member: Congressman JOHN CULBERSON

Bill Number: H.R. 3183

Account: U.S. Army Corps of Engineers' Construction General account

Legal Name and Address of Requesting Entity: Port Authority of Houston, P.O. Box 2562, Houston, TX 77252.

Description of Request: Provide an earmark of \$500,000 for the Port Authority of Houston. It is my understanding that the funding would be used to add capacity for dredged material disposal sites along the Channel.

Requesting Member: Congressman JOHN CULBERSON

Bill Number: H.R. 3183

Account: U.S. Army Corps of Engineers' Operations and Maintenance account

Legal Name and Address of Requesting Entity: Port Authority of Houston, P.O. Box 2562, Houston, TX 77252.

Description of Request: Provide an earmark of \$15,063,000 for the Port Authority of Houston. It is my understanding that the funding would be used for operations and maintenance of the Channels, including dredging activities.

RECOGNIZING THE RETIREMENT OF JOSEPH W. TESTA AS AUDITOR OF FRANKLIN COUNTY, OHIO

HON. PATRICK J. TIBERI

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. TIBERI. Madam Speaker, it is my pleasure to recognize Joseph W. Testa for his service to the people of Franklin County, Ohio.

Joe Testa has been a tireless advocate for good government, first serving as Franklin County Recorder from 1985 to 1992, and since then, as Franklin County Auditor. Throughout his career as an elected official, Joe acted as a resounding voice of fiscal responsibility.

Joe's career also showcased the finest level of professionalism. For more than 17 years, he ran one of the most effective and innovative county offices in the State of Ohio, and

was consistently recognized as such by the County Auditor's Association of Ohio. As an early advocate of the potential of the internet and its benefits to local government, Joe's vision helped Franklin County government to become an example for other metropolitan areas in the region in how to maximize technology for public use.

In addition to his work with the county as an elected official, Joe made a lasting impression on the greater Central Ohio community. Driven by his deep faith, he has made service a priority throughout his life. Serving as an adjunct professor at The Ohio State University, and a founder of a local charter school, Joe spent much of his free time helping provide a quality education for area students. Joe also founded a local non-profit which helps to locate, renovate and restore veteran gravesites going back to the Revolutionary War, ensuring that all veterans are remembered for their sacrifice.

This sense of service and level of commitment has made Joe a highly-respected figure in our community. While the Auditor's office and the taxpayers of Franklin County will certainly miss his principled leadership, I know he will continue to assist many in Central Ohio through his service as a private citizen.

For his years of service to Franklin County and consistent hard work toward the betterment of Central Ohio, I commend Joe Testa upon his retirement.

NAACP CENTENNIAL CELEBRATION

HON. SILVESTRE REYES

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. REYES. Madam Speaker, I rise today to congratulate the NAACP on their 100th anniversary. As the nation's oldest and largest grassroots civil rights organization, I commend the NAACP for their landmark accomplishments as well as their ongoing efforts to remove all barriers of racial discrimination in our nation.

Founded on February 12, 1909, the NAACP was established by a diverse and determined small group of brave men and women whose stated goal was to secure for all people the rights guaranteed by the 13th, 14th, and 15th Amendments to the U.S. Constitution. Over the span of 100 years, the NAACP's trailblazing work with federal and state legislators as well as in courthouses across the country transformed the organization into an instrumental force in the movement for political, educational and economic equality. As we begin the 21st century, the NAACP continues to pursue these important goals while remaining focused on promoting voter empowerment initiatives as well as closing the economic and educational disparities that continue to plague minority communities.

In my hometown of El Paso, Texas, the local NAACP branch has a distinguished and rich history of civic participation, as this branch is the oldest in the State of Texas. Established in 1915, the El Paso Branch was led by one of its pioneer charter members, Dr. Lawrence Aaron Nixon. Dr. Nixon worked tirelessly for nearly 20 years to remove the legal barriers

that prevented African Americans from participating in Democratic primary elections in Texas. Dr. Nixon was the lead plaintiff in two lawsuits in which the U.S. Supreme Court ruled in his favor by declaring Texas' discriminatory laws to be unconstitutional. In recent times, the El Paso branch continues to serve our community through economic development programs and initiatives to assist our troops and veterans. I am proud of this history as well as the ongoing efforts that the local branch continues to spearhead in El Paso.

While much progress has been made in our nation over the past 100 years, there is unquestionably a lot of work that remains to be done. It is my belief that the NAACP will remain in the forefront in creating positive change and that through the combined efforts of all people, the promise of America can be reality for all.

IN MEMORY OF LOMPOC MAYOR
DICK DEWEES

HON. ELTON GALLEGLY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GALLEGLY. Madam Speaker, I rise in memory of Lompoc, California, Mayor Dick DeWees, who passed away last night from complications related to a prior medical condition.

Dick DeWees was more than a legislative colleague. He was an ally and personal friend. The relationship we built over the years greatly benefited our mutual constituencies.

I will miss his leadership and friendship.

Dick and his wife of more than 30 years, Jane, moved to Santa Barbara in 1974 and to Lompoc in 1987, where Dick quickly became involved in the community. In addition to serving as mayor, Dick served on the Santa Barbara County Local Agency Formation Commission and is its past chairman, and was the City of Lompoc's representative on the Santa Barbara County Association of Governments. Dick also served on numerous local non-profit organization boards.

As owner of a local advertising agency, DeWees & Company Media Services, which specializes in electronic media, Dick was the recipient of the Sam Walton Business Leader Award. In addition, he taught a public speaking course at the Lompoc Valley Center of Alan Hancock College.

Jane and Dick met while they were performing Summer Stock Theater together in Michigan. Their two married children, Nathan and Anna, also live in Lompoc, as does their first grandchild, Emma Chastain.

Mr. Speaker, I know my colleagues will join me in sending our condolences to Jane, their children, their grandchild, and all their family and friends.

Godspeed, Dick.

TRIBUTE TO PAUL BALLOU
HOFFER, JR.

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CALVERT. Madam Speaker, I rise today to honor and pay tribute to an individual whose dedication and contributions to the community of Ontario, California were exceptional. Today I ask that the House of Representatives honor and remember an incredible man and American patriot, Paul Ballou Hofer, Jr. Paul was a dear friend of mine and I was deeply saddened by his passing on July 8, 2009.

Paul was born to Paul Ballou Hofer and Frances Morgan Hofer on January 23, 1921 at the family ranch in Ontario, California. He attended Mountain View Elementary School, Chaffey High School and the University of Southern California. A natural athlete, at Chaffey he played varsity basketball for four years and was a halfback on the football team, receiving dual scholarships to USC for both sports.

During World War II Paul served in the U.S. Navy, commissioned as a Naval Aviator, with several thousand hours of flight time. In 1944 Paul married his high school sweetheart, Laura Jean Belcher, who preceded him in death. They had three sons, Paul III, John and Brett who grew up in the same house in which their father was born. Along with his brothers Morgan, also deceased, and Phillip, Paul was a fourth generation vineyard farmer at Hofer Ranch which was founded by his family in 1882. Paul always believed that the lessons learned from lifetimes of farming, hard work and determination, coupled with the deeply held and abiding belief that land is what endures, have been the anchor that has guided the family through seven generations on the ranch.

In addition to ranching, Paul was a man of many interests. He had a great love of the outdoors, with a passion for fly fishing and wing shooting. Paul was a member of the Masons, and also of the Republican Party. He collected antique farm and winery equipment, proudly adding to the collection at Hofer Ranch. In addition to his three sons, Paul is survived by his brother, Phillip, and his family; his grandchildren, Jason Hofer (Christina), Jacklyn Hofer Winton (Jeremy), Morgan Hofer and Laura Hofer; his great-granddaughter, Elizabeth; and other family members.

Paul's passion for his ranch, his family, and his community has contributed immensely to the betterment of the Ontario, California. I was proud to call Paul a fellow community member, American and good friend. I hope his family knows that their father, brother, and grandfather, and the goodness he brought to this world, will always be remembered.

COMMEMORATING THE VOTING
RIGHTS ACT OF 1965

HON. DANNY K. DAVIS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. DAVIS of Illinois. Madam Speaker, as we enter into the month of August, I would like to take this opportunity to commemorate the anniversary of The Voting Rights Act of 1965. On August 6, 1965, President Lyndon Johnson signed the Voting Rights Act into law. The date marks a pivotal moment in our country's progress in extending equal membership in the political processes to every American. The right to vote is a fundamental principle of all democracies. Yet, in our great nation whose founding fathers and documents boasted of its creation to promote equality, there was a substantial period of history during which minority men and women were barred from that very right. The Fifteenth Amendment to the Constitution guarantees the right to vote for every citizen, but the discriminatory practices of Jim Crow in the antebellum south used taxes, literacy tests, gerrymandering, and language discrimination to prevent Blacks from voting and taking part in the government. Without the right to vote, many African-Americans were subject to intolerable injustices and appalling prejudice.

The Voting Rights Act represents a culmination of the great efforts of civil rights organizations and activists to inform the nation of the extensive disenfranchisement taking place throughout the country. The anniversary of the enactment of this historic law provides an opportunity to acknowledge these activists. Most notably, their tremendous dedication and uncompromising pursuit of equality took the form of peaceful marches from Selma to Montgomery that were met with vicious attacks by state and local police forces. These events caught the attention of the President and Congress, contributing to a commitment to new civil rights legislation to counter the resistance and discrimination laws within the states. The enactment of the Voting Rights Act in 1965 allowed African-Americans across the country to finally have a say in the functioning of the country. Today, I celebrate the anniversary of this law as a reflection of what our country represents: a nation pledged to representing the views, values, and beliefs of all the people it serves.

TRIBUTE TO TRINITY UNITED
METHODIST CHURCH

HON. DIANA DeGETTE

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. DeGETTE. Madam Speaker. I would like to recognize the remarkable history and invaluable contributions of an extraordinary church and congregation in the 1st Congressional District of Colorado. It is fitting that we recognize this outstanding institution for its inspiring history as the City of Denver's "First Church" and for its enduring service to the

people of our community and our nation. It is to commend this distinguished organization that I rise to honor the Trinity United Methodist Church on the occasion of its 150th Anniversary.

In the spring of 1859, only months after the mining camps of Auraria and Denver City were precariously settled along the banks of Cherry Creek, the Kansas-Nebraska Conference of the United Methodist Church sent out members to set up churches in the already rowdy mining camps of the newly established Pikes Peak region. On August 2, 1859, frontier minister William H. Goode and 23-year-old Jacob Adriance established the Auraria and Denver City Methodist Episcopal Mission, known today as Trinity United Methodist Church. In 1864, a new Trinity United Methodist Church was built at 14th and Lawrence Streets to serve a burgeoning congregation.

The "Lawrence Street Church" served the community well. However, after arrival of the railroads to Denver, the City expanded greatly spreading the church's congregation further out into the growing city. By 1888 a new church rose at 18th and Broadway in Denver to accommodate the congregation's growing members. For over a century Trinity United Methodist Church has remained at this location. The church was regarded by its architect, Robert S. Roeschlaub, as the crowning achievement of his extensive career. Built of local sandstone and materials the sanctuaries ornate and carefully considered carvings and architecture are a testament to the commitment of the church to its members and community. Its 184 foot spire was one of the tallest stone towers in 1888 and remains a distinctive feature. Inside reside soaring stain glass windows and solid brass pulpit along with a custom crafted 4,202 pipe organ which brings parishioners to prayer.

Today under the banner of "We're Here for Good!" over 50,000 church members share in weekly worship. In honor of its 150th Anniversary and in continuation of the church's service to our community and fellow humankind, the congregation has laid out four ambitious missions; planting a new church for those on the margins of society; completing construction of the John Wesley School in Guatemala; partnering to reduce infant, child, and maternal mortality in Liberia; upgrading the interior to be greener, safer, and more welcoming.

Please join me in commending Trinity United Methodist Church for its 150 years of invaluable service to our community and our nation. It is the commitment and dedication that Trinity United Methodist Church and members of its congregation exhibit on a daily basis which continually enhances our lives and builds a better future for all of our people.

TRIBUTE TO LUCILE GOODHUE

HON. TOM LATHAM

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LATHAM. Madam Speaker, I rise today to congratulate Lucile Goodhue on the celebration of her 100th birthday on August 26, 2009.

Lucile was born on what is now a 150-year old farm near Hartford, Iowa in 1909. She became a farm wife when she married her husband Wilbur. Lucile enjoyed traveling with Wilbur and collecting antiques. She has been blessed with numerous children, grandchildren and great grandchildren. Lucile's secrets to a long life are to keep active, take power naps and remain positive. She always followed these directives with a great sense of humor. Lucile currently lives at the Good Same Care Center in Indianola, Iowa.

There have been many changes that have occurred during the past one hundred years. Since Lucile's birth we have revolutionized air travel and walked on the moon. We have invented the television and the Internet. We have fought in wars overseas, seen the rise and fall of Soviet communism and the birth of new democracies. Lucile has lived through eighteen United States Presidents and twenty-two Governors of Iowa. In her lifetime the population of the United States has more than tripled.

I congratulate Lucile Goodhue for reaching this milestone of a birthday. I am extremely honored to represent Lucile in the United States Congress and I wish her happiness and health in her future years.

HONORING THE 75TH ANNIVERSARY OF THE EAST BAY REGIONAL PARK DISTRICT

HON. FORTNEY PETE STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. STARK. Madam Speaker, I rise today to pay tribute to the 75th Anniversary of the East Bay Regional Park District, headquartered in Oakland, California. The story of the EBRPD is an inspirational one in which citizens, during the toughest of economic times, had a mission. In the late 1920s, thousands of acres of surplus watershed land were available for development. Far-sighted civic leaders sought to preserve this land and retain a balance of recreational and wilderness features.

With 65 parks, over 1,100 miles of trails, campgrounds, visitor centers, historic sites, lakes and shorelines, the mission of the East Bay Regional Park District is to provide recreational opportunities, ensure the natural beauty and cultural history of the land, and protect wildlife habitat.

In 1934, during the depths of the Great Depression, members of a grassroots land preservation movement placed a measure on the ballot. It passed by a resounding 71% and the first regional park agency in the nation, the East Bay Regional Park District, was created.

At the outset, the Park District included only seven Alameda County communities and no parks. By 1936, it was able to purchase enough land to create three parks. The first three parks were opened with great fanfare on October 18, 1936. The opening of Redwood Regional Park in 1939 soon followed.

In the 1940s, Pearl Harbor and the start of World War II halted the District's growth. Much of Tilden Regional Park was turned over to the U.S. Army Defense Command. At the end of

the war, the District began an era of prudent growth as people returned to the parks seeking family recreation. Concessions such as Tilden Regional Park's steam train, carousel, and pony ride were added. This growth continued into the 1950s with Roberts Regional Park's swimming pool, baseball field, and picnic areas.

Between 1968 and 1987, the District added 32 new regional parks and preserved 43,000 acres of the East Bay's most scenic parkland. During the period 1988–2008, the District added 15 new regional parks and an additional 34,000 acres of open space. There were increased volunteer opportunities and expanded communication tools, such as the District's website. District staff also built and opened Camp Arroyo, a state-of-the-art environmental education and youth camp.

The Park District describes itself as a work in progress as it struggles to acquire and operate regional parks and trails to serve the Bay Area population. Regardless of future challenges and opportunities, the East Bay Regional Park District is committed to providing East Bay residents with recreational opportunities and open space reserves close to home.

I join the community in celebrating the East Bay Regional Park's 75th Anniversary and send best wishes for many more successful years of service.

IN TRIBUTE TO CHARLES HOBBY STRIPLING, SR.

HON. JIM MARSHALL

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. MARSHALL. Madam Speaker, it is with great pleasure I rise today not only to honor Hobby Stripling for his continuing contributions to the State of Georgia and the United States of America, but also to congratulate him on the next chapter in his career as he joins the U.S. Department of Agriculture's Farm Service Agency as the State Executive Director for Georgia.

As many of you know, Hobby most recently served as my District Director. There aren't many people in Georgia politics who don't recognize Hobby's name. His longstanding relationships with civic and political leaders throughout the state are nothing short of legendary. His wealth of knowledge has helped many Georgians improve their communities and his wise counsel has untangled many seemingly insoluble problems. Hobby reminds me of those old E F Hutton ads. When he speaks, I listen and almost always follow his advice. Georgia's farmers and rural communities will be well served by Hobby. My loss is their gain.

Madam Speaker, prior to joining my staff in 2002, Hobby was District Director for Congressman SANFORD BISHOP and ran the campaign for former Ambassador, Mayor, Congressman and Civil Rights activist Andy Young in his 1990 bid to become Georgia's governor.

Hobby also worked for many years as a local business owner, Mayor and Municipal Court Judge in Vienna, Georgia. He has

served on and chaired numerous state boards including the Georgia Municipal Association, the Georgia Department of Labor Middle Flint Employment and Training Council, the State Bar of Georgia Disciplinary Board and the Board of Directors of Crisp/Dooly County Joint Development Authority.

Madam Speaker, I am confident my colleagues will join me in recognizing the accomplishments of this great Georgian and great American and in congratulating him as he starts this next chapter of his career.

EARMARK DECLARATION

HON. JIM JORDAN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. JORDAN of Ohio. Madam Speaker, pursuant to House Republican Conference standards on earmarks, I submit the following information regarding a project included at my request in H.R. 3326, the Fiscal Year 2010 Department of Defense Appropriations Act:

Requesting Member: Congressman JIM JORDAN (OH-04)

Bill: H.R. 3326

Account: Army Research, Development, Test, and Evaluation (RDT&E)—Combat Vehicle and Automotive Advanced Technology

Requesting entity: Joint Systems Manufacturing Center, 1161 Buckeye Road, Lima, Ohio

Project title: Friction Stir Welding Program

Description: With federal assistance in fiscal years 2005, 2006, and 2009, the government-owned Joint Systems Manufacturing Center in Lima, Ohio, has developed better methods of fusing metals used in large combat vehicle manufacturing. These methods are proving to be stronger than results achieved through traditional arc welding, resulting in stronger superstructures. The \$3 million included for this program in H.R. 3326 will help perfect friction stir welding technology for current and future vehicle production, reducing procurement costs to the government.

EARMARK DECLARATION

HON. BILL POSEY

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. POSEY. Madam Speaker, pursuant to the Republican Leadership standards on earmarks as well as in accordance with Clause 9 of Rule XXI, I am submitting the following information regarding earmarks for my Congressional District as a part of H.R. 3183, Energy and Water Development and Related Agencies Appropriations Act, 2010

Requesting Member: The Administration and Congressman BILL POSEY

Project Funding Amount: \$4,600,000

Bill Number: H.R. 3183, Energy and Water Development and Related Agencies Appropriations Act, 2010

Account: Corps of Engineers, O&M

Legal Name of Requesting Entity: Corps of Engineers.

Address of Requesting Entity: U.S. Army Corps of Engineers, Jacksonville District Office, 701 San Marco Blvd., Jacksonville, Florida 32207-8175

Description of Request: This funding will be used by the U.S. Army Corps of Engineers to provide annual operation and maintenance of the channel at Port Canaveral, Florida.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable.

Requesting Member: Congressman BILL POSEY

Project Funding Amount: \$900,000

Bill Number: H.R. 3183, Energy and Water Development and Related Agencies Appropriations Act, 2010

Account: Corps of Engineers, Investigations
Legal Name of Requesting Entity: Canaveral Port Authority.

Address of Requesting Entity: Canaveral Port Authority, 445 Challenger Road, P.O. Box 267, Cape Canaveral, Florida 32920.

Description of Request: This funding will be used by the U.S. Army Corps of Engineers. Port Canaveral has completed a Section 203 report, which has been submitted to the Corps for consideration. The Corps can then start Preconstruction, Engineering, and Design (PED), which is cost-shared with the non-Federal sponsor 75/25. The non-federal sponsor is prepared to provide their 25% match. The recommended improvements to the channel are urgently required to provide adequate channel capacity and safety.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable.

Requesting Member: Congressman BILL POSEY

Project Funding Amount: \$600,000

Bill Number: H.R. 3183, Energy and Water Development and Related Agencies Appropriations Act, 2010

Account: Corps of Engineers, Construction
Legal Name of Requesting Entity: Brevard County, Florida.

Address of Requesting Entity: Brevard County, Florida, 2725 Judge Fran Jamieson Way, Building A-219, Viera, Florida 32940.

Description of Request: This funding will be used by the U.S. Army Corps of Engineers to begin construction of the first phase of re-nourishing the Mid-Reach section of the Brevard County Storm Damage Protection Project. The federal, state, and county governments have already completed the Northern and Southern section of this project. This funding will help provide the federal portion of funding toward

this authorized federal project. This funding will enable the Corps to dredge sand to be placed in the Mid-reach the following year. The County has funding set aside and available for this project, and this is a top priority for the state.

Consistent with Republican Leadership's policy on earmarks, I hereby certify that to the best of my knowledge this request (1) is not directed to any entity or program that will be named after a sitting Member of Congress; (2) is not intended to be used by an entity to secure funds for entities unless the use of the funding is consistent with the specified purpose of the earmark; and (3) meets or exceeds all statutory requirements for matching funds where applicable.

IN RECOGNITION OF JAMES J. BRUNO FOR HIS YEARS OF SERVICE TO THE KANKAKEE TOWNSHIP FIRE PROTECTION DISTRICT AND THE KANKAKEE CITY FIRE DEPARTMENT

HON. DEBORAH L. HALVORSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mrs. HALVORSON. Madam Speaker, on August 14, 2009, friends, family, and colleagues of James J. Bruno will gather to celebrate his 27½ years of service to the Kankakee Township Fire Protection District and the Kankakee City Fire Department. Today I join the chorus of praise for Jim's service.

After the unfortunate death of his father of a heart attack, Jim took the opportunity to devote himself to saving lives by joining the Kankakee Township Fire Protection District. Just 6 years after becoming a firefighter, he rose to the rank of Lieutenant and was the first paramedic in the department. In 1988, Jim joined the Kankakee City Fire Department. In 1990, Jim received the Distinguished Service Award for his role in rescuing a heart-attack victim from her burning home. With the help of his partner, Steve Born, Jim entered a blazing home, located the woman, hoisted her on his shoulders, and carried her to safety. She made a full recovery. This was an obvious act of heroism. What is less obvious, but no less important, are the lives Jim saved through countless inspections he conducted of homes and businesses as well as the education programs he participated in that prevented fires. Prevention efforts like the ones Jim participated in have been highly effective. Since 1982, deaths due to fires in the home have decreased 36 percent. Firefighters like Jim have made our communities much safer.

Jim has been an active labor leader for over 20 years. He has performed many roles in the Kankakee Firefighters Union including Chaplain and Executive Board Secretary. He completed many labor trainings on how to participate in productive grievance and arbitration hearings. Jim has been an effective advocate for hard-working firefighters.

Jim is also a compassionate father and husband. Jim is a proud supporter of his wife, Captain Stacey Ann Bruno, who will begin her second tour of duty in Iraq in September. He is a loving father of three teenage children.

The 11th District and the community of Kanakee owe Jim Bruno a debt of gratitude. I am proud to represent him and all the wonderful firefighters around my district in Congress. I wish Jim the best of luck as he enters retirement.

EARMARK DECLARATION

HON. RODNEY ALEXANDER

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ALEXANDER. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information regarding earmarks I received as part of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, 2010, H.R. 3293.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Education, Elementary & Secondary Education (includes FIE)

Ouachita Parish School Board located at 701 St. John Street, Monroe, LA 71201.

The Northeast Louisiana Family Literacy Interagency Consortium; \$400,000. The Northeast Louisiana Family Literacy Interagency Consortium (NELFLIC). NELFLIC is requesting funding so that more families can continue to be served, and served more effectively, by securing staff and resources. NELFLIC is determined to enhance its services to provide flexible, year-round hours and to target special populations more intensely than ever before. The English as a Second Language services to be offered in Union and West Carroll parishes can double the number of participants in each site. Serving the incarcerated population in Richland parish incurs significant expenses due to the dynamics of the program and to ensure that children can participate sufficiently in appropriate services. In order to serve the high school population in Lincoln parish, the Even Start center must have highly qualified personnel available to work with the children from 7:20 to 3:35 five days per week. Funding is requested to retain the staff at each site and to provide transportation and other support services to accommodate the flexible schedules and growing population of participants. Expanding services or the service area will help to empower families to gain literacy skills, build strong families, earn a living wage, and move toward self-sufficiency.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Education—Elementary & Secondary Education (includes FIE)

Institute for Student Achievement, One Hollow Lane, Suite 100, Lake Success, NY 11042

Institute for Student Achievement; \$150,000. ISA is requesting \$150,000 in funding to continue its partnership with the Point Coupee Central Prep High School located in the Point Coupee Central High School building. Point Coupee Central Prep High School opened in September, 2008 with a cohort of grade nine students. It will grow one grade per year until it serves students in grades 9 to 12, at which time the Point Coupee Central High School will be phased out. ISA will remain in partner-

ship with EBR throughout the entire school development period. A clear, explicit set of non negotiable principles defines the ISA research-based school reform capacity-building model. With its strategic partner, the National Center for Research, Education, Students and Teaching (NCREST) at Columbia University, ISA facilitates the implementation of these principles through coaching and professional development. Additionally, ISA provides technical assistance, administrative guidance, and formative student assessments in writing and mathematics which inform instructional practice, program advocacy and program assessment.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Health & Human Services Centers for Medicare and Medicaid Services (CMS)—Research & Demonstration.

PACE Greater New Orleans, 4201 North Rampart, New Orleans, LA 70117.

PACE Greater New Orleans, for facilities and equipment; \$500,000. This project is for \$4 million to allow PACE Greater New Orleans, Franciscan PACE and CHRISTUS Health to expand and develop additional PACE services and space on the Westbank of Jefferson Parish as well as in Monroe and Alexandria so they may be able to serve more elderly and offer them an alternative to institutionalized care. Expansion of service personnel and capacity could allow PACE New Orleans to serve 150 more elderly, PACE Monroe approximately 124 and PACE Alexandria approximately 125. The Program of All-Inclusive Care for the Elderly (PACE) is a capitated benefit authorized by the Balanced Budget Act of 1997 (BBA) that features a comprehensive service delivery system and integrated Medicare and Medicaid financing. The program is modeled on the system of acute and long term care services developed by On Lok Senior Health Services in San Francisco, California. The model was tested through CMS (then HCFA) demonstration projects that began in the mid-1980s. The PACE model was developed to address the needs of long-term care clients, providers, and payers. For most participants, the comprehensive service package permits them to continue living at home while receiving services rather than be institutionalized. Participants must be at least 55 years old and be certified as eligible for nursing home care by the appropriate State agency. However the average age of a PACE recipient is 75. The PACE program becomes the sole source of services for Medicare and Medicaid eligible enrollees.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Health & Human Services, Health Resources and Services Administration (HRSA)—Health Facilities and Services.

CHRISTUS Health St. Francis Cabrini Hospital, 3330 Masonic Drive, Alexandria, LA 71301.

CHRISTUS Health St. Francis Cabrini Hospital for an electronic medical records initiative; \$400,000. CHRISTUS St. Francis Cabrini has undertaken an initiative to lower the cost of care by leveraging communication and health information technology, with an emphasis on using these tools to improve access and lower costs for the under- and uninsured. The project will reduce inappropriate use of

the emergency department while providing a care team to help coordinate their care and provide a medical home. Reducing the cost of care requires investment in health IT infrastructure. This project began almost a year ago by deploying community health workers using all manual processes. This activity will automate the process of data collection, information sharing and increased communications with the clients to reduce inappropriate utilization, improve access and reduce costs, all while helping them to better care for themselves. Internal funding is lacking due to competing priorities. Funds will be used for investing in core infrastructure needs that will become operating costs in future years but at a much lower level.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Health & Human Services, Health Resources and Services Administration (HRSA)—Health Facilities and Services.

CHRISTUS Health System, 9830 Jennifer Lane, Shreveport, LA 71106.

CHRISTUS Health System for a rural health initiative; \$350,000. School-Based Health Centers (SBHCs) enable CHRISTUS Health to provide primary and preventative health care services to children and adolescents in Louisiana, many of whom are among the working poor. Besides immunizations and physical examinations, SBHCs provide well-child care, dispensation of over-the-counter and prescribed medicines, routine lab tests, management of chronic conditions, and initial care for acute illnesses and injuries. The centers provide mental health services including individual, family, and group therapy. SBHCs emphasize prevention as well as early identification and treatment of physical and mental health concerns. Prevention programs concentrate on proper nutrition, dental hygiene, exercise, and the elimination of substance abuse, use of tobacco, teenage pregnancy, violence, and suicide. CHRISTUS Health sponsors and operates 25 of the 62 SBHCs in Louisiana. With earmark funds of \$350,000, these centers could address such critical health issues as childhood and adolescent obesity. The money could also help the centers provide more dental services and expand mental health services.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Health & Human Services, Health Resources and Services Administration (HRSA)—Health Facilities and Services.

Richland Parish Hospital, 407 Cincinnati Street, Delhi, LA 71232.

Richland Parish Hospital for facilities and equipment; \$1,025,000. This request would increase access to vital preventive and diagnostic health care services in Northeast Louisiana through the use of one-time funding to purchase Digital Mammography and 16-Slice Computerized Tomography (CT) Scan machine and a Mobile Unit to transport the equipment throughout the region. This will particularly impact the low-income, under- and uninsured residents of the most rural areas of the region, who so many times do not have the resources to travel to the larger urban areas to obtain these services. Currently, a resident must travel at least to Monroe to obtain these services, which is over 60 miles away from

many of the communities in the most north-east part of the state. RPH is a participant in the LA Rural Health Information Exchange Network and was the first hospital to be linked with the LSU Health Sciences Center (LSUHSC-S) in Shreveport. If they are able to obtain this equipment, they will be able to transmit these tests to the specialists at LSUHSC-S. Many of the low-income, under- and uninsured patients are referred to LSUHSC-S for specialty care. Due to the lack of resources, patients may very well forego treatment until the condition is much more serious.

Congressman RODNEY ALEXANDER
H.R. 3293

Department of Health & Human Services, Health Resources and Services Administration (HRSA)—Health Facilities and Services.

University of Louisiana at Monroe, 700 University Avenue, Monroe, LA 71209

University of Louisiana at Monroe for facilities and equipment, including purchase of a mobile dental unit; \$840,000. The University of Louisiana at Monroe College of Health Sciences Department of Dental Hygiene proposes the purchase of a mobile dental unit for use throughout the northeastern portion of the State of Louisiana. The use of this mobile unit would enhance the teaching capabilities of the dental hygiene program and would provide a critically needed service to patients unable to access regular dental/dental hygiene care. The mobile dental unit would serve the delta area of Louisiana which has been designated an economically and socially depressed area, which in the past has been approved for federal development funding. The mobile unit would benefit underserved patients who lack the financial resources and/or transportation to obtain proper dental care. The unit would be staffed by a dentist, dental assistant, dental hygienist and dental hygiene students who would work with local public health offices to coordinate services.

Congressman RODNEY ALEXANDER
H.R. 3170
SBA

Grambling University, 400 Main St., Grambling, LA 71245

The primary goals of the Greater North Louisiana Community Development Corp are to: a) stimulate creation, attraction, retention and expansion of business and industry in North Louisiana, b) provide access to financial capital, c) promote the growth of "homegrown" business using technology to provide rural isolated entrepreneurs with access to information, technical assistance, professional services and expertise. The Rural U.S. is home to over 56 million Americans who live in some of the country's poorest regions. As nationally publicized by all mediums, the state of Louisiana is involved in a long-running battle to find solutions to poverty and combating literacy (see attachments A & B—GNLCDC Service Area Demographics and Maps). The primary employers in the targeted parishes are light manufacturing companies. It is expected that manufacturing jobs will continue to decline in the 21st Century, therefore diversification is critical to the stimulation and survival of rural communities.

Congressman RODNEY ALEXANDER
H.R. 3326

RDTE, A

Louisiana Tech University, 700 W California Ave, Ruston, LA 71272

Anti-Tamper Research and Development \$3,800,000. This program will provide the research, development, and testing of technologies that can significantly reduce or eliminate the threat of reverse-engineering or software extraction from the guidance/avionics package of military aircraft and missiles. We will initiate the R&D of specific technologies that can be used to prevent tampering of aviation and missile systems, initiate the development and instrumentation of techniques that can be used to test the vulnerability of missile systems before and after insertion of the technology, and test the initial technology produced by this program. Technologies developed will prevent the extraction, disassembly, and reuse of U.S. aviation and missile Critical Technology/Critical Program Information hardware and software. The DoD is currently aware of how vulnerable its weapons systems are to reverse-engineering, and this effort will develop measures to decrease or eliminate this vulnerability.

Congressman RODNEY ALEXANDER
H.R. 3326

RDTE, AF

Louisiana Tech University, 700 W California Ave, Ruston, LA 71272

Remote Language-Independent Suspect Identification \$3,200,000. Louisiana Tech University seeks funding for research in remote language-independent suspect identification. Our researchers have developed technologies that use mathematical models for identity verification. Aspects of this work have been commercialized in the private sector. The University has worked with the Air Force and industry partners in further development of the algorithms and software for military applications. These funds will support our faculty and partners identified by the Air Force in extending the development of these algorithms.

Congressman RODNEY ALEXANDER
H.R. 3326
RDTE, AF

Louisiana Tech University, 700 W California Ave, Ruston, LA 71272

Cyber Security Research Program \$1,500,000. Louisiana Tech University seeks funding to initiate programs in the recently funded Cyber Security Laboratory to support new research and educational efforts in cyber security. This laboratory is a key component of the Center for Secure Cyberspace (CSC), a collaboration between Louisiana Tech University and Louisiana State University. Funding for the CSC, totaling \$8 million, has been provided by the Louisiana Board of Regents and the two universities. Researchers are developing core research foundations in evolvable sensor hardware/software and corresponding transformational technologies for the early prediction, detection, and control of anomalous behavior in cyberspace. The CSC has built strategic collaborative relationships between national and international academic and industrial partners, with the Air Force Cyber Command (P), Air Force Research Laboratory, and other state and federal agencies. Many of these partners have provided input into the design of the CSL. The proposed funding will enable us to configure, test and validate the

new equipment and software, which is being purchased in FY 2009, and to support initial research projects between the CSC and partners. These initial projects will enable Tech and its partners to gather preliminary data to serve as the basis for further funding from multiple agencies.

TEXAS H. CON. RES. 39

HON. K. MICHAEL CONAWAY

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONAWAY. Madam Speaker, at the request of the Secretary of State of the State of Texas, I am officially entering House Joint Resolution 39, as passed by the 81st Legislature, Regular Session, 2009 of the State of Texas, into the CONGRESSIONAL RECORD.

A JOINT RESOLUTION

Post-ratifying Amendment XXIV to the Constitution of the United States prohibiting the denial or abridgment of the right to vote for failure to pay any poll tax or other tax.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. The 87th Congress of the United States, on August 27, 1962, in the form of Senate Joint Resolution No. 29, proposed to the legislatures of the several states an amendment to the Constitution of the United States, and by a proclamation dated February 4, 1964, published at 29 *Federal Register* 1715-16 and at 78 Statutes at Large 1117-18, the Administrator of General Services, Bernard L. Boutin—in the presence of native Texan, President Lyndon Baines Johnson—declared the amendment to have been ratified by the legislatures of 38 of the 50 states, thereby becoming Amendment XXIV to the United States Constitution, pursuant to Article V thereof, and reading as follows:

"AMENDMENT XXIV.

"SECTION 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

"SECTION 2. The Congress shall have power to enforce this article by appropriate legislation."

"SECTION 2. While the congress was still deliberating on the poll tax amendment in August of 1962, President John Fitzgerald Kennedy urged the United States House of Representatives to follow the lead of the Senate and propose the amendment for the consideration of the state legislatures "... to finally eliminate this outmoded and arbitrary bar to voting. American citizens should not have to pay to vote." And in witnessing the issuance of Amendment XXIV's certificate of validity 17 months later, Kennedy's successor, President Johnson, noted that abolishing the tax requirement "... reaffirmed the simple but unbreakable theme of this Republic. Nothing is so valuable as liberty, and nothing is so necessary to liberty as the freedom to vote without bans or barriers. ... A change in our Constitution is a serious event. ... There can now be no one too poor to vote."

SECTION 3. Although Amendment XXIV has been the law of the land since 1964, some 13 years following its effective date, it received symbolic post-ratification in 1977

from the General Assembly of the Commonwealth of Virginia, as reflected in the *Congressional Record* of March 28, 1977, which printed the full text of Virginia's post-ratification; 12 years after that, the amendment gained ceremonial post-ratification in 1989 from the General Assembly of the State of North Carolina, as reflected in the *Congressional Record* of June 6, 1989, which printed the full text of North Carolina's post-ratification; and nearly 13 years after that, the amendment acquired its most recent post-ratification in 2002 from the Legislature of the State of Alabama, as reflected in the *Congressional Record* of September 26, 2002, which printed the full text of Alabama's post-ratification.

SECTION 4. The Legislature of the State of Texas—one of only five states still levying a poll tax by 1964—has never approved Amendment XXIV to the Constitution of the United States, but precedent makes clear the opportunity of Texas to post-ratify the amendment in a manner similar to the actions of lawmakers in Alabama, North Carolina, and Virginia.

SECTION 5. The Legislature of the State of Texas, as a symbolic gesture, hereby post-ratifies Amendment XXIV to the Constitution of the United States.

SECTION 6. Pursuant to Public Law No. 98-497, the Texas secretary of state shall notify the archivist of the United States of the action of the 81st Legislature of the State of Texas, Regular Session, 2009, by forwarding to the archivist an official copy of this resolution.

SECTION 7. The Texas secretary of state shall also forward official copies of this resolution to both United States senators from Texas, to all United States representatives from Texas, to the vice president of the United States in his capacity as presiding officer of the United States Senate, and to the speaker of the United States House of Representatives, with the request that this resolution be printed in full in the *Congressional Record*.

DAVID DEWHURST,
President of the Senate.

JOE STRAUS,
Speaker of the House.

ROBERT HANEY,
Chief Clerk of the House.

PATSY SPAW,
Secretary of the Senate.

HOPE ANDRADE,
Secretary of State.

SALUTING THE NOMINEES OF THE 2009 TECH TITANS FINALISTS

HON. SAM JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. SAM JOHNSON of Texas. Madam Speaker, I rise to congratulate the finalists for the 2009 Tech Titans Award presented by Metroplex Technology Business Council, the largest technology trade association in Texas. On August 28th, the winners will be announced in categories designed to showcase the most cutting-edge technologies and the brightest talent emerging from the North Texas region at the 2009 Tech Titans Awards and Fast Tech gala. The event will also reveal the

rankings of the 2009 Titan Fast Tech, which lists the fastest-growing DFW technology companies based on percentage revenue growth over the last year and the fastest-growing DFW technology companies based on percentage revenue growth over the last five years.

The Tech Titans gala also raises funds to support a scholarship program for students at local universities who are pursuing degrees in math, science, engineering and technology, as well as high school teachers who teach in these disciplines. Founded in 1994, the Metroplex Technology Business Council (MTBC) is a non-profit organization composed of approximately 300 members that include technology businesses and providers from across the DFW Metroplex. The MTBC produces numerous events, including the Management in High-Tech Luncheon Series, the Technical Luncheon Series, Tech Week in Austin and the Tech Titans and Fast Tech Awards.

Recently, the Economist, a reputable international magazine, featured a special in-depth section showcasing the wonders of Texas for business. The MTBC is a shining example of the face of the future for Texas. Make no mistake, the MTBC is making great things happen for the Lone Star State—and the world.

"The Tech Titans Awards and Fast Tech provide the premier recognition of fast-growing, highly innovative companies that contribute to the vibrancy of the North Texas economy and make our region an exciting place to live and work," said Cindi Keith, partner/technology marketing industry leader, PricewaterhouseCoopers, and co-chair of the MTBC's Tech Titans steering committee. "We look forward to showcasing the true leaders in our industry and celebrating their hard work and creativity."

Besides the MTBC, other supporters of the Tech Titans Awards and Fast Tech event are PricewaterhouseCoopers, TechAmerica (formerly American Electronics Association), Deloitte, Dallas Business Journal, KBA Group LLP, Time Warner Cable Business Class, GSCS Inc., Farstar Inc., and AVMG.

Congratulations one and all. I salute you.

The 2009 Tech Titan Finalist names and the categories follow:

CORPORATE CEO AWARD CATEGORY

Bruce Ballengee, CEO and Co-Founder, Pariveda Solutions, Inc.

Timothy Gallagher, CEO, Electronic Transaction Consultants Corporation

HONORING BRUCE G. MCATTEE

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. KILDEE. Madam Speaker, I rise today to pay tribute to Bruce G. McAttee as he retires from his position as CAP Coordinator for UAW Region 1C. A retirement party is planned for August 28th in Lansing, Michigan.

Bruce McAttee began his career working for General Motors in August 1976. In 1982 he completed his Electrician Apprenticeship and ran for Committeeman in November of that year. He was elected and held the position until 1990. He was elected Financial Secretary Treasurer of UAW Local 652 in June 1990. During this time he also was elected Vice Chair of Region 1C Skilled Trades Council and Chairman in 1986. This made him the youngest person to ever serve on the UAW International Skilled Trades Advisory Committee. In 1994 he accepted a position on the UAW International Staff and was assigned to UAW Region 1C as CAP Coordinator one year later.

Bruce's interest in politics was sparked at the age of 13 when he worked on his first political campaign. He went to Wolverine Boys State during his high school years and he served as an intern with the Michigan House of Representatives. Since that time he has worked on numerous campaigns including the campaigns for every Democratic Presidential candidate since Jimmy Carter ran for office in 1976. He has served on the Michigan Democratic Party's State Central Committee for the past 14 years. He has served as delegate to the Democratic National Convention in 2000 and 2004. In 2004 he served as a Presidential Elector for the 8th District casting his ballot for JOHN KERRY. The Clinton County Democratic Party honored him with their 2009 Phil Hart Award.

In addition to his work with the UAW and the Democratic Party, Bruce is active with Cancer Society, the Martin Luther King Holiday Commission and the Red Cross Great Lakes Regional Board of Directors. The Lansing Area APRI Chapter recognized him earlier this year as a Role Model for his work in Civil Rights and the community.

Madam Speaker, I ask the House of Representatives to rise with me and applaud the work of a dear friend, Bruce G. McAttee. For many years an important member of my own campaigns, I consider Bruce a dear friend and skilled analyst. I value his capable, proficient expertise on a broad variety of subjects. I wish him the best as he enters this next phase of his life.

CONGRATULATING THE NATIONAL
JOINT APPRENTICESHIP TRAINING
COMMITTEE ON THEIR 20TH
NATIONAL TRAINING INSTITUTE

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. DINGELL. Madam Speaker, I rise today to congratulate the National Joint Apprenticeship

and Training Committee (NJATC) on the occasion of the 20th anniversary of their National Training Institute, which will be held this weekend at the University of Michigan in Ann Arbor. It will also be my pleasure to address this gathering back home in Michigan's 15th Congressional District.

I wish to commend the NJATC's National Training Institute for what they do for working men and women across the country. I believe they serve as an example of the good work labor unions have done for this country. I think it is entirely appropriate that the 20th annual National Training Institute will be held in Michigan, the state that most have deemed the birthplace of the American labor movement. This is a point in which I take great pride, as Michigan has long had a history of looking out for our workers and supporting the growth and success of our labor unions.

The partnership of the National Electrical Contractors Association and the International Brotherhood of Electrical Workers is unique and it has led to a special training institute that puts a value on skilled trade and allows apprentices to "earn while you learn." This is critical for those in Southeast Michigan and across the country, as they start their second career, or even begin their first. Skilled trades provide our families with respectable and fair wages, benefits that will provide for their families and training that will allow them to successfully complete various jobs within the electrical industry.

As the National Joint Apprenticeship & Training Committee enters its 68th year, I would like to once again commend them for their fine work and congratulate them for the more than 350,000 apprentices which they have skillfully trained. I look forward to their 20th National Training Institute and I am so pleased that they will be holding this special event in Michigan's 15th Congressional District.

CITY OF NEWCASTLE

HON. DAVID G. REICHERT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. REICHERT. Madam Speaker, I rise today to congratulate the city of Newcastle, Washington, which was recently ranked seventeenth by Money Magazine on their list of "America's Best Small Towns." I'm proud to represent Newcastle, a city that affords residents a unique opportunity to live near the "hustle and bustle" of everyday life while re-treating into a rural small town setting.

It is fitting that Money Magazine released its rankings the same week that Newcastle held a ribbon-cutting ceremony on a multi-year, multi-phase public works project that shows the city's true colors: leadership, patience and encouragement. Although I couldn't be at the celebration personally, I once again congratulate them on the expansion of the Coal Creek Parkway, to help alleviate the flow of traffic for its businesses and citizens.

Newcastle has grown by leaps and bounds, developing and offering new attractions and conveniences for citizens and businesses

alike. Officially incorporated in 1994, Newcastle's population at the time was 7,000. 15 years later, Newcastle's population has grown to about 10,000 and the city's amenities continue to grow as well. A new YMCA will open in September, complete with swimming pools, community rooms, and gyms. A new transit center currently under construction will provide new bus shelters and improve the city's main intersection, benefiting commuters, pedestrians and bicyclists.

In true Pacific Northwest tradition, Newcastle also boasts a vast array of accessible natural resources and outdoor activities. Lake Boren Park, the city's best known location in its parks and trails system, offers walking trails, tennis and basketball courts, playground equipment for children and is home to special events: the Fourth of July fireworks celebration and Newcastle's summer series of "Concerts in the Park." Of course, I must mention Newcastle's wonderful golf club; perhaps the city's most marketable asset as well as a terrific place for civic engagement and community fundraising. The course is truly beautiful and attracts attendees from all over the Pacific Northwest.

Newcastle is a beautiful city filled with a great mix of small town charm, big city access and natural, fantastic neighborhoods and open spaces, and is very well-deserving of this award to one of America's best small towns in the country. I look forward to continuing to support the goals and ideals of Newcastle residents and its elected leaders.

AMERICA'S AFFORDABLE HEALTH
CHOICES ACT

HON. LINDA T. SÁNCHEZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. LINDA T. SÁNCHEZ of California. Madam Speaker, I rise in support of real health care reform for the American people. As a member of the Committee on Ways and Means, I have been working hard to develop a bill that really makes health care better.

What stands out to me the most from my work are the stories I hear from my district in California. Neighbors like Blasa Ochoa, who lost her insurance when her employer went bankrupt, and who has been unable to get another policy because she has a pre-existing condition.

Or Denise from Lakewood who told me that doctors treat her special-needs son like a number and not a person.

The other night, I spoke to several hundred of my neighbors during a telephone town hall, and they told me about the problems with the current system: high costs, exclusions for pre-existing conditions, and the flat out inability to find a plan for those 60 and older.

I'm working so hard on this issue because I know health care reform is what my neighbors back home in California want and need.

America's Affordable Health Choices Act will fix these problems and more.

But sadly, there are still many misconceptions out there.

So let me clear some things up.

This bill will put a stop to abusive insurance company practices, so that you can get a policy no matter what your age or whether you have a pre-existing condition.

This bill will control skyrocketing health costs and make health insurance more affordable. Its strongest cost-control tool is the public health plan option.

We need a strong and stable public option because the private plans, busy seeking profits, have been unsuccessful in controlling the growth in healthcare costs. Their idea of controlling costs is denying care!

But a robust public plan, like the one in this bill, will give the private plans real competition and persuade them to change their ways. This makes health care cheaper for you.

A strong public plan will show how investing in comprehensive, high-quality care, including preventive care, will make Americans healthier and save money at the same time.

An NBC/Wall Street Journal Poll from earlier this year showed that 76 percent of American voters want a public health plan option. And I am proud to have worked on a bill that gives them just that.

But the public plan option is not the only standard provision in this bill.

This bill will protect small businesses and their employees.

This bill is going to help small businesses offer health insurance to their employees—something most small employers want, but can't afford to do right now.

Currently, small businesses pay an average of 18 percent more for health coverage than large businesses.

But with the America's Affordable Health Choices Act, small businesses will have access to the new Health Insurance Exchange, giving them the benefits of lower rates that only large businesses now enjoy. The exchange will also give small businesses more plans to choose from.

The bill also creates a new tax credit—worth up to half the cost of health insurance premiums—to assist small employers who want to offer coverage.

Finally, small businesses will be exempt from the "pay or play" requirements that will apply to large employers. Small businesses with a total payroll of \$250,000 or less—that's \$250,000 in employee payroll, and doesn't count the owner's take home pay—will be exempt from "pay or play."

Altogether, the bill makes it easier for small businesses and their employees to afford high quality care while protecting their bottom line.

I encourage my colleagues in both chambers and on both sides of the aisle to stop the bickering—and stop spreading misconceptions that are delaying this much-needed reform bill.

Americans cannot wait any longer. They're counting on us to get this done. We need to pass reform that lowers cost, promotes choice and provides care for all, no matter where they work or how large—or small—their paychecks.

DEPARTMENT OF THE INTERIOR,
ENVIRONMENT, AND RELATED
AGENCIES APPROPRIATIONS
ACT, 2010

HON. BETTY MCCOLLUM

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. MCCOLLUM. Madam Speaker, I rise in strong support of the Fiscal Year 2010 Department of the Interior, Environment, and Related Agencies Appropriations Act (H.R. 2996). This important bill makes timely investments to protect and preserve our country's natural resources, enhance climate change research and adaptation efforts, empower Native American communities, and support the arts. I thank Chairman OBEY, Chairman DICKS, my colleagues on the Appropriations Committee, and the House leadership for their hard work on this legislation.

This legislation upholds America's leadership in environmental stewardship. It includes an 8 percent funding increase for the National Parks Service and a 6 percent increase for the National Wildlife Refuges. I am pleased that the bill includes my language for the first ever national, comprehensive study to identify best practices to protect and preserve the Mississippi River, America's greatest waterway. Additionally, by passing this bill, Congress is investing in tackling the urgent challenge of global climate change. The bill provides over \$178 million for climate change programs in the Department of the Interior, \$80 million for climate change planning and on-the-ground conservation efforts at the Fish and Wildlife Service, and \$31 million for climate change adaptation activities at the Bureau of Land Management, the National Park Service, and Bureau of Indian Affairs. Climate change is happening now, and Congress must invest to adapt to its impacts on America's lands and economy.

My state of Minnesota is blessed with fresh water resources, including over 10,000 lakes and the headwaters of the Mississippi River. This legislation provides \$667 million—\$507 million over FY2009—in much-needed investments to promote and protect our nation's great water bodies. This includes \$475 million for the Great Lakes Restoration Initiative, which will involve the coordination and collaboration of 16 Federal agencies, the States of the Great Lakes Region, local government, and citizens groups in an effort to restore the source of 20 percent of the world's fresh surface water. This bill also directs EPA to invest in essential research on the human health and environmental impacts of endocrine disrupting compounds and other contaminants in our water supply.

This bill makes important investments to empower our country's Native American communities and enhance support of the arts. It provides \$6.8 billion for programs at the Bureau of Indian Affairs and the Indian Health Service, including almost an almost \$7 million increase in funding for the Urban Indian Health Program. And finally, H.R. 2996 includes funding increases for the National Endowment of the Arts and the National Endowment for the Humanities. I strongly support

these investments and applaud the Committee for these including these provisions.

I urge passage of this legislation.

IN MEMORY OF FATHER FLOYD
LOTITO

HON. JACKIE SPEIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. SPEIER. Madam Speaker, I pay tribute today to a man of God who dedicated his life to improving the lives of those less fortunate. Father Floyd Lotito, the heart and soul of St. Anthony's Dining Room, left our world on July 14, ending his long and valiant struggle with Parkinson's disease.

Born in Los Angeles, as Alfonso Joseph Lotito, he took Floyd as his religious name when he entered the Franciscan Order in 1953, prior to being ordained into the priesthood seven years later. He received his Bachelor of Sacred Theology from Old Mission Theological Seminary in Santa Barbara and his Masters in Speech and Communication Arts from Marquette University.

Before joining the St. Anthony Foundation in 1968, Father Floyd spent time as a high school teacher in Santa Barbara and as a parish priest in communities all across our country.

When I think of Father Floyd, I remember a man who knew everyone's name, yet called us all "brother" or "sister" as a sign of respect. He went out of his way to make people feel special and was known locally for his annual Blessing of the Taxi Fleet and the Blessing of the Animals.

Father Floyd's wisdom and eloquence garnered him invitations to give the benediction at the 1984 Democratic National Convention in San Francisco, the opening of Pacific Bell Park in 2000, and many others.

The St. Anthony Foundation has ministered to the poor and down-on-their-luck for more than 40 years, in large part due to Father Floyd's ability to reach people of all types in profoundly personal ways. He did not see rich or poor, he only saw those who could help and those who needed help.

Father Floyd held many positions at St. Anthony's, but nearest to his heart was the St. Anthony Dining Room. Opened in 1981, it is now the leading free-meal program in the city, providing more than 2,500 meals a day to San Francisco's poor. Earlier this year, Father Floyd served his 35 millionth meal.

Madam Speaker, our community is fortunate to have been blessed with Father Floyd. He leaves our community better than he found it and it brightens my heart to know that San Francisco has yet another angel to help guide us.

A TRIBUTE HONORING THE
FALKENTHAL-NICHOLS WEDDING

HON. LUCILLE ROYBAL-ALLARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. ROYBAL-ALLARD. Madam Speaker, I rise today to extend my best wishes to two young Americans who are starting their new life together. On Friday, June 4, 2009, Michelle Lynn Falkenthal and Michael David Nichols were joined in matrimony surrounded by their loving family and friends at the Earl Burns Miller Japanese Garden located on the campus of California State University, Long Beach.

Michelle Falkenthal was born in West Covina, California on December 24, 1979. Her mother, Evelyn Bobbitt, is an accounting technician for the County of San Bernardino, and her stepfather, David Bobbitt, is a director of audits for Riverside Community College. Her father is Robert Falkenthal, an attorney in private practice, and her stepmother is Jennette Falkenthal, a homemaker. Michelle graduated from Colton high school and is currently employed as a billing agent for Cox Communications.

Michael Nichols was born in Arcadia, California on December 12, 1980. His mother, Linda Nichols, is a secretary at Arcadia High School, and his father, Ken Nichols, is a general contractor. Michael attended Arcadia High School and Embry Riddle Aeronautical University in Prescott, Arizona. He is employed as an independent contractor pilot.

In this constantly developing age of electronic communications, it's no surprise that the young couple first met via the Internet. After several weeks of getting acquainted online, Michelle and Michael had their first date on June 5, 2007. They were engaged fifteen months later on September 14, 2008. The couple enjoys spending time with family and friends, going to Big Bear Lake, bike riding, and remodeling their new home, among other activities. Their many friends say Michelle and Michael are very well suited for each other, and their families already consider each of them a member of the family. The newlywed couple will make their home in the city of Chino Hills in Los Angeles County.

Michelle and Michael were joined in their wedding celebration in Long Beach by guests from across town and across the country. Family and friends traveled from Maryland, Washington, DC, Sacramento, Oxnard, Newberry Park, the Inland Empire, and from across southern California. Special participants in the wedding ceremony included the maid of honor Casandra Holiday, the bridesmaids, Sally Lara and Evie Bobbitt, the bride's niece and sister respectively, and the groomsmen Travis Amezcua, Ryan Benigno, Caleb Gray, and Dustin Mullins. Leading the bridal party and assembled family and guests in the wedding celebration and officiating the vows was the Reverend Doctor Paul Yestebo of the New Hope Community Church in Huntington Beach.

Madam Speaker, I offer my best congratulations to the Bobbitt, Falkenthal, and Nichols families, and their friends and guests on this

happy and memorable occasion. To Michelle and Michael, I offer the sentiment and gifts which George Bailey offered the Martini family as they moved into their new home in the classic film, "It's a Wonderful Life": "Bread! That their house may never know hunger. Salt! That life may always have flavor. And wine! That joy and prosperity may reign forever." Lastly, I wish that throughout their wonderful life together, Michelle and Michael will always have an abundance of what St. Paul wrote of in his letter to the Corinthians, "faith, hope, and love; and the greatest of these is love."

EARMARK DECLARATION

HON. TRENT FRANKS

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. FRANKS of Arizona. Madam Speaker, pursuant to the Republican Leadership standards on budget requests, I am submitting the following information regarding budget designations I received as part of H.R. 3326: FY 2010 Defense Appropriations Bill.

(1) Recipient: Robertson Aviation

Budget Designation: \$3,000,000

This designation funds the procurement of internal 200 gallon A-kits and B-kits for installation on UH-60 Black Hawk helicopters operated by the Army National Guard. The Internal Auxiliary Fuel Tank System is a crashworthy, ballistically self-sealing, single-point pressure refuelable internal auxiliary fuel system that has been developed and fielded to H-60 helicopters operated by the U.S. Army Special Operations, the U.S. Navy, U.S. Air Force Combat Search and Rescue, and certain units of the U.S. Army National Guard. Having this system installed on an H-60 helicopter saves lives by reducing the risk of post crash fires by using military standard crashworthy self sealing bladders integrated into rugged aluminum honeycomb fiberglass outer containers. The resulting system provides ballistic protection for aircrews operating in hostile environments and crashworthy protection for all operations.

(2) Recipient: Southwest Gas Corporation

Budget Designation: \$3,000,000

This funding request is for a Gas Engine Heat Pump (GEDAC) demonstration. GEDAC provides essential peak electric and winter gas load reduction. GEDACs not only provide increased energy efficiency, reduced peak electricity demand, costs savings to the U.S. military, resource reductions (water), and reduction of greenhouse gas emissions, it also diversifies energy sources and provides the foundation for grid independence in electricity production. This type of energy independence is invaluable to a military installation, or other facility of national interest, that has to continue to function in the event of a national emergency.

(3) Proposed Recipient: USAF, Air Education and Training Command

Budget Designation: \$1,500,000

This funding request is for Air Education & Training Command (AETC) aircraft range upgrades, specifically Barry M. Goldwater Range (BMGR) improvement projects. Air Education

and Training Command ranges have an unfunded requirement for enhancements to bring them more in line with the operational capabilities of the F-35. The Barry M. Goldwater Range has an identified unfunded requirement to secure a sensor training area and new instrumented target area as well as two ground moving target sets to conduct real world training which mirrors Global War on Terror requirements. Acquisition of ground moving targets, and development of a sensor training area/instrumented target area within the Barry M. Goldwater Tactical Range addresses the operational requirements which F-16 and future pilots (F-35) will face in defeating urban and moving targets with high precision.

(4) Proposed Recipient: Advanced Ceramics
Budget Designation: \$2,000,000

This funding request supports efforts at the U.S. Army Battle Command Battle laboratory at Ft. Huachuca to aggressively pursue experimental deployment efforts and spiral development of sensor and micro-transponder technologies using the Silver Fox and Manta unmanned aerial systems (UAS). Silver Fox and Manta systems' uniquely compact size and stealth technology coupled with the use of advanced sensors and transponders enable them to detect, track, and isolate the smallest enemy movements, including the emplacement of improvised explosive devices (IEDs)—the enemy's weapon of choice against our troops in Iraq and Afghanistan.

RECOGNIZING THE EXTRAORDINARY SERVICE OF THE UNITED STATES COAST GUARD AND THE "JERSEY BOYS OF THE USCGC MUNRO"

HON. STEVEN R. ROTHMAN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. ROTHMAN of New Jersey. Madam Speaker, I rise today in recognition of the United States Coast Guard, and the dedicated service-men and women who provide invaluable service to our country. I would especially like to recognize Lieutenant Junior Grade Paul Windt of Paramus, Lieutenant Junior Grade Lee Crusius of Hackensack, Boatswain's Mate 3rd Class Daniel McGrath of West Milford, and Electronics Technician 2nd Class Lorin Fisher of Jersey City, whose efforts during a heroic rescue on March 28, 2008 saved the lives of 42 fishermen in the Alaskan Sea. These 4 brave crew members of the Coast Guard Cutter *Munro*, who go by the name "The Jersey Boys of the USCGC Munro," are New Jersey natives and deserve recognition and commendation for their brave and selfless actions that day.

Following in the Coast Guard's rich tradition of service to the American people, these young men, away from their homes and families on Easter morning of 2008, were called to action to rescue the crew of a sinking ship. They battled minus 24-degree weather and a pitching sea which threatened to throw them overboard, while transporting the freezing crew of the sinking ship aboard the *Munro*. Thanks to the heroics of these brave men, 42

of the 47 fishermen aboard the sinking ship survived that frigid morning in March 2008.

Madam Speaker, I ask my colleagues to join with me today in commending the thousands of Americans who serve and have served in the United States Coast Guard. They are a great credit to our country.

GENERAL SUPPORT OF VETERAN
BILLS FOR WEEK OF JULY 27

HON. MAXINE WATERS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. WATERS. Madam Speaker, I rise in strong support for the veterans' bills considered on the floor this week. I am very pleased that we have reached a point where we can begin to address the many institutional problems our returning soldiers endure under the Department of Veteran Affairs. While some of these issues can be attributed to administrative deficiencies, many of the department's problems can be helped by increased federal support. These brave men and women deserve our support as they risk their lives in combat. This support should be reflected in appropriate legislative action to ease the burdens they confront upon returning home. While many of us in Congress may disagree on our military strategy and presence in Iraq and Afghanistan, we can all agree that our returning veterans deserve far more than what they have received upon returning home from combat.

Although the Bush Administration initiated the wars in Iraq and Afghanistan, it failed to provide for critical veterans' health care benefits and programs that would have helped to reorient our returning troops into society. However, under a new administration and as evidenced by the bills considered this week, Congress is working diligently to introduce and pass critical legislation that will provide our veterans with long overdue support and efficient access to medical resources. Therefore, I am pleased to support all of the veterans' bills on the floor this week, and I commend my colleagues in Congress for their commitment to our nation's troops.

A New York Times report published last fall reported that the nation's newest veterans, particularly the wounded, are paying an exceptionally high price for their service to our country. According to various veterans' advocacy groups, the combination of injury and unemployment coupled with the long VA disability claims process has forced many veterans into foreclosure and other financial hardships. Thus, the legislation on the floor this week will provide for beneficial assistance through federal appropriations, employment and housing resources, and improved veterans' medical insurance programs.

H.R. 3219, the Veterans' Insurance and Health Care Improvements Act of 2009 will expand veterans' insurance and provide much needed healthcare improvements. Additionally, this measure establishes permanent VA authority to provide hospital care, medical services, and nursing home care to Vietnam-era herbicide-exposed veterans and Persian Gulf

War veterans who have insufficient medical evidence to establish a service-connected disability. Undoubtedly, many of our current veterans from past and our present international conflicts stand to benefit a great deal from this bill.

In addition, H.R. 1293, the Disabled Veterans Home Improvement and Structural Alteration Grant Increase Act of 2009, will increase the amount of authorized grants the Department of Veterans Affairs can pay for improvements and structural alterations for homes of veterans with service-connected disabilities of 50 percent or more. Accordingly, this bill will provide much needed assistance for veterans to make any necessary improvements they are otherwise unable to fix on their own. As many may suffer from service-connected physical disabilities impeding their normal life activities, this bill would authorize the VA to increase their financial assistance to veterans. This measure will greatly supplement the bill we passed last Congress, the Homes for Heroes Act, H.R. 3329. Where that bill expanded the supply of permanent housing for veterans, H.R. 1293 will provide the grants to make improvements for veterans' current homes.

Moreover, H.R. 2270, the Veterans Non-profit Research and Education Corporations (NREC) Enhancement Act of 2009 will amend federal provisions regarding the establishment at the Department of Veterans Affairs medical facilities of nonprofit and research and education corporations (NRECs) to allow an NREC to facilitate the conduct of research or education, or both, at more than one VA medical center. This will greatly benefit the VA so that they can have readily available resources to help them confront challenges facing our veterans.

And H.R. 3155, the Caregiver Assistance and Resource Enhancement Act will provide federal assistance to individuals providing non-institutional extended care to disabled veterans. These valuable services include educational and teaching caring techniques; strategies and skills; nursing care, and mental and health services.

And finally, H.R. 1803, the Veterans Business Center Act of 2009 will amend the Small Business Act to direct the Administrator of the Small Business Administration (SBA) to establish within the SBA a Veterans Business Center program to provide entrepreneurial training and counseling to veterans. This will create yet another resource to benefit our returning veterans who may have trouble finding employment.

Madam Speaker, these are incredibly important bills, providing our veterans with the federal resources so they may have efficient access to much needed medical assistance, job, and housing support. As a strong advocate for veterans' rights, I am pleased to add my voice of support for all of these measures. Moreover, I will be working with my colleagues to make sure we continue to provide the necessary resources towards protecting our veterans' rights and ensuring fair and just access to their rightful benefits.

HONORING BRITTANY LEAP'S
FIGHT AGAINST
NEURODEGENERATION WITH
BRAIN IRON ACCUMULATION

HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. CONNOLLY of Virginia. Madam Speaker, I rise today to recognize the bravery and fortitude of a very special and courageous constituent of mine, Brittany Leap; and her mother, Sandy, and father, Richard. In February 2006, Brittany was diagnosed with a debilitating and degenerative disorder—Neurodegeneration with Brain Iron Accumulation (NBIA).

NBIA is a very rare and devastating neurological disorder that only gets worse over time—resulting in constant muscle cramping, an inability to control one's body, difficulty with speech, a loss of peripheral vision, and even blindness. No cure or specific means of treatment currently exists for NBIA, and scientists are still baffled by the factors that influence the disease.

Imagine waking up one morning having lost the ability to walk, or talk, or even eat. In Brittany's case, however, this is no dream. This is a very real challenge that Brittany faces every day of her life. To make matters worse, one of the few laboratories dedicated to researching her disease is at risk of having to close its doors because of a lack of funding; doors that upon closing will forfeit the hope of Brittany, her family, and the thousands of other people suffering from NBIA, that a cure may one day be realized.

Brittany is determined to continue fighting this disease and the potentially devastating consequences of what will happen if the research to develop a cure is suspended. She is unwavering in her pursuit to raise the funds necessary to keep hope alive, not only for her, but for everyone else with NBIA. Brittany has taken it upon herself, with the help of her loving parents—and so many others across this great nation—to raise \$250,000 by year's end to keep the search for a cure alive.

Madam Speaker, I ask my colleagues to join me in wishing Brittany and her family and all others with NBIA our heartfelt regards for their efforts to bring an end to this devastating illness, and I ask they give their support in any way possible to help Brittany in her efforts. I am inspired by Brittany's determination and I am honored to bring her story to the floor of this Chamber.

EARMARK DECLARATION

HON. DOUG LAMBORN

OF COLORADO—

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. LAMBORN. Madam Speaker, I recently submitted a member request declaration for the RECORD. In that declaration, I stated that my requests were in H.R. 2647. It should have read that these requests were in H.R. 3326 as noted below.

Requesting Member: Representative DOUG LAMBORN, CO-05

Bill Number: H.R. 3326

Account: RDTE Navy, Line 27, PE 0603216N

Legal Name of the Requesting Entity: Global Near Space Services

Legal Address of the Requesting Entity: 8610 Explorer Dr, Ste 140, Colorado Springs, CO 80920

Description of the Request: Requesting \$6 million funding for the Lighter-Than-Air Stratospheric UAV for Persistent Communications Relay and Surveillance. This project will develop a lighter-than-air, unmanned aerial vehicle (UAV) that will fly at 85,000 feet for three to four months, providing low cost, persistent surveillance, high bandwidth and over the horizon communications needed to effectively fight terrorism, achieve maritime domain awareness, protect critical infrastructures and secure national borders.

Requesting Member: Representative DOUG LAMBORN, CO-05

Bill Number: H.R. 3326

Account: RDTE Air Force, Line 8, PE 0602201F

Legal Name of the Requesting Entity: Colorado Engineering, Inc

Legal Address of the Requesting Entity: 1310 United Heights, Suite 105 Colorado Springs, CO 80921

Description of the Request: Requesting \$3 million funding for the Unmanned Sense, Track, and Avoid Radar (USTAR) for low rate initial production of an advanced radar system for the Global Hawk unmanned aerial vehicle platform to detect and track large and small targets. USTAR will allow the UAV to identify potential collision risks and increase maneuvering capability in controlled airspace and improve operability in adverse weather conditions.

Requesting Member: Representative DOUG LAMBORN, CO-05

Bill Number: H.R. 3326

Account: RDTE Defense-wide, Line 89, PE 0603898C

Legal Name of the Requesting Entity: Not Applicable

Legal Address of the Requesting Entity: Not Applicable

Description of the Request: Requesting \$500,000 funding for an Independent Advisory Group to review Ballistic Missile Defense (BMD) Education and Training Needs and recommend a BMD education and training solution to include a recommendation of roles and responsibilities, organizational structure, and/or resources and facilities for integrated missile defense training.

NIHI TA HASSO, UNHAPPY
LABOR—A HISTORY OF THE
TIYAN AIRFIELD, GUAM

HON. MADELEINE Z. BORDALLO

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. BORDALLO. Madam Speaker, on July 21, 2009, our community on Guam marked the 65th anniversary of our liberation from

enemy occupation. It was a day of commemoration and celebration as we recalled the sacrifices made for our freedom by our elders who survived this brutal occupation and of the servicemembers who landed on our beaches to liberate us from the oppression of the enemy during war. My predecessor, General Ben Blaz, penned a narrative about the history of the Tiyan airfield on this occasion. Today, the Tiyan airfield is the site of the Antonio B. Won Pat Guam International Airport and General Blaz' narrative was printed in this year's Liberation Day Special Edition of the Pacific Daily News. I submit this narrative for print in the CONGRESSIONAL RECORD. It helps us connect the past with the present. It also helps us gain an appreciation for the history of the landscape that continues to serve today as an important transportation link for our island. This is one story of many through which we can understand and interpret the period of occupation, and the trials experienced and endured by the Chamorro people.

NIHI TA TASSO . . .

Time and tide have eroded and buried remnants of the barricades and trenches on the beaches of our island. The verdant jungle has reclaimed the old concentration camp sites over the past six and a half decades. Heavy foliage and buildings now camouflage pillboxes and fortifications anchored along expected landing sites to obstruct the advance of liberating forces.

In contrast, a modest landing strip, built at Tiyan under extreme duress and a pervasive sense of personal insecurity by the Chamorros during the occupation in World War II, has risen from the ashes of war, a la the legendary Phoenix. It continues to grow with each passing year and now accommodates millions of visitors and handles thousands of tons of food and cargo so vital to the island's economy. Remarkably, Tiyan is the Chamorro word for stomach and the airfield there serves as Guam's breadbasket. Visitors from Asia, North America, and elsewhere as well as local citizens routinely arrive and depart from the airport, seemingly oblivious to how dearly we paid, with blood and tears, to carve its foundation out of a jungle for the enemy.

The latte stones of antiquity enjoy a special place in our history. Considering the circumstances under which the original landing strip was built and its indispensability to the island's future, it has attained memorial stature at least among those who wielded the primitive tools to build it. It makes a worthy companion to the latte stone which, interestingly enough, was also used as foundation stone, among others, by our ancestors.

The airport today dwarfs what we achieved during the occupation but it was built with earth movers, bulldozers, backhoe, and steamrollers. If, during the occupation, we had known the wonders that modern technology could perform, we might have said that what was being asked of us was impossible. And, having decided that, we might never have completed the airstrip. We would never have been able to overcome the psychological barrier that we would have created between us and the job's completion. There would have been nothing that the Japanese could do to make us get the project done. It would not be that we would have worked more slowly. In the actual construction, our lack of enthusiasm translated to a snail's pace in any event. Rather, we would have been so daunted by our perception of

the enormity of the task that we simply wouldn't have been able to do it. Our naiveté then worked to the Japanese's advantage. We got the job done simply because we didn't know that we couldn't!

As we were finishing the airstrip, it was not possible to simply dismiss it as something we were forced to do. Surprisingly, most of us looked at it with a kind of pride of proprietorship. It was ours. We made it—not only the construction but survived the incredibly taxing ordeal. This was possible because of the older men in our forced labor groups who rose to lead us. There were many such men but I remember two of them in particular because they were my immediate leaders—Frank D. Perez and Nito Cristobal. We worked together, we prayed together and, on occasion, we laughed together. It was 1944 and I was 16.

Evidently, American reconnaissance planes noticed that the airstrip was nearing completion and it became a daily target for bombing. Seeing the American planes bomb the airstrip in daylight was a tonic beyond description even though we knew we had to repair the runway that same night guarded by soldiers angered similarly beyond description. One of the ironies of our forced labor was how it played against one of the most cherished of Chamorro traditions, *adalak*, whereby neighbors helped one another build houses or prepare fields for crops. We participated in *adalak* willingly and from our hearts in keeping with our custom and tradition. The closest English translation of the word is "happy labor." This was not so when we were digging caves, constructing barricades and felling the jungle to build an airstrip.

In an incredible twist of fate, on June 20, 1944, during the Battle of the Philippine Sea, the Japanese lost more than 400 planes in a resounding defeat in air combat which U.S. Naval aviators referred to as the Great Marianas Turkey Shoot. A month later, Guam was liberated by U.S. Marines, soldiers, sailors and airmen. Following the capture of the Tiyan airstrip, we watched with astonishment and great delight as U.S. Navy Seabees widened, extended, and surfaced the runway with remarkable efficiency in but a few days. Seeing U.S. planes land and take off from "our" airstrip to continue the war against Japan made grown men cry. And teenagers, too.

Poetic justice comes to mind.

IN MEMORY OF MANETTE SEADY

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Ms. KAPTUR. Madam Speaker, from biblical times, each of us can recall images of strong women carrying heavy water jars—bringing the precious, essential liquid of life to family, to friends, to community. Water takes a special place in the Catholic Mass, recalling the holiest moments of Christian celebration. Jesus blessed the water and then blessed the people with that water. The women who carried water would gather at the well. Others would be drawn to conversation with them, and from their gatherings, community came to be built, gently and progressively, conversation, one by one. Ancient history rarely recorded women's words. We know now, it

should have. We know their faithfulness at the well sustaining those they loved. All life needs water.

Manette in so many ways was a Biblical woman, in our time. She was faithful, a Christian of the Catholic variety, strong, vital, wise and—as we all know now, courageous—carrying her water jar with sparkling eyes, a broad smile, humor and generosity. She gave you an extra portion. Her wisdom, born of faith, hard work and ethnic and gender sensitivity was an endless fountain for those who could appreciate it.

She ministered to all who crossed her path. And importantly, she plowed her own path to seek those who others might not know. She did so unselfishly, with a rare spirit of self-giving. She worked hard, at every worthy task she undertook. She was a laboring woman who labored with love.

As a child at her father and mother's side, she would rise at 4 am to accompany her dad as he opened the family restaurant called Najaim's and then Manette's. She hated that early rise but she learned to fill water glasses of countless people of all ages and stations. No one was a stranger at the Seady fountain. She learned about community at a young age. She was comfortable with people, most especially from Delta. She never wanted to leave them. She reminisced last week about the beauty of Delbert Dunbar's gardens, the Democratic women's club, St. Casper's and Father Ed. When I asked her, "Manette, what especially did you want me to share with those who will gather to celebrate your life?" She replied: "Tell them how we worked to help the seniors." The idea for creating for our country The Senior Farmer's Market coupons was formed here, where it now serves 23,000 seniors in northwest Ohio, well as millions

across our nation. She delivered communion to shut-ins, befriended individuals—Dorothy Biddle, Edwina Mattimore, Mary Turi, Nona Sue-Mack, Clarence Seifert—carrying her water jar. She influenced the younger generation, including members of our Congressional staff here today: Steve, Sue, Theresa and Karen among them.

Theresa has written:

It is just so hard to imagine life without our Manette . . . the Fulton County Fair (she loved the ribbon chips and getting tacos from J & A Taco Wagon from Defiance), having dinner at Byblo's and looking at Christmas lights (Manette asked Sue and me to be mystery judges for the Chamber's Christmas light contest) . . . none of that will be the same. She loved her community, her family, and had such a warm heart.

Now, I have met thousands upon thousands of people in my own life. But there has been only one Manette, my sister-friend, The "Blessed Woman of Delta with the Water Jar". There is much I did not know about her family. I was reminded yesterday, her father ran for the Mayor of Delta. Of course, Manette ran for the Fulton County Recorder. Each took representative government a step forward.

As a representative of our Congressional office in Fulton County, she stayed in touch with hundreds of people. She let us know what their concerns were. She took her duties very seriously. She practiced the route to events twice the day before. She planned every moment at every event. She left nothing to chance. She always worked hard, a laboring woman who provided her own sustenance, cared for her parents, working 28 years at Aunt Jane's Foods, and upon its closure, as an Administrative Assistant at the Fulton Mill Service.

In her beautiful memory, Manette Ann Zogby Seady, we ordered a U.S. flag flown over the Capitol for a loving, generous, hard-working daughter, niece, cousin, godmother, beloved friend, devout woman of the church, and patriotic citizen for all time. She made her passage with grace and coverage. At twilight on the day of her passage, her cousin recalls she saw a rainbow through the trees, but there had been no rain. Truly, Manette was a "Blessed Woman At the Well."

HONORING KELLI REICHERT

HON. SAM GRAVES

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Friday, July 31, 2009

Mr. GRAVES. Madam Speaker, I proudly rise today to recognize Kelli Reichert. On July 16, 2009, Kelli received a Gold Medal while competing at the National Family, Career and Community Leaders of America National Leadership Conference. This is the highest award in the nation for her FCCLA event.

She has been very active with her local chapter and has contributed greatly to her area through her service. Not only has she distinguished herself through her involvement, she has earned the respect of her family, peers, and community.

Madam Speaker, I proudly ask you to join me in commending Kelli Reichert for her accomplishments with the National Family, Career and Community Leaders of America and for her efforts put forth in achieving the highest distinction in the National Leadership Conference competition.

SENATE—Monday, August 3, 2009

The Senate met at 2 p.m. and was called to order by the Honorable MARK R. WARNER, a Senator from the Commonwealth of Virginia.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

God our help of the ages past, our hope for years to come, in Your secret places we find our faith and strength. Help us to know ourselves for who we are, people who too often seek our own way instead of striving to fulfill Your purposes. Cleanse the inner foundations of our hearts from any hint of pretense and use our Senators for Your glory. In this challenging hour of human destiny, deepen in our Senators a sense of surpassing opportunity to do their full part in building a better nation and world. Lord, fit them to protect this land from outward evil and from inner corruption. Make the words of their mouths and the meditations of their hearts be acceptable in Your sight, O God, our rock and our Redeemer. Amen.

PLEDGE OF ALLEGIANCE

The Honorable MARK R. WARNER led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, August 3, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MARK R. WARNER, a Senator from the Commonwealth of Virginia, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. WARNER thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, the Senate will be in a period of morning business for up to 1 hour. Senator BEGICH will give his maiden speech. We all look forward to this. He will have the first 30 minutes of morning business time. I note before he starts his speech, we are all so pleased with the work he has done. He has done an outstanding job for the people of the State of Alaska and our country, and I look forward to his remarks. The Republicans will control the final 30 minutes.

Following morning business, the Senate will resume consideration of the Agriculture Appropriations Act. At 5:30 the Senate will proceed to a cloture vote on the substitute amendment to the bill. Additional votes in relation to the amendments are possible following the cloture vote. The deadline for filing first-degree amendments is 3:30 today.

In speaking to Senator BROWNBACK and on our side Senator KOHL, who is the comanager of the bill and who, of course, would love to finish it today, Senator BROWNBACK said on Thursday that he thought we could finish the bill this evening and I hope that in fact is the case. The longer we are on this bill the less time there will be for Sotomayor speeches, so we look forward to completing this Agriculture appropriations bill so we can go to the Supreme Court nomination and listen to what people have to say about the new Supreme Court Justice.

HEALTH CARE REFORM

Mr. REID. Mr. President, the American people wake up every morning worrying about real problems. They go to bed every night with real concerns. They worry about the agonizing sacrifices they have to make so they can afford to stay healthy, and their fear is sincere.

Our response and responsibility to the American people should be equally grounded in reality. That reality is that our health care system is in serious distress. I believe serious problems deserve serious efforts by serious legislators to develop serious solutions.

Unfortunately, much of what we have seen from the other side is simply one radical distraction after the next. For months, Republicans have perpetuated a pollster- and consultant-created myth that our plan and our goal is to have the government run your health care. It is not. Let me repeat: It is not. In fact, one of our core principles is that if you like the health care you have, you can keep it. But the other

side simply won't let the facts get in the way of a good story.

A Republican Congressman recently claimed that our plan to improve health care would "put seniors in a position of being put to death by their government."

A Republican Senator made a similar statement to mislead his constituents. He actually accused Democrats of proposing a plan that would kill Americans. It is hard to imagine that. Rather than having a serious and real debate about a serious and real crisis, some Senators and Congressmen want the American people to believe their colleagues are proposing a plan to kill them.

These distortions and distractions are revolting, and they are not limited to health care.

An artificial controversy is getting far too much attention lately—one that ignores the undeniable and proven fact that President Obama was born in the United States of America. Last week, one of the Republican leaders in the House of Representatives continued to give this false and misleading claim credence. Let's be clear: It is a phony issue that does not deserve even a minute of our attention on the floor of the Senate. It is absurd, irresponsible, and baseless, and the false claims have long ago been refuted.

The American people have every right to expect we will solve real problems before creating fake problems. They should know that rather than helping them get ahead, some of our colleagues would rather spew ludicrous conspiracy theories.

The other side hasn't stopped at fake arguments and fake issues. We also have seen them resort to fake letters. Some Members of Congress have recently received forged letters purporting to be from the NAACP. Others have received a similar letter signed by a fake name with a fake job title purporting to be from a local Hispanic group. The bogus letters have been tracked back to employees of a Republican lobbying firm. This behavior is sick, it is shameful, it is dishonest, and it is undemocratic.

When we passed the economic recovery plan this winter, some opposed it. They didn't believe we needed an aggressive plan in response to a grave crisis that now is putting people back to work, ensuring middle-class families can get ahead, and investing in our future. But objecting to that legislation is their right. As we start to see a return on our investment, many of those who tried to block this bill have since sought credit for the good it is doing.

Others who opposed the plan outright—those who wish we weren't investing in their States and districts—now complain they wish to see us invest more quickly. Well, you can't have it both ways. It is yet another embarrassing example of misinformation and misrepresentation upon which some on the other side tend to rely.

I cannot blame people for wondering why, with an issue as important as health care now before us, bipartisan consensus sometimes seems so elusive. So I say to them: This extreme brand of strategy and the extreme tactics that come with it are what we have to contend with.

First, Rush Limbaugh happily admitted he wants our President to fail. Then a Republican Senator openly admitted he wants to block the health insurance reform for millions as a way to "break the President." Another Republican Senator admitted that at least half of the other side's opposition to reform is purely political. And an influential commentator advised Republicans to avoid consensus at all costs and instead "go for the kill."

These partisan tactics have consequences. These consequences will be evident at any kitchen table, in every family budget, and every American's peace of mind.

And they are watching. A poll released last week found that a majority of Americans credit President Obama with putting partisanship aside and trying to work with congressional Republicans to get this done for the good of the country. Republicans, they found, weren't returning the favor.

Others may be focused on delaying and denying health insurance reform, but we will make sure we don't let that happen. We already have seen what happens when we do nothing. The costs of sitting this one out are far too high and not acting is not an option.

The American people appreciate those Republicans who have come to the negotiating table in good faith. I am sorry to say that there simply aren't enough of them. At this stage, out of 100 Senators, we have 3 Republicans who are willing to work with us on health care. I am very happy to have them, but I wish we had more.

Rather than having a serious and real debate about a serious and real crisis, some would prefer to deploy tactics to scare the American people. But what scares the American people is that under the status quo, they live just one illness, one accident, or one pink slip away from losing everything.

This is no time to let partisanship get the best of us. This is no time to obsess over fake controversies or oppose ideas simply because they were proposed by people who sit on the other side of this Chamber. This is no time to instill unfounded fears and incite the hope that our Nation's leaders fail. This is the time to get serious about

making it easier for American citizens to afford to live a healthy life.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, the leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. The Senate will proceed to a period of morning business for 1 hour, with Senators permitted to speak for up to 10 minutes each, with the time equally divided and controlled between the two leaders or their designees, with the distinguished Senator from Alaska, Mr. BEGICH, controlling the first 30 minutes and the Republicans controlling the final 30 minutes.

The Senator from Alaska is recognized.

Mr. BEGICH. I thank the Chair.

(The remarks of Mr. BEGICH pertaining to the introduction of S. 1560, S. 1561, S. 1562, S. 1563, S. 1564, and S. 1565 are printed in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

LU YOUNG

Mr. BEGICH. Mr. President, before yielding the floor, I wish to mark the passing of a great Alaskan—Lu Young, the wife of Alaska's long-time Congressman DON YOUNG.

Lu passed away suddenly over the weekend. Lu was an Alaskan of true distinction. I am proud to have shared a friendship with her for several decades.

Our State is better because of her service and many contributions. The thoughts and prayers of Alaskans and me are with Representative YOUNG and his family.

I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

SENATOR BEGICH'S MAIDEN SPEECH

Ms. MURKOWSKI. Mr. President, I rise this afternoon to congratulate my colleague from Alaska, Senator BEGICH, and recognize his maiden speech on the Senate floor. The tradition of giving a maiden speech is one that perhaps in recent years has not been followed as intently as it has in days gone past. Senator BEGICH has highlighted with his remarks today and with the collection of bills he has introduced on the Senate floor—the significance of America's role as an Arctic nation and the key that Alaska holds as a leader in that responsibility.

I appreciate what he is doing to shine a spotlight on these issues, whether it

is how we deal with the impact of climate change, whether it is how we deal with the health consequences, how we dealt with renewed and increased commerce in an Arctic that is potentially ice free.

I applaud him for his efforts and, again, shining the light on this issue. It seems every day the rest of the country, the rest of the world, is looking to the Arctic for our science, looking to the Arctic for the knowledge of our elders and researchers, and looking to the Arctic as a true leader in global environmental policies.

I applaud him, and I am privileged to be able to support him in so many of these efforts, working on the issues that are important to, of course, our State but to the Nation as a whole.

LU YOUNG

Ms. MURKOWSKI. Mr. President, my colleague mentioned the passing of a very dear friend. I wish to take a moment this afternoon to also acknowledge the passing of Lu Young.

This is a sad day for us in Alaska as we come to grips with the very sudden passing of Congressman YOUNG's wife. They have been a team for some 46 years. She died this weekend at their home in Great Falls, VA. She was only 67 years old.

Lu Young was an Athabascan Indian from the village of Fort Yukon. Fort Yukon, you may have seen on Senator BEGICH's map, is in the interior part of the State. It sits 7 miles above the Arctic Circle on the north bank of the Yukon River. It is about 145 air miles north from Fairbanks.

Congressman YOUNG met Lu in Fort Yukon. This is back in the days when he was a tugboat captain operating a barge, carrying products and supplies up and down the river. DON taught in the wintertime at the BIA schools. Lu was the bookkeeper there in the village. They met, they married, and had 46 years of honest wedded bliss.

I have to tell you, it is not often one can look at a couple after 46 years of marriage and still see the love and the gleam and the warmth between two individuals, one for another. Every day we saw that. If Lu wasn't with DON, DON was talking about Lu.

He used to joke when he was in his campaigns: "You get two for the price of one." He wasn't kidding. DON was in his office every day, and Lu was also in the office every day over at the Rayburn Building. She would greet Alaskans as they would come in. She would make sure they were comfortable or if she thought they were taking too much of DON's time, she would tell them that too. She would take people over to the restaurant for lunch. She welcomed Alaskans as part of their family.

We have a very close and intimate relationship with those we represent in Alaska. As my new colleague is recognizing, we are a long way from home,

so we kind of band together. We are part of an extended family.

Lu was a constant in DON YOUNG's office. She ensured that Alaskans who traveled to Washington, DC, would know that the Congressman for all Alaska was going to take care of you. She was also reminding DON every day: Don't forget where you come from. Anyone who has ever been to DON's office knows it looks and feels very much like Alaska. Lu made sure that was never going to change.

Today the people of Alaska are not thinking of Lu's contributions to DON's political career. They are reflecting on the truly remarkable love between the two of them. In a statement this morning, Congressman YOUNG summed it up. He said: "Lu was my everything, and I am heartbroken." That loss breaks the golden hearts of all Alaskans as we remember our own experiences with Congressman YOUNG's partner, his best friend, and his heart.

Congressman YOUNG has lost the love of his life, and Alaskans have lost a great friend. Regardless of political persuasion, all of Alaska grieves with Congressman YOUNG, his daughters, Joni and Dawn, and their husbands, 14 grandchildren, and an extended family of lifelong friends throughout the great land.

I yield the floor.

Mr. ALEXANDER. Mr. President, of course, all of us extend our sympathies to Congressman YOUNG and his family. The remarks of the Senators from Alaska spoke for all of us.

The ACTING PRESIDENT pro tempore. The Senator from Tennessee.

ORDER OF PROCEDURE

Mr. ALEXANDER. Mr. President, how much time is remaining?

The ACTING PRESIDENT pro tempore. There is 23½ minutes remaining.

Mr. ALEXANDER. Will the Chair please let me know when 10 minutes remain?

The ACTING PRESIDENT pro tempore. Yes.

Mr. ALEXANDER. Mr. President, I ask unanimous consent that Senator KYL and I be permitted to engage in a colloquy during our time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MIDDLE-CLASS TAX INCREASE

Mr. ALEXANDER. Mr. President, a few minutes ago, I was waiting to give a television interview with MSNBC. The White House press secretary, Robert Gibbs, was on. He said a most astonishing thing. He was there, obviously, for the purpose of an impromptu press conference to correct what I thought was a truthful impression left yesterday by two members of the Obama administration. Both Mr. Sum-

mers and Mr. Geithner yesterday did not rule out the possibility of a middle-income tax increase. That was widely reported all over the country today. Apparently, they were taken to the woodshed this morning, and Mr. Gibbs was sent out to say: Oh, no, we are not going to raise taxes on middle income Americans.

But that is misleading, at best, to the American people. Most people know that. An article in the New York Times on August 1, was titled: "Obama's Pledge to Tax Only the Rich Can't Pay for Everything, Analysts Say."

Among those quoted is Leonard Burman, "a veteran of the Clinton administration Treasury and director of the nonpartisan Tax Policy Center."

"This idea," he says, "that everything new that government provides ought to be paid for by the top 5 percent, that's a basically unstable way of governing."

I am sure the Senator from Arizona remembers Isabel Sawhill's distinguished service. She had some comments on tax increases as well. "There is no way we can pay for health care and the rest of the Obama agenda, plus get our long-term deficits under control, simply by raising taxes on the wealthy," said Isabel V. Sawhill, a former Clinton administration budget official. "The middle class is going to have to contribute as well."

I wonder if the Senator from Arizona, who is a veteran member of the Finance Committee, is surprised to see, first, the two top finance people for the Obama administration say we are not going to rule out a middle-class tax increase, and then all of a sudden today, the Obama administration says no, nope, we are going to rule that out again. What is going on?

Mr. KYL. Mr. President, I say to my colleague, I had the same impression yesterday when I saw Mr. Geithner and Mr. Summers on television. They, frankly, were recognizing the reality of the situation. I did not think that much of it because the truth is, the people my colleague has quoted are absolutely right. You cannot do all the things the President wants to do without raising taxes, and inevitably that will be on the middle class.

To put in the RECORD what both Treasury Secretary Geithner and Mr. Summers said—this is as reported by George Stephanopoulos, "This Week" host for ABC. He said:

To get the economy back on track, will President Obama have to break his pledge not to raise taxes on 95 percent of Americans? In a "This Week" exclusive, Treasury Secretary Tim Geithner told me, "We're going to have to do what's necessary." Then Stephanopoulos continues:

When I gave him several opportunities to rule out a middle-class tax hike, he wouldn't do it. "We have to bring these deficits down very dramatically," Geithner told me. "And that's going to require some very hard choices."

Of course it is. Secretary Geithner is right. It is pretty hard to deny.

Then the National Economic Council Director, Lawrence Summers, was asked by Bob Schieffer on CBS if taxes could be raised for middle-income Americans. Summers said:

There is a lot that can happen over time. It is never a good idea to absolutely rule out things no matter what.

Then he said that what the President has been completely clear on is he is not going to pursue any of these priorities—not health care—in ways that are primarily burdening middle-class families. That is something that is not going to happen.

There seems to be a subtle switch here to, first of all, never say never and, secondly, say the tax burden is not going to primarily fall on middle-class Americans.

I say to my colleague, when you look at some of the provisions that are in the House of Representatives bill on health care, in the Senate HELP Committee on health care, and some of the things that are being considered by the Finance Committee, in all three situations, you do have taxes on working American families, middle-class families.

I think that what the Secretary and Mr. Summers said Sunday is actually more true than what the press secretary tried to make it out to be. It is simply the recognition of a reality—that you can't pay for all of this and not impose taxes on middle Americans.

Mr. ALEXANDER. Mr. President, I agree with the Senator. His point is a valid one. It is not a matter or are they going to propose middle-income tax increases. In the health care plans, we already see that happening. For example, in the proposed payroll tax or jobs tax on employers to pay for the proposed health care plan coming out of the House of Representatives, there is a very large tax. It could be up to 8 percent of payroll. Quoting from the Wall Street Journal editorial of July 30:

So who bears the burden of this tax? The economic research is close to unanimous that a payroll tax is tax on labor and is thus shouldered mostly if not entirely by workers.

This is a middle-income tax increase already proposed. Then there is another issue that bothers me, especially as a former Governor. Our current Governor of Tennessee called it the "mother of all unfunded mandates." If we add, as is proposed by both bills, another 20 million people to Medicaid—which is for low-income people, and the States help pay for that—that is more than 300,000 new people for Tennessee.

The estimates we have gotten from Tennessee's department of Medicaid, TennCare, is that would cost enough money to equal the amount raised by a 5-percent new State income tax. If we actually pay doctors a sufficient amount to cause them to see these people who are dumped into Medicaid,

then Tennessee would need a total of a 10-percent new State income tax. That is another middle-income tax increase.

Mr. KYL. Mr. President, I would just ask my colleague also if he is aware that there are some other proposals in these various Democratic bills. One is that all individuals would be required to buy medical insurance. There would be a penalty if they refused to do so that would go directly to their income tax. I believe the latest proposal I saw was 2.5 percent of your income tax. There would be a penalty imposed if you didn't buy insurance.

Now, what happens to, let's say a young man or woman who has just graduated from college, who are no longer on their parents' insurance policy and they are now going to be required to go into a risk pool along with everybody else? Or let's say they have been paying a modest amount for their insurance through their college, perhaps. What is likely to happen when they are thrown into the pool of other Americans, all of whom are required to purchase insurance? Will their premiums go down, or what is the estimate of what will happen to the premiums of these young people?

Mr. ALEXANDER. The Senator makes a good point. If you are young and in America and you are forced into the health plan that is passing the House, your costs are going to go up, and that is a mandate or a tax that absolutely will go up. So the Senator is exactly right.

For every young person in America who is in this plan, their health care costs are, by definition, going to go up. Their health care costs are going to go up to help pay for older Americans whose benefits, I might add, are going to go down because half of the health care plan is going to be paid for by Medicare cuts. These Medicare cuts will not make Medicare solvent, but grandma's Medicare benefits are going to be cut to help pay for this new health program.

Whether it is a benefit cut or a tax increase, there are a lot of middle-income Americans who are already looking at a very big change in their economic circumstances.

Mr. KYL. Mr. President, I know we just have a couple of minutes left. There are several other examples—one that is being considered by the Finance Committee, I know. It is to amend the provision of the Tax Code by which if you itemize your deductions and you have medical expenses that exceed 7½ percent of your adjusted gross income, you would get to deduct that from your income tax.

There are two different proposals pending in the Finance Committee. In both cases, there would be a new tax imposed. The problem is, according to the Joint Committee on Taxation, replacing the existing deduction with the new provision would increase taxes by

\$48 billion over 10 years. Who does it hit? Fifty-two percent of the taxpayers who claim the deduction earn under \$50,000 a year. These are not the wealthy Americans the President was speaking of. Forty percent of the taxpayers who claimed the deduction are over the age of 65.

I guarantee you in Arizona we are going to look at that provision because a lot of our folks are over 65 and they rely upon the income-tax code to ensure if they have a catastrophic expense in any given year that they have the ability to deduct a portion of that.

Mr. ALEXANDER. As the Senator knows, we have heard about limited taxes before. We actually have a millionaire tax on the books, passed in 1969, 40 years ago, where 155 high-income Americans were avoiding paying Federal income tax. There was the cry: So let's tax them. And so we did.

Well, today that is called the alternative minimum tax. Every year we have to change it because this year it was going to affect 28 million Americans. People who are making \$46,000 or \$47,000 as individuals or \$70,000 filing jointly were suddenly affected by the millionaires tax. So beware of the millionaires tax because it soon catches us all.

Mr. President, I thank the Senator from Arizona for his time. I see Senator McCain, and I yield the remainder of my time to him. But before doing so, Mr. President, I ask unanimous consent to include the August 1 New York Times article and the July 30 editorial from the Wall Street Journal, to which I referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 30, 2009]

THE PELOSI JOBS TAX

Even many Democrats are revolting against Speaker Nancy Pelosi's 5.4% income surtax to finance ObamaCare, but another tax in her House bill isn't getting enough attention. To wit, the up to 10-percent point payroll tax increase on workers and businesses that don't provide health insurance. This should put to rest the illusion that no one making more than \$250,000 in income will pay higher taxes.

To understand why, consider how the Pelosi jobs tax works. Under the House bill, firms with employee payroll of above \$250,000 without a company health plan would pay a tax starting at 2% of wages per employee. That rate would quickly rise to 8% on firms with total payroll of \$400,000 or more. A tax credit would help very small businesses adjust to the new costs, but even a firm with a handful of workers is likely to be subject to this payroll levy. As we went to press, Blue Dogs were taking credit for pushing those payroll amounts up to \$500,000 and \$750,000, but those are still small employers.

So who bears the burden of this tax? The economic research is close to unanimous that a payroll tax is a tax on labor and is thus shouldered mostly if not entirely by workers. Employers merely collect the tax and then pass along its costs in lower wages or benefits. This is the view of the Demo-

cratic-controlled Congressional Budget Office, which advised on July 13: "If employers who did not offer health insurance were required to pay a fee, employee's wages and other forms of compensation would generally decline by the amount of that fee from what they otherwise would have been."

To put this in actual dollars, a worker earning, say, \$70,000 a year could lose some \$5,600 in take home pay to cover the costs of ObamaCare. And, by the way; this is in addition to the 2.5% tax that the individual worker would have to pay on gross income, if he doesn't buy the high-priced health insurance that the government will mandate. In sum, that's a near 10-percent point tax on wages and salaries on top of the 15% that already hits workers to finance Medicare and Social Security.

Even Democrats are aware that his tax would come out of the wallets of the very workers they pretend to be helping, so they inserted a provision on page 147 of the bill prohibiting firms from cutting salaries to pay the tax. Thus they figure they can decree that wages cannot fall even, as costs rise. Of course, all this means is that businesses would lay off some workers, or hire fewer new ones, or pay lower starting salaries or other benefits to the workers they do hire.

Cornell economists Richard Burkhauser and Kosali Simon predicted in a 2007 National Bureau of Economic Research study that a payroll tax increase of about this magnitude plus the recent minimum wage increase will translate into hundreds of thousands of lost jobs for those with low wages. Pay or play schemes, says Mr. Burkhauser, "wind up hurting the very low-wage workers they are supposed to help." The CBO agrees, arguing that play or pay policies "could reduce the hiring of low-wage workers, whose wages could not fall by the full cost of health insurance or a substantial play-or-pay fee if they were close to the minimum wage."

To make matters worse, many workers and firms would have to pay the Pelosi tax even if the employer already provides health insurance. That's because the House bill requires firms to pay at least 72.5% of health-insurance premiums for individual workers and 65% for families in order to avoid the tax. A Kaiser Family Foundation survey in 2008 found that about three in five small businesses fail to meet the Pelosi test and will have to pay the tax. In these instances, the businesses will have every incentive simply to drop their coverage.

A new study by Sageworks, Inc., a financial consulting firm, runs the numbers on the income statements of actual companies. It looks at three types of firms with at least \$5 million in sales: a retailer, a construction company and a small manufacturer. The companies each have total payroll of between \$750,000 and \$1 million a year. Assuming the firms absorb the cost of the payroll tax, their net profits fall by one-third on average. That is on top of the 45% income tax and surtax that many small business owners would pay as part of the House tax scheme, so the total reduction in some small business profits would climb to nearly 80%. These lower after-tax profits would mean fewer jobs.

To put it another way, the workers who will gain health insurance from ObamaCare will pay the steepest price for it in either a shrinking pay check, or no job at all.

[From the New York Times, Aug. 1, 2009]
**OBAMA'S PLEDGE TO TAX ONLY THE RICH
 CAN'T PAY FOR EVERYTHING, ANALYSTS SAY**
 (By Jackie Calmes)

WASHINGTON.—Behind Democrats' struggle to pay the \$1 trillion 10-year cost of President Obama's promise to overhaul the health care system is their collision with another of his well-known pledges: that 95 percent of Americans "will not see their taxes increase by a single dime" during his term.

This will not be the last time that the president runs into a conflict between his audacious agenda and his pay-as-you-go guarantee, when only 5 percent of taxpayers are being asked to chip in. Critics from conservative to liberal warn that Mr. Obama has tied his and Congress's hands on a range of issues, including tax reform and the need to reduce deficits topping \$1 trillion a year.

"You can only go to the same well so many times," said Bruce Bartlett, a Treasury official in the Reagan administration.

In the budget, Mr. Obama and Congress have already agreed to let the Bush tax cuts for the most affluent expire after 2010, as scheduled, but to extend them for everyone else. The top rates, now 33 percent and 35 percent, will revert to Clinton-era levels of 36 percent and 39.6 percent.

The critics do not have a beef with the government's taking more from the wealthiest Americans, especially given the growing income gap between the rich and everyone else. They object to doing so for health care over other pressing needs.

"I want to tax the rich to reduce the deficit," said Robert D. Reischauer, a former director of the Congressional Budget Office who heads the Urban Institute, a center-left research group. Similarly, Mr. Bartlett, a conservative analyst who often chastises Republicans for their antitax absolutism, supports overhauling the tax code to raise revenues.

As these analysts recognize, taxing the rich has its limits both economically and politically, such that members of Congress are not likely to tap that well again and again.

Polls show strong majorities supporting higher taxes on those earning more than \$250,000 a year, Mr. Obama's target group. Yet some Congressional Democrats are fearful of Republicans' attacks that "soak the rich" tax increases will douse small-business owners, too, even if the number of those affected is far less than Republicans suggest.

Also, higher rates like those in the House health care legislation could lead to tax avoidance schemes, reducing the government's collections and warping business decisions, analysts say.

The House measure calls for surtaxes ranging from 1 percent on annual income of \$280,000 to 5.4 percent on income of \$1 million and more. The millionaires' surtax would push the top tax rate to 45 percent, the highest since the 1986 tax code overhaul lowered all rates in return for jettisoning a raft of tax breaks for businesses and individuals.

But the effective top rate would be higher still, counting the 2.9 percent Medicare payroll tax and state and local income taxes. In the highest-tax states of Oregon, Hawaii, New Jersey, New York and California, it would be 57 percent, according to the conservative Heritage Foundation.

In the health debate, Democrats emphasize that they are not just raising taxes on the rich, but cutting spending, too, mostly for Medicare payments to doctors, hospitals and insurance companies.

Also, the Democrats say, at least they are trying to pay for the health care initiative,

rather than letting the deficit balloon as the Republicans, along with President George W. Bush, did when they created the Medicare prescription drug benefit in 2003. That program will add a projected \$803 billion to the national debt in the decade through 2019, according to the White House budget office.

"They charged theirs on the government's credit card," Rahm Emanuel, the White House chief of staff, said of the Republicans.

Even so, Mr. Obama's vow to tax only the rich is a variation "of Bush's policy that nobody has to pay for anything," said Leonard Burman, a veteran of the Clinton administration Treasury and director of the non-partisan Tax Policy Center.

"Democrats are more worried about the deficits," Mr. Burman added, but "they put the burden on a tiny fraction of the population that they figure doesn't vote for them anyway."

Mr. Burman and others recall that in the creation of Social Security and Medicare, Presidents Franklin D. Roosevelt and Lyndon B. Johnson insisted that beneficiaries contribute through payroll taxes, both to finance the programs and to give all Americans a vested interest. The same philosophy should apply to seeking universal health coverage, they say.

This idea that everything new that government provides ought to be paid for by the top 5 percent, that's a basically unstable way of governing," Mr. Burman said.

Mr. Obama recently dismissed concerns that taxing the rich to pay for health care would foreclose that option when he and Congress turn to deficit reduction. "Health care reform is fiscal reform," he said.

"If we don't do anything on health care inflation, then we might as well close up shop when it comes to dealing with our long-term debt and deficit problems, because that's the driver of it—Medicare and Medicaid," Mr. Obama said.

But his no-new-tax admonition for most Americans even now complicates the behind-the-scenes work of the panel he established to recommend ways to simplify the tax code and raise more revenue.

The panel, which is led by Paul A. Volcker, a former chairman of the Federal Reserve, is to report by Dec. 4. Overhauling the code, as in 1986, generally creates winners and losers across the board; leaving 95 percent of taxpayers unscathed will not be easy.

That has already proved true in the health care deliberations. Proposals to raise about \$50 billion over 10 years by taxing sugared drinks foundered partly because the levy would hit nearly everyone.

And when Congressional leaders opposed Mr. Obama's chief idea for raising revenues—limiting affluent taxpayers' deductions—his campaign vow against taxing the middle class made finding an acceptable alternative difficult.

While the president endorsed House Democrats' surtax idea, saying it "meets my principle that it's not being shouldered by families who are already having a tough time," he could not embrace a bipartisan Senate proposal to tax employer-provided health benefits above a certain amount. He had criticized a similar idea as a middle-class tax during his presidential campaign.

Yet taxing at least the most generous employer-provided plans above a threshold amount would meet two elusive goals for Mr. Obama: It would raise a lot of money and, economists say, cut overall health spending by making consumers more cost-conscious.

Administration officials recently began promoting a fallback. Rather than tax indi-

viduals, it would single out insurance companies that sell "Cadillac" plans. David Axelrod, a White House strategist, has described the proposal in populist terms, saying it would hit "the \$40,000 policies that the head of Goldman Sachs has" and "not impact on the middle class."

That position, analysts predict, cannot hold over time.

"There is no way we can pay for health care and the rest of the Obama agenda, plus get our long-term deficits under control, simply by raising taxes on the wealthy," said Isabel V. Sawhill, a former Clinton administration budget official. "The middle class is going to have to contribute as well."

The ACTING PRESIDENT pro tempore. The Senator from Arizona.

SOTOMAYOR NOMINATION

Mr. MCCAIN. Mr. President, it is with great respect for Judge Sotomayor's qualifications that I come to the floor today to discuss her nomination to the U.S. Supreme Court. There is no doubt that Judge Sotomayor has the professional background and qualifications that one hopes for in a Supreme Court nominee. As we all know, she is a former prosecutor, served as an attorney in private practice, and spent 12 years as an appellate court judge. She is an immensely qualified candidate. And, obviously, Judge Sotomayor's life story is inspiring and compelling.

As a child of Puerto Rican parents who did not speak English upon their arrival in New York, Judge Sotomayor took it upon herself to learn English and became an outstanding student. She graduated cum laude from Princeton University and later from Yale Law School. Judge Sotomayor herself stated that she is "an ordinary person who has been blessed with extraordinary opportunities and experiences."

However, an excellent resume and an inspiring life story are not enough to qualify one for a lifetime of service on the Supreme Court. Those who suggest otherwise need to be reminded of Miguel Estrada. Mr. Estrada also was a supremely qualified candidate, and he, too, has an incredible life story. Miguel Estrada actually emigrated to the United States from Honduras as a teenager, understanding very little English. Yet he managed to graduate from Columbia University and Harvard Law School magna cum laude before serving his country as a prosecutor and a lawyer at the Department of Justice. Later, he found success as a lawyer in private practice. However, Miguel Estrada, in spite of his qualifications and remarkable background, in spite of the fact that millions of Latinos would have taken great pride in his confirmation, was filibustered by the Democrats seven times—most recently in 2003—because many Democrats disagreed with Mr. Estrada's judicial philosophy. This was the first filibuster ever to be successfully used against a court of appeals nominee.

I supported Mr. Estrada's nomination to the DC Circuit Court of Appeals, not because of his inspiring life story or impeccable qualifications but because his judicial philosophy was one of restraint. He was explicit in his writings and responses to the Senate Judiciary Committee that he would not seek to legislate from the bench.

In 1987, I had my first opportunity to provide "advice and consent" on a Supreme Court nominee. At that time, I stated that the qualifications I believed were essential for evaluating a nominee for the bench included integrity, character, legal competence and ability, experience, and philosophy and judicial temperament.

When I spoke of philosophy and judicial temperament, it is specifically how one seeks to interpret the law while serving on the bench. I believe a judge should seek to uphold all actions of Congress and State legislatures, unless they clearly violate a specific section of the Constitution, and refrain from interpreting the law in a manner that creates law. While I believe Judge Sotomayor has many of these qualifications I outlined in 1987, I do not believe she shares my belief in judicial restraint.

When the Senate was considering Judge Sotomayor's nomination to the Second Circuit in 1998, I reviewed her decisions and her academic writings. Her writings demonstrated that she does not subscribe to the philosophy that Federal judges should respect the limited nature of the judicial power under our Constitution. Judges who stray beyond their constitutional role believe judges somehow have a greater insight into the meaning of the broad principles of our Constitution than representatives who are elected by the people. These activist judges assume the Judiciary is a superlegislature of moral philosophers.

I know of no more profoundly anti-democratic attitude than that expressed by those who want judges to discover and enforce the ever-changing boundaries of a so-called "living constitution." It demonstrates a lack of respect for the popular will that is at fundamental odds of our republican system of government. Regardless of one's success in academics and government service, an individual who does not appreciate the commonsense limitations on judicial power in our democratic system of government ultimately lacks a key qualification for a lifetime appointment to the bench.

Although she attempted to walk back from her long public record of judicial activism during her confirmation hearings, Judge Sotomayor cannot change her record. In a 1996 article in the *Suffolk University Law Review*, she stated:

A given judge (or judges) may develop a novel approach to a specific set of facts or legal framework that pushes the law in a new direction.

This is exactly the view I disagree with. As a district court judge, her decisions too often strayed beyond legal norms. Several times this resulted in her decisions being overturned by the Second Circuit. She was reversed due to her reliance on foreign law rather than U.S. law. She was reversed because the Second Circuit found she exceeded her jurisdiction in deciding a case involving a State law claim. She was reversed for trying to impose a settlement in a dispute between businesses, and she was reversed for unnecessarily limiting the intellectual property rights of free-lance authors.

These are but a few examples that led me to vote against her nomination to the Second Circuit in 1998 because of her troubling record of being an activist judge who strayed beyond the rule of law. For this reason, I closely followed her confirmation hearing last month. During the hearing, she clearly stated, "As a judge, I don't make law."

While I applaud this statement, it does not reflect her record. As an appellate court judge, Judge Sotomayor has been overturned by the Supreme Court six times. In several of the reversals of Judge Sotomayor's Second Circuit opinions, the Supreme Court strongly criticized her decision and reasoning. In a seventh case, the Supreme Court vacated the ruling, noting that in her written opinion for the majority of the Second Circuit, Judge Sotomayor had ignored two prior Supreme Court decisions.

While I do not believe reversal by the Supreme Court is a disqualifying factor for being considered for the Federal bench, I do believe such cases must be studied in reviewing a nominee's record. Most recently, in 2008, the Supreme Court noted in an opinion overturning Judge Sotomayor that her decision "flies in the face of the statutory language" and chided the Second Circuit for extending a remedy that the court had "consistently and repeatedly recognized for three decades forecloses such an extension here."

Unfortunately, it appears from this case—*Malesko v. Correctional Services Corp.*—that Judge Sotomayor does not seek "fidelity to the law" as she pledged at her confirmation hearing. As legislators, we must enact laws. The courts must apply the law faithfully. The job of a judge is not to make law or ignore the law.

Further, in *Lopez Torres v. N.Y. State Board of Education*, the Supreme Court overturned Judge Sotomayor's decision that a State law allowing for the political parties to nominate State judges through a judicial district convention was unconstitutional because it did not give people, in her view, "a fair shot." In overturning her decision, the Supreme Court took aim at her views on providing a "fair shot" to all interested persons, stating:

It is hardly a manageable constitutional question for judges—especially for judges in

our legal system, where traditional electoral practice gives no hint of even the existence, much less the content, of a constitutional requirement for a "fair shot" at party nomination.

In her most recent and well-known reversal by the Supreme Court, the Court unanimously rejected Judge Sotomayor's reasoning and held that white firefighters who had passed a race neutral exam were eligible for promotion. *Ricci v. DeStefano* raised the bar considerably on overt discrimination against one racial group simply to undo the unintentionally racially skewed results of otherwise fair and objective employment procedures. Again, this case proves that Judge Sotomayor does not faithfully apply the law we legislators enact.

Again and again, Judge Sotomayor seeks to amend the law to fit the circumstances of the case, thereby substituting herself in the role of a legislator. Our Constitution is very clear in its delineation and disbursement of power. It solely tasks the Congress with creating law. It also clearly defines the appropriate role of the courts to "extend to all Cases in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties." To protect the equal, but separate roles of all three branches of government, I cannot support activist judges that seek to legislate from the bench. I have not supported such nominees in the past, and I cannot support such a nominee to the highest court in the land.

When the people of Arizona sent me to Washington, I took an oath. I swore to uphold the Constitution. For millions of Americans, it is clear what the Constitution means. The Constitution protects an individual's right to keep and bear arms to protect himself, his home, and his family. The Constitution protects our right to protest our government, speak freely and practice our religious beliefs.

The American people will be watching this week when the Senate votes on Judge Sotomayor's nomination. She is a judge who has foreworn judicial activism in her confirmation hearings, but who has a long record of it prior to 2009. And should she engage in activist decisions that overturn the considered constitutional judgments of millions of Americans, if she uses her lifetime appointment on the bench as a perch to remake law in her own image of justice, I expect that Americans will hold us Senators accountable.

Judicial activism demonstrates a lack of respect for the popular will that is at fundamental odds with our republican system of government. And, as I stated earlier, regardless of one's success in academics and in government service, an individual who does not appreciate the common sense limitations on judicial power in our democratic system of government ultimately lacks

a key qualification for a lifetime appointment to the bench. For this reason, and no other, I am unable to support Judge Sotomayor's nomination.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

Mr. McCONNELL. Mr. President, before I address the matter I came to the Senate floor to address today, I congratulate the Senator from Arizona for his thoughtful description of the process by which he has made a decision on the extraordinarily important issue we will have before the Senate later this week; that is, the confirmation of Judge Sotomayor for the Supreme Court.

HEALTH CARE WEEK IX, DAY I

Mr. McCONNELL. Mr. President, over the past 2 months, I have come to the floor time and again to talk about one of the most important issues we face as a Nation: and that is the need for commonsense health care reforms which address the serious problems that all Americans see in the system as it is. I have done this in the context of a larger debate about a proposed reform that, in my view, could actually make our current problems worse. And I have had solid support for that view from a number of well-respected sources.

First and foremost is the independent Congressional Budget Office, which has refuted several estimates by the administration about the effect its health care proposals would have on the economy in general and health care costs in particular.

The Director of the CBO has said the Democrat proposals we have seen would not reverse the upward trend of health care costs and would significantly increase the government's share of those costs. The CBO says these proposals would add hundreds of billions of dollars to the national debt. It says that one section of one of the proposals would cause 10 million people to lose their current health plans. And it says a so-called Independent Medicare Advisory Council designed to cut costs probably wouldn't.

These findings have helped clarify the debate over health care—and they have added to a growing perception that, though the administration is trying very hard, economic estimates are not the administration's strong suit.

First there was the stimulus. In trying to account for rising unemployment after a stimulus bill that was meant to arrest it, the administration said it misread the economy. It also said the stimulus would "create or save" between 3 and 4 million jobs, though now it says it can't measure how many jobs are created or saved. Meanwhile we have lost 2 million of them since the stimulus was passed.

Last week we saw the administration's tendency to miss the mark on economic estimates again with the so-called cash for clunkers program.

We were told this program would last for several months. As it turned out, it ran out of money in a week, prompting the House to rush a \$2 billion dollar extension before anybody even had time to figure out what happened with the first billion.

There is a pattern here, a pattern that amounts to an argument—and a very strong argument at that: when the administration comes bearing estimates, it is not a bad idea to look for a second opinion. All the more so if they say they are in a hurry.

Americans are telling us that health care is too important to rush. They are saying it is too important to base our decisions on this issue solely on the estimates that we are getting from the same people who brought us the stimulus and cash for clunkers.

The American people want to know what they are getting into when it comes to changing health care in this country. And while I have no doubt the administration is trying, Americans need some assurance that the estimates they are getting are accurate. And if recent experience is any guide, they have reason to be as skeptical as the car dealer who said this to a reporter last week:

If they can't administer a program like this, I'd be a little concerned about my health insurance.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCain. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. McCain. Mr. President, what is the pending business before the Senate?

The ACTING PRESIDENT pro tempore. The Senate is in a period of morning business.

Mr. McCain. What time does the Senate intend to move back to consideration of the fiscal year 2010 Agriculture appropriations bill?

The ACTING PRESIDENT pro tempore. The majority still has 8 minutes remaining in morning business.

Mr. McCain. Mr. President, I ask unanimous consent that at this time we return to the Agriculture appropriations bill that was pending before the Senate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCain. I thank the Chair.

The ACTING PRESIDENT pro tempore. Morning business is closed.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 2997, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2997) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Kohl/Brownback amendment No. 1908, in the nature of a substitute.

Kohl (for Tester) amendment No. 2230 (to amendment No. 1908), to clarify a provision relating to funding for a National Animal Identification Program.

Brownback amendment No. 2229 (to amendment No. 1908), to establish within the Food and Drug Administration two review groups to recommend solutions for the prevention, diagnosis, and treatment of rare diseases and neglected diseases of the developing world.

Kohl (for Murray/Baucus) amendment No. 2225 (to amendment No. 1908), to allow State and local governments to participate in the Conservation Reserve Program.

Kohl (for Nelson (FL)) amendment No. 2226 (to amendment No. 1908), to prohibit funds made available under this act from being used to enforce a travel or conference policy that prohibits an event from being held in a location based on a perception that the location is a resort or vacation destination.

The ACTING PRESIDENT pro tempore. The Senator from Arizona is recognized.

AMENDMENT NO. 1910 TO AMENDMENT NO. 1908

Mr. McCain. I ask unanimous consent to call up amendment No. 1910 which is at the desk.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. McCain] proposes an amendment numbered 1910 to Amendment No. 1908.

Mr. McCain. I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To strike a setaside for certain grants authorized under the Rural Electrification Act)

On page 49, strike line 7 and all that follows through "U.S.C. 918a):" on line 12.

Mr. McCain. Mr. President, I intend to have three amendments considered. I discussed with the majority leader and the Republican leader how we

would proceed. So at this time, after I make a brief remark about amendment No. 1910, I will be calling up amendment No. 1912 and amendment No. 2030, both of which are at the desk.

Amendment No. 1910 eliminates, as suggested and recommended strongly by the President of the United States, the U.S. Department of Agriculture's High Energy Cost Grant Program. This is a \$17.5 million subsidy designed to pay for energy generation systems in rural areas. This program was proposed for termination by the administration because it is duplicative of existing programs, including USDA's own Rural Utilities Service Loan Program.

Under the fiscal year 2010 budget, the Rural Utilities Service Program would provide \$6.6 billion in electric loans at no cost to the taxpayers. In comparison, providing \$17.5 million in grants, as opposed to a loan, actually costs the taxpayer \$17.5 million. Moreover, Senators should know there is \$20 million in unobligated high energy cost grants still available from the previous year.

This is the submission to Congress, the budget of the U.S. Government for fiscal year 2010, by the Office of Management and Budget. Guess what. In there is a page that is titled "Termination: High Energy Cost Grant, Department of Agriculture." It goes on to say:

The administration proposes to eliminate the High Energy Cost Grants program because it is duplicative of and less effective than the Rural Utilities Service's electric loan program.

Those are not my words, those are the words of the Director of the Office of Management and Budget, who, at the direction of the President of the United States, prepared this document of certain programs that should be eliminated.

It goes on to say:

The 2010 budget proposes elimination of the duplicative High Energy Cost Grants program in favor of electric loans, which are more cost effective from the standpoint of the taxpayer. Using loans to provide support is less expensive than using grants because loans provide more support . . . with fewer appropriated dollars. For example, the 2010 budget provides for \$6.6 billion in electric loans at no cost to the taxpayer. In comparison, providing \$18 million in grants costs the taxpayers \$18 million. In addition, the funds for High Energy Cost Grants have not been obligated in a timely manner and \$20 million in balances from previous year funding are still available.

In other words, this amendment eliminates a duplicative, unnecessary program, according to the Director of the Office of Management and Budget, and at the President's request, he has sent over one of the programs they want eliminated. So somehow it ends up back in the appropriations bill.

It seems to me it is a pretty clear-cut case again that at some point we have to try to make some kinds of cost savings. I admit, as we are throwing around billions and trillions of dollars,

as we do here lately, \$17.5 million is probably not much money given the kind of behavior the Congress and the administration have been up to lately. I would still argue, though, to millions of Americans, including those in my home State of Arizona, \$17.5 million—in the view of the administration and a clear argument, it is not a complicated issue—should be eliminated.

I hope we will be able to vote on this amendment.

AMENDMENT NO. 1912 TO AMENDMENT NO. 1908

Mr. MCCAIN. Mr. President, I ask unanimous consent to set aside the pending amendment and call up amendment No. 1912 which is at the desk.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. MCCAIN] proposes an amendment numbered 1912 to amendment No. 1908.

The amendment is as follows:

AMENDMENT NO. 1912 TO AMENDMENT NO. 1908

(Purpose: To strike a provision relating to certain watershed and flood prevention operations)

On page 31, strike line 20 and all that follows through page 32, line 10.

Mr. MCCAIN. This amendment eliminates the U.S. Watershed and Flood Prevention Operations Program, also known as the Small Watersheds Program.

This program is a textbook example of how reckless earmarks can devastate a government program. Like the previous four Presidents' budgets, the administration proposes to terminate this account because Congress has earmarked virtually all of this program in recent years, meaning that the agency is unable to prioritize projects on any merit-based criteria such as cost effectiveness.

According to the Congressional Research Service, the Small Watersheds Program was 97 percent earmarked in fiscal year 2009, which severely marginalized the USDA's ability to evaluate and prioritize projects. Earmarks may partly be to blame for the findings of a 2003 Office of Management and Budget study that showed this program has a lower economic return than any other Federal flood prevention program, including those in the Army Corps of Engineers and the Federal Emergency Management Agency.

The onslaught of earmarks over the years has almost certainly contributed to the current backlog of about 300 unfunded authorized small watershed projects totaling \$1.2 billion. As it was originally intended, the Small Watersheds Program may be a worthwhile program. I am sure we will hear a vigorous defense of this program. But by inundating it with so-called congressionally designated projects, the pro-

gram is challenged to function properly to the point where the administration would rather see it gone.

Note this. Our friends on the Appropriations Committee have not given up on plundering it yet. This bill provides \$24.3 million for this program, including \$16.5 million in earmarks for projects such as \$2 million for the Pocasset River in Rhode Island, which is not authorized; \$1.5 million for Dunlop Creek in West Virginia, which is not authorized; and \$1 million for the DuPage County Watershed in Illinois, which is not authorized, to name a few.

I refer back again to the Office of Management and Budget publication entitled "Terminations, Reductions and Savings," where the administration proposes to terminate watershed and flood prevention operation programs. Congress has earmarked virtually all of this program in recent years, meaning that agencies are unable to prioritize projects on any merit-based criteria such as cost effectiveness.

So, again, these first two amendments, the President of the United States, the Office of Management and Budget, most any casual observer would argue need to be eliminated.

AMENDMENT NO. 2030 TO AMENDMENT NO. 1908

Mr. MCCAIN. Mr. President, I ask unanimous consent to set aside the pending amendment and call up amendment No. 2030, which is at the desk.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. MCCAIN] proposes an amendment numbered 2030 to amendment No. 1908.

The amendment is as follows:

AMENDMENT NO. 2030

(Purpose: To prohibit funding for an earmark)

On page 85, between lines 16 and 17, insert the following:

SEC. 7. None of the funds made available under this Act may be used for the Iowa Vitality Center, Iowa State University.

Mr. MCCAIN. This amendment is very simple. It prohibits funding of the \$250,000 earmark for the Iowa Vitality Center at Iowa State University.

This earmark is a textbook example of how difficult it is to stop funding for an earmark once it starts. According to the Web site of the earmark sponsor, since fiscal year 2001, the Iowa Vitality Center has received \$2,579,000. For what? What is so vital about the Iowa Vitality Center that it has required over \$2.5 million of scarce taxpayer funds?

Well, according to their own Web site, the purpose of the Iowa Community Vitality Center is to serve as a catalyst in fostering collaborative public-private partnerships among

nonmetro community interests to stimulate vitality and address barriers to growth.

I am not making that up. I am not making it up. That is what the Web site says. Let me repeat. We spent \$2.5 million. The purpose of the Iowa Community Vitality Center is to serve as a catalyst in fostering collaborative public-private partnerships among nonmetro community interests to stimulate vitality and address barriers to growth.

Is there anyone who has a clue as to what that means? I wanted to be clear. I am not questioning the merits of this program, but I am questioning the process. Why was this funding earmarked? If the Vitality Center is such a critical national priority at this time, why wasn't the funding authorized since 2001 or requested by the President in his budget submission?

The funding for the Vitality Center is often justified as helping communities "plan strategically" and as "representing diverse interest across the state." However, the sponsors of the earmark neglect to explain why 10 years of strategic planning have been insufficient to accomplish this center's stated purpose.

Our current economic situation and our vital national security interest concerns require, now more than ever, that we prioritize our Federal spending. We need to prove to the American people that we are serious about changing the way we do business and we should start with ending the practice of earmarking. We need to put our national priorities first and eliminate unnecessary wasteful earmarks such as the Iowa Vitality Center.

The Agriculture appropriations bill for the year 2010 spends about \$123 billion in direct and mandatory spending, an amount that is approximately \$234 million above the administration's budget request. We debate this legislation in the shadow of the fiscal year 2009 omnibus bill, the omnibus bill which doled out \$108 billion for U.S. Department of Agriculture programs, as well as the infamous economic stimulus package which provided another \$26.5 billion in agricultural spending. So 2009 is certainly a good year to be a U.S. Department of Agriculture program office.

I acknowledge that many of the programs funded by this are valid for providing important services to the agricultural community at large. I commend the members of the Senate Appropriations Committee for reporting this bill in a timely manner. I agree we should ensure that our farmers stay out of the red and that some Federal involvement is necessary to assist low-income families under the nutrition programs.

Unfortunately, Congress once again has conformed to the practice of diverting precious taxpayer dollars into

an array of special interest projects which have not been authorized or requested, and in the case of two of these, they have been requested to be terminated by the administration.

The committee report accompanying this bill contains 296 congressionally directed spending items, a fancy new term for "earmarks," totaling over \$220 million. None of these projects was requested by the administration. Many of them were not authorized or competitively bid in any way. No hearings were held to judge whether these were national priorities worthy of scarce taxpayer dollars. They are in this bill for one reason and one reason only—because of the prerogatives of a select few Members of the Senate to serve their own interests over those of the American taxpayer.

Let's take a look at some of the earmarks. Let's take a look at some of the earmarks that are in this bill and its accompanying reports. There is \$250,000 for gypsy moth research in New Jersey. Don't gypsy moths travel all over the country? Why just New Jersey? Over the past 10 years, the taxpayer has funded \$42.8 million worth of gypsy moth research.

There is \$500,000 for the hemlock woolly adelgid at the University of Tennessee. This is an aphid-like insect. That is a lot of money for that bug.

There is \$235,000 for noxious weed management in Nevada. I think a better term for this one is obnoxious. Over the past 10 years, over \$15.4 million has been earmarked for Nevada noxious weed management.

There is \$200,000 for cotton research at Texas Tech University. Congress subsidizes the industry, the cotton industry, to the tune of \$3 billion a year.

There is \$300,000 for floriculture at the University of Hawaii. Nearly \$3.5 million has been earmarked for floriculture in the past 10 years.

There is \$165,000 for the Maple Research Center at the University of Vermont. According to the center's director, Tim Perkins, Maple syrup science is a nose-and-mouth science. The technical term is organoleptic, which means you put it in your mouth and taste it, says Perkins. We get people who know the flavor of maple syrup, and off-flavors, and they try each one. Laboratory tests using gas chromatography provide a breakdown of the many compounds in the syrup, which supplements the tastebud approach. Since 1998, the University of Vermont Proctor Maple Research Center has received over \$2.1 million in earmarks.

There is \$75,000 for farm safety education for children in Iowa. Who better than a bureaucrat in Washington to teach a farmer's children to be safe. The 10-year total for earmarks for Iowa farm safety education—over \$4.2 million.

There is \$300,000 for shrimp aquaculture research at the University of

Southern Mississippi Thad Cochran Marine Agricultural Center. Over the past 10 years, we have earmarked over \$30.4 million on shrimp aquaculture research.

There is \$1 million for potato research at Oregon State University. We have earmarked, over the past 10 years, \$7.1 million for potato research.

There is \$600,000 which is gobbled down by the National Wild Turkey Federation for projects in Nebraska, Georgia, Mississippi, and South Carolina. Since fiscal year 2004, the National Wild Turkey Federation has received over \$1.7 million in earmarks.

There is \$265,000 for minimizing blackbird damage to sunflowers in North and South Dakota. This is an earmark "regular" for the Agriculture appropriations bill. Evidently the South Dakota sunflowers have a rather serious Alfred Hitchcock "Birds" problem. According to the USDA, blackbird management in North and South Dakota has received over \$1.2 million over the past 5 years.

There is \$200,000 for Washington State University to study goatgrass. Since 2003, \$767,000 has been earmarked for goatgrass research.

There is \$372,000 for the University of Pennsylvania to study dairy farm profitability. If you are relying on a federally mandated study to make your dairy farm profitable, you might want to find a new business plan, because nearly \$3.8 million has been earmarked for dairy farm profitability over the last 10 years.

There is \$288,000 for the Iowa Soybean Association. Since 2002, over \$3.3 million has been earmarked for the Iowa Soybean Association. There is \$1 million for Mormon cricket control in Nevada; the 10-year total for Mormon cricket control, nearly \$13.7 million. There is \$260,000 for wine grape research at Washington State University. According to Washington State University's own Web site, the wine industry generates \$3 billion in their State, so we are going to pour another \$260,000 into it. There is \$350,000 for the Wisconsin Department of Agriculture to support the "specialty meats industry." Specialty meats industry? Since 2004, the Wisconsin specialty meats industry has received over \$12.7 million in earmarks. There is \$340,000 for the Center for Beef Excellence in Pennsylvania. According to their own press release, the center was established by the Pennsylvania Department of Agriculture just last year. At least we can agree that a \$340,000 handout from Congress is quite a good start. Over \$1 million has been earmarked to the Center for Beef Excellence since 2005. There is \$450,000 for the University of Northern Iowa to study agriculture-based lubricants. They have received over \$3 million in the last 10 years.

It is not surprising that the largest earmark in this bill goes to Hawaii.

The Aloha State bags \$5 million to continue construction of an Agricultural Research Service center to study agricultural practices in the Pacific. As my colleagues might know, ARS construction is one of the most heavily earmarked accounts in government, so much so that the President's budget actually proposed zeroing out Agricultural Research Service center construction for fiscal year 2010 because "Congress routinely earmarks small amounts of funding for [these projects] located throughout the nation. The result of scattering funding in this manner is that . . . few, if any, of the projects are able to reach the critical threshold of funding that would allow construction to begin. Funding construction over such a long time significantly increases the amount of money needed to fully complete these projects as well as postponing their completion for many years."

So here we have a program that is earmarked so severely that it delays and drives up the cost of approved construction projects. Not only are we defiantly funding this Hawaiian facility, the bill provides a total of \$47 million for a list of 15 of these facilities ranging from \$4 million for a fruit lab in West Virginia to \$2 million for an animal waste research facility in Kentucky.

Another amendment I have filed proposes striking the \$50.7 million contained in this bill for USDA's Resource Conservation and Development Program, known as RC&D. The RC&D Program was created in 1962 to promote resource conservation through community-based conservation leadership councils. The RC&D councils have helped to leverage local funding for efforts such as soil mapping or erosion control for rural areas. The administration supports terminating this program because, in their own words:

After 47 years, the goal of the RC&D program has been accomplished. These councils have developed sufficiently strong state and local ties . . . and are now able to secure funding for their continued operation without Federal assistance. The program has been in operation for decades and these councils have a proven track record of success, showing that they have outlived the need for Federal funding.

A half-century-old program proposed for termination by this administration, yet retained by appropriators for its spoils.

I could go on for a long time.

This bill funds several other government programs that were proposed for termination in the President's budget. I filed amendments to strike these programs as well as zero out the ARS construction account. If successfully adopted, these amendments would save taxpayers over \$144.5 million. As I have said throughout my comments, some of these programs may have merit and may be helpful to the designated communities. But considering our current

budgetary crisis, it is inappropriate to include them in this year's agricultural spending bill, especially when they have been identified for termination or reduction.

I hope my colleagues will agree that we have higher spending priorities that are directly related to the purposes of this Agriculture bill. This bill is intended to address farmers, women, children, and rural communities with the greatest need and should not be used as a vehicle for piggybacking pet projects to get the support of special interest constituents.

It is no surprise that many of these earmarks are not included for practical purposes. I know many of my colleagues have spoken about the economic struggles of America's hard-working farmers and low-income families. The farmers and struggling families I know are tired of watching their hard-earned money go down the drain. I intend to fight every single unnecessary, unrequested, unauthorized earmark in this and every other appropriations bill.

I filed 313 amendments to this bill. The bulk of those amendments seek to strike the 296 earmarks, now humorously called "congressionally directed spending items," in the committee report on this bill. I have now offered only three of these amendments. Let me assure my colleagues I have no problem with offering, debating, and voting on each and every one of the amendments I have filed. The time has come to end this practice.

This first amendment, which we may vote on today, I want to emphasize, eliminates, as recommended by the President and the Office of Management and Budget, the U.S. Department of Agriculture's High Energy Cost Grants Program, a \$17.5 million subsidy designed to pay for energy generation systems in rural areas. It was proposed for termination by the administration because it is duplicative of existing programs. Under the fiscal year 2010 budget, the rural utility service program would provide \$6.6 billion in electric loans at no cost to the taxpayers. Senators should know there is \$20 million in unobligated high energy cost grants still available from last year.

I urge a "yes" vote on my amendment.

I yield the floor and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KOHL. Mr. President, the Senate began work on the Agriculture appro-

priations bill last Thursday. Senator BROWNBACK and I were here then to consider amendments Senators might wish to offer. We were back on the bill Friday, and we were again prepared to consider amendments. It is my hope we can complete action on the bill today. The filing deadline for first-degree amendments was 3:30, and a cloture vote is scheduled for 5:30. Once we finish this bill, the Senate still has important work to do this week before the start of the August recess. I hope any Senator who has an amendment to offer will come to the floor in the next few hours to see if we can dispose of all remaining issues and make it possible to go to final passage as early as this evening.

AMENDMENT NO. 2233 TO AMENDMENT NO. 1908

I ask unanimous consent to set aside the pending amendment and call up the following amendment which is at the desk and ask for its immediate consideration: Kohl amendment No. 2233.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL] proposes an amendment numbered 2233 to amendment No. 1908.

Mr. KOHL. I ask unanimous consent that reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide the Food and Drug Administration the ability to collect user fees as authorized by the Family Smoking Prevention and Tobacco Control Act)

On page 59, line 22, strike "\$2,995,218,000" and insert "\$3,230,218,000".

On page 60, line 9, strike "and".

On page 60, line 12, after "expended", insert "; and \$235,000,000 shall be derived from tobacco product user fees authorized by the Family Smoking Prevention and Tobacco Control Act (Public Law 111-31) and shall be credited to this account and remain available until expended".

On page 60, line 14, strike "and", and insert after "and tobacco product" after "generic drug".

On page 61, line 12, strike (7) and insert "(8)"; after "Research;" insert "(7) \$216,523,000 shall be for the Center for Tobacco Products and for related field activities in the Office of Regulatory Affairs;"; and strike "\$115,882,000" and insert "\$117,225,000".

On page 61, line 15, strike "(8)" and insert "(9)".

On page 61, line 16, strike "\$168,728,000" and insert "\$171,526,000".

On page 61, line 17, strike "(9)" and insert "(10)".

On page 61, line 18, strike "\$185,793,000" and insert "\$200,129,000".

Mr. KOHL. I ask unanimous consent for the adoption of this amendment and the Tester amendment No. 2230 which has been approved by both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments (Nos. 2233 and 2230) were agreed to.

Mr. KOHL. Mr. President, I move to reconsider the vote.

Mr. BROWNBACK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BROWNBACK. Mr. President, I ask my colleagues, if people have amendments, that they come down to the floor now and start working on these. It would be my hope we can move through this bill as fast as possible so that we can get to the debate on Judge Sotomayor and have as much time as possible to deal with that. I urge colleagues to start working with us on these issues. By unanimous consent, the cloture vote has been scheduled for 5:30 today. There are things we need to get resolved; they should be taken care of now.

AMENDMENT NO. 2229, AS MODIFIED

Mr. BROWN. I send a modification to my amendment No. 2229 to the desk and ask unanimous consent that it be accepted as modified.

The ACTING PRESIDENT pro tempore. Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) The Commissioner of Food and Drugs may establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and treatment of rare diseases: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of rare diseases, including specific expertise in developing or carrying out clinical trials.

(b) The Commissioner of Food and Drugs may establish within the Food and Drug Administration a review group which shall recommend to the Commissioner of Food and Drugs appropriate preclinical, trial design, and regulatory paradigms and optimal solutions for the prevention, diagnosis, and treatment of neglected diseases of the developing world: *Provided*, That the Commissioner of Food and Drugs shall appoint 8 individuals employed by the Food and Drug Administration to serve on the review group: *Provided further*, That members of the review group shall have specific expertise relating to the development of articles for use in the prevention, diagnosis, or treatment of neglected diseases of the developing world, including specific expertise in developing or carrying out clinical trials: *Provided further*, That for the purposes of this section the term "neglected disease of the developing world" means a tropical disease, as defined in section 524(a)(3) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(a)(3)).

(c) The Commissioner of Food and Drugs shall—

(1) submit, not later than 1 year after the date of the establishment of review groups

under subsections (a) and (b), a report to Congress that describes both the findings and recommendations made by the review groups under subsections (a) and (b);

(2) issue, not later than 180 days after submission of the report to Congress under paragraph (1), guidance based on such recommendations for articles for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world; and

(3) develop, not later than 180 days after submission of the report to Congress under paragraph (1), internal review standards based on such recommendations for articles for use in the prevention, diagnosis, and treatment of rare diseases and for such uses in neglected diseases of the developing world.

Mr. BROWNBACK. This is an amendment that has been cleared by both sides. It is on neglected and rare diseases. Senator BROWN has asked to be a cosponsor. I ask unanimous consent that the pending amendment be set aside and that this be considered the pending amendment and that it be passed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. If there is no further debate on the amendment, the question is on agreeing to amendment No. 2229, as modified.

The amendment (No. 2229), as modified, was agreed to.

Mr. BROWNBACK. What we are trying to do is to work through the amendments to the degree we can. We certainly want to. I ask our colleagues to bring those to the floor as soon as they possibly can.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. HAGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mrs. HAGAN. Mr. President, I ask unanimous consent to speak for 10 minutes as in morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SOTOMAYOR NOMINATION

Mrs. HAGAN. Mr. President, today I am pleased to rise in support of Judge Sonia Sotomayor's nomination to be an Associate Justice of the Supreme Court of the United States. Judge Sotomayor's background demonstrates that she is an extremely well-qualified, mainstream judge who has the utmost respect for precedent and believes in fidelity to the law.

I have always said I do not believe in a litmus test for judicial nominees, and I will look at the nominee's record as a whole. Judge Sotomayor's record, in its entirety, is nothing short of impressive. With 17 years on the Federal bench, she has more Federal judicial

experience than any Supreme Court nominee in 100 years.

Judge Sotomayor has a compelling, "pull yourself up by your bootstraps" personal story. She was raised by a single mom who emphasized education as she struggled to support her family while working as a nurse. With her mother's strong work ethic and focus on education deeply ingrained in her, Judge Sotomayor went on to graduate summa cum laude from Princeton University, and she received her law degree from Yale Law School, where she was editor of the Yale Law Journal.

She then became a prosecutor in the Manhattan District Attorney's office, where she was tough on criminals and gained valuable perspective for her later career as a judge. She also became active in many areas of her community, showing her desire to serve others and promote justice in society. Having served as a volunteer for many efforts in my hometown of Greensboro, North Carolina, I know how serving others can enhance one's understanding and appreciation of the world.

After her time as a prosecutor, Judge Sotomayor went into practice as a commercial litigator, where she dealt with business and finance law—an area of importance to my State of North Carolina. In 1991, upon the recommendation of then-Senator Daniel Patrick Moynihan of New York, she was nominated by President George H.W. Bush to serve as a Federal judge for the Southern District Court of New York, and in 1992 she was unanimously confirmed for that position by the Senate.

While serving as a district court judge, she was known for her toughness, fairness, and dedication to the law—characteristics of a strong judge. Because of her outstanding record on the district court level, Judge Sotomayor was nominated, in 1997, by President William Jefferson Clinton, to serve as a judge on the U.S. Court of Appeals for the Second Circuit. In 1998, the Senate confirmed her by a wide margin.

Among the Senators voting for her confirmation was former North Carolina Senator Jesse Helms. I would like to think that Senator Helms saw in Judge Sotomayor the same qualities President Obama saw: fairness of mind, supreme intellect, and an unsurpassed devotion to the law and to our system of government.

Some opponents have repeatedly brought up a few select comments made by Judge Sotomayor to suggest that she will not be impartial. However, Judge Sotomayor has made it clear she does not let her background influence her interpretation of the law. Her statements to the Judiciary Committee and her 17-year record on the bench confirm this.

As Judge Sotomayor has said:

My record shows that at no point or time have I ever permitted my personal views or

sympathies to influence an outcome of a case. In every case where I have identified a sympathy, I have articulated it and explained to the litigant why the law requires a different result.

Judge Sotomayor has also said that as much as her experiences influence her perspective, they have also taught her to be aware of other people's perspectives. In 2001, she said:

I am reminded each day that I render decisions that affect people concretely and that I owe them constant and complete vigilance in checking my assumptions, presumptions and perspectives and ensuring that to the extent that my limited abilities and capabilities permit me, that I reevaluate them and change as circumstances and cases before me require.

As Judge Sotomayor said in her confirmation hearing, her underlying judicial philosophy is "fidelity to the law." In an independent study, Supreme Court expert Tom Goldstein looked at 97 race-related cases in which Judge Sotomayor participated while on the Second Circuit. He found that she and the rest of her panel "rejected discrimination claims roughly 80 times and agreed with them 10 times." The circuit rejected discrimination claims by a margin of 8 to 1. Goldstein wrote: "Of the 10 cases favoring claims of discrimination, 9 were unanimous" and "of those 9, in 7, the unanimous panel included at least one Republican-appointed judge."

"Given that record," Goldstein concluded, "it seems absurd to say that Judge Sotomayor allows race to infect her decisionmaking."

Judge Sotomayor has also demonstrated she does not legislate from the bench, and she gives deference to Congress in clarifying the intent of laws. In her dissent to the majority's opinion in *Hayden v. Pataki*, Judge Sotomayor wrote:

The duty of a judge is to follow the law, not to question its plain terms. I do not believe that Congress wishes us to disregard the plain language of any statute or to invent exceptions to the statutes it has created.

She also said:

I trust that Congress would prefer to make any needed changes itself, rather than have courts do so for it.

Additionally, a comprehensive study of Judge Sotomayor's criminal appellate decisions by the majority staff of the Senate Judiciary Committee found, as an appellate judge, Sotomayor sat with Republican-appointed judges on more than 400 criminal cases. In those cases, she agreed with all Republican-appointed judges 97 percent of the time; and she agreed with at least one Republican-appointed judge 99 percent of the time.

Judge Sotomayor's sensible attitude toward following the law and her ability to objectively evaluate all angles of her cases has resulted in high ratings and endorsements by numerous organizations.

The American Bar Association unanimously found Sotomayor to be "well qualified," which is the highest rating the ABA gives to judicial nominees. The Congressional Research Service conducted an analysis of her opinions and concluded:

As a group, the opinions belie easy categorization along any ideological spectrum. . . . Perhaps the most consistent characteristic of Judge Sotomayor's approach as an appellate judge has been an adherence to the doctrine of *stare decisis*, i.e., the upholding of past judicial precedents.

Judge Sotomayor has an impressive list of law enforcement endorsements and supporters, including the International Association of Chiefs of Police; the National Association of Police Organizations; the National District Attorneys Association; the Fraternal Order of Police; the National Latino Peace Officers Association; the Federal Law Enforcement Officers Association; the Federal Hispanic Law Enforcement Officers Association; the National Organization of Black Law Enforcement Executives; and the National Sheriffs' Association.

Judge Sotomayor has also been endorsed by the U.S. Chamber of Commerce, which stated:

The Chamber evaluated Judge Sotomayor's record from the standpoint of legal scholarship, judicial temperament, and an understanding of business and economic issues. Based on the Chamber's evaluation of her judicial record, Judge Sotomayor is well-qualified to serve as an Associate Justice of the U.S. Supreme Court.

The nonpartisan Brennan Center for Justice reviewed all of Judge Sotomayor's constitutional law decisions and said:

Based on this exhaustive review, the conclusion is unmistakable: in constitutional cases, Judge Sotomayor is solidly in the mainstream of the Second Circuit.

Judge Sotomayor's former law clerks wrote a letter endorsing her nomination, in which they said:

As former law clerks to Judge Sotomayor, each of us can attest to her intellectual prowess, extraordinary work ethic, and commitment to the rule of law. Working for Judge Sotomayor is an awe-inspiring experience. We each had the privilege of working closely with her as she confronted, and resolved, incredibly complex and intellectually demanding legal challenges. Judge Sotomayor approaches each case with an open mind and arrives at her decision only after carefully considering all of the pertinent facts and applicable rules of law.

The law clerks said they agree with many of Judge Sotomayor's other colleagues, who "respect her intellectual dynamism, collegiality, and balanced, fair jurisprudence."

I would like to thank and congratulate the members of the Judiciary Committee for holding an extraordinarily civil and open Supreme Court nomination process. I commend President Obama for selecting a woman, a Hispanic, and, above all, an extremely well-qualified nominee. I am thrilled to

have the opportunity to be a part of this historic moment, and if she is confirmed, I believe she will serve our country well.

Based on my conversations with the nominee, her statements in her confirmation hearings, and my review of her record, I intend to support her confirmation when it is voted upon later this week, and I urge my colleagues to do the same.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin.

Mr. KOHL. Mr. President, I join my colleagues in congratulating Senator LEAHY and Senator SESSIONS for their work on the Sotomayor nomination. The process was fair to both sides, and, most importantly, fair to the nominee.

I am pleased to rise in support of Judge Sotomayor, an individual whose life story is an inspiration to millions of Americans. A child of immigrants with modest means, Judge Sotomayor has risen by dint of exemplary academic accomplishment and hard work to the cusp of confirmation to our Nation's highest Court.

But Judge Sotomayor is much more than just a story of accomplishment. She has shown herself to be a judge truly worthy of elevation to the Supreme Court. Both on the bench and before this committee, Judge Sotomayor has proved she has the necessary character, competence, and integrity to serve on the Supreme Court. Her distinguished 17-year record on the bench demonstrates a commitment to fair and impartial application of the law and respect for the values which make up our Constitution.

At her hearing, Judge Sotomayor assured us she will listen with an open mind to all sides of an argument and that she will be mindful of the very real impact her decisions will have on each and every American. She pledged fidelity to the Constitution and to the Court's precedent, as well as a responsibility to cautiously review precedent when justice requires.

As we conclude the Senate's action on Judge Sotomayor's nomination this week, I believe we need to reflect upon the role that confirmation hearings play in the Senate's duty to advise and consent. While I have no reservations about my support for Judge Sotomayor, I share the concerns expressed by many Americans, legal commentators, and others on the Judiciary Committee about our committee's ability to have candid and substantive conversations with nominees about the issues Americans care about.

We all know the confirmation process is crucial. It is the public's only opportunity to learn about a nominee before he or she serves for life on the highest Court in our land. But, for many years now, we have seen a familiar pattern from nominees—Democratic and Republican alike—who have learned the

path of least resistance is to limit their responses and cautiously cloak them in generalities.

Understandably, nominees do not want to risk their confirmation by saying anything that might provoke potential opponents. We cannot ask nominees to disclose how they would vote on cases that might come before them. But it is reasonable for us to ask them to speak more openly about past Supreme Court decisions and how they would decide cases that are close calls—what reasoning they would use and what factors they would consider.

The concerns I raise do not reflect any personal criticism about Judge Sotomayor. I think she responded to our committee's questions with great intellect and sincerity and that she has rightly earned bipartisan praise.

However, going forward, I hope together we can explore ways to achieve the greater candor that the confirmation process demands and deserves. For example, we could convene a bipartisan group of Judiciary Committee members, members of the bar, constitutional scholars, and perhaps even members of the media who have experience following the Court and our hearings to help us determine what specific questions we can and should expect substantive answers about. If we can do this, then the committee's unique opportunity to engage nominees in the great legal questions facing our Nation will more effectively serve the Senate as we fulfill our constitutional duty.

In the meantime, I commend President Obama for nominating Judge Sotomayor—a woman of great ability who has demonstrated an enduring commitment to public service and to the law. I look forward to her tenure on the Court.

AMENDMENT NO. 2241 TO AMENDMENT NO. 1908

Mr. JOHANNIS. Mr. President, I ask unanimous consent that the pending amendment be set aside so that I may call up amendment No. 2241.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

The clerk will report.

The bill clerk read as follows:

The Senator from Nebraska [Mr. JOHANNIS], for himself and Mr. NELSON of Nebraska, proposes an amendment numbered 2241 to amendment No. 1908.

Mr. JOHANNIS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To provide funding for the tuberculosis program of the Animal and Plant Health Inspection Service)

On page 19, line 9, before the period, insert the following: “: *Provided further*, That of the amount available under this heading, at least \$17,764,000 shall be used for the tuberculosis program (including at least \$3,000,000

for tuberculosis indemnity and depopulation)”.

Mr. JOHANNIS. Mr. President, I rise to discuss my amendment to increase funding for USDA's tuberculosis program by \$2 million.

In early June, TB was discovered in a beef cattle herd in Rock County, NE. As many of my colleagues know, this is a disease that can spread very quickly among cattle. It is also transmissible to humans.

This is not just a Nebraska issue or a Midwest issue. As I speak, California, Michigan, Minnesota, and New Mexico are battling the effects of TB. Other States, including Colorado, South Dakota, and Texas have had TB scares as well. Although, thankfully, up to this point they have not seen any change in their TB status. This problem could impact the beef industry nationwide, and it is critical that we do everything we can to eliminate it immediately when it is discovered.

In Nebraska, thankfully, only two animals in the entire herd tested positive for the disease, and they were put down to prevent further spread. Since that time, Nebraska State officials have worked side by side with USDA officials to test the infected herd, as well as several neighboring herds, which is the process. Based on the latest reports from home, 8,900 cattle have been tested to date, and all have, thankfully, tested negative for TB. That is great news.

I commend the efforts of the veterinarians and the government officials on the ground in Nebraska. I thank those officials for their efforts. They have been aggressively dealing with this issue every day since the initial discovery. I wish to thank the USDA specifically for providing significant expertise and personnel to assist with the ongoing testing. The Department's assistance has been sound and it has been steady. We greatly appreciate it, but the work is not yet done. The testing is not quite complete. Hopefully, the results will keep coming back negative, but, regardless, we are going to remain vigilant.

We must make sure the USDA has the resources on hand to respond in the event that further cases of TB are discovered. That could be anywhere in this country. TB can have a crippling impact on a State's beef industry. It can negatively impact the ability of State producers to shift cattle State to State, and, of course, potentially it can have an impact on export markets.

Ranchers cannot afford to have their State lose its TB-free status. Anytime a disease such as TB is discovered in a herd, it is absolutely critical the infected herd be depopulated immediately. I say that from my experience as a former Secretary of Agriculture. Depopulation is oftentimes essential. Doing so significantly decreases the likelihood of the spread of the disease.

It also reassures the rest of the beef industry that we will always respond decisively to combat the spread of the animal disease.

We need to send a strong signal to our producers that they will have our support if they come forward when they discover the herd has a problem. If depopulation indemnity funds are not available, a producer literally may hesitate to disclose the information. Then the problem festers and it festers and it spreads. We simply cannot take that kind of risk. Consumer confidence and producer trust are far too important.

It is imperative that we make sure USDA has the funding and the tools on hand to deal with existing TB problems and to take swift action in the event of future TB discoveries. That is why I am offering this amendment—to make sure the resources are there.

At this point I ask unanimous consent that a letter supporting my amendment from the National Cattlemen's Beef Association be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL CATTLEMEN'S
BEEF ASSOCIATION,
Washington, DC, August 3, 2009.

Hon. MIKE JOHANNIS,
U.S. Senate,
Washington, DC.

DEAR SENATOR JOHANNIS: I am writing today in support of your amendment to the Fiscal Year 2010 Agriculture Appropriations bill that increases United States Department of Agriculture (USDA) funding for bovine tuberculosis (TB) indemnity and depopulation. Bovine TB is a contagious animal disease that the cattle industry and Federal government have been working to eradicate for close to 100 years. In order to eventually eradicate this disease, infected herds must be depopulated quickly and the fanner or rancher must be compensated in a fair and equitable way for the value of lost cattle. Your amendment will go far in helping with this effort.

The work done by the Animal and Plant Health Inspection Service (APHIS), the Food Safety Inspection Service (FSIS), and state and industry partners, has been critical in containing and managing this disease. FSIS maintains a robust TB surveillance program at harvesting facilities to ensure that no cattle with TB enter the food supply. This illustrates the effectiveness of the food safety measures utilized in the beef industry. In recent years, APHIS has intensified their TB surveillance and has indicated that the disease has nearly been eradicated. We also know that wildlife play a critical part in the transmission of the disease, and industry is working with both Federal and state governments to address this.

In our combined effort for eventual eradication, the national tuberculosis eradication program has successfully reduced the incidence of the disease in U.S. cattle. There continues, however, to be a low incidence of TB as evidenced by the handful of newly identified infected herds over the past several years. These additional cases are in part due to intentional intensified surveillance activities, and the infected animals, along

with their herd mates, are then quarantined in order to control the disease and minimize its impact on cattle movement and markets. This has proven to be the most effective method to protect our domestic cattle herd since the national program began in 1917.

We support USDA's efforts to eradicate this disease, but historically we have not seen enough funding to adequately compensate farmers and ranchers for cattle that had to be depopulated. It is evident with the limitations of current technology, the wildlife vector, and the complicated nature of TB, that the current amount of Federal funding is not adequate. More funding and research is needed to provide better answers and solutions. Until those solutions are found, we need timely and adequate funding to depopulate any current beef herds and compensate cattle producers for their losses. Since TB is a concern across the country, this amendment will help to provide that needed compensation and allow the TB eradication program to be successful.

We urge the Senate to vote YES on your amendment during floor consideration of this bill. Thank you for your leadership and support of U.S. cattle producers.

Sincerely,

GARY VOGGT,
President.

Mr. JOHANNIS. Finally, I urge my colleagues to support this very important amendment to make the resources available to the USDA, and I urge my colleagues, if they have any questions, to get in touch with us. This is a very important issue.

With that, I thank the Chair, and I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin.

Mr. KOHL. Mr. President, the Senator's amendment would increase the amount in this bill from \$15.7 million to \$17.7 million. The amendment would require at least \$3 million to compensate producers for losses. The Secretary currently has access to the Commodity Credit Corporation to compensate producers, and we hope the Secretary will use those funds as needed.

Since this amendment would reduce other animal and plant health activities, I must oppose it at this time.

The PRESIDING OFFICER (Mrs. HAGAN). The Senator from Kansas is recognized.

Mr. BROWNBACK. Madam President, I ask unanimous consent to speak as in morning business for such time as I may consume.

The PRESIDING OFFICER. Without objection, it is so ordered.

GUANTANAMO BAY

Mr. BROWNBACK. Madam President, the reason I ask that on this bill—and I do urge my colleagues to come forward to speak on the Agriculture appropriations bill. We have already cleared some amendments, and we need to move forward.

Something happened yesterday that affected my State directly, and that was the statement by the administration—or leak from the administration—that they are considering moving

Guantanamo Bay detainees to my State, associated with Fort Leavenworth. This has riled up everybody. I was just there this morning, and we had 100 people who came out after very short notice. It is virtually unanimous in their opinions—not everybody but close to everybody is opposed to this idea for a multiple set of reasons.

Moving the Guantanamo Bay detainees to Fort Leavenworth and the Fort Leavenworth area would not work, to start off with, and will significantly hurt the core educational and international mission of the fort. On top of that it is totally unnecessary. I hope the administration will start to rethink this idea of moving the Guantanamo Bay detainees. I think it is a bad idea that we replicate the facility we already have at Guantanamo Bay somewhere in the United States because we already have a facility to hold the detainees. We already have a facility to try the detainees. It is all set up. I was there. I led a congressional delegation a couple of months ago. They are being humanely treated, and if they are not, and if there are credible reports that they are not, then let's work on fixing Guantanamo Bay rather than moving the detainees to the United States.

If there are problems, let's fix them rather than just say we are going to change the name of the place and we are going to move the detainees from Guantanamo Bay to Leavenworth. We are not going to change the opinion of the world of the United States one iota by substituting the name "Leavenworth" for the name "Guantanamo Bay," creating a replica of what we already have at Guantanamo Bay, only somewhere else. It would cost hundreds of millions of dollars we don't have when we already have an \$11 trillion debt, and it is growing at a rate of nearly \$2 trillion a year. So why would we spend hundreds of millions of dollars doing something that is not going to change world opinion, replicating a facility that we already have, that slows the process? This doesn't make any sense.

On top of that, what is being considered at Leavenworth would not work. The fort at Leavenworth—if I could just talk to my colleagues about this, and I hope they will look at the factual setting. Fort Leavenworth is one of the smallest Army bases we have around the world. It is 8 square miles. It butts up in and is a part of an urban area of Kansas City. It has on its border a river and a train that goes through about every 25 minutes. It is not the secure facility one would need to have for these detainees. We don't have any setbacks like we have in a number of other facilities, and it has one of the highest population densities per square mile or square foot of any of our military bases because it houses the Command and General Staff College of the military.

If I could just point out that facility to my colleagues—and I hope some of them come and attend and address the Command and General Staff College. We get students from around the world on a regular basis at that facility. Generally, some 90 countries at any one point in time have students at the Command and General Staff College. Of these 90 countries that send students for their Army training for their military, half of those students will become general flag officers before their career is done. A number of them will become civilian leaders in their own country as well. So you get the cream of the crop from around the world. They come here. They also meet with our future military leaders, and this is the training center they have. It is the Command and General Staff College at Fort Leavenworth.

The primary mission of Fort Leavenworth is that training as well as that relationship and integration between our U.S. Army forces and forces of militaries, Army forces from around the world, which is critically important when you go into places such as Pakistan or Afghanistan or you are working with the Jordanians or the Egyptians, just to name a few. They send leaders from all of those countries, future flag officers to Fort Leavenworth to be trained. We have already heard in canvassing students from Jordan, Egypt, and Pakistan that they will pull their students from Fort Leavenworth if the detainees are moved there. They don't want to have their military leaders, their future military leaders at the same place that the detainees are being held in the United States, and they have already stated that to us.

So we are going to hurt the core mission of Fort Leavenworth in a facility that doesn't have setbacks to safely handle this for no gain. I would point out that I spoke with the commanding general at Fort Leavenworth yesterday. I called him after I heard about this report on MS-NBC. That was how I got the news of it. My wife was on the Internet, and she was on MSNBC's Web site and she sees that they are thinking about moving the Gitmo detainees to either Leavenworth or Michigan. That didn't set very well with me, that that is how I learned about this to start off with.

As I started calling around, I called the commanding general, and he said he learned about it pretty late as well and has difficulties, although he is a military man. He will salute and take orders and do what he is directed to do, but he is not—he needs to be asked and brought in to testify about what his opinion would be about this issue. I talked to the Governor in Kansas last night. The Governor, a Democratic Governor, has issued a statement previously opposed to this move taking place to Fort Leavenworth. The Congresswoman from the area was there

this morning opposed to this move. The mayor of Leavenworth was there opposed to this move.

We have voted in this body virtually unanimously—close to a unanimous vote—that you have to work with local officials before the Gitmo detainees can be moved anywhere into the United States. Well, the local officials are uniformly opposed to this at Leavenworth, and we wake up and it is in the morning paper and nobody has been consulted about it.

I wish to say the detainees in my estimation deserve appropriate humane treatment. They deserve to be treated under our international obligations. If they are not getting that, then that needs to be changed, and it needs to be changed at Guantanamo Bay. I hope we would have international investigations to tell us what is not being met that we are required to do, that is not being done. I have not seen any credible international reports that say there are things we are not doing that we should do at Guantanamo Bay. There is a gray category that is involved where you have enemy combatants who don't represent a foreign country, and that is a big part of our problem. There is also a very tough area, and that is—I saw this when I was at Guantanamo Bay—a number of the detainees are continuing the fight today. While in prison, at Gitmo, they continue the fight. So whoever gets these or takes these detainees is going to have to be prepared to have the continuation of the war on terrorism happening near them and happening in the prison facility. That is not everybody, but some of them continue to fight in prison. That is going to be a difficult situation for whoever is to handle it.

On top of that, our folks at Leavenworth—we have prisoners in there, and the town is proud of their ability to handle various prisoners. Their concern is not keeping the detainees in, because you can staff up for that, but it is keeping out people who seek to get in or make a statement in that area. Plus, they would have to scale up their facilities.

We have a medium-security Bureau of Prisons facility. It is not maximum security. We have a dominated medium-security disciplinary barracks there, and we have space for 25 maximum-security prisoners—only 25. You would have to move out all of the current military personnel convicted in military courts who are held in the disciplinary barracks. We are not situated to handle this. It would cost a huge amount of money, and it would not be safe to do it at Leavenworth. It is a bad idea for us to do that there.

I ask the President to come to Leavenworth. He was invited by the mayor this morning. He can look at the facility and examine it himself. The Attorney General can come and examine the facility, look at it, and see what esti-

mation they come up with after examining and looking at the facility. I understand they are looking at some sort of hybrid facility. We don't have the situation to be able to house it in Kansas.

On top of that, I ask the President to really listen to the American people. The American people don't want these detainees moved to the United States. They don't want to hurry up artificial timelines set for moving the detainees to the United States, and they feel the President should be listening to them and not to European leaders or somebody around the world who doesn't like the Guantanamo Bay facility and thinks it has a bad name. Listen to the American people on this issue.

I ask that the President come and talk to the Members of Congress who may be impacted by this and ask our opinions and look at what is taking place. This is being rushed. It is on an artificial time deadline. It doesn't need to happen. It is replicating a facility we have, at a cost of hundreds of millions of dollars, and it will slow the process down. It is a bad idea chasing a bad idea with an artificial time limit. I ask that the President not do that.

My colleague and I from Kansas will fight every step of the way to keep this facility from being moved to Kansas. We are representing our constituents, who don't want these detainees moved to Kansas. We are going to fight it every step of the way.

With that, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KOHL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Madam President, I received a Statement of Administration Policy from the Executive Office of the President relating to the Agriculture appropriations bill. I will read from that document at this time:

The administration strongly supports Senate passage of H.R. 2997, with the Committee-reported text of S. 1406, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010.

A strong, vibrant rural America is central to the Nation's future. The bill, as reported by the Committee, makes important investments in infrastructure so economic progress does not bypass rural communities. The legislation also provides the resources necessary to keep food and medicines safe and reliable. It provides critical support for farmers to continue the Nation's leading role in feeding the world. In addition, this legislation addresses chronic problems facing Americans, including poverty, nutrition, and housing.

Moreover, the legislation responds to the President's call for investments in programs

that work while ending programs that do not. This legislation gives priority to merit-based funding in critical infrastructure programs. The Administration urges the Congress to continue to apply high standards to funding decisions so taxpayer money is spent efficiently and effectively.

Madam President, I am grateful that the executive branch has recognized the good work done to craft this bill in a way that meets the serious requirements of our country. Again, I thank the ranking member, Senator BROWNBACK, for his help. This is a good bill, and I urge all Senators to support its passage.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. UDALL of New Mexico. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. UDALL of New Mexico. Madam President, I ask unanimous consent to speak as in morning business for 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

SOTOMAYOR NOMINATION

Mr. UDALL of New Mexico. Madam President, I rise today to talk about Judge Sotomayor's experience, and I also want to talk about empathy.

In the period since President Obama nominated Sotomayor, some of her opponents have done their best to give empathy a bad name. I think that is a shame. It would be sad for us to confirm Sonia Sotomayor but allow her empathy to be discredited as a human emotion and a judicial asset.

During his confirmation hearings, Clarence Thomas said:

What I bring to this Court, I believe, is an understanding and the ability to stand in the shoes of other people across a broad spectrum of this country.

Justice Thomas's description of empathy captures one thing Sotomayor would bring to this Court: a diversity of experience and the ability to stand in the shoes of other people.

During her opening statement before the Judiciary Committee, Judge Sotomayor talked about her experience as a prosecutor in New York for legendary district attorney Bob Morgenthau. She said:

I saw children exploited and abused. I felt the pain and suffering of families torn apart by the needless deaths of loved ones. I saw and learned the tough job law enforcement has in protecting the public.

According to those who knew and worked with her, Judge Sotomayor was an excellent prosecutor. She knew the law, she studied the facts, and she did the hard work to keep people safe from crime. In this difficult job, she benefited from her empathy. Judge Sotomayor felt the pain and suffering

of families destroyed by crime. She felt the difficulties law enforcement officers face, and she understood that her job was not just about enforcing the law, it was about ending the suffering crime brings.

During her testimony, Judge Sotomayor talked about the "Tarzan" case, a famous burglary and murder case she prosecuted. A quarter century later, she still feels deeply the impact of that crime. I was struck by her description of how the murder of a son devastated the lives of his mother and grandmother, how one act of violence produced ripples that destroyed a family and weakened a community, and how the family and the community demanded justice.

When I served as a Federal prosecutor, I learned that empathy is every bit as important as legal knowledge and good judgment. A prosecutor who reads the facts of a crime and cannot empathize with those involved is not just a strange person, he or she is likely to be an ineffective lawyer. A proper respect for the law demands a recognition that individuals involved in a legal dispute are not abstractions; they are sons, daughters, sisters, and brothers, men and women who deserve justice. Empathy allows us to recognize that, and that is essential to the practice of law. It is also an essential quality for judges.

Some Members of this body have suggested that empathy is inconsistent with impartial judgment. I disagree. Judges must, first and foremost, apply law to facts. But this process is not a mechanical calculation; it requires attention to the human impact of legal decisions. Legal reasoning that ignores the human dimension risks inhuman outcomes to human problems. Law without empathy produces decisions such as *Dred Scott* and *Plessy v. Ferguson*. It gives you reasoned arguments and unreasonable results.

When the Supreme Court ruled in *Dred Scott*, its members were applying the law to the facts as they saw them. One fact they took for granted was that *Dred Scott* was so different as to be unworthy of legal protections. The Taney Court could not put themselves in *Scott's* shoes, and the result was such a rebuke to the values of this Nation that it helped drive us to civil war.

When the Court wrote in *Plessy* that "the enforced separation of the two races [does not stamp] the colored race with a badge of inferiority," they were not misinterpreting the law. They just could not feel the sting of segregation. Or to put it another way, they failed to show empathy, and generations of Black citizens paid the price.

Of course, a judge with empathy must also determine with whom to empathize. One of my colleagues has argued that empathy for somebody is always discrimination against some-

body else. Again, I disagree. I believe that justice is not a zero-sum game. Equal justice for minorities does not mean less justice for others. A judge who feels compassion for those who face the legacy of codified bigotry is not less able to sympathize with a White firefighter who has been denied a promotion. The law respects the humanity of every individual. Judges can and should do the same.

Judge Sotomayor has explained that her experience has helped her to "understand, respect and respond to the concerns and arguments of all litigants who appear before me." All litigants.

As a prosecutor, Judge Sotomayor sympathized with the victims of crime. But she could also look at a defendant and see a fellow human being—somebody who deserves fairness, if not freedom. As a judge, she has ruled for civil rights claimants, and she has ruled against them. She has ruled for prosecutors and for defendants. Her compassion has not led her to come down on one side or the other. It has helped her to be both wise and fair—to treat every individual with the respect he or she deserves.

President Obama has nominated a Supreme Court Justice with a wealth of both personal and professional experience. Her experience has given her the intelligence to understand the law and the wisdom to apply it.

But it has also given her something more. Judge Sotomayor has seen housing projects and Ivy League dorms. She has defended those whom society ignores and prosecuted those who ignore society's rules. At the trial and appellate level, she has seen the human drama of American law play out in countless ways.

This experience has given her compassion for the diverse experiences that make up the American experiment. She understands in a deep and personal way that we all deserve equal justice under law. I can think of no more important qualification for a Supreme Court Justice.

She has earned her right to serve on the Nation's highest Court. I look forward to supporting her confirmation.

Madam President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROWNBAC. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2253, AS MODIFIED, TO
AMENDMENT NO. 1908

Mr. BROWNBAC. Madam President, we are attempting to work through some amendments. I ask unanimous consent that the pending amendment be set aside so I may call up amendment No. 2253 on behalf of Senator

CHAMBLISS, and the amendment be modified with the changes at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas [Mr. BROWNBAC], for Mr. CHAMBLISS, for himself and Mr. HARKIN, proposes an amendment numbered 2253, as modified, to amendment No. 1908.

Mr. BROWNBAC. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To require a report on the status of the reorganization of the Foreign Agricultural Service and future plans to modify office structures)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Not later than 60 days after the date of enactment of this Act, the Administrator of the Foreign Agricultural Service shall submit to Congress a report that describes the status of the reorganization of the Foreign Agricultural Service and any future plans of the Administrator to modify office structures to meet existing, emerging, and new priorities.

Mr. BROWNBAC. Madam President, it is my understanding this amendment has been cleared on both sides, so I ask unanimous consent that the amendment, as modified, be agreed to.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment No. 2253, as modified.

The amendment (No. 2253), as modified, was agreed to.

Mr. BROWNBAC. I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BROWNBAC. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. UDALL of New Mexico. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. UDALL of New Mexico. Madam President, I ask unanimous consent to speak as in morning business for 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLEAN ENERGY JOBS

Mr. UDALL of New Mexico. Madam President, as I rise today, the world is engaged in a high-stakes competition. The country that wins this competition will not only produce jobs today, it will dominate the industries of the future. The competition is the race to create clean energy jobs. I want America to win, and the Congress will play a key role in deciding whether we do.

But before I talk about the decision we have to make, I want to be clear about a decision that America does not have to make. We don't have to decide whether clean energy will be the industry of the future. It will. The clean energy industry is primed to produce millions of jobs in the coming years. The question is whether these jobs will be in America. We have to answer this question now.

If we put our minds to it, Americans can produce the clean energy technologies that will power the future. The country that invented the light bulb, the automobile, and the Internet is not going to finish last when it comes to developing new ideas. But we need policies that promote innovation. Right now, we are falling behind.

Progressive policies have given other countries a lead. With a population roughly one-quarter as large as America's, Germany has more than twice as many workers developing wind energy and solar photovoltaic technologies. By 2020, more Germans will be producing clean energy than are producing German cars. Spain has almost five times as many workers in the solar thermal industry as the United States. China has more than 300 times as many. Do we want to lose this race to Germany, to Spain, to China?

Some have argued that America cannot lead on climate change; that we need to wait for countries such as China and India to act first. This would be incredibly shortsighted. If America solves its energy problems first, every country on Earth will be begging for the technologies we develop. If we don't, we will be begging for technologies developed elsewhere.

Americans always prosper by being one step ahead. We mass produced the car, and American manufacturing built the middle class. We sparked the IT revolution, and our high-tech industry still gives us high-paying jobs. Today, being one step ahead means developing the clean energy technologies of the future before anybody else does. Waiting for China to address its emissions problems before we address ours is like waiting for an opponent to finish the race before we start to lace up our shoes.

China is not waiting for America to act. It has already implemented strong policies to promote clean energy. Chinese fuel efficiency economy standards are higher today than ours will be in 2020. They have already set a 15-percent renewable energy standard for 2020, and their government recently said they could reach 20 percent. In 2009, China became the world's largest clean energy investor. It plans to spend nearly half a trillion dollars over 10 years to ensure clean energy jobs come to China.

China's policies have already begun to pay off. It is now the leading manufacturer of wind turbines and it has 65

percent of the world's solar thermal water heating market. China even beats us in industries we created. America invented solar photovoltaics, but China now dominates that market, while America comes in tenth.

I am not content to let other countries keep beating us at our own game. It is time to act. The clean energy bill currently being developed in Congress is the kind of action we need. It is a distinctly American solution to this global problem because it relies on private markets and private businesses, and that is why it provides real change with minimal cost.

Of course, some people will claim this plan breaks the bank. Defenders of the status quo never run out of excuses to do nothing. They have made huge profits polluting our air, and clean energy is a threat to them. The same people who denied the science of global warming will tell you that a clean energy solution is too expensive. They were wrong about the science then, and they are wrong about the economics now.

In 1990, polluters told America we could not afford the Clean Air Act, a bipartisan bill signed by a Republican President. History has shown that the act actually cost one-fortieth of what they said it would. The best independent estimate about this bill comes from the nonpartisan Congressional Budget Office, and they say it will cost Americans less than 50 cents per day, and the CBO numbers likely overestimate costs. To keep their analysis simple, they ignore the impact of increased efficiency. When you factor in efficiency, New Mexicans will probably end up ahead about \$4 per month on their energy bills, and low-income New Mexicans will save even more. The most expensive energy policy America can pursue is the status quo.

In 2006, I introduced a clean energy bill similar to the bill we are considering now. The month I introduced it, gas prices were at about \$2.25 per gallon. Critics claimed clean energy would drive up prices and Congress never acted. By 2008, the price of gas had nearly doubled to a high of \$4.11.

Much of the money America spends on gas flows right out of this country. Today, the United States is importing nearly 70 percent of its oil. We sent roughly \$4,280 per U.S. family out of the country in 2008 to pay for oil, and too much of that money goes to individuals who finance terrorism and regimes that don't like Americans.

Some will say the solution is increased oil production, and I support increased production. My home State of New Mexico is one of 10 that produces more oil than it consumes, and I am proud that we help meet America's energy needs. But increased production alone is not enough. America has only 3 percent of the world's oil reserves. More than 66 percent of those re-

serves—those that are left—are in Russia, Iran, and six other countries in the Middle East. The more we depend only on fossil fuels, the more American money will flow to these countries.

When it comes to energy, we have to do it all and we have to do it now. Since comprehensive clean energy legislation was first introduced in 2003, we have sent trillions of dollars abroad every year to pay for oil—in fact, \$700 billion a year. We cannot afford 6 more years of delay.

But the status quo doesn't just threaten our economy and our security; it threatens the basis of our way of life. Scientists predict that global warming could give my home State of New Mexico the same climate as the Sonoran Desert in Chihuahua, Mexico. If that happens, farmers who have worked the land for generations will be forced out of business. Forest fires will become more common and more dangerous. Our communities will face a bleak economic future. For the children of my State and our country, we cannot afford to stay on this path.

Fortunately, America has what it takes to change course. Even without progressive policies on the national level, New Mexico has begun to create massive numbers of clean energy jobs. Between 1998 and 2007, clean energy jobs grew 25 times faster than other jobs. We call these the jobs of the future. Increasingly, they are also the jobs of today.

There are too many success stories to tell, but I want to mention one. Three weeks ago, a company called Schott Solar opened its second renewable technologies plant in Albuquerque, NM. The plant currently employs 300 people, and it comes 2 months after the company opened a plant that will eventually employ 1,500. Schott decided to locate these plants in New Mexico after our State passed a series of clean energy incentives.

What I like most about this story is that Schott is a German company. It looked at New Mexico's policies and decided to invest German money in creating American jobs. For years, while American policymakers failed to act, American investors sent our capital to Germany. New Mexico's forward-looking policies are helping to reverse the flow. What that tells me is that with the right policies, America can lead the world in this crucial industry. We can stop creating jobs in Saudi Arabia and start creating them in Socorro, NM. We can stop letting China develop our technologies and sell them back to us.

We can win the clean energy revolution the same way we won the high-tech revolution—by getting there first—or we can wait and watch the world pass us by. I think the choice is clear. I hope my colleagues do as well, and I hope they will join me in supporting the Senate's clean energy legislation when it comes to the floor.

Madam President, I yield the floor, and I suggest the absence of a quorum. The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. MURKOWSKI. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1910

Ms. MURKOWSKI. Madam President, I would like to take a few minutes this afternoon to speak to an amendment to the agriculture bill that has been introduced. This is amendment No. 1910. It has to do with the high energy cost grants. This is a program within the rural utility service.

I would like to lay out for my colleagues a bit about this program. The high energy cost grants are available for improving and providing energy generation, transmission, and distribution facilities that serve communities with average home energy costs that exceed 275 percent of the national average. So 275 percent of the national average—you have to see your home energy costs exceed this level in order to make yourself available to this High Energy Cost Grant Program.

These grant funds can be used for on-grid and off-grid renewable energy projects, energy efficiency, and energy conservation projects serving these eligible communities.

Some have suggested this is somehow an Alaska aid program. It certainly does help in my State, but it has provided aid to utilities in more than a dozen States, including Alabama, Arizona, California, Florida, Hawaii, Idaho, Kentucky, Maine, Massachusetts, Nevada, New Mexico, New York, and Washington. In addition to these States, applications have been submitted by other eligible communities in more than eight States. This is in Colorado, Minnesota, Montana, North Dakota, Rhode Island, South Dakota, Wisconsin, Wyoming, and also out in Puerto Rico, the Virgin Islands, Guam, and American Samoa.

In addition, these are community-driven projects. They reflect the local priorities for addressing energy challenges. Some of the projects that are currently underway with these high energy cost grants are replacing failing transmission and distribution lines that serve communities in my State and in Arizona, Idaho, Maine, and Nevada.

As we think about how we are going to move our energy, particularly our renewable energy sources, we have to do more within our transmission systems. This program allows us to replace our older or failing transmission and distribution lines.

Some of the other projects extend electric distribution lines to connect homes in rural communities in States

such as Alaska, Arizona, California, and Washington, including some homes on Indian reservations.

The other projects replace old inefficient diesel generators in many of the remote Alaska villages with more efficient, less polluting units, with heat recovery systems. These funds from the high energy cost grants go toward constructing community-owned renewable energy projects, including wind and solar, small hydroelectric and biomass systems. Again, the States where you see these projects are Alaska, Arizona, Hawaii, Maine, New Mexico, New York, Washington, to the Marshall Islands.

The last area of the program provides cost savings, energy efficiency, and weatherization upgrades for rural homes and community facilities in Alabama, Alaska, Florida, Hawaii, Kentucky, and Massachusetts.

I go through this list of where these projects are to ensure that Members know we are not just talking about a benefit to a State such as Alaska, where our energy costs are enormously high, but States such as Alabama, where they might not be facing the cold winters but they are certainly facing the hot summers and how they, too, can be more energy efficient; how they, too, can benefit from programs that help to reduce the high energy costs they face in their State.

This program has been one of the smartest things Congress has done since the passage of the rural electrification programs back in the 1930s. It has provided assistance to run modern power lines on Indian reservations, helped to propel economic activity where it is needed most in this country. It has provided aid to towns off the interstate transmission grid and a number of towns in the West that are isolated and not so connected to that grid, thus more subject to the blackouts and brownouts.

This program also motivated many States to step up their individual efforts to increase funding for these programs. In my home State of Alaska, despite the very dramatic decrease in revenues, we are investing tremendous resources toward energy solutions. In the State's fiscal year 2010 capital and operating budgets, they include \$25.5 million for Alaska energy authority projects; \$25 million for renewable energy; \$38 million for power cost equalization; and \$26.4 million for heating assistance. That is a total of about \$115 million in funding that is coming from the State to help, alongside funding for the high energy cost grants.

If funding sources continue to be eliminated or reduced, the Nation's efforts to address the high cost of energy by increasing energy efficiencies and renewable resource development are going to be severely hindered. This is at a time when we can least afford to do this.

This program has helped with installation of renewable energy systems,

whether it be solar or wind or hydro, biomass or geothermal projects. These are generally financed through guaranteed loans. This is exactly in keeping with existing congressional intent and the intent of this administration to expand renewable energy and to reduce carbon emissions and greenhouse gas emissions and their potential climate impacts. It has done so economically. The program has a 4-percent cap on planning and administrative expenses. I wish all Federal programs did this.

The program has an excellent track record. According to the Congressional Research Service, it has such a low default rate on its loans that the guarantee program has a zero subsidy cost; loans being secured by the borrower's electric system and assets.

Earlier on the floor it was argued that this program is somehow duplicative of other existing programs, but it is not. The existing USDA Rural Utilities Service Loan and Grant Program cannot make loans to school districts or to Indian reservations, such as the Navajo projects that have been made in Arizona or to off-grid utilities. The program can only make loans for electricity programs, not for renewable energy projects to tie into grids.

This is exceptionally important, the fact that the programs currently can only make those loans to electricity programs and not the renewable energy projects.

The program was authorized, the High Energy Cost Grant Program was authorized by Congress back in the 2000 Rural Electrification Act, simply because it covered a gap in existing programs that desperately needed to be filled.

This amendment might not only kill this program in the future, but it also might pull the rug out from under the projects that have expended funds and which have started and which are waiting for the Federal funds to be delivered.

This program actually lowers Federal unemployment and economic assistance costs over time because helping to reduce our energy costs is one of the best things we can be doing in government to support sustainable economic development in a State or in the region.

I certainly support the need for fiscal responsibility—absolutely, especially given the size of our deficit. Cutting the High Energy Cost Grants Program is likely to not only lessen economic activity in rural areas but also worsen our overall economy and unemployment across the Nation. There is no reason to delete the continuation of funding that is proposed for this program.

I urge my colleagues to vote against this amendment when the time comes.

I yield the floor.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Madam President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. I ask unanimous consent the Senate proceed to vote in relation to the McCain amendment, No. 1910, after the cloture vote with respect to the Kohl-Brownback substitute amendment No. 1908, and that prior to the vote with respect to amendment No. 1910, there be 4 minutes of debate, equally divided and controlled in the usual form, with no amendment in order to the amendment prior to the vote.

The PRESIDING OFFICER. Is there objection? The Senator from Oklahoma.

Mr. COBURN. Reserving the right to object, I was asked to come down and get my amendments pending. I checked with the staff. All I would like to do is get several amendments up, have them pending, and then we will have the debate after the cloture vote. Is that agreeable?

Mr. KOHL. That is agreeable.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from Kansas is recognized.

AMENDMENT NO. 2240 TO AMENDMENT NO. 1908

Mr. BROWNBACK. Madam President, I have been asked by Senator BARRASSO to ask unanimous consent the pending amendment be set aside so I may call up amendment No. 2240 on behalf of Senator BARRASSO.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows.

The Senator from Kansas [Mr. BROWNBACK], for Mr. BARRASSO, for himself, and Mr. VITTER, Mr. HATCH, Mr. ROBERTS, Mr. ENZI, Mr. THUNE, and Mr. JOHANN, proposes an amendment numbered 2240 to amendment No. 1908.

Mr. BROWNBACK. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To require the Secretary of Agriculture to conduct a State-by-State analysis of the impacts on agricultural producers of the American Clean Energy and Security Act of 2009 (H.R. 2452, as passed by the House by Representatives on June 26, 2009)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) Not later than 60 days after the date of enactment of this Act, the Secretary of Agriculture shall complete a State-by-State analysis of the impacts on agricultural producers of the American Clean En-

ergy and Security Act of 2009 (H.R. 2452, as passed by the House of Representatives on June 26, 2009) (referred to in this section as "H.R. 2452").

(b) In conducting the analysis under subsection (a), the Secretary shall—

(1) use a range of peer-reviewed analyses of H.R. 2454 conducted by public and private entities, including land grant universities;

(2) consider a scenario in which the fertilizer industry does not receive any free allowances under H.R. 2454;

(3) consider the impacts of H.R. 2454 on a range of fishing, aquaculture, livestock, poultry, and swine production and a variety of crop production, including specialty crops; and

(4) analyze projected land use changes, afforestation patterns, and other market incentives created by H.R. 2454 that may impact food or agriculture commodity prices, including specific acreage estimates of parcels of land planted with trees in the United States.

Mr. BROWNBACK. I wanted to get this for Senator BARRASSO. We will be handling that at a later point in time. I yield the floor.

AMENDMENT NO. 2243 TO AMENDMENT NO. 1908

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. I ask unanimous consent the pending amendment be set aside and amendment No. 2243 be called up.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 2243 to amendment No. 1908.

Mr. COBURN. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To eliminate double-dipped stimulus funds for the Rural Business-Cooperative Service account)

At the appropriate place, insert the following:

SEC. 7 _____. Notwithstanding any other provision of this Act, each amount provided under the heading "RURAL BUSINESS—COOPERATIVE SERVICE" in title III is reduced by the pro rata percentage required to reduce the total amount provided under that heading by \$124,800,000.

AMENDMENT NO. 2244 TO AMENDMENT NO. 1908

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. I ask unanimous consent that the pending amendment be set aside and amendment No. 2244 be called up.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 2244 to amendment No. 1908.

Mr. COBURN. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To support the proposal of the President to eliminate funding in the bill for digital conversion efforts of the Department of Agriculture that are duplicative of existing Federal efforts)

On page 51, beginning on line 10, strike "Provided further," and all that follows through "technologies" on line 20.

AMENDMENT NO. 2245 TO AMENDMENT NO. 1908

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. I ask unanimous consent the pending amendment be set aside and amendment No. 2245 be called up.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 2245 to amendment No. 1908.

Mr. COBURN. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To strike a provision providing \$3,000,000 for specialty cheeses in Vermont and Wisconsin)

Beginning on page 75, strike line 16 and all that follows through page 76, line 3.

AMENDMENT NO. 2248 TO AMENDMENT NO. 1908

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. I ask unanimous consent the pending amendment be set aside and amendment No. 2248 be called up.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 2248 to amendment No. 1908.

Mr. COBURN. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To prohibit no-bid contracts and grants)

At the appropriate place, insert the following:

PROHIBITION ON NO-BID CONTRACTS AND GRANTS

SEC. _____. (a) Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act may be—

(1) used to make any payment in connection with a contract not awarded using competitive procedures in accordance with the requirements of section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253), section 2304 of title 10, United States Code, and the Federal Acquisition Regulation;

(2) awarded by grant not subjected to merit-based competitive procedures, needs-

based criteria, and other procedures specifically authorized by law to select the grantee or award recipient; or

(3) spent on a congressionally directed spending item, as defined by Rule XLIV of the Standing Rules of the Senate, not subjected to merit-based competitive procedures, needs-based criteria, and other procedures specifically authorized by law to select the grantee to perform the activity to be provided by the congressionally directed spending item.

(b) This prohibition shall not apply to the awarding of contracts or grants with respect to which—

(1) no more than one applicant submits a bid for a contract or grant; or

(2) Federal law specifically authorizes a grant or contract to be entered into without regard for these requirements, including formula grants for States.

Mr. COBURN. I now call for the regular order on amendment No. 2226 and send a second-degree amendment to the desk, ask for its immediate consideration, and ask any consideration be delayed until after the cloture vote and that the second-degree amendment is my amendment No. 2246.

The PRESIDING OFFICER. Was there a unanimous consent request?

Mr. COBURN. Yes, unanimous consent is requested for that.

The PRESIDING OFFICER. Is there objection?

Mr. KOHL. I object and suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator does not have the floor. Objection is heard.

The Senator from Oklahoma.

AMENDMENT NO. 2246 TO AMENDMENT NO. 2226

Mr. COBURN. I ask unanimous consent the pending amendment be set aside and amendment No. 2246 be called up.

The PRESIDING OFFICER. Is there objection?

The amendment is drafted as a second-degree amendment to amendment No. 2226.

Mr. COBURN. I will change the drafting.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COBURN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. I call for the regular order on amendment No. 2226, and I send a second-degree amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 2246 to amendment No. 2226.

The amendment is as follows:

(Purpose: To provide additional transparency and accountability for spending on conferences and meetings of the Department of Agriculture)

In lieu of the matter proposed to be inserted, insert the following:

SEC. 7 _____. (a) In this section, the term "conference" means a meeting that—

(1) is held for consultation, education, awareness, or discussion;

(2) includes participants who are not all employees of the same agency;

(3) is not held entirely at an agency facility;

(4) involves costs associated with travel and lodging for some participants; and

(5) is sponsored by 1 or more agencies, 1 or more organizations that are not agencies, or a combination of such agencies or organizations.

(b) Not later than September 30, 2011, the Secretary of Agriculture shall submit to the appropriate committees of Congress and post on the public Internet website of the Department of Agriculture (referred to in this section as the "Department") in a searchable, electronic format, a report on each conference for which the Department paid travel expenses during fiscal year 2010 that includes—

(1) the itemized expenses paid by the Department, including travel expenses and any Department expenditure to otherwise support the conference;

(2) the primary sponsor of the conference;

(3) the location of the conference; and

(4) in the case of a conference for which the Department was the primary sponsor, a statement that includes—

(A) a justification of the location selected;

(B) a description of the cost efficiency of the location;

(C) the date of the conference;

(D) a brief explanation of how the conference advanced the mission of the Department; and

(E) the total number of individuals whose travel or attendance at the conference was paid for in part or full by the Department.

(c) Notwithstanding any other provision of this Act, the aggregate amount made available under this Act for expenses of the Department relating to conferences in fiscal year 2010, including expenses relating to conference programs, staff, travel costs, and other conference matters, may not exceed \$12,000,000.

Mr. KOHL. I send to the desk a second-degree amendment to amendment No. 2246.

The PRESIDING OFFICER. Amendment No. 2246 is a second-degree amendment.

Mr. KOHL. I ask unanimous consent that amendment No. 2248 be pending.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2288 TO AMENDMENT NO. 2248

Mr. KOHL. I send to the desk a second-degree amendment to amendment No. 2248.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL] proposes an amendment numbered 2288 to amendment No. 2248.

The amendment is as follows:

(Purpose: To provide requirements regarding the authority of the Secretary of Agriculture and the Commissioner of Food and Drugs to enter into certain contracts)

In lieu of the matter proposed to be inserted, insert the following:

SEC. 7 _____. None of the funds appropriated or otherwise made available by this Act may be used by the Secretary of Agriculture or the Commissioner of Food and Drugs to enter into any Federal contract unless the contract is—

(1) entered into in accordance with the requirements of section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253) or chapter 137 of title 10, United States Code, and the Federal Acquisition Regulation described in section 6(a) of the Office of Federal Procurement Policy Act (41 U.S.C. 405(a)); or

(2) otherwise authorized by law to be entered into without regard to the laws cited in paragraph (1).

Mr. KOHL. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2289 TO AMENDMENT NO. 1908

Mr. KOHL. I ask unanimous consent to set aside the pending amendment, and I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL], for himself and Mr. BROWNBACK, proposes an amendment numbered 2289 to amendment No. 1908.

Mr. KOHL. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. I ask for its adoption.

The PRESIDING OFFICER. Is there further debate? The question is on agreeing to the amendment.

The amendment (No. 2289) was agreed to, as follows:

(Purpose: To ensure the compliance of the United States regarding obligations under international trade agreements)

On page 85, line 16, strike "inspections." and insert the following:

inspections: *Provided further*, That this section shall be applied in a manner consistent with United States obligations under international trade agreements.

Mr. KOHL. Madam President, I move to reconsider that vote.

Mr. BROWNBACK. I move to lay that motion upon the table.

The motion to lay upon the table was agreed to.

AMENDMENTS NOS. 2254 AND 2255 TO AMENDMENT NO. 1908

Mr. BROWNBACK. Madam President, I ask unanimous consent that the

pending amendment be set aside, and I call up amendment No. 2254 on behalf of Senator CHAMBLISS and 2255 on behalf of Senator VITTER en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. BROWNBACK], for Mr. CHAMBLISS and Mr. VITTER, proposes amendments en bloc numbered 2254 and 2255.

Mr. BROWNBACK. I ask unanimous consent that the reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. I understand these amendments have been cleared on both sides. I offer them for Senators CHAMBLISS and VITTER. I ask unanimous consent that the amendments be agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments (Nos. 2254 and 2255) were agreed to, as follows:

AMENDMENT NO. 2254

(Purpose: To prohibit the use of funds to assess greenbook charges to agencies or to use previously assessed funds)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available by this Act may be used to pay the salaries and expenses of any employee of the Department of Agriculture to assess any agency any greenbook charge or to use any funds acquired through an assessment of greenbook charges made prior to the date of enactment of this Act.

AMENDMENT NO. 2255

(Purpose: To require the Commissioner of Food and Drugs to conduct a study on imported seafood)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. The Commissioner of Food and Drugs, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, shall conduct a study and, not later than 240 days after the date of enactment of this Act, submit a report to Congress on the technical challenges associated with inspecting imported seafood. The study and report shall—

(1) provide information on the status of seafood importation, including—

(A) the volume of seafood imported into the United States annually, by product and country of origin;

(B) the number of physical inspections of imported seafood products conducted annually, by product and country of origin; and

(C) a listing of the United States ports of entry for seafood imports by volume;

(2) provide information on imported seafood products, by product and country of origin, that do not meet standards as set forth in the applicable food importation law, including the reason for which each such product does not meet such standards;

(3) identify the fish, crayfish, shellfish, and other sea species most susceptible to violations of the applicable food importation law;

(4) identify the aquaculture and mariculture practices that are of greatest concern to human health; and

(5) suggest methods for improving import inspection policies and procedures to protect consumers in the United States.

Mr. BROWNBACK. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2259, AS MODIFIED

Mr. KOHL. I ask unanimous consent to set aside the pending amendment and call up the following amendment, which is at the desk, and ask for its immediate consideration: Landrieu amendment No. 2259, as modified.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL], for Ms. LANDRIEU, proposes an amendment numbered 2259, as modified, to amendment No. 1908.

Mr. KOHL. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, is as follows:

(Purpose: To require a report on increasing the participation of rural small businesses in tourism activities)

On page 85, between lines 16 and 17, insert the following:

SEC. —745. REPORT ON TOURISM FOR RURAL COMMUNITIES.

(a) IN GENERAL.—Not later than 1 year after the date of the enactment of this Act, the Comptroller General of the United States shall report to the Committees on Appropriations of the House of Representatives and of the Senate on developing the tourism potential of rural communities.

(b) CONTENT OF THE REPORT.—The report required by subsection (a) shall—

(1) identify existing Federal programs that provide assistance to rural small businesses in developing tourism marketing and promotion plans relating to tourism in rural areas;

(2) identify existing Federal programs that assist rural small business concerns in obtaining capital for starting or expanding businesses primarily serving tourists; and

(3) include recommendations, if any, for improving existing programs or creating new Federal programs that may benefit tourism in rural communities.

Mr. KOHL. This amendment has been approved by both sides, and I ask for its adoption.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to amendment No. 2259, as modified.

The amendment (No. 2259), as modified, was agreed to.

Mr. KOHL. I move to reconsider the vote.

Mr. BROWNBACK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLOTURE MOTION

The PRESIDING OFFICER. Under the previous order, pursuant to rule XXII, the clerk will report the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the substitute amendment No. 1908 to H.R. 2997, the Agriculture Appropriations Act for Fiscal Year 2010.

John D. Rockefeller, IV, Tom Udall, Mark L. Pryor, Edward E. Kaufman, Blanche L. Lincoln, Kent Conrad, Kay R. Hagan, Mark Begich, Byron L. Dorgan, Max Baucus, Ben Nelson, Herb Kohl, Daniel K. Inouye, Michael F. Bennet, Mary L. Landrieu, Charles E. Schumer.

The PRESIDING OFFICER. By unanimous consent, the mandatory quorum call has been waived.

The question is, Is it the sense of the Senate that debate on amendment No. 1908 to H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act, 2010, shall be brought to a close?

The yeas and nays are required under the rule.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Connecticut (Mr. LIEBERMAN), the Senator from New Jersey (Mr. MENENDEZ), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

Mr. KYL. The following Senator is necessarily absent: the Senator from Mississippi (Mr. COCHRAN).

The PRESIDING OFFICER (Mrs. SHAHEEN). Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 83, nays 11, as follows:

[Rollcall Vote No. 255 Leg.]

YEAS—83

Akaka	Coburn	Inouye
Alexander	Collins	Isakson
Baucus	Conrad	Johnson
Bayh	Cornyn	Kaufman
Begich	Crapo	Kerry
Bennet	Dodd	Klobuchar

Barrasso	Ensign	Kyl
Bunning	Enzi	McCain
Corker	Gregg	Vitter
DeMint	Johanns	

NOT VOTING—6

Byrd	Kennedy	Menendez
Cochran	Lieberman	Mikulski

The PRESIDING OFFICER. On this vote, the yeas are 83, the nays are 11. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to.

AMENDMENT NO. 1910

The PRESIDING OFFICER. There will now be 4 minutes of debate equally divided on the McCain amendment No. 1910.

The Senator from Arizona is recognized.

Mr. MCCAIN. Madam President, this amendment eliminates the U.S. Department of Agriculture's High Energy Cost Grant Program which is a \$17.5 million subsidy that is designed to pay for energy generation systems in rural areas.

The 2010 budget from the President of the United States and the Office of Management and Budget have recommended a number of programs be eliminated. Concerning this High Energy Cost Grant Program, it says:

The administration proposes to eliminate the High Energy Cost Grant Program because it is duplicative of and less effective than the Rural Utility Services Electric Loan Program.

This recommendation by the administration to eliminate this program is because it is both duplicative and unnecessary and there is a \$6.6 billion program in electric loans at no cost to the taxpayer.

I recommend we agree with the President of the United States and eliminate this unnecessary \$17.5 million subsidy.

I yield.

The PRESIDING OFFICER. Who yields time in opposition?

The Senator from Alaska.

Ms. MURKOWSKI. Madam President, I stand in opposition to this amendment. The funds contained within this High Cost Energy Program are designed to improve energy generation, transmission, and distribution. These are designed to do exactly what we are working so hard in this body to do: to improve our energy generation, our transmission facilities, our distribution facilities, and we are doing this through a program where the qualifications in order to comply are you have to serve communities in which the average residential home energy costs are 275 percent of the national average.

There are 14 States across the country that have projects that focus on these very high energy areas. We are trying to reduce our energy costs for renewables and through the standard energy mechanisms but, quite honestly, when your energy costs are 275 percent above the national average, it is pretty darn tough.

So these are funds made available to communities in the State of Alaska, but also communities in Arizona, California, Florida, Hawaii, Idaho, Kentucky, Maine, Massachusetts, Nevada, New Mexico, Washington, and the Marshall Islands, and it allows them to have energy at a more affordable cost.

I urge defeat of the amendment.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KOHL. Madam President, this bill includes the programs the amendment would strike. The Senator from Alaska has spoken eloquently and I believe correctly. So I do oppose the amendment.

The PRESIDING OFFICER. Is there further debate?

If not, the question is agreeing to the amendment.

Mr. KYL. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The bill clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Connecticut (Mr. LIEBERMAN), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 41, nays 55, as follows:

[Rollcall Vote No. 256 Leg.]

YEAS—41

Alexander	Enzi	McCain
Barrasso	Feingold	McCaskill
Bayh	Graham	McConnell
Bunning	Grassley	Menendez
Burr	Gregg	Merkley
Cardin	Hutchison	Nelson (NE)
Chambliss	Inhofe	Sessions
Coburn	Isakson	Shaheen
Conrad	Johanns	Thune
Corker	Kaufman	Udall (CO)

NOT VOTING—4

Byrd	Lieberman
Kennedy	Mikulski

The amendment (No. 1910) was rejected.

Mr. KOHL. Madam President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. WICKER. Madam President, I ask unanimous consent to speak as in morning business for 12 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. WICKER. Madam President, in the ongoing debate on health care reform, it has become clearer and clearer that this is a competition of two very different philosophies of government. On the one hand, there are those who think government ought to be the primary sponsor of almost everything, including our American health care system. These persons basically hope and fervently believe things would be better in this country if only the Federal Government took control of more aspects of our society.

The other approach is one that I have advocated. It is the philosophy held by those of us who look at history and realize that government doesn't run things very well. We believe government can and should set standards, establish goals, and create incentives for the right behavior, but we do not believe the Federal Government should run health care or, for that matter, is capable of running the American health care system.

The debate so far this year has been very instructive for this Congress and for the taxpayers. Here are some things we have already learned as a result of the very thorough process we have gone through.

First, we know instead of saving money for our economy, as we were promised during the 2008 campaign, health care spending will actually go up under the Democrats' proposal. This is true both short term and in the long run.

Second, we have been informed by the nonpartisan Congressional Budget Office that both the House and Senate bills would add to the Federal deficit.

Third, according to a CBO letter, dated July 17, "millions of Americans would lose their private health care coverage if these plans are enacted, and millions more would be forced into a government plan." That is not me talking, it is the nonpartisan Congressional Budget Office.

Fourth, small businesses and other job creators will pay higher taxes, including specifically \$163 billion in penalties and \$543 billion in other taxes if the Democrats' plans are enacted.

Fifth, the provisions of these risky schemes could reduce job creation. Again quoting the nonpartisan CBO:

The play or pay provision could reduce the hiring of low-wage workers.

One has to wonder, if you are a job applicant out there in our economy looking to earn a living, applying for a job, would you rather see a Federal takeover of the health care system or would you rather have a job? I think most American job seekers, given that choice, would say: I want a job. Don't reduce my chances of getting that job.

Then we learned just a few days ago that the Medicaid provisions of these proposals could amount to a massive cost shift to the States. The outcry against this has been loud and it has been bipartisan.

Here is what two-term Democratic Tennessee Governor Phil Bredesen had to say recently. He called the proposal "the mother of all unfunded mandates." Governor Bredesen went on to say:

Medicaid is a poor vehicle for expanding coverage. It is a 45-year-old system originally designed for women and children. It's not health care reform to dump more money into Medicaid.

The words of Democratic Governor Phil Bredesen of Tennessee.

And Governor Bredesen is not an isolated example. At the National Governors Association meeting in Biloxi, Gov. Brian Schweitzer, a Democrat, said the legislation currently making its way through Congress would unfairly burden States. Here is some good advice from Governor Schweitzer:

What we need Congress to do is cost control.

Cost control is something that would actually help in health care reform. I appreciate Governor Schweitzer calling for it. I am grateful to Governor Schweitzer for his honest assessment.

In fact, the American people owe a debt of gratitude to Democratic and Republican Governors for speaking the truth. These Governors may have saved us from a catastrophe by speaking out and telling us what the consequences are, as States struggle to meet their current obligations. Indeed, there is a great deal of bipartisanship emerging on the issue of health care reform, and that bipartisanship is coming in the form of alarm—alarm about what the bill proposes to do to State budgets, to small businesses, to job creation, and to choice in health care.

We are also learning that when it comes to the discussion of the so-called public plan or public option, there is a great amount of bait and switch lurking about. Bait and switch is basically a form of fraud or trickery that, unfortunately, goes on in our economy. It is

such a problem that the U.S. Federal Trade Commission has issued guidelines warning the public about this practice.

Here is a direct quote from 16 CFR part 238 entitled "Guides Against Bait Advertising." The FTC says this:

Bait advertising is an alluring but insincere offer to sell a product or service which the advertiser in truth does not intend or want to sell. Its purpose is to switch consumers from buying the advertised merchandise in order to sell something else. . . .

One thing is advertised and the other is attempted to be sold. I think this is exactly what is going on in the debate over the public option. We are being offered the promise of genuine competition between the public plan and private insurance plans when, in fact, the purpose is to switch Americans to a European-style, single-payer plan down the road.

By now, it is abundantly clear that citizens of the United States do not want to risk putting our country on a path toward a single-payer plan such as the ones in Canada or Great Britain. Americans do not want a single-payer system. The leadership of both parties, House and Senate, understands this fact. The American public does not want a wholesale government takeover of one-sixth of our economy. We do not want waiting lists such as in Canada. We do not want rationing such as in the United Kingdom.

Realizing where public opinion is on this pivotal issue, the advocates of these congressional Democratic plans have gone to great lengths to assure people they do not want a single-payer option either. These reassurances have come from as high as the White House itself. Just last week in North Carolina, President Obama said:

Nobody is talking about some government takeover of health care. . . . These folks need to stop scaring everybody.

I wish that were true. But with due respect to our Chief Executive, there is a reason people are frightened. They are paying attention, and they see that sponsors of this legislation are, in fact, advocating a government takeover.

I found it interesting that just 1 day after the President's remarks, I turned on the news to see one of the most senior Democratic chairmen in the House of Representatives seem to contradict the President. Here is the exact quote from this leading Member of the House on the consequences of a public option. He said:

I think if we get a good public option, it could lead to a single payer and that is the best way to reach single payer.

I wonder what the Federal Trade Commission would say about that type of advertisement. To me, it says: Let's lure people into going along with a public plan when we know it will eventually lead to a single payer down the road. I don't want to take that risk.

Another leading House advocate of the public option had this to say about a path to a single-payer system:

This is a fight about strategy about getting there—

Meaning the single-payer option—and I believe we will.

I think most folks would call this a classic legislative bait and switch.

I recently ran across a blog from Dr. Michael Swickard of New Mexico, cautioning about this very tactic. Here is what Dr. Swickard said:

Given the track record of our government in bait and switch, all of the promises of national health care are just that—promises to be broken. Maybe there will be a few years before the full impact of the bait and switch is felt by citizens. But given the past actions of our government when implementing programs, our future is clear.

I hope we can avoid that future for our country, but the writer's point is this: It may take a while, but the pattern is there. The future he fears includes a single-payer takeover that very few Americans would vote for today.

I say to my colleagues, there is much to be said about the ill effects of the health care proposals being put forward by the House and Senate committees. But among the most troublesome aspects of this so-called reform is the enactment of a public plan which will inevitably lead to a single-payer system Americans don't want and don't need.

Don't take my word for it on the cost, on the loss of choice, and on the effect on small business job creators. Just read the words of the nonpartisan Congressional Budget Office. On the issue of massive, unsustainable cost shifting to State governments, don't take my word for it. Listen to the experienced Democratic Governors pleading with us not to go down this road. And when it comes to whether the goal of this whole exercise is to move us to a European single-payer plan, it is no longer necessary to heed the warnings of the political conservatives. When you listen closely, the leading advocates of the House and Senate legislation, in their unguarded moments, are willing to admit that a single-payer government takeover is their ultimate dream. I hope we do not go down that road.

Madam President, I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. I yield to my colleague from Vermont.

AMENDMENTS NOS. 2276 AND 2271 TO AMENDMENT NO. 1908

Mr. SANDERS. Madam President, I seek unanimous consent to set aside the pending amendment so that I may call up my amendments Nos. 2276 and 2271.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Vermont [Mr. SANDERS] proposes amendments numbered 2276 and 2271, en bloc, to amendment No. 1908.

The amendments are as follows:

AMENDMENT NO. 2276

(Purpose: To modify the amount made available for the Farm Service Agency)

On page 24, line 12, strike "\$1,253,777,000" and insert "\$1,603,777,000".

AMENDMENT NO. 2271

(Purpose: To provide funds for the school community garden pilot program, with an offset)

On page 52, lines 22 and (23), strike "\$16,799,584,000, to remain available through September 30, 2011," and insert "\$16,802,084,000, to remain available through September 30, 2011, of which \$2,500,000 shall be used to carry out the school community garden pilot program established under section 18(g)(3) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1769(g)(3)) and shall be derived by transfer of the amount made available under the heading 'ANIMAL AND PLANT HEALTH INSPECTION SERVICE' of title I for the National Animal Identification program".

Mr. INOUE. Madam President, the Senate is considering the fiscal year 2010 appropriations bill for the Department of Agriculture, rural development, the Food and Drug Administration, and related agencies. I thank our two managers, Senators KOHL and BROWNBACK, for their hard work on this measure.

The bill was reported by the Appropriations Committee more than 3 weeks ago on a bipartisan basis with all members voting in support of the measure.

As my colleagues are aware, as the new chairman of the Appropriations Committee this year one of my goals was to increase transparency and accountability in the appropriations process. In many respects I have followed the lead of former Chairman Senator BYRD in this regard. To this end, the Agriculture bill and report have been available on the Internet and in printed form for several weeks. All Members have had ample time to review the material in this bill.

As the Senate considers this measure it will find a bill that will meet our Nation's critical requirements to support agriculture and related programs which are vital to our economy and, frankly, our Nation's livelihood.

Our Nation has been blessed with a wealth of natural resources which allows us to be the world's leader in agriculture. This bill offered by Senators KOHL and BROWNBACK will help to ensure that we maintain that position.

There is a total funding of \$123.9 billion included in this bill, of which \$23.05 billion is for discretionary programs, the same as the 302(b) allocation. While this represents an 11-percent increase in funding when compared with fiscal year 2009, not including supplemental spending, my colleagues should recognize that for too long funding for our Agriculture and Rural Development Subcommittee has been severely constrained.

Even with this level of funding, the subcommittee has had to find savings

in farm programs to live within this allocation.

I very much thank our two managers for their work in preparing this bill. The Committee on Appropriations has offered its unanimous support. I believe the full Senate should do the same.

MORNING BUSINESS

Mr. DODD. Madam President, I ask unanimous consent that there now be a period for the transaction of morning business, with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. DODD. Madam President, I thank my colleagues this evening. I am going to momentarily turn to my colleagues from Iowa, Ohio, Vermont, and Rhode Island—all of whom participated with us nearly 3 weeks ago in the markup of our bill, the Affordable Health Choices Act, which took up an inordinate amount of time, longer than I think any markup certainly in the history of our committee, maybe the longest in the history of this body. We actually spent about 56 hours, 23 sessions, and 13 days on this bill. We considered just shy of 300 amendments, of which 161 amendments were offered by our colleagues from the minority and contributed significantly and substantively to the outcome of that bill. They did not support the bill in the end, unfortunately, but any definition of "bipartisan" would have to include whether or not their ideas were incorporated in any significant degree in this bill, and they were. I am appreciative of their efforts.

I am particularly grateful to Senators HARKIN, MURRAY, WHITEHOUSE, and BROWN for their contributions, along with others on the committee: Senator SANDERS, who is here; Senator MIKULSKI played such an important role; Senator CASEY, Senator MERKLEY, Senator BINGAMAN, Senator REED, Senator HAGAN—all of whom contributed to the outcome of that legislation.

We thought it might be worthwhile this evening to talk about exactly what is in this bill. We will be adjourning in a few days. We will be gone for a month. Unfortunately, during that month, nothing will happen on this bill. But I think it is an important month to educate our constituents and people across this country as to what is in this bill, what we are trying to accomplish with our reform efforts.

Senator HARKIN led the effort on prevention in our committee. The Senator was asked by our chairman, TED KENNEDY—who, as we all know, is struggling with his own illness, a brain tumor. We pray and hope he will be back to work with us and to chair his committee. But the distinguished Sen-

ator from Iowa, along with Senators MIKULSKI, BINGAMAN, and MURRAY, worked on various ideas. Prevention was the matter in which Senator HARKIN became an expert. He developed very sound ideas in our legislation to promote the improvement of prevention ideas as part of our health care reform efforts. Senator MIKULSKI worked on quality. Senator BINGAMAN worked on coverage. Senator MURRAY worked on workforce issues, which are all so critically important. Senator HARKIN brought to the committee his more than three decades' long commitment to prevention and wellness. He is no newcomer to this issue. In a minute, I am going to ask him, if he would, to go into detail about the prevention aspects of this bill and what is included.

People ought to know what we have done. I am so sick and tired of hearing about socialized medicine, government takeover—nothing but absolute falsehoods about what is in this legislation and what we are promoting.

I say at the outset, if you like what you have, you get to keep it, choose your doctor, hospital, choose the insurance program you have. What people don't have is a sense of stability and certainty that they are going to have the coverage they deserve if a crisis hits them in health care and that they will get the care they need. That is what people are uncertain about today. So many millions of our fellow citizens worry every night that the coverage they have and the coverage they would like to have is unavailable to them because the costs are rising almost on an hourly basis, and they worry about their families.

Before I turn to my colleague from Iowa and my other colleagues, as well, to share some thoughts with us, I made an announcement last Friday which has become quite well known—the fact that I have been diagnosed with prostate cancer. It is in the very early stages. I am confident the outcomes are going to be great and all is going to work out well. I have known about this since June when I was diagnosed with it and did what I could to learn all about prostate cancer and what treatments and options will be available to me.

The point I want to make is this: When I discovered in June that I had prostate cancer, I didn't lose a moment's sleep over whether I had the coverage to pay for it. I didn't lose a moment's sleep as to whether I have quality care. I am a Member of Congress. I have a great health care plan. I have great coverage. I never lost a moment's sleep over whether or not I would be able to access that coverage.

What bothers me is it should not just be me or Members like me in this body. If every Member in this body had to go through what millions of Americans do every day, and that is wonder whether the quality is going to be there, the

care is going to be there, maybe they would worry. But that is not the case. Our efforts over these days have been to try to bring, at long last, that sense of stability and certainty to our fellow citizens that we have in this body and that the other body has and that thousands and thousands of Federal employees and others who have good health care coverage have.

I am confident everything is going to be fine. That is not the point of bringing this up. The reason I bring it up is because too many of our fellow citizens lack the kind of security and stability that those of us who are here have. I hear my colleagues—some of them—say: Well, we ought to wait a while longer. We can't afford to do this.

We can't afford not to do this. The cost to the average American is rising by the hour.

I had one insurance company in my State of Connecticut, a few weeks ago, announce a 32-percent increase in premiums. They announced it right in the middle of this debate, to jack up those prices. Of course, it goes on all across the country. We have working families who are losing their jobs, losing their homes, and we find that 62 percent of people who are in bankruptcy are there because of a health care crisis. We find 50 percent of the foreclosures that are occurring are occurring because of a health care crisis.

So my interest in raising this is to bring home the point that we have an obligation, it seems to me, in this body, to address this issue; to do it carefully, do it well but to get the job done. We have a President committed to that. Our leadership is committed to it. The members of our committee who have worked so hard are committed to it. All we are missing is some folks willing to come to the table and help us resolve these matters in a way that will allow us to have some votes and decide whether to go forward with accessible, affordable, quality health care.

No one is talking about socialized medicine or talking about big government-run plans. They use those words over and over and over again. You ought to be suspicious when they have nothing else to say about health care but scare tactics and fear. That is what they have done day after day in this debate, and it is a disservice to the American people to suggest that after 70 years, with millions of our fellow citizens uninsured or underinsured tonight, the only answer they have to our health care problems is to wait longer, do nothing, and be scared.

What is more, if they were more serious about some of these issues, we might be engaged in more of a significant debate. As I said, that is not true for the 47 million without health insurance, the 30 million underinsured in our Nation or the 14,000 in America who lost their health insurance today.

Every day we wait, another 14,000 people lose health coverage. Since we marked up our bill—and we finished marking up our bill in that committee back 3 weeks ago this Wednesday—266,000 people in the United States, more than a quarter of a million people, have lost their health insurance. That is what has happened in less than 3 weeks.

My hope would be that while we are going to debate this issue at home over the month of August, we would come back with a renewed sense of commitment to getting this job done. But tonight, my colleagues and I would like to spend a few minutes talking about what is in our bill, what we tried to do with this, how we tried to increase access, quality, as well as affordability.

I have heard my distinguished colleague from Iowa say on so many occasions—and I am confident he will probably say it tonight—we don't have a health care system, we have a sick care system. I think he coined the phrase in talking about it. I have heard him say it so many years in this body, talking about what we need to do to develop sound health care programs. So I wish to thank my colleague and ask if he would share with us his thoughts on this.

Is it not the case that chronic disease accounts for about 75 percent of our health care costs, and these are preventable diseases in our country, such as diabetes and heart disease, among other things? I wonder if my colleague from Iowa could take a moment or two to talk about the cost savings achievable through increased prevention, not to mention what it means to individuals. It can lead to a longer life and a better quality of life. I thank him for his thoughts on the subject matter.

Mr. HARKIN. I thank our chairman, the leader on this issue. Would the Senator yield?

Mr. DODD. I yield to my colleague from Iowa.

Mr. HARKIN. First, I say to Senator DODD, I heard all this talk about socialized medicine. Socialized medicine. These are scare tactics. There are a lot of scare tactics going on.

I was in my State over the weekend, and people were talking about euthanasia in the bill. We hear all this crazy stuff going on out there, and I got to thinking about this. There is a lot of money on the table. We spend \$2.3 trillion a year, if I am not mistaken. There is a lot of money, and a lot of people have a vested interest in not changing the system because they are making a lot of money. Obviously, what they are trying to do is scare people.

People elected us—and I think elected President Obama—to make some changes in the way we do things, but there are a lot of vested interests out there that don't want to change. There are a lot of scare tactics going on out

there. They are unduly scaring people and obviously by people who don't want to change the system. They want the status quo.

The other thing I might say, as to all this talk about socialized medicine, historically, when President Harry Truman first proposed a kind of national health insurance program, that is the issue that was raised in 1951, I think it was. I could be off a year. Maybe 1950 or 1951 it was raised, when he was proposing this. The origins go back to an individual whose name I forget right now, but he was an advertising executive hired by the AMA at that time to stop Harry Truman's program. So he came up and he coined this whole phrase "socialized medicine." It was picked up by then-Senator Robert Taft, and he kept harping on the Truman program was socialized medicine. Well, that was in 1949-1950, I think it was, and here we are, all these many years later, and we hear the same arguments coming up again. It wasn't socialized medicine then and it is not socialized medicine now.

What we are trying to get is a system that is stable, that people can rely on, that they know is going to be there for them and that is affordable and gives them a quality health program—as my colleague, Senator DODD, said—as we have. What we are trying to get for the American people is the same kind of system all Federal employees have. We are on the same system as your local postal employee in a small town in Connecticut or a small town in Iowa or somebody who works for the Farm Service Agency in the Federal Government. We are all on the same plan. We have a lot of choices, don't we? Every year, I think we get 20-some plans to pick from. We sort of have an exchange out there, where every year, if we don't like what we have, we can go to something else. Why shouldn't the rest of the American people have that kind of access?

I spoke with a small businessman in Iowa last week. He has 12 employees and spends 15 percent of his gross revenue on health care. He has 12 employees, and one of his employees had a kidney transplant. Another came down with cancer. In 2 years, his insurance premiums went up 100 percent. In 2 years. He has a \$5,000 deductible, and he said he needs some work done. He wanted to go in for a colonoscopy because he turned 50, but a colonoscopy costs \$3,000. Well, that is out of pocket because he has a \$5,000 deductible.

I am trying to get to my point of prevention. Because we know if he has a colonoscopy and something happens, they can stop it. It is one of the most preventable forms of cancer, this colon cancer, but it is one of the most deadly if you don't get it in time. So I asked Art: Why don't you get a different plan? He said: I can't. We only have one in rural Iowa I can go to.

What we are trying to do is get more plans for people out there in small towns in Iowa, in Connecticut, and everywhere else so they do not have to be stuck with one plan; they can shop around and get other plans.

He asked me if he could get on the public option plan that we have in our bill. I said: Sure. Small businesses such as you? Absolutely. That means he can get in a pool with everybody else around the country and reduce his costs. I just remembered that, and I remembered him talking about trying to get a colonoscopy. This kind of gets to the nexus of what I wanted to talk about, briefly, which is the focus on keeping people healthy.

President Obama said very clearly, when he addressed a joint session of Congress earlier this year, that we have to make a major investment in prevention and wellness because that is the only way we are going to keep people healthy and reduce medical costs. Well, President Obama gets it. He understands we have to make a major new investment. That is what we have done in our bill—our Affordable Health Choices Act—which Senator DODD so greatly led through our committee. We make a major investment in prevention and keeping people healthy.

My colleague is right. I started out saying we have a sick care system instead of health care. I started saying that in 1992; that we have a sick care system, not a health care system. If you get sick, you get care, one way or the other. But there is not much there to try to keep you healthy in the first place and to focus on prevention. Again, our bill has a very strong prevention provision in there.

Some ideas on what we have tried to do. The real health reform starts with prevention, it does. If we don't do prevention and wellness, you can jiggle the payment system all you want and you are not going to save a dime, unless we start focusing on keeping people healthy in the first place. Is there support for that out there? Sure. The American people get it. They understand this. They were asked: Should we invest more or not invest more in prevention and wellness? Well, you can see that 76 percent of the American people said we had to invest somewhat or strongly; invest more, 53 percent; invest somewhat, 76 percent; not invest any more, 10 to 16 percent.

The American people get it. They get it. You can talk to anyone you want about health care and ask them: Would you rather just have something that takes care of you when you get sick or would you rather have more focus on keeping you healthy? I will tell you the response will be: I want to stay healthy. People want to stay healthy. But in a lot of cases, they don't know how. There are not the support systems there to do that.

Again, on saving some money; a lot of times we hear that: Oh, this won't

save money, and the CBO—Congressional Budget Office—doesn't score it. But we asked voters. The poll question was: Will prevention and wellness save us money? Seventy-seven percent said yes. Yes, it will save us money. Again, the American people get it, that we have to focus more on prevention and health.

We have some problems with CBO. That is the Congressional Budget Office, for those who don't understand the jargon around here. The Congressional Budget Office doesn't score us very well. Score means they do not give us much savings when we invest in prevention and wellness. Well, I have gone over that with the Congressional Budget Office, and the problem is they do not give a savings because they do not give savings on what they call secondary savings. Secondary savings is what prevention provides. It saves you money from going to the hospital or getting sick. But they do not give us a good score for that on savings. But do we have data on that? Do we know if it saves money? Sure, we do.

This is from the Trust for America's Health. They did a big survey of community-based interventions and for \$10 per person, in 1 to 2 years, they save \$2.8 billion; 5 years, \$16.5 billion; 10 years, \$18.5 billion. That is just \$10 per person, and that is just community programs. So we address the whole gamut. We address the community-based programs and the clinical-based programs.

For example, what we do in our bill is we set up an investment fund to do a number of different things. Let me give one example. We are going to train health professionals in how to work with prediabetic individuals, people who have tested high, who look like they are prediabetic. We will train them to work with them to manage their condition, to get them on the proper diet, to manage them as they go along. What is so important about that? Well, what is important about that is that right now, for example in Medicare, Medicare will pay \$30,000 to amputate your foot if you have diabetes. They will not reimburse one cent for nutrition counseling before so you don't get diabetes. But they will pay for nutrition counseling after you get diabetes. That doesn't make any sense.

Right now, the cost of diabetes in our society is \$174 billion a year. That is \$174 billion a year on diabetes. Well, it doesn't take a genius to figure out that if we can get hold of people who test prediabetic and get them on a well-managed program so they do not come down with diabetes, we will save money. But the Congressional Budget Office doesn't score that as any savings.

So at the clinical level we will do that. We will reimburse, for example. There will be a reimbursement for cancer screenings, for smoking cessation,

nutrition counseling, colorectal screening. There will be reimbursements for that, and you will not have to pay any deductibles or copays. So for my friend who is now facing \$3,000 for a colorectal screening, this will not cost him anything. No copays, no deductibles, and the insurance company has to reimburse for that.

Again, if we catch these things early, it is just like mammogram screening. We know if we get breast cancer early, it is curable. Again, let me say something that is public. The mayor of Cedar Rapids is a woman. I was in Iowa this weekend, and it was announced she has breast cancer. She went in today for a small surgery, and she will be back to work tomorrow because they got it early.

Mr. DODD. If my colleague will yield at this point, again, because I am exhibit A. I had an annual physical this year. At my annual physical, my PSA score spiked—shot up. That was a signal to the doctors that maybe something more serious was happening.

They decided a biopsy was appropriate. A biopsy showed I had cancer. But I had the annual physical, which my health care plan pays for. If you don't have a health care plan, that physical can be very expensive, so people don't get their annual physical. Prostate cancer is the slowest growing form of cancer, it is the easiest to manage. If you have to have cancer, it is the best one to have. If you have to have one, that is the best one—if you catch it early. A number of our colleagues have had prostate cancer. But the important thing, as my colleague pointed out, is to have an annual physical, get the screening, and detect it early. I will be able to deal with this, and I am told I will have a very healthy life for many more years to come.

If I had gone years without detecting this and it migrated or metastasized into my lymph nodes or bones, I could be in serious trouble. Spark Matsunaga, our former colleague from Hawaii, died of prostate cancer. JOHN KERRY, our colleague, his dad died of prostate cancer. Thirty thousand people a year die of prostate cancer, because they never caught it. That is what screening does. That is why what you are saying has such value.

(Mr. MERKLEY assumed the chair.)

Mr. HARKIN. I appreciate the Senator saying that, and that is why we have to have more focus on this prevention and getting people in for early screenings. If you get it early, you are cured. We know that. So we want to remove any of the obstacles people have going in and getting screening.

Again, the Congressional Budget Office says they cannot figure out the savings. I said: Why don't you go look at Pitney Bowes. It is a big company, 200-some thousand employees, scattered all over the United States—

Mr. DODD. Headquartered in Connecticut.

Mr. HARKIN. I didn't know that. Pitney Bowes, and their CEO, Mike Critelli, went on a big program of wellness and prevention for all their employees. I think they called it Health Care University or something such as that. Here is what they found.

They found, through their wellness and prevention program, they reduced their number of hospitalizations for all their people by 38 percent—38 percent. Think of the savings. They reduced their disability payments and claims by 50 percent, just through their wellness and prevention programs.

Again, this will save us money. It will make people healthier. Not only that, I say to my friend, just the productivity level—people will work harder, they will work better when they are healthy and they are well.

One other thing I wish to mention. We have a fund in the prevention title of the bill that will increase over the years to a significant amount of money. People say: What are you going to use that money for?

Right now at the Centers for Disease Control and Prevention, for cardiovascular disease prevention and heart disease prevention, the current funding is \$50 million for all States. That is barely enough to even print a pamphlet to get information out to people—\$50 million for cardiovascular disease. Yet angioplasties alone and bypasses, we spend over \$90 billion a year—just on those two items. But if they are caught early and if there are prevention programs out there, we can cut those down.

You mentioned diabetes. Right now diabetes costs us \$174 billion a year—for diabetes. So the current funding is \$62 million a year for diabetes prevention and control in the entire United States.

Arthritis, the current funding is \$13 million. For nutrition, physical activity and obesity, right now \$42 million is all we spend through the Centers for Disease Control and Prevention—\$42 million a year.

You get my point. My point is, we are not focusing enough on prevention and wellness. That is what this bill does.

I thank our chairman, I thank Senator DODD for his great leadership. That is what people have to understand. In our bill, we have defined what we want to do on prevention and wellness. Frankly, I think we had good support on both sides of the aisle for that. I think the American people support putting more emphasis on keeping people healthy.

Andrew Weil, Dr. Andrew Weil has come out with a new book, "Why Our Health Matters." One of the things Andrew Weil pointed out to me a while ago—he said the natural state of the human body is to be healthy. It is in our DNA. Our body wants to be

healthy. Yet everything we do lends itself to be unhealthy. We have to do things to make it easier to be healthy and harder to be unhealthy. Right now we do the opposite. It is easy to be unhealthy and hard to be healthy—especially after you find you have to make all these copays and deductibles. There is not much out there if you are prediabetic. Where do you go to get the kind of counseling and help you need so you don't get diabetes? I suppose if you have a lot of money you can probably do it, but for the average person, they have no idea where to go.

The last thing I might mention, I say to Senator DODD, also in our appropriations we have, and we hope we get some more in other bills, but: workplace wellness programs, to buttress what Pitney Bowes and Safeway and others have done in that area.

For this bill, it is key to reducing costs and changing the structure of health care in America. I am grateful for my colleague's leadership in pulling this together and making sure in this bill we have a very strong investment in prevention and wellness.

Mr. DODD. I thank my colleague, Mr. President. Before I turn to Senator BROWN and Senator WHITEHOUSE—and there are a lot of things to talk about in the work Senator HARKIN and the committee did on prevention—one of the great successes in this bill is a matter he worked out with our friend and colleague from New Hampshire, JUDD GREGG. You mentioned Pitney Bowes and Safeway. The Presiding Officer is, of course, a member of our committee as well and will recall this conversation. But the amendment we worked out will allow for companies to reduce by as much as 50 percent the premium costs of employees who decide to take personal responsibility for improving their health care: getting involved in smoking cessation programs; those who can lose weight will go on programs to take that poundage off.

I will never forget Steve Burd, the CEO of Safeway, telling us that for every pound a person who could lose weight loses in a year, it is a \$50 savings in premium costs—for every 1 pound. Think about what that can mean in terms of not only a healthier employee but also bringing down that cost of health care, not to mention, of course, that person is less likely to contract diabetes or related problems.

You get a cost savings, you get a healthier person, you get a more productive worker. That language exists in this bill because of what TOM HARKIN did with JUDD GREGG on a bipartisan basis to make this a better and stronger bill. I commend the Senator and thank him for it.

Mr. DODD. Mr. President, I see our colleagues from Ohio and Rhode Island are here.

Mr. BROWN. I yield to Senator WHITEHOUSE.

Mr. WHITEHOUSE. I ask my distinguished colleague from Iowa a question about prevention because it strikes me, if you are a community health center and you want to invest in a health prevention strategy that will help the community you serve have healthier lives and therefore lower the costs to the system for everyone—you put out the money for that program if you are the community health center, you have to staff it, you take all the risks, you do all the work, and yet the benefit of what you have done doesn't come back to you. It goes to private insurers, it goes to the Federal Government, it goes to patients and better health. But it makes it a very unfortunate business proposition for anybody who is doing this on their own, which suggests this is an important place for the Federal Government to invest because the market, by itself, will not take care of this because you invest and you don't get it back. You invest and it goes to the insurance company. You invest and it goes to Medicare.

I know Senator BROWN wishes to make some statement. I wish to make that point because Senator HARKIN's work has been so important on this, and I think that is an important thread.

Mr. HARKIN. I thank my colleague. I think that is a very good point.

Mr. BROWN. I appreciate the leadership of Chairman DODD and Senator HARKIN on the whole bill. Senator HARKIN has led the way on prevention. Senator WHITEHOUSE and I worked together on writing the public option which provides a choice—not any government mandates, not as the other side would like to create, this fear in the public that it is going to lead to single payer.

Also, I thank the Presiding Officer for his work on tobacco and other issues on the HELP Committee too.

I listened as we began this evening. Before Senator DODD spoke, we heard from a colleague, a Republican colleague from the South, from Mississippi, I believe. We heard over and over all these scare tactics, all the kinds of words they use about single payer, about government takeover, about socialized medicine. It just serves to scare the public, to confuse the public.

What they have done especially is trying to scare senior citizens into thinking we are going to do something to their Medicare, require them to come in and not just have a living will but have a plan on how they are going to die. Some of the things they are saying are absolutely amazing.

I wish to kind of cut through that for a moment because I know we tend to use words—we talk about exclusivity and single payer and the gateway and the exchange, all these words we use around here. I wish to cut through that. I wish to share tonight, as I have

every night we have been in session for the last week or so, some letters I have gotten from people in Ohio. I know the Presiding Officer gets these from Portland, OR, and Eugene and Senator DODD gets these from West Hartford and New London and New Haven and I know Senator WHITEHOUSE and Senator HARKIN get letters such as these from their States. But this is the reason we are doing this health care bill. This is the reason we have worked hard, doing our jobs, as we should, to pass legislation that will protect what works in our health care system and fix what is broken.

We know many people want to keep their health care plans that they have. If they are satisfied and want to keep them, we want to help them keep them, but we want to build some consumer protections so they cannot be denied care when they call their insurer when they need a health care treatment; so they can't be discriminated against; they can't have a community rating system gamed. That is what people have seen. So if you have your own health insurance and are happy with it, we want you to keep that, but we want some consumer protections around it.

This bill is full of assistance for small business that works so very hard to help people, small businesses that want to insure their employees but often cannot afford it. This bill will work so well to encourage and assist people who want health insurance to get that health insurance.

Let me stop talking, except to read a few of these letters I have received in the last few days.

Jon, from Franklin County—central Ohio, Columbus area—writes:

I am a self-employed 28-year-old with Type I diabetes. After being denied coverage by many health insurance companies, the only plan I could find charged outrageous monthly premiums.

After having a policy for 5 months, the insurance company increased my monthly premium by another \$100.

It is vital I have health insurance. I was diagnosed with Type I diabetes at age 12, and I have taken very good care of my health with diet and exercise.

As Senator HARKIN talks about.

I didn't ask for this disease but ask you to vote for reform—especially the public insurance option.

We need realistic premiums and choices without penalties.

That is what the public option does. If you don't have health insurance or you have inadequate insurance or insurance you are dissatisfied with, you can go into what is called this exchange. You have a choice, a menu of options. You can go with Aetna or with an Ohio medical mutual fund, mutual company, or you can go with the public option. Nobody forces you to do anything, but providing you a wide range of options will give you much better insurance than you might now have if you are dissatisfied.

Thomas from Knox County, a Navy veteran—that is about 25 miles from where I grew up, in Mansfield:

I would like to urge you to support health care reform that includes a public insurance option. While private insurance is adequate in many cases—

Thomas, the Navy veteran, writes—there are far too many instances where private insurance is denied or is inadequate to meet the needs of the insured.

A neighbor of mine, a retired minister, was forced to sell his home and move in with his son after battling cancer and having tremendous debt as a result. And he was insured.

We know how often that has happened. As Chairman DODD has pointed out, people who so often have declared bankruptcy because of their illness often had insurance, but their insurance had lifetime caps. One of our consumer protections we are building into the health care system with this bill is no more lifetime caps so people can get the insurance they thought they had, can get the coverage they thought they had.

Why we would allow, in this country, that a retired minister has to sell his house and has to move in with his son because the insurance he had when he got seriously ill would not cover his illness?

What does that say about our failures in the past in enacting health reform?

Thomas from Knox County, a Navy veteran, says:

Please do not vote for any plan that would only fatten the wallets of the insurance and drug industry without significantly fixing the problem for the average American citizen.

What Thomas is talking about is what has happened in this body and what happened in the other body, where I was a Member, 5 years ago when the Bush administration pushed through a Medicare plan that betrayed the middle class. It was a plan that the drug companies wrote, the insurance companies wrote. It was a Medicare plan that simply did not work for the middle class. It worked very well to fatten the wallets, as Thomas said, of the drug and insurance companies.

Let me share a couple more.

Lia from Miami County writes:

Recently our daughter graduated with her masters degree and was ready to join the workforce. Last summer between semesters she had major back surgery. We are so proud that along with her recovery, she managed to carry her full curriculum with great grades. But she developed complications and subsequently endured three surgeries and 2 weeks in the hospital.

Her student health insurance expires at the end of July. During her recovery, she was not able to search for a job and has been denied from multiple insurance carriers due to her preexisting conditions. We are now faced with additional medical expenses and no insurance coverage.

I fully understand the need for healthcare reform to assist those who are facing the same issues that we are with our daughter. Please stand up for those in Ohio and other states that are doing their best to create a

better life. Please support healthcare insurance reform with a public and a private option.

She understands we want both. A public option will, frankly, make private insurance companies more honest. Private options help make the public option work better too. It will make it more flexible, and it will make it respond better to market conditions. Having them compete with each other will work for Lia from Miami County, from Piqua, or Troy, that area of the State north of Dayton.

The last letter I would like to share is from Mary from Cuyahoga, from the Cleveland area:

Please, please, please, do whatever you can to get the healthcare reform bill through Congress this year, and stop the insanity we are experiencing now. My husband and I are retired. He has had diabetes for the past 28 years. Thank God for Medicare. But he is part of the doughnut hole generation.

What that means is, again, what happened 5 years ago when the Bush administration pushed their partial privatization of Medicare through the House and through the Senate, the bill that was written by the drug companies for the drug companies, the bill that was written by the insurance companies for the insurance companies, it simply did not provide senior citizens who had high drug expenses with their drug benefits. There was something called a doughnut hole where people simply lost the coverage for which they were paying.

My husband has now reached the limit of the payments that Medicare will make on his medications. Now he has to spend thousands of dollars out of his pocket to stay healthy. Why would you pay for only a half year of his medications? What is he supposed to do the rest of the year? Hope for the best?

My husband had taken charge of his health through better diet and exercise. Yes, we need to take responsibility for our health, especially a disease such as diabetes, but we need healthcare that will help when all of our efforts fall short and illnesses take over. Please vote for healthcare reform.

All of us get letters like this every day. Thousands of these letters are sent to the Capitol every single day from people who are struggling. Most of these letters, I have found, come from people who have had health insurance, they have lost it because of a pre-existing condition, they have seen it fall far short of what they were promised because they had a very expensive illness, or they have sometimes seen their health insurance go away because they have lost their job.

In every one of these cases I have read tonight, in every letter I have read, the dozen or so, couple dozen letters I have read here on the floor of the Senate, in every single one of these cases the legislation that those of us—Senator WHITEHOUSE and Senators HARKIN and DODD and the Presiding Officer, the Senator from Oregon, Mr. MERKLEY—the legislation we wrote will take care of this. It will protect

what works in our system. It will fix what is broken. It will give people who already have their insurance and are satisfied with it more consumer protection so they can keep their insurance they are satisfied with. It will give those who do not have insurance an opportunity to buy decent health insurance, with a public option, if they so choose, or to go to a private insurance career.

I yield the floor.

Mr. DODD. I thank my colleague and thank him for making that contribution on so many points, particularly on the public option. As our colleague from Ohio has pointed out, and some may find it somewhat alarming—but the whole idea of competition is about as basic in America as any I can think of. The idea that people can have choices out there is something we cherish in this country.

In fact, what exists today in so many cases is the lack of choice. I listened to my colleague from Iowa talk about western Iowa, rural Iowa, where you only get one or two choices. In the State of Virginia, almost 70 percent of all insurance is written by two companies in the entire State—two companies in the entire State of Virginia. That is not untrue in most places. I cannot speak specifically State by State, but it is not uncommon that in many areas the choices are very limited. So today, for most Americans, the ability to shop for the best health care plan that serves their needs and the needs of their families is very limited.

What is being discussed here is not a subsidized plan, not taxpayer subsidized in any way, but a plan that would offer an option, a safety net in many cases, probably for some kind of illness that can afflict someone, which most people worry most about that could ruin them financially. It is a pretty straightforward kind of a plan that would provide some basic coverage, at a competitive price, a non-profit operation that would take the element of profit out. I know that may be intimidating to people, to have someone out there competing with an idea. If it is not a good plan and people don't like it, they will not go to it, in which case it will not work very well. If it is a well-drafted plan that does what many would like it to do, it might just have the effect of bringing down the cost in a competitive environment.

I mean, under a capitalistic system, competition is what contributes to price fairness. If one company controls the whole game, or two do, you get a predictable result—price fixing—and you pay an awful price as a consumer, whether you are buying shoes or automobiles or any other product or service.

So the idea of injecting a level of competition—I find it somewhat ironic that our Republican friends are fright-

ened of this idea. I traditionally think that all of us embrace the free enterprise system as providing the best results for our country throughout 200 years of history. Why in the 21st century should that be any different from the 20th or the 19th century, where competition helped produce the greatness of this country?

I appreciate the Senator from Ohio today raising the point about the value of injecting some competition. We all know ultimately that could have the desired effect of bringing down those costs and making insurance or health care coverage more affordable. At some point, I hope someone might explain to me why competition is a bad idea. I though quite the contrary, and it is almost un-American to suggest that we ought to make this a noncompetitive environment, that everything else ought to be competitive but not health care. It seems to me that quite the opposite ought to be the case.

I see my colleague from Rhode Island here, who made a significant contribution in crafting the public option and the very public option that was praised by the so-called Blue Dogs in the House, the more conservative Democrats in the House who were reluctant to be supportive of that specific health care package. But to their great credit, they took a good look at what we had created in our bill on the public option, and they were so impressed by the work done by our committee—specifically, our colleagues from North Carolina, Senator HAGAN, Senator BROWN from Ohio, and Senator WHITEHOUSE from Rhode Island, who were the principal authors of this provision in our bill—that the House Blue Dogs insisted that this language be incorporated in part of their health care effort in the House. I thank my colleagues from Rhode Island and Ohio and Senator KAY HAGAN from North Carolina for their work in this regard.

Possibly my colleague from Rhode Island would like to talk about that or some other aspect of this bill.

Mr. WHITEHOUSE. I would be delighted to talk about that. But the first thing I would like to do is react to a point the distinguished chairman has just made regarding how ironic it is that some of our friends on the other side are so opposed to increasing competition in the insurance industry. One of the things that is particularly ironic is that a great number of our colleagues on the other side go home to their home States to a health insurance system that already is a public option for their business community, their workers' compensation system.

The two places you get health care are from the general health insurance marketplace and from the workers' compensation marketplace. You can get workers' compensation coverage, and it will cover small workplace injuries, it will cover catastrophic work-

place injuries, it will cover temporary conditions, and it will cover lifetime chronic conditions. It has all of the elements of health insurance coverage and the need for it.

Well, when our colleague from Wyoming, the distinguished ranking member of the HELP Committee, goes home to Wyoming, he goes home to a single-payer public option for workers' compensation health insurance. So it can hardly by anathema to have a choice public option.

The distinguished gentleman, Senator MCCAIN, who was the Republican candidate for President, goes home to Arizona to a competitive public plan providing workers' compensation health insurance in his home State.

The Republican leader himself, Senator MCCONNELL, goes home to Kentucky, to a State where there is a public plan that delivers health insurance, a competitive public plan. And I suspect his employers like it and the people are comfortable with it.

Our colleague, KAY BAILEY HUTCHISON, is shortly to go home to Texas to run for Governor. When she does, she will go home to a State that has a competitive public plan that delivers health care through the workers' compensation system.

Our distinguished friends in Utah, Senator BENNETT and Senator HATCH, who have done so much work on health insurance issues over the years, go home to Utah, where their business community has a competitive public plan for delivering health insurance.

So, in addition to the irony of being against competition, their business communities, I believe, are highly favorable to a public plan that competes in the market to deliver health insurance that the business community funds, the workers' compensation health insurance market. So I guess ironies abound here.

I would also like to compliment Senator BROWN for keeping it real here on the Senate floor and reading those letters and reminding us that when push comes to shove around here, it is not the nametags and the labels that matter, it is not "socialized medicine," it is not "government takeover," it is people who have real problems.

I was struck by a letter that was brought to my attention today. I do not know exactly what day it came in, but I saw it today. A working couple with a son, sort of the ideal American family, doing nothing wrong, doing everything right, playing by the rules, working hard. The son becomes grievously ill, has a very grave illness. Over the years, his condition worsens, and ultimately his disease takes his life. They were insured through this whole period, but the insurance was not enough. There were copays, there were limits, there was cost sharing. As a result of all of this, they are deeply in debt. They had to take time off work

and spend time caring for him, and so they have had employment issues.

Now, this is, again, sort of the ideal American family. They are both working hard. They have a son whom they love. They are doing everything right, and they are playing by the rules. And because he got sick and because our health insurance system is such a nightmare for a family in that situation, they have lost their son, they have lost their savings, and they are about to lose their home. They are about to be put out of the house that has all of the memories of their son.

You know, there are people for whom this is very real, and we have to keep our eye on that ball and not on all of the smoke and all of the fear mongering that is happening around here. A lot of that smoke and fear mongering is happening around our public plan.

Well, it is not that complicated. It is competitive. It is fair. It has no special subsidies for people who are in that plan versus in competing private plans. It has no special advantage. And it honors President Obama's programs and the promise of all of the Presidential candidates that if you like the plan you have, you get to keep it. You are not forced out of anything.

So if it has no special advantages, if it has no special subsidies, why do we support a public option? Why is it better? Well, I would say that there are three reasons we can have some confidence that a public option will make a difference for the kind of people Senator BROWN was talking about, the family I was talking about, people who suffer through our existing health care system.

The first is, a public plan does not need to take profit out of the system.

In 2007, in Rhode Island, one of our insurers, United Health Care, asked permission to remove \$37 million as its profit in that year from Rhode Island back to its home headquarters. My State isn't as big as Ohio. It is not as big as Iowa or Connecticut. It is a small State. It has a million people. In one year to take \$37 million out of that State, when they only had a 16-percent market share, think of that. A 16-percent market share in a State of a million people is about 160,000 folks they cover, assuming that everybody had coverage; \$37 million out of those 160,000 people in 1 year gone for profits.

Stop doing that. Stop paying exorbitant salaries such as United Health Care's chief executive who got \$124 million in salary. That is a lot of money that could go back into other things in health care. That could help families either get better coverage or pay lower premiums. So there is one thing—no profit, no excess cost.

The second is, you could have better dealings between insurers and providers and hospitals than we have right now. Fifteen percent of our health care

costs from the insurance side goes to overhead and administration. Most of that goes to denying claims and making life difficult for providers, doctors, and hospitals, when they submit their bills. There is a war, a claims war going on right now between the insurance industry and doctors and hospitals. And 15 percent of what we pay for health care gets burned up on the insurance company side of that war. The insurance companies are bigger and smarter, and they set the rules. So you can bet that the doctors' side of responding to that costs more than 15 percent.

In fact, the Lewin Group has estimated that 36 percent of a provider's overhead cost goes to fighting with the insurance industry. Everybody in this place has had the experience or somebody they know or love has had the experience of trying to get a claim paid, having it be denied, submitting a bill, having it be denied, having to wait for treatment that you need while your doctor tries to get prior authorization from the insurance company that says: No, we need more papers. All of that is expensive. None of it provides any health care value, zero. It is all administrative overhead and nonsense.

In some cases it is big. I was at the Cranston, RI community health center. It is not a big organization. Rhode Island is not a big State. Cranston is not our capital city, not our biggest town. Its community health center does not have an enormous budget. They spend \$300,000 every year on the consultants who help them try to negotiate this payment claims war they are stuck in—\$300,000 a year. On top of that, 50 percent of their personnel time, half of their personnel time, goes to fighting with insurance companies. So you take a little place such as the Cranston community health center and you can tell them: Half of your personnel costs can go away or can be devoted to prevention, as the Senator from Iowa has suggested, instead of fighting with the insurance industry. That is an improved model. That is something the public option can pursue.

You don't have to fight the providers that way, and the amount of waste that is burned up on all of that warfare for no health care value whatsoever is an opportunity for this public option to achieve.

The third area is to more broadly change the business model. There is a failed private insurance business model right now. It is pretty simple to summarize. No. 1, if they think you are going to get sick, they deny you insurance. You don't even get in the door. No. 2, if they make a terrible mistake and let you in the door and then you have the temerity to get sick, they look for a way to deny coverage. They go through the form and look for a mistake you might have made so they can throw it out. They find something

that might have been a preexisting condition. They look for a loophole. If they are stuck, if they can't find a loophole, then they deny payment. They tell you that the coverage you need isn't what you need or they refuse to honor the doctor's bill when it comes through the door. But a business model for an entire industry of denying insurance to the people who they think will get sick and then denying coverage to the people who actually do get sick and, when they can't dodge their coverage responsibilities, denying payment to doctors or hospitals or trying to have some person who is not even a doctor second-guess the coverage that your doctor tells you you need, that is a terrible business model. It has caused immense pain across the country, and it has been a disaster. There is a better business model. A public option can pursue it.

Mr. DODD. If my colleague will yield on that point, those very fact situations the Senator describes would be totally prohibited under the bill we marked up in our committee nearly 3 weeks ago. Every one of those fact situations would be prohibited under the legislation we sent to the body for its consideration.

Mr. WHITEHOUSE. Yes, it would. And it is an important piece of this legislation that has received far too little attention so far in the debate. It has caused an immense amount of personal pain, human anguish, and suffering that our health care system causes.

The distinguished Senator from Ohio, Senator BROWN, and I wrote an article about this. We wrote: Your health insurer should be your advocate, not your adversary. The community health insurance option will invest in prevention so that when you are healthy, you stay that way. It will invest in care management coordination, if you have a chronic condition, and it will fight for you, not with you, to get you the best possible care with the least possible hassle.

That is what this is all about. The new business model can look in these areas: Quality improvement. We know that improvement in the quality of care in this country can save dollars. But as we were saying earlier in our colloquy, it doesn't save money for the person investing in the quality. It saves it for the system. A public option will have the public purpose necessary to pursue those quality improvements that will drive down cost.

Health information infrastructure. We have the worst health information infrastructure in this country of any industry. The only industry that has worse information infrastructure is the mining industry. It is pathetic. But the same principle applies. The doctor investing in that equipment on their desk puts out all the money, takes all the risk, absorbs all the hassle, and the savings go to the insurance companies.

So we are underinvested. A public option can make those investments in our electronic health record infrastructure.

Prevention strategies. I won't dwell on that because the Senator from Iowa has done such a good job already. Same principle: A public option can pursue the public purpose of protecting public health through prevention in a way that insurers never will because they don't have the financial interest at stake. Finally, you can develop new models of payment to make all those happen, because the way we pay for it now is piecework. Procedure by procedure, the more you do, the more you get paid. Not the healthier your patients are, the more you get paid; the more you do, the more you get paid.

There is enormous hope for the whole system. In fact, it may be the only hope for our whole system is to change that business model to a model that works on quality improvement, prevention, investment, payment reform, and electronic health record infrastructure for everybody. A public option will lead us in that way.

Perhaps you can trust the private insurance industry to do this, although they never have so far. But perhaps now suddenly something will change and you can trust them to start doing this for the first time, when they never did before. But I don't think it is a wise bet to put all of our eggs in that one basket. Give us a public option and let them compete. I think they can help transform this world.

The last thing I will say it is cost control. We have heard a lot about cost control on this subject. There is no better way to have cost control than to get a public option out there doing all these things—stripping the excess profit out of the system, lowering the administrative costs, ending the warfare with providers that provides no value, and working to a business model founded on quality, prevention, electronic infrastructure, and clearer payment signals. That is where we need to go. The public option takes us there.

Nobody cares more about this than the distinguished chairman and particularly the people he has heard from in Connecticut. I would revert back to the chairman to discuss the personal aspects of this on the part of the people he serves.

Mr. DODD. I thank my colleague. There will be many more opportunities for us to go over this, but I want to make some points that are important and are part of the legislation that came out of our committee and that are now available for colleagues and others to consider.

Under our legislation, you can never discriminate again for a preexisting condition. So when someone comes in and says, I am sorry but that condition precludes you from getting coverage, under our legislation, drafted and ap-

proved by our committee, that would not happen. Never again can a pre-existing condition be used to deprive coverage.

No exorbitant out-of-pocket expenses, deductibles, or copays. Insurance companies will have to abide by yearly caps on how much they can charge for out-of-pocket expenses. There will be minimal or no cost sharing for preventive care. The insurance industry would fully cover regular checkups and tests that help prevent illness such as mammograms or eye and foot exams for diabetes, the kind of thing Senator HARKIN talked about. It doesn't make sense to pay \$30,000 to amputate your leg instead of paying for the coverage to determine if you are susceptible to the illness.

No dropping coverage for the seriously ill. Companies would be prohibited from dropping or watering down insurance coverage for those who become seriously ill. No gender discrimination. There has been a problem of tremendous discrimination in the cost of coverage based on gender. Under our legislation, insurance companies would be prohibited from charging you more because of your gender. No annual or lifetime caps on coverage. Again, you have coverage. You have never had to use it. All of a sudden you get that crisis in your family, and then you start reading the fine print and discover all you get are two hospital visits or three doctor visits. You have a serious problem on your hands. That coverage you have been paying for month after month, year after year, all of a sudden might as well not exist at all. Under our bill, the industry would be prevented from placing annual and lifetime caps on coverage that you receive.

Extended coverage for young adults: Children would continue to be eligible for family coverage, not stopping at age 21 but up to 26. That is a huge gap, 21 to 26. Then we have young adult plans that would allow another option. Young people often think they will live forever and never have any problems. We are trying to help out this age group that too often slips through the cracks. This group often doesn't think coverage is that important and, as a result, suffers when they are faced with illnesses or accidents.

Lastly, guaranteed insurance renewal is the point I wanted to raise—when you discover all of a sudden that you are no longer covered. Under our legislation, the industry would be required to renew any policy as long as the policyholder pays premiums in full. The companies wouldn't be allowed to refuse renewal because someone became sick. Every one of these provisions is now written into our legislation. Our bill absolutely makes major reforms that will make a difference on behalf of the citizenry who are counting on a program that would not deprive them of the coverage they deserve.

I see our colleague from Oregon is here. I want to say that RON WYDEN has been a tremendous advocate of health care reform for so long. He has written a bill that has attracted a lot of bipartisan support. He and I have had long conversations about some of his ideas. I have asked him to take a look at what we have done as well. I am confident we will end up with health care reform. And I want to thank RON WYDEN for his energy and passion about this issue and the very creative ideas he has brought to the table.

Mr. WYDEN. Mr. President, I wanted to come tonight as a member of the Finance Committee and particularly highlight the extraordinary contributions that those on the HELP Committee have made in the prevention area. This is going to be a landmark bill. This is going to be an absolute turning point in American history when we finally say that instead of spending loads of money on various health care services, we will start keeping people healthy. You look, for example, at the Medicare Program. Medicare Part A will pay thousands and thousands of dollars on senior citizens' hospital bills. And then Medicare Part B, the outpatient portion, can't do anything to reward somebody for staying healthy. Along comes Senator HARKIN, who has consulted very extensively with the private sector, worked on a bipartisan effort. Senator ENZI and Senator GREGG were very involved. And you found the sweet spot. Prevention.

What you all were able to do in the preventive area is to show that you could give very dramatic incentives to reward people for staying healthy, lowering their cholesterol, lowering their blood pressure, picking up on some of the good work that is being done in the private sector but not getting into where one could, in effect, be said to be discriminating against an individual who would have a lot of health problems and would have difficulty just with an incentive-based system.

That is a very thoughtful approach, in my view, to moving this country forward. I hope we will be able to pick up on it in the Senate Finance Committee. There is a lot of bipartisan support for it. I came to the floor tonight to particularly highlight that.

There is time, perhaps, for one other thought. I was struck—as we talk about the lack of choice in this country—the distinguished Presiding Officer and I woke up this morning to our statewide newspaper, the *Oregonian*, which described, in great detail, our health insurance as Members of Congress. Senator HARKIN and I have talked about this, Chairman DODD as well. It described how Senator MERKLEY and I have access to 23 health care packages, which, by the way, understand the HELP lesson. They cannot discriminate against you if you

have a preexisting condition. You go into a big group so you can play hardball with the insurance companies.

What is striking about this—and Senate MERKLEY and I heard about this on the front page of our newspaper—is most of the country thinks this is some kind of “Cadillac,” gold-plated operation. But, as the newspaper pointed out today, that is what somebody who works for the Forest Service gets in central Oregon, that is what somebody who is a janitor, for example, the paper said, gets at the Bureau of Engraving.

I very much look forward to working with all of you on the HELP Committee, as Chairman DODD and I have talked about, to make sure everybody can have a wide array of choices, have a lot of clout to take on the insurance companies, get reduced administrative costs, which is what you get with the big groups, and, by the way, have a financial incentive to choose one of these Harkin-type packages that reward prevention.

One of the things that is troubling about this debate is if we do not get the choice issue right, a lot of Americans are not going to be able to choose those kinds of packages. I think, under the Senator's leadership, we will be able to do it.

The last point I would make is—and I thank the Senator for all the time—I think working together over the next few months we can close the sale with folks who have insurance. This is going to be the key to getting health reform passed.

Mr. President, 150 million-plus people say: Not only do I want to make sure I am not worse off, I want to be better off. Well, we want to make sure they are going to be able to choose a package such as Senator HARKIN has been able to advance in the HELP Committee, where they get rewarded for prevention. We want to make sure they can choose a package where they can get lower premiums. We want to make sure everybody can keep what they have, but if they do not like what they have they can go somewhere else, which is what we can do as Members of Congress.

So I think tonight's program, particularly focusing on prevention and the incentives you all have laid out—and as Senator WHITEHOUSE has talked about, changing this insurance model, which in many respects is inhumane to reward all this cherry-picking and, in effect, sending the sick people over to government programs more fragile than they are—you all have done some very good work, particularly in prevention and making sure the consumer gets a fair shake with the insurance industry.

Working together, particularly by adding choices, we are going to be able, over the next few months, to show we can close the sale with those who have insurance in this country and come

back in the fall and win bipartisan support to go where this country has not been able to go for 60 years; that is, quality, affordable coverage for all Americans.

We have already made it clear that in any legislative effort we are a part of, we will mandate good health for the Dodd household because we are all thinking about you, and we want you to know how much affection we have for you and how much support both personally and professionally we have for you from all of us in the Senate.

Mr. DODD. I thank the Senator.

Mr. WYDEN. I thank the Senator for giving me all this time.

(Mr. WHITEHOUSE assumed the chair.)

Mr. DODD. I thank my colleague.

Mr. HARKIN. Mr. President, I wish to thank my friend from Oregon, with whom I have had numerous conversations, going back over years, on the whole wellness ethic and how we can kind of get this big ship of health care moving in a different direction. Senator WYDEN has been one of the great leaders in this area, and I have consulted with him often on this issue. I look forward to his work on the Finance Committee.

Of course, on workplace wellness, we have to make sure small businesses are able to help their employees in wellness programs. We know from other businesses and what they have done—some larger businesses but some smaller ones that have done good workplace wellness programs—it pays off immensely in savings but also in productivity. Of course, that is something the CBO does not look at—increased productivity. They do not look at that.

But I say to Senator WYDEN, he is absolutely right. What we have done, what we anticipate will be coming now from the Finance Committee, and in putting these together, we will have a whole new—what is that fancy word called Paradigm—a new paradigm in health care in this country, where people will have a lot of choices. They will be able to shop. They will not be like my friend Art in Storm Lake, IA, who only has one place to go with a \$5,000 deductible.

Now we will be able to take a lot of these small businesses and they will be able to go on these exchanges and they can be in a pool with a lot of other people all over the country. We know a principle of insurance—I say to Senator WYDEN, he knows this very well—one of the basic principles of insurance is: The more people in the pool, the cheaper it is for everybody.

So we set up the bigger pools with our small businesses, my farmers and farm families to get into bigger pools, and not just these small pools that cost them so much money. But the idea behind it, of course, the one big paradigm, is to start focusing on wellness and health promotion, keeping people

healthy. We have to put more incentives in there for people.

You talk to anyone. Go out and talk to anyone and ask them would they like to be healthier or would they like to be sick. That answer is easy. They want to be healthy. What kind of help do you get? When you go to your doctor, when you talk to your doctor and stuff, do they tell you how to be healthy? Well, I do not know. I do not think so. When is the last time you went to a doctor and walked out without getting a prescription? So the doctor gave you a prescription. Go get a drug. We have to change this. In our bill, we do.

Again, part of our prevention package is to focus on medical schools and how we get more people in general practices and family practices and residencies in prevention and wellness so they begin to understand how they can start working with people to keep them healthy.

So this is a way we are going to try to shift this so the person can say: Yes, I want to be healthy. And do you know what, I went to my health care practitioner—maybe a doctor, maybe a nurse practitioner, maybe a physician's assistant, and it could be a host of different people; it could be a chiropractor—and, do you know what, they spent a lot of time with me, and they gave me a program to follow to stay healthy. And guess what. They check up on me and they find out: Are you following your program? Come in. You come in here in 6 months. I am giving you this program to show you how to stay healthy. And they call me up after a month. Someone in the office called me up, asking: Are you doing this? In 6 months, I have to come back in to make sure I am doing it.

No one has ever done that before. But in our bill, you see—in our bill—they will be able to get reimbursed for that. They will be able to get reimbursed for keeping someone healthy and not just taking care of you when you are sick.

I wish to thank my friend from Oregon. He has been a great leader in this area for so many years. I look forward to working with the Senator to get us over that finish line sometime this year.

I thank Senator DODD again for all his great leadership. I say to the Presiding Officer, the Senator from Rhode Island—talking about the public option, to digress for 1 second away from prevention—here is one of the reasons we need a public option: From 2003 to 2007, the combined profits of the five largest health insurance companies went up 170 percent. Their profits went up 170 percent. The CEO compensation for the top seven health insurance companies right now: \$14.2 million a year.

Well, that is why we need a public option out there, to kind of put some brakes on that, to give some competition out there so these health insurance companies know they have to be a

little bit more stringent on maybe what they pay their CEOs, and maybe the profits will not be so high because they will have a public option out there that will act as a check both on their profits but also a check on the quality of care they provide. That is why the public option is so vital and necessary.

Well, again, I say thank you to Senator DODD for having us here tonight, and I thank him again for his great leadership on this health care bill.

I say to my friend from Oregon, we are going to get it done. We are going to make this a wellness society, not a sick society.

Mr. DODD. Mr. President, I thank our colleague from Iowa, and I thank, again, RON WYDEN for his contributions.

I wish to reintroduce a constituent of mine, Kevin Galvin. I spent the morning with Kevin today. He is a true American hero, in many ways. He did not want to become an American hero.

Kevin employs, I think, 13 people. He has a small business in Hartford, CT. He started out in a hardware business about 27 years ago and changed his business model to meet the needs and times of our country. He was never able to provide health insurance for his people, and it bothered him deeply because he did not have enough business, and health care coverage, even years ago, was more expensive than he could afford.

Students sometimes ask: Can one person make a difference? This person—I suppose the legislative leaders in my State would acknowledge this as well—this one person, on his own, over 2 years, organized 19,000 small businesses in my small State to lobby my State legislature about doing something at long last to make a difference for small businesses on health care. They achieved it about a week ago, in no small measure because one guy, who employs about 13 people, got fed up.

The average small business pays 18 percent more for health care than larger businesses and gets a lot less coverage than others do as well for the very reason Senator HARKIN pointed out: pooling, the idea of being able to work together, get together. They can hardly lift up their heads. In a small business, you are struggling every day to survive.

Seventy-five percent of our employers employ fewer than 25 people in our country. The majority of people in our Nation get a job in a small business. Yet they work so hard every day trying to keep that business afloat, particularly in times such as these.

It bothered Kevin Galvin so much, that employees of his, in some cases, had to leave him. They did not want to leave but had to because their spouse lost their job, which is what they were relying on for health insurance. He told us about one fellow today, who I think

was with him 20-some-odd years, who had to go off and find a job that paid 30 percent less in income but because they had a health care plan. He left the job he loved to take a 30-percent pay cut so his family could have health care.

A young man whom we talked to today, an employee, a Hispanic American, in Hartford, CT, is raising a family on his own and has a child with a severe disability and his parents have Alzheimer's and there is no coverage under this guy's plan, Kevin Galvin's plan, in his workplace. But they are doing everything. Kevin does whatever he can to help that family out because he loves that young man who has worked with him. He cares about him. But he cannot afford to do it forever. He cannot survive as a businessperson that way.

So we need to pay attention. Our bill does. We talked about prevention. But one of the things I am most proud of in our bill is providing those credits to small businesses so they can afford coverage, giving them the option of going to those alternative plans out there that may suit their needs the best, which they do not have today, allowing them to come together, so they have an opportunity to drive down those costs when they bargain together for the best cost for their employees, as the Senator from Rhode Island pointed out.

But I wished to point out Kevin Galvin. Today we met in his shop in Hartford, CT. The Secretary of Health and Human Services, Kathleen Sebelius, was there. The new Administrator for the Small Business Administration, Karen Mills, was there. Congresswoman ROSA DELAUNO was there. The speaker of the State house was there. The president of the State senate was there. The head of the small business community was there. They were there to say thank you to Kevin Galvin for what he had done.

If one person like that can make a difference, we ought to listen to them. When the Kevin Galvins of this country—he is a small business guy with 13 employees, struggling every day. He decided he was going to do something about it, and we ought to listen to him. He made a difference in my State. But if we listen to him, we can make a difference with small businesspeople all across this country. If we will take the language we wrote in our bill that can make a difference with small business—13 million people in this country who work for small business every day don't have health insurance. Of that 47 million, 13 million—being able to make a difference in their lives, giving them the kind of coverage, the accessibility and the affordability to health care, can make a huge difference.

One thing we don't mention enough: This week is the 44th birthday of Medicare—this week. It is a great program.

It took the poorest sector of our society out of poverty, the elderly. It also did something else. How many of us in our generation were able to do other things and make investments in other things because in 1965, this Congress, the men and women sitting in this Chamber—mostly men in those days—passed Medicare? All of a sudden, that financial burden children had to look at—the cost of pharmaceutical drugs their parents needed, going to the doctor with their parents—all of a sudden, a lot of it got taken care of. It was a financial benefit to their children.

I don't know if there are any economic models that look around and say: How much did that program not only benefit the elderly who got Medicare, but how did it benefit their children who were then able to make investments in their own children's education and in that better home and that better neighborhood, buying that second car? How much did our economy actually grow and improve because we invested in Medicare? We always talk about what it did for those who receive Medicare, but how about those who didn't receive Medicare but had removed from them—or at least partially removed—the burden of those costs they would otherwise pay?

How many people today, because of the uncertainty about their health insurance, are not making the kinds of investments in other things because they are trying to protect themselves against that crisis that could befall them? We don't talk about that.

All I hear about is how expensive this is. It is going to be expensive, but if we don't do something about it, it will be a lot more expensive—expensive to our economy, expensive to individuals, and expensive to our Nation.

So when we talk about these issues, it isn't just those who benefit as a result of having access; it also is the relief, it is the sense of comfort, that sense of confidence that, Lord forbid, something happens to me and my family, I am protected against catastrophic ruin—catastrophic ruin that can happen. I don't think we talk about that enough here. One of the reasons is because none of us here—none of us here—have to worry for one single second about that. None of us are going to be economically ruined as Members of the U.S. Congress if a health care crisis befalls us. Not one of us. Yet the millions of people we represent worry about it every single day.

That is at the heart of all of this, to be able to establish a system in our country which protects our Nation—the greatest, the wealthiest Nation in the history of mankind—from the absolute and very predictable knowledge that you have either been sick, you are sick, or you are going to get sick. I guarantee you, if you are a human being living in this country, that is going to happen to you. To what extent

does that occasion, that event put you and your family in financial ruin? It happens to millions in this country. So that as much as anything else ought to motivate us to get back here and do the job.

I see my colleague from Oregon is here, Senator MERKLEY of our committee, who has done a great job as well.

Mr. MERKLEY. Mr. President, I thank the Senator very much for his presentation and leadership on health care.

The Senator was just talking about Medicare, and when our HELP Committee was meeting, I heard a very interesting statistic; that is, while Americans spend 17 to 18 percent of our GDP on health care—more than any other country on the planet—our health outcomes overall are significantly less than several dozen other nations in the world. That is part of the puzzle we are addressing. But then I heard another piece of the puzzle; that is, for American citizens who are 65, their health prospects are among the best in the world. The question was posed before the committee: What is the difference? The difference is very simple, as the Senator from Connecticut has so described, and that was the creation of the Medicare Program. All of our citizens 65 and older have health care. If we can take it and make it a nation where all of our citizens 65 and under have health care, wouldn't it make a tremendous difference?

Mr. DODD. My colleague is absolutely correct. This is the point. People probably know, but the younger generation may not realize it. Prior to 1965, the poorest population of our country were our elderly. It was a great tragedy—the generation that grew up and then contributed so much. The 20th century—of course, by 1965, those were the veterans of World War I. They were the people who had lived through the Depression and held us together as a nation time after time, and here they were reaching their retirement years, and, as we all know, when health care problems become pretty routine.

A generation that came before us sitting in this very Chamber decided we could do better than that, and so crafted Medicare. The leadership again began with President Kennedy and culminated with the work of Lyndon Baines Johnson putting a package together with Hubert Humphrey and others, putting together that Medicare Program and taking a substantial portion of our population and giving them the assurance and the confidence that as they grow older and face health care problems, the Nation would be there to back them up and to say thank you as a gesture of gratitude for the contribution they made.

Also, there was a note of selfishness in that it relieved that younger genera-

tion from the burden of financially caring for parents beyond their economic means, in many cases. So it freed up their children to provide for that generation's grandchildren. In so many ways we have benefited from that.

So while we talk about the recipients of Medicare—and that is extremely worthwhile—we all benefited from that. It was a great economic relief to an entire Nation, not just the recipients of Medicare's assistance and support.

Mr. MERKLEY. Mr. President, if I could carry on a second point related to the Senator's comments, and that is simply as you address small business and Kevin Galvin, your constituent, to help organize small business, whereas we did a tremendous job in regard to our seniors 65 and older, we haven't done such a good job for our small businesses.

I know that over the past many years, small business owners have been coming to me and saying: JEFF, we just can't afford these double-digit increases we are getting every year in health care premiums, and we are having to shift some of the cost to our employees. We are having to consider shutting down our insurance program completely. We as small businesses can't get the same good deal the large businesses are able to get. Can't you do something about that?

I think with the bill the Senator from Connecticut has steered through committee, he has done such great work in laying out a plan that will help our small businesses in several different ways.

First is to create a pool where they will have the negotiating power of hundreds of thousands of individuals rather than having to go as a small business of 5 or so or 25 employees to the health care market, because when you go by yourself with 5 or 10 or 25 employees, it is like leading a lamb to slaughter. Now they will be able to go to the health care marketplace where they will be able to be a part of a larger pool and negotiate a much better deal.

The second is, they will have so many options when they get to that health care marketplace, whereas now there may be only one company that will hear them out and give them a possible plan, and then they will have many more to choose from.

So I think those pieces are a tremendous improvement to what I think has been a long neglected part of the health care puzzle.

Mr. DODD. Again, I thank my colleague for mentioning that. He is absolutely correct. As I mentioned earlier, the average small business pays a lot more for insurance than larger businesses do, and they get far less coverage than others do as well. That is why we provide new credits in this bill: \$2,000 per employee, family coverage;

\$1,500 for couples; and \$1,000 for individuals. That may not satisfy all of their health care costs, but it is a major break and an assistance to small businesses and guys such as Kevin Galvin who would like to be able to buy that coverage for his employees out of loyalty to their family.

One thing about small business is it becomes a family. Everybody knows everybody. You know about what their kids are doing. You know what is going on in their homes. There is a far greater deal of flexibility in trying to meet the needs because it is a family in so many ways. So being able to jump in and help them provide, as Kevin has tried to do with his own employees over the years, we open up the insurance gateway to all small businesses to give affordable insurance options to employers.

This gives small businesses the same bargaining leverage as I mentioned earlier, protection from hiking up rates on small businesses, watering down coverage, or denying coverage altogether just because one worker gets really sick—and you heard cases of that. I think Senator HARKIN talked about that small business where one employee contracted a very serious illness and the industry then jacked up the premiums for everyone, thus making it impossible for other employees to get coverage. Our bill, as our colleague from Oregon, Senator MERKLEY, mentioned, bans that case.

We exempt businesses from having to pay any penalty if you employ 25 or fewer employees, and that is a great asset. Again, 75 percent of all employers employ 25 or fewer in our country. We don't count seasonal workers. Our colleague Senator KAY HAGAN offered that amendment in our committee to exclude seasonal workers toward the total size of a small business, which is important in small agricultural communities where seasonal workers become absolutely critical. But if you start adding them all up, it would drive that small business into a larger number category. I assume in Oregon that could be a major problem, I know in the agricultural sector of your State, and it helps self-employed workers by allowing them to purchase health insurance through the gateways.

So a lot of businesses are single employers. They employ themselves. That could be tremendously costly, and by pooling, it makes it possible for those people to drive down those costs.

So a major part of our bill, as Senator MERKLEY has pointed out, is focused on small business—again, the great engine of our economic success in this country, and we pay a lot of attention to their needs in this bill.

Mr. MERKLEY. There is just one last point I wish to make, but I am happy to yield to my colleague.

Mr. HARKIN. I thank my friend from Oregon.

Mr. President, I can't thank Senator DODD enough for getting the information out on what our bill does. A lot of people don't know that we have a very comprehensive bill. This one dealing with small businesses is so important.

Now, it is true we excepted businesses that employ fewer than 25, as we should. However, I just told the story about my friend in Iowa who employs 12 people, and they buy health insurance but they only have one plan, and this would give them more.

I believe that with the bill we have and setting up these exchanges and letting different insurance companies come on the exchange, and with a public option there are a lot of small businesses out there that would like to cover their employees; they just simply can't afford it or the deductible is so high that it is not even worth it. Now I believe they will be able to take, with our bill, after it is fully implemented—it takes about 3 years to phase in, if I am not mistaken—there will be a lot of small businesses out there that employ 10 or 15 people that now will be able to get an insurance policy for their people that will be a heck of a lot more reasonable than what they can get now, and they will be able to shop for that.

So even though we have exempted them, I think a lot of small businesses want to cover their employees. They live in the same community; they go to the same church; they know one another, and they want to buy some health coverage for their employees. They can't now, but I believe under the bill we have through our committee, once we get it fully implemented, we will have that public option out there, we will have the exchange with all of the insurance programs out there, and they will be able to now shop around and find one that can fit their needs. So we will have a lot more support for small businesses that way.

Mr. DODD. Absolutely.

Mr. HARKIN. I thank the Senator.

Mr. MERKLEY. I thank the Senator very much.

The distinguished chair, Senator DODD, mentioned earlier that this bill is not just for the uninsured; this is for the insured because we have a broken health care system for the insured. My colleague from Oregon made this point, that we need to close the deal for insurance in this country.

I can tell you that folks with insurance have been telling us lots of stories about the challenges they face under our current broken status quo health care system. The first is that right now, their insurance is largely tied to their job, so if they should lose their job, it is a huge calamity—not just because they lost their job but also because they lost their insurance. It is a double whammy. This bill would change that for our families who currently have insurance.

Second, our families who currently have insurance, their costs are being

driven up, in part because they are covering the costs of the emergency room treatment for those who don't have insurance. In the last couple of years, we have had more and more people without insurance transferring more costs in the emergency room and, therefore, more costs to the insurer. Therefore, more companies—particularly small ones—are saying we cannot afford health insurance anymore.

This is a downward cycle, a death cycle in insurance that we break with this bill—helping out those who have insurance by taking away the burden of paying for the emergency room for those who don't.

A third factor is that other pieces are driving up health care more than 10 percent a year of health care premiums. That means health care is going to double every 7 years. That is unsustainable in this country for those of us who are fortunate enough to have insurance.

Then, also, citizens have been recognizing that they would like to have portability—to be able to take the insurance they have and, should they change jobs—as Americans do, on average, every 3 years—be able to have the same insurance plan, the same set of choices, the same doctors, the same doctor for themselves and their spouse and their children. That portability becomes an inherent feature of the bill, helping those who have insurance.

The list goes on. Those who currently have insurance sometimes get it at a very poor deal. As the chairman pointed out, it is 18 percent more for an individual than a small business. Now they will be able to be part of a larger pool and get a much better deal.

Finally, many of those who currently have insurance don't have existing conditions covered. If they have a bad back or a heart condition or cancer or diabetes, and they cannot have that fundamental health care issue covered by their insurance, then they don't have any form of health care insurance that matters for the issue they are wrestling with.

So in so many ways, the plan the committee has put together profoundly improves on our broken health care system for those who have insurance today in America.

Mr. DODD. I thank my colleague. There is so much to talk about, and there are so many pieces of this. I was listening to Secretary Sebelius today, and I am sure all of us have mentioned this in our own States, and we hear colleagues talk about this "tax" being imposed as a result of this bill. There is no tax being imposed by this bill. However, there is a tax that exists today, which is \$1,100 for the average family, and that is the amount the average family pays in health care premiums every year to cover the uncompensated care—that is, for those of the 47 million who show up in emergency rooms for health care. We take care of them.

If you show up in a hospital, just walk in, and you have a problem, there is not a hospital in America that doesn't take you into that emergency room. They don't throw you out on the streets and say: I am sorry, you don't have any money, so you are going to have to suffer.

Communities all across the country do this job every day. We need to understand that, of course, it is not free. That care costs. It is the most expensive health care in the country that occurs in an emergency room. The cost of that, on average, is \$1,100 per family in the United States. If that is not a tax, I don't know what is. You are not getting anything for it. You are helping to pick up the cost of the people who don't have coverage who are showing up—usually in a critical state, because they have waited until such a point that it is catastrophic, and they haven't had any prevention, as Senator HARKIN talked about earlier, and they waited forever.

Now it has come down to a crisis, and they show up in the emergency room with the child at 1 or 2 in the morning. It is not just filled with car accidents and violence. People walk in every night because they have a child or a spouse who needs care. They are reaching out in desperation, and that is expensive health care. We are paying a tax of \$1,100, and the average family pays that.

Mr. WYDEN. If the chairman would yield on that point, the reason I wanted to speak at this point is, in fact, today there is an entrepreneurship tax in America. What it means is, if you have a health care problem and you work in a small business and you have a good idea and you would like to go out and set up your own small business, you are not going to be able to do it because you have a preexisting illness. You are locked into your job. What your insurance reforms do in the HELP legislation, and what I think a lot of Senators want to do, is lift that entrepreneurship tax.

This is very appropriate that you talk about taxes because that is what this always comes down to. Your insurance reforms specifically, as a result of making sure that person who has a good idea—perhaps that gentleman's business the Senator just described—they are going to be able to do what makes America great, which is use their ingenuity and talent because when they go to their next job, they are not going to face insurance discrimination.

I appreciate the Senator bringing up the entrepreneurship tax. I am looking forward to working with the chairman over the next few weeks. I think there is additional work we can do on the exchanges. The Senator from Oregon, Mr. MERKLEY, my colleague who is doing such a good job, talked about some of those options. I think we can get additional people more bargaining power,

and in effect build on the good work done in the HELP Committee.

Thanks for all the time tonight. You have done a first-rate job on prevention. Again, I appreciate lifting that entrepreneurship tax. That is why I wanted to take a minute to point that out.

I look forward to working specifically with my colleagues on the HELP Committee. Let's expand those exchanges because that makes the system work for us and Members of Congress.

I checked the other day. My pool—put on the front page of our paper—is 1 million people. That is a lot of folks to spread costs and risk among. Senator HARKIN and I have talked about it. It is not possible to replicate that exactly, for a variety of reasons. We can get close. We can get pretty close because we can build on the good work Senators have done in the HELP Committee, expand the exchanges, and give more people choices and more opportunities to lower their premiums and, in my view, close the sale with the insured people over the next few months.

I thank the Chairman for all the time.

(Mr. MERKLEY assumed the chair.)

Mr. DODD. I thank my colleague from Oregon, a great advocate. We appreciate his involvement this evening with us. As a member of the Finance Committee, it will be critically important that we come together.

Mr. WHITEHOUSE. I wanted to follow up on Senator MERKLEY's discussion of the different ways in which somebody who is watching this, and who is insured, can look forward to some benefit from all of this. A simple one would be to think, in your own experience, how often you have gone into your doctor's office and maybe been referred to a specialist or you brought a family member in and you had to take a clipboard and fill out on paper for the umpteenth time your personal health insurance, your billing information, your Social Security information, and whatever it is they want. You have to fill it out over and over again. That is the experience many people have with our health care system.

Compare that to going online at—pick one—say, Amazon. You log into Amazon and they say: Welcome, SHELTON WHITEHOUSE. Good to have you back. Here are all the books you bought in the last year or so. Based on that, we think here are more books you might like. Choose something you would like, and your billing information is here.

Put those experiences side by side and show where our bill can take the American health care consumer, and what that means for quality of care, and not just for the convenience of not filling out the form, but when you are a pharmacy, it is connected to your laboratory, it is connected to your doc-

tor, it is connected to the hospital, and you are the center of it, and all of it is private and secure. That is a new and better world for everybody, including those who have insurance.

Who has not had somebody they know go into a hospital and come out with a hospital-acquired infection? It has happened over and over. I have had a friend who went in for a simple knee surgery, arthroscopic surgery. He was a big athlete in college, and he needed a simple surgery on his knee. He got a hospital-acquired infection—a strong, big guy—and it nearly killed him. It took him out of work for weeks. Mercifully, he recovered and everything is fine. It was touch and go for a while, and the cost of all of that was tremendous from that hospital-acquired infection. He required weeks of medical care. Everybody has had that experience. About 100,000 people every year—Americans we represent—die every year because of hospital-acquired infections.

Senator HARKIN tells me that it is the fourth leading cause of death—hospital-acquired infections. They don't care if you are insured when it comes to hospital-acquired infections. The insured will get one just as quickly as the uninsured. The quality provisions of this bill will prevent that and diminish that. That number should be under 5,000. It should be a rarity. Instead, it is a commonality. The system has to change for that to happen.

If you have an illness, try to find a prevention program. Ask anybody you know where they can go to find somebody who will support them in getting an appropriate, sensible, supported prevention program for themselves. It is rare to find. It is almost impossible. As I said earlier, when I was talking about the person who had a leg removed for \$30,000 because there was nobody there to prevent them from letting that disease get to that stage, there are big savings there. It is a human consequence. You can have all the insurance in the world, but if it doesn't have a prevention option, you are not helped.

The last thing I will say is that so many of us who feel comfortable right now with our insurance only feel that way because we have had the good luck not to have the experience of having some loved one or ourselves get very sick. People's viewpoints change when they have had that experience. They find the limits of their policy. They see how fast the copays add up. They see the fine print in what they thought was a great policy when times were good and they were healthy, with just a little injury here and there, and everything was taken care of fine; but when they got really sick they found that policy they thought they could count on wasn't there for them.

Now the leading cause of families going into bankruptcy and losing ev-

erything in this country is somebody in the family having a health care disaster that wiped them out. That should not be. It happens over and over and over. It happens to the insured. That is not the uninsured. If you are uninsured and you have medical bills, you know you will have problems, but it is the insured who are caught by surprise. They have their homes, their stock portfolios, perhaps, on the side; they have a nest egg, and maybe they help support their children a little bit. And, boom, comes the illness and suddenly they have all these costs and these bills and it is piling up and they cannot keep up and they start to get behind. Before you know it, they have lost it all, and they are in bankruptcy.

Americans have that experience every day and every one of us have heard from somebody in our State who is right there. So I think the point the chairman has been making, and Senator MERKLEY made, about how important it is for people who have insurance, in terms of improving their lives, their quality, and their care and prospects is very poor. I applaud the Senator for having made that point.

Mr. DODD. I thank my colleagues from Rhode Island, Iowa, Senators WYDEN and MERKLEY, and Senator BROWN who spent a little time talking about this. There is a lot more to talk about, such as the quality issues that Senator MIKULSKI of Maryland spent a long time helping to develop, and Senator MURRAY from Washington on workforce and the coverage questions that JEFF BINGAMAN worked on, as well.

We hope in the few days we have between now and adjournment—and we know a good part of the time will be taken up with the Sotomayor nomination—we will have a chance to talk further about this bill and say to our colleagues: We welcome your comments. There are five committees of Congress charged with the responsibility of health care. Four of the five have met and completed their work. Our committee, the HELP Committee, has completed its work. We know the Finance Committee is working to complete its work. I want to make clear that the HELP Committee product will be very much a part of this effort. We welcome the work of the Finance Committee. But much of health care coverage is the shared purview and responsibility of the Health, Education, Labor, and Pensions Committee, under the leadership of Senator KENNEDY of Massachusetts, as well as the Finance Committee. Senator KENNEDY has championed for four decades this effort. Regrettably, he cannot be with us because of his own struggles with illness. But he has helped frame this. It has been a bipartisan effort over the years.

We are determined as we move forward in this debate that the product

my colleagues have worked on so diligently over these past number of months is going to be very much a part of our health care program.

I express my gratitude to each member of the committee who helped produce this result that took so long. We have taken this time to explain to our fellow citizens what we tried to incorporate in our bill that will get us to the point of increased accessibility, increased quality, and affordable products. That is what we are gaining. That is the purpose we are driving at to get those three goals met.

I think we achieved a good part of it with this bill. More needs to be done, but, obviously, it is a great step in the right direction.

I see another partner of ours in this effort. He played a critical role with community health care centers. I say to my colleague from Vermont, last week I was in New Britain, CT. I have many community health centers in Connecticut. As a result of the stimulus package, several of them received some real help to expand because they are overcrowded. Getting electronic records is critically important. Their patients have greater needs, but they have a medical home now.

I have three volunteer clinics in Connecticut, one in Norwalk, CT, one in Danbury, CT, and one in Bridgeport, CT, under AmeriCares. That program only serves the uninsured. It is completely voluntary.

In Norwalk, I have 60 physicians in the area who volunteer their time to come in and serve the needs of the people of the greater Norwalk area, not to mention retired doctors, nurse practitioners, and others who help.

I say to my colleague, that he has been a tremendous voice—in fact, our bill increases by 400 percent the commitment to community health centers across our country. We can expand community health centers and provide that medical home for so many people. They are a source of prevention, early detection, providing for the needs of families—all of these things that occur in these remarkable facilities called community health centers.

The best champion, other than TED KENNEDY, who helped author the idea to begin with, is our colleague BERNIE SANDERS from Vermont. I thank him for that effort.

Mr. SANDERS. Mr. President, I thank Senator DODD for his kind words and extraordinary efforts over the last several months to lead the fight in health care reform.

Let me pick up on one issue Senator DODD raised. Most Americans do not understand this, but in the midst of a disintegrated health care system, we have 60 million Americans who do not on a regular basis have access to a physician—60 million. What happens when those people get sick? If you are in Vermont and you are kind of stubborn,

you delay going to the doctor when you should go, and you wait and you wait. And 6 months after you first were feeling badly, you go crawling into the doctor's office, and the doctor says: Why weren't you in here 6 months ago?

And the person says: Well, I felt awkward. I didn't have any health insurance. I was embarrassed.

The doctor says: I am getting you to the hospital because you are really sick.

So instead of treating people when they are initially ill, what we end up doing for people who do not have access to a doctor on a regular basis or do not have any health insurance is we wait until they become very ill and then we send them to the hospital and spend tens of thousands of dollars, in some instances, when we could have treated them with much less suffering and at much less cost.

There is another point that is not widely known, and that is, according to the Institute of Medicine, in this country today, we lose about 18,000 Americans every single year who die because they do not go to a doctor when they should go to the doctor. That is six times the number of people who were killed on 9/11 every single year.

What Senator DODD is talking about and what many of us have worked on is significantly expanding the federally qualified health center program, started by Senator KENNEDY four decades ago, widely supported in a bipartisan manner.

What studies tell us is, if, in fact, we can do what is in this legislation and provide a community health center with physicians, with dentists, with low-cost prescription drugs, with mental health counseling, do you know what we would end up doing, amazingly enough? We save money. We save money. We invest over a 5-year period about \$8 billion, and we end up saving money because we keep people out of the emergency rooms, we keep people out of hospitals, we keep people alive. If that is not a good investment, I don't know what is.

So the fight to make sure that every American has access to a doctor, to a dentist, to low-cost prescription drugs is certainly, in my mind, one of the crowning achievements of the Health, Education, Labor, and Pensions Committee piece of health care reform.

A month ago, I asked people on my e-mail list, which is not only Vermont, but all across the country, to write to me and tell me their relationship, how they are dealing with private health insurance companies. Within a week, we had over 4,000 responses. The booklet is available on my Web site, sanders.senate.gov. I urge people to take a look at it. If you want to know what is wrong with health care in America, this booklet will tell you.

People are writing from their hearts, from their own suffering, describing

the health care crisis. I want to read and comment on a few of the statements sent to my office. This is from a fellow in Swanton, VT, a small town in the northern part of Vermont:

My younger brother, a combat decorated veteran of the Vietnam conflict, died three weeks after being diagnosed with colon cancer. He was laid off from his job and could not afford COBRA coverage. When he was in enough pain to see a doctor, it was too late. He left a wife and two teenage sons in the prime of his life at 50 years old. The attending doctor said that if he had only sought treatment earlier, he would still be alive.

People talk about waiting lines in Canada or in Great Britain. Let's talk about over 18,000 Americans dying every year because either they do not have any health insurance or, if they do, they cannot get access to a doctor.

When we talk about the health care crisis in America, it is not just the pain that millions of Americans are experiencing, the fear, or the tens of millions of people who stay at their job today. Do you know why they are staying at their job? Not because they particularly want to stay at their job, but because they have good health insurance and their wife has an illness that needs to be covered. Talk about economic nonsense, absurdity—millions of people staying at work because they do not want to give up their health insurance. What President Obama says, because of the economic crisis, we have to address health care, is absolutely right.

Some of our friends on the other side say what they have always said: Let's do nothing. You want to do nothing? Within 10 years, the amount of money you are paying for health care today will double. If you are a small business person today in Vermont or around the country and having a hard time providing health care to your workers or maybe your family, think about what happens when the cost of health care doubles. Think about large corporations that have to compete with European, Scandinavian countries, and companies where health care becomes a right of all people and not something placed on the employer.

In this year, amazingly enough, when we talk about health care and economics—and Senator WHITEHOUSE was alluding to this a moment ago—there are 1 million people this year, it is estimated, who will go bankrupt because of medically related illnesses. Most of those people have health insurance—1 million Americans. And our friends say: We can't go forward; now is not the time to go forward on health care reform. Tell that to 1 million American families who have suffered bankruptcy.

In my view, the evidence is overwhelming that our current system is extraordinarily wasteful and bureaucratic; that in a very significant way, the function of our current health care system is not to provide quality health care to every man, woman, and child,

but, in fact, to allow people within the industry—the private insurance companies, the drug companies, the medical device suppliers—to make as much money as they possibly can.

Amazingly enough, according to the papers in the last few days, the health care industry has spent over \$130 million in the last quarter on lobbying. There are 100 Members in the Senate and 435 Members of the House—to spend \$130 million?

Where do they get that money? They get that money, if they are a drug company, by charging the American people the highest prices in the entire world. I was the first Member of Congress to take Americans over the Canadian border a number of years ago where women with breast cancer who were fighting for their lives were able to pick up breast cancer medicine at one-tenth the price. The drug companies cannot lower prices in this country—they have to charge us the highest prices in the world—but somehow they do manage to come up with tens and tens of millions of dollars to try to buy Members of the Congress.

While more and more people are losing their health insurance, we are seeing many of these private insurance companies seeing huge increases in their profits. We are seeing the insurance companies, the drug companies paying, in some cases, tens of millions of dollars in compensation packages to their CEOs.

For anybody to suggest that this country does not need health care reform is simply not to understand what is going on from one end of this country to the other. We are a great nation. There is no reason in the world why we should end up spending almost twice as much per person on health care as any other nation and yet have inferior health care outcomes in terms of infant mortality, in terms of life expectancy, in terms of preventable deaths.

We can do better. And right now, despite all of the lobbying money coming in from the health care industry, the moral imperative is for Members of Congress to think about the folks back home, the people who have no health insurance, the people who are underinsured, the people who are going bankrupt, the people who are staying at their work, not because they want to but because they have a decent health insurance program or the small business people who cannot invest in their company because they are busy spending all of their money on health care. We can do better than that. We must do better than that. Now is the time.

I hope the American people work with us in standing up to very powerful special interests and moving us toward real health care reform.

I yield the floor.

Mr. DODD. Mr. President, I want to briefly, before he leaves the floor, com-

mend my friend and colleague from Vermont. He has been a remarkable advocate, and this evening is yet one more example of it. He speaks with that passion I love to hear about these issues and talks about real people and what they go through every day.

I was thinking as he was talking, I say to Senator SANDERS, there is a wonderful small business guy in Connecticut named Penn Ritter. I have known his family a long time. He got up and talked about his business and how difficult it has been to buy health care for his employees. He talked about one particular case which is very moving.

They were laying people off. The economy was down. They didn't need people. One of the people they were going to lay off had terminal cancer. He knew if he laid him off, he would have no access to the kind of health care coverage he would need to go through the difficult period he was about to go through. But the verdict was clear. This small business decided this was not going to happen. So they kept the man on, not because they could afford to keep him on—because they couldn't afford it—but in good conscience they couldn't do that. There are people like that in small businesses all across our country, in every community in which we reside, who make a difference every day. There are wonderful providers and hospitals and places that take in people and treat them every single day. I would like to see us, in this Congress, at least rise to the level of our citizenry who do these things every day—the Penn Ritters of America, the doctors who work at Manchester Memorial Hospital in Connecticut, those people who work at AmeriCare, those volunteer doctors who show up every day. I could go down a long list, and every one of us can talk about what happens in our communities by caring people who help people maneuver and navigate in a difficult time during this health care crisis.

The least we should be able to do is to figure out how to meet the challenges they meet every single day, and my colleague from Vermont is as eloquent as any other Member on this subject matter, and I thank him for his comments.

Mr. SANDERS. I thank my colleague very much.

Mr. DODD. Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DODD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE—H.R. 2997

Mr. DODD. Mr. President, I ask unanimous consent that on Tuesday, August 4, at 10:30 a.m., the Senate proceed to vote in relation to the following amendments in the order listed; that prior to the second vote, there be 2 minutes of debate equally divided and controlled in the usual form; and that the time for the second vote be limited to 10 minutes: McCain amendment No. 1912 and McCain amendment No. 2030; that no amendment be in order to either amendment prior to the vote; and that following the second vote, the Senate then recess until 2:15 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMENDING NEVADA ASSOCIATION FOR LATIN AMERICANS, INC.

Mr. REID. Mr. President, I rise to call the attention of the Senate to the 40th anniversary of the Nevada Association for Latin Americans, Inc. NALA is a Las Vegas-based organization that strives to provide low to moderate income families educational and social services to enhance their quality of life. NALA aids the people in the Silver State with exceptional services in education, language immersion, health prevention and immigration.

NALA was established as a nonprofit organization in 1969. As a Hispanic social-service organization, NALA acquired a small daycare center in 1978. At the time it was serving mainly African-American families, but now the center serves all low-income members of the community. The Social Services that NALA offers include emergency rental, utility assistance, food vouchers, and food pantry assistance to individuals who qualify for assistance. During these difficult economic times where many families are in dire need, we are grateful for NALA's excellent services and resources.

The association's affordable preschool/childcare program benefits more than 400 children annually. The preschool program includes an exceptional ESL program and meals for the children. Many of these children become so well versed in English, that most become teachers to their limited-English speaking parents. NALA offers HIV prevention services and outreach to those living with AIDS through counseling, health care, and job training. In addition to their educational and health outreach, NALA offers immigration services through their targeted program that assists with application processing, naturalization preparation and employment referrals.

I praise the Nevada Association for Latin Americans, Inc. for their 40 years of support to the low-income community of Nevada. It is through the hard work of organizations like NALA that low-income families across Nevada and

the United States will be able to overcome the challenges of our current economy.

BURUNDI

Mr. FEINGOLD. Mr. President, Burundi is a country that should receive much greater attention from this Congress and the Obama administration in the months and year ahead. As many of my colleagues will recall, Burundi was devastated by political violence throughout the 1990s, leaving over 100,000 people dead. Yet with the mediation of the late Tanzanian President Julius Nyerere and then South African President Nelson Mandela, and the active engagement of President Clinton, a peace agreement was finally signed in August 2000. Several armed groups refused to accept the agreement, but they were brought into the fold over subsequent years. And in 2005, Burundi held multiparty national and local elections, a major milestone on its transition to peace.

In 2010, Burundi is set to hold its next round of elections. These elections have the potential to be another milestone in Burundi's path toward reconciliation, lasting stability and democratic institutions. Over the last 4 years, Burundi has made significant progress in that direction. However, there are still persistent tensions within Burundian society, which could be strained during this electoral period.

Despite all the progress that has been made, Burundi remains a fragile state and regularly appears on watch lists of countries vulnerable to internal conflict. For example, the Brookings Institution's Weak States Index last year listed Burundi as the fifth weakest state in the world, behind Iraq, the DRC, Afghanistan, and Somalia. Moreover, according to the U.N. Human Development Index, Burundi continues to be one of the poorest countries in the world.

I have been particularly concerned by reports that both the Burundian government and the armed opposition Forces for National Liberation—FNL—continue to resort to violence, intimidation and repression. According to the State Department's "Country Reports on Human Rights Practices," members of the army, the police, and the National Intelligence Service were responsible for killings, torture, and beatings of civilians and detainees in 2008, although there were fewer such reports than in the previous year. Human Rights Watch has documented a number of abuses committed against democratic political opponents by state agents and unofficial proxies in the first few months of 2009. Meanwhile, the FNL reportedly continues to abduct civilians and use violence against local officials.

In the run-up to the 2010 elections, it is quite possible that these abuses and

killings will increase as the parties compete for political power. Therefore, it is critical that the international community speak out now against human rights violations and the importance of maintaining the rule of law. We need to press the Burundian government to ensure it is not participating in any abusive behavior and help it to improve the independence and capacity of its judicial institutions. We also need to engage with and help strengthen the Electoral Commission so it can guard against any manipulation actual or perceived of the electoral process. Finally, we need to continue working with the United Nations Integrated Office in Burundi and the new Partnership for Peace in Burundi to advance disarmament and demobilization, transitional justice, reconciliation and development efforts. Burundi's peace process has come a long way, but the process is far from complete.

The United States has a unique role to play in these efforts. Because of our role in helping to broker the Arusha peace accord, the United States has significant good will in Burundi and is seen by many as a credible arbiter. In the years since, we have continued to work with regional stakeholders in support of peace. In the months leading up to Burundi's election, we need to increase that support and amplify our voice against abuses and political violence. I know President Obama's nominee to be our next ambassador to Burundi, Ambassador Pamela Slutz, understands these challenges and I look forward to working with her. Working together, regional leaders and the international community can help Burundians avert an electoral crisis and keep the peace process on track.

COMMENDING RICHARD "DICK" PEMBROKE

Mr. LEAHY. Mr. President, I would like to salute Richard "Dick" Pembroke, of North Bennington, VT, for his years of service and dedication to the State of Vermont.

Dick has been chosen as this year's honoree at the fourth annual Living History Day that will be held August 9, 2009. Dick's friends and family will pay tribute to him in downtown Bennington, for his many achievements and contributions to Bennington and to the State of Vermont.

I have had the good fortune to have known Dick for many years. Born and raised on a family farm in my hometown of Montpelier, Dick and I also share St. Michael's College in Vermont as our alma mater. He is a good friend and I am delighted for him and the recognition that he is being given.

In honor of Dick Pembroke, I ask unanimous consent that a copy of the Bennington Banner's story, "Pembroke will be honored August 9 as 'Living History,'" be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Bennington Banner, July 23, 2009]

PEMBROKE WILL BE HONORED AUGUST 9 AS
"LIVING HISTORY"

NORTH BENNINGTON.—Richard "Dick" Pembroke of Harrington Road will be this year's honoree for the fourth annual Living History Day to be held on Aug. 9 in front of Powers Market.

A different resident is chosen each year to be recognized for their achievements and contribution in shaping the local community. The two-hour event offers others a venue to share stories about the honoree and enjoy time with neighbors and friends. In addition to stories, there will be music, Kevin's hot dogs and much more. The event takes place from noon to 2 p.m., is free and open to all ages.

Pembroke has lived a spiritually rich and diversified private and public life. He was the eldest of four children, born and raised in Vermont on the family farm in Montpelier. He attended St. Michael's College in Winooski and subsequently served in the Navy during the Korean War and afterward, from 1951 to 1955. He met and married his wife, MaryAnn, while stationed in Pensacola, Fla. Upon returning to Vermont a short time later, he was employed at the First National Grocery Store Corp.

Pembroke managed several stores before opening one in Bennington in 1962. His love of horticulture and the outdoors was insatiable. To fulfill this passion, he began a landscaping business on the side, which gradually grew. In 1973, he left the grocery business and directed his full attention to Pembroke Landscaping.

Being the father of one daughter and three sons kept him busy and involved with loyal education. Pembroke coached Little League and helped to construct the local Little League park. He was also a member of the Mount Anthony Union High School Booster Club from 1973 to 1980 as well as other school organizations. Pembroke joined the Lions Club in 1957 and was involved with building the current Lions Field. He was a member of the University of Vermont board from 1980 to 1986, director for the American Red Cross and a member of the Knights of Columbus since 1963. He served on the Bennington Zoning Board of Adjustment from 1975 to 1987 and was chairman for 11 years.

In 1986, he discovered another avenue of public service that suited him quite well: He was elected to the Vermont House of Representatives, where he was chairman of the House Transportation Committee for 12 of the 16 years he served. He championed the construction of Route 279 in and around Bennington and worked diligently on many infrastructure projects related to safety and economic development.

In 2006, he was voted chamber of commerce person of the year. "Retirement" is not a word in Pembroke's vocabulary. He continues to keep a foot in the door of Pembroke Landscaping and currently sits on the State Environmental board as well as trustee/director of the Southwestern Vermont Medical Center.

ADDITIONAL STATEMENTS

COMMENDING EDDIE LEE PEPPE

• Ms. CANTWELL. Mr. President, today I honor Mr. Eddie Lee Pepple,

varsity basketball coach at Mercer Island High School, in retiring after 52 years of faithful service to our Nation and our youth. His distinguished career has culminated as varsity coach at Mercer Island High School where he has taught basketball for 42 years, leading the team to win 4 Washington State AAA Championships, and inspiring thousands of young students.

Coach Pepple was born in Denver, CO. He graduated from the University of Utah in 1955 with a bachelor of arts degree, and went on to serve in the Marine Corps from 1956-1957. He was the captain of the Quantico Marine Corps basketball team and Pendleton Marine Corps basketball team, winning a Marine Corps Championship with the Quantico Marines in 1956. He later earned his masters' degree in 1965 at Oregon State University.

He began his coaching career in 1958 as the varsity basketball coach at Fife High School in Washington State, where he led the team to a 4th place finish in the 1961 State Tournament. After 6 years of dedicated service to Fife High School, Coach Pepple went on to be the assistant coach at Meadowdale High School from 1964-1966, and then varsity coach at Mark Morris High School in 1967.

In 1968, Coach Ed Pepple began as varsity coach at Mercer Island High School, where he has led the team to 23 league championship tournaments, 4 final placements as State AAA Champions, and 13 second place finishes in the State championship tournament. His overall winning record during his tenure at Mercer Island High School is 78.8 percent after winning 882 of the 1,119 games he has coached.

During these 52 years of devoted public service, Coach Pepple has been recognized by numerous organizations as an outstanding basketball coach and is nationally renowned for his inspiration, dedication, and success. In 1985, after leading Mercer Island High School to his first State AAA championship, Coach Pepple was awarded his first Coach of the Year Award by both the Kingco Conference, and the Washington State Interscholastic Basketball Association. He has since won the Kingco Coach of the year award five more times, and the Washington State Interscholastic Basketball Association award again in 1993.

In 1986, Coach Pepple was nationally celebrated when he received the Region 7 Coach of the Year award from the National High School Athletic Coaches Association, NHSACA. He received this award once again in 1993 and 1998. In 1998 Coach Pepple was also recognized by the NHSACA as the National Coach of the Year, one of the highest national awards a distinguished coach can receive. He has also served as the prestigious West Head Coach of the McDonald's All American Game, and served on the McDonald's All American Game Selection Committee for 17 years.

In 1997 and 1999, the Washington Interscholastic Basketball Coaches Association also recognized Coach Pepple as the AAA Coach of the Year. He has been the chairman of this organization for the past 26 years. In total, Coach Pepple has been awarded 17 Coach of the Year awards and has been inaugurated into the Puget Sound Hall of Fame, the Washington Interscholastic Activities Association Hall of Fame, the Washington Interscholastic Basketball Coaches Association Hall of Fame, and most recently the National High School Athletic Coaches Association Hall of Fame in 2006.

Upon his retirement Coach Pepple will be inaugurated into the Everett Community College Hall of Fame, and honored by the establishment of the Ed Pepple Coaches' Service Award by the Washington Interscholastic Basketball Coaches Association, as recognition of his service to the Washington State basketball community.

It is through the commitment and sacrifice of Americans such as Eddie Lee Pepple that our young adults are able to thrive and succeed. He has bettered our communities in Washington State, and touched the lives of countless students through his dedication to coaching and teaching. I am proud to thank him, his wife Shirley, and children Terry, Jill, Jody, and Kyle for his honorable service to our Nation as a coach. I congratulate Coach Pepple and give my best wishes as he concludes his distinguished career.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Williams, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 2:03 p.m., the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that it has passed the following bills and joint resolution, in which it requests the concurrence of the Senate:

H.R. 2510. An act to amend the Help America Vote Act of 2002 to reimburse States for the costs incurred in establishing a program to track and confirm the receipt of voted absentee ballots in elections for Federal office and make information on the receipt of such ballots available by means of online access, and for other purposes.

H.R. 2728. An act to provide financial support for the operation of the law library of the Library of Congress, and for other purposes.

H.R. 2749. An act to amend the Federal Food, Drug, and Cosmetic Act to improve the safety of food in the global market, and for other purposes.

H.R. 2913. An act to designate the United States courthouse located at 301 Simonton Street in Key West, Florida, as the "Sidney M. Aronovitz United States Courthouse".

H.R. 3269. An act to amend the Securities Exchange Act of 1934 to provide shareholders with an advisory vote on executive compensation and to prevent perverse incentives in the compensation practices of financial institutions.

H.R. 3326. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes.

H.R. 3435. An act making supplemental appropriations for fiscal year 2009 for the Consumer Assistance to Recycle and Save Program.

H.J. Res. 12. Joint resolution expressing support for designation of September 2009 as "Gospel Music Heritage Month" and honoring gospel music for its valuable and longstanding contributions to the culture of the United States.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 171. Concurrent resolution authorizing the use of the Capitol Grounds for an event to honor military personnel who have died in service to the United States and to acknowledge the sacrifice of the families of those individuals as part of the National Weekend of Remembrance.

The message further announced that it has passed the following joint resolution (S.J. Res. 19) granting the consent and approval of Congress to amendments made by the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to the Washington Metropolitan Area Transit Regulation Compact, without amendment.

The message also announced that pursuant to section 194 of title 14, United States Code, Mr. OBERSTAR, Chairman of the Committee on Transportation and Infrastructure, appoints the following Members of the House of Representatives to the United States Coast Guard Academy Board of Visitors: Mr. MICHAEL H. MICHAUD of Maine, Ms. MAZIE HIRONO of Hawaii, and Mr. JOHN L. MICA of Florida.

ENROLLED BILLS SIGNED

The message further announced that the speaker has signed the following enrolled bills:

S. 1107. An act to amend title 28, United States Code, to provide for a limited 6-month period for Federal judges to opt into the Judicial Survivors' Annuities System and begin contributing toward an annuity for their spouse and dependent children upon their death, and for other purposes.

H.R. 3357. An act to restore sums to the Highway Trust Fund and for other purposes.

The enrolled bills were subsequently signed by the President pro tempore (Mr. BYRD).

MEASURES REFERRED

The following bills and joint resolution were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 2510. An act to amend the Help America Vote Act of 2002 to reimburse States for the costs incurred in establishing a program to track and confirm the receipt of voted absentee ballots in elections for Federal office and make information on the receipt of such ballots available by means of online access, and for other purposes; to the Committee on Rules and Administration.

H.R. 2728. An act to provide financial support for the operation of the law library of the Library of Congress, and for other purposes; to the Committee on Rules and Administration.

H.R. 2749. An act to amend the Federal Food, Drug, and Cosmetic Act to improve the safety of food in the global market, and for other purposes; to the Committee on Health, Education, Labor, and Pensions.

H.R. 3269. An act to amend the Securities Exchange Act of 1934 to provide shareholders with an advisory vote on executive compensation and to prevent perverse incentives in the compensation practices of financial institutions; to the Committee on Banking, Housing, and Urban Affairs.

H.R. 3326. An act making appropriations for the Department of Defense for the fiscal year ending September 30, 2010, and for other purposes; to the Committee on Appropriations.

H.J. Res. 12. Joint resolution expressing support for designation of September 2009 as "Gospel Music Heritage Month" and honoring gospel music for its valuable and longstanding contributions to the culture of the United States; to the Committee on Health, Education, Labor, and Pensions.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

H.R. 3435. An act making supplemental appropriations for fiscal year 2009 for the Consumer Assistance to Recycle and Save Program.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, August 3, 2009, she had presented to the President of the United States the following enrolled bill:

S. 1107. An act to amend title 28, United States Code, to provide for a limited 6-month period for Federal judges to opt into the Judicial Survivors' Annuities System and begin contributing toward an annuity for their spouse and dependent children upon their death, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-2568. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Es-

tablishment of Suspension and Revocation National Center of Expertise" ((RIN1625-ZA22) (Docket No. USG-2009-0314)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2569. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Special Local Regulation for Marine Event; Temporary Change of Dates for Recurring Marine Event in the Fifth Coast Guard District" ((RIN1625-AA08) (Docket No. USG-2009-0252)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2570. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Special Local Regulation, Maggie Fischer Memorial Great South Bay Cross Bay Swim, Great South Bay, New York" ((RIN1625-AA08) (Docket No. USG-2009-0302)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2571. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Special Local Regulation; Summer Marine Events, Coastal Massachusetts" ((RIN1625-AA08) (Docket No. USG-2009-0448)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2572. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Operation Regulation; Manasquan River, New Jersey" ((RIN1625-AA09) (Docket No. USG-2009-0233)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2573. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Drawbridge Operation Regulation; Ernest Lyons (SR A1A), Stuart Florida, and Memorial Clearwater Causeway (SR 60), Clearwater Florida" ((RIN1625-AA09) (Docket No. USG-2007-0129)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2574. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; James River, Navy Live Fire and Explosive Training" ((RIN1625-AA00) (Docket No. USG-2009-0568)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2575. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Friends of Fireworks Celebration, Lake Huron, St. Ignace, Michigan" ((RIN1625-AA00) (Docket No. USG-2009-0649)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2576. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant

to law, the report of a rule entitled "Safety Zone; Atlantic Intracoastal Waterway, Oak Island, North Carolina" ((RIN1625-AA00) (Docket No. USG-2009-0565)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2577. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Access Destinations Fireworks Display, San Diego Bay, California" ((RIN1625-AA00) (Docket No. USG-2009-0513)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2578. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Norfolk Tides Post-Game Fireworks Displays, Elizabeth River, Norfolk, Virginia" ((RIN1625-AA00) (Docket No. USG-2009-0274)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2579. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Fireworks Displays within the Captain of the Port Puget Sound Zone" ((RIN1625-AA00) (Docket No. USG-2009-0532)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2580. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Fireworks Display at the Craneway Building, Richmond, California" ((RIN1625-AA00) (Docket No. USG-2009-0521)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2581. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "Safety Zone; Kinnickinnic River Sediment Removal Project, Milwaukee, Wisconsin" ((RIN1625-AA00) (Docket No. USG-2009-0399)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2582. A communication from the Attorney Advisor, U.S. Coast Guard, Department of Homeland Security, transmitting, pursuant to law, the report of a rule entitled "2009 Rates for Pilotage on the Great Lakes" ((RIN1625-AB29) (Docket No. USG-2008-1126)) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Commerce, Science, and Transportation.

EC-2583. S. 1155

At the request of Ms. COLLINS, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of S. 1155, a bill to amend title 38, United States Code, to establish the position of Director of Physician Assistant Services within the office of the Under Secretary of Veterans Affairs for health.

S. 1160

At the request of Mr. SCHUMER, the name of the Senator from New York (Mrs. GILLIBRAND) was added as a cosponsor of S. 1160, a bill to provide housing assistance for very low-income veterans.

S. 1273

At the request of Mr. DORGAN, the names of the Senator from Vermont (Mr. SANDERS) and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of S. 1273, a bill to amend the Public Health Service Act to provide for the establishment of permanent national surveillance systems for multiple sclerosis, Parkinson's disease, and other neurological diseases and disorders.

S. 1295

At the request of Mrs. SHAHEEN, the name of the Senator from Virginia (Mr. WARNER) was added as a cosponsor of S. 1295, a bill to amend title XVIII of the Social Security Act to cover transitional care services to improve the quality and cost effectiveness of care under the Medicare program.

S. 1320

At the request of Mr. TESTER, the name of the Senator from Alaska (Mr. BEGICH) was added as a cosponsor of S. 1320, a bill to provide assistance to owners of manufactured homes constructed before January 1, 1976, to purchase Energy Star-qualified manufactured homes.

S. 1362

At the request of Mr. REED, the name of the Senator from Minnesota (Mr. FRANKEN) was added as a cosponsor of S. 1362, a bill to provide grants to States to ensure that all students in

the middle grades are taught an academically rigorous curriculum with effective supports so that students complete the middle grades prepared for success in high school and postsecondary endeavors, to improve State and district policies and programs relating to the academic achievement of students in the middle grades, to develop and implement effective middle grades models for struggling students, and for other purposes.

S. 1382

At the request of Mr. DODD, the name of the Senator from New Mexico (Mr. UDALL) was added as a cosponsor of S. 1382, a bill to improve and expand the Peace Corps for the 21st century, and for other purposes.

S. 1402

At the request of Mr. MERKLEY, the name of the Senator from Georgia (Mr. ISAKSON) was added as a cosponsor of S. 1402, a bill to amend the Internal Revenue Code of 1986 to increase the amount allowed as a deduction for start-up expenditures.

S. 1422

At the request of Mrs. MURRAY, the names of the Senator from Alaska (Mr. BEGICH) and the Senator from North Carolina (Mr. BURR) were added as cosponsors of S. 1422, a bill to amend the Family and Medical Leave Act of 1993 to clarify the eligibility requirements with respect to airline flight crews.

S. 1452

At the request of Mr. SCHUMER, the name of the Senator from Illinois (Mr. BURRIS) was added as a cosponsor of S. 1452, a bill to amend title 38, United States Code, to clarify the meaning of "combat with the enemy" for purposes of service-connection of disabilities.

S. 1518

At the request of Mr. BURR, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1518, a bill to amend title 38, United States Code, to furnish hospital care, medical services, and nursing home care to veterans who were stationed at Camp Lejeune, North Carolina, while the water was contaminated at Camp Lejeune.

S. 1542

At the request of Mr. SCHUMER, the names of the Senator from Maine (Ms. SNOWE), the Senator from New York (Mrs. GILLIBRAND) and the Senator from South Dakota (Mr. JOHNSON) were added as cosponsors of S. 1542, a bill to impose tariff-rate quotas on certain casein and milk protein concentrates.

S. 1543

At the request of Mr. DODD, the name of the Senator from Georgia (Mr. CHAMBLISS) was added as a cosponsor of S. 1543, a bill to amend the Family and Medical Leave Act of 1993 and title 5, United States Code, to provide leave for family members of members of regular components of the Armed Forces, and leave to care for covered veterans, and for other purposes.

S. 1545

At the request of Mrs. GILLIBRAND, the name of the Senator from New York (Mr. SCHUMER) was added as a cosponsor of S. 1545, a bill to expand the research and awareness activities of the National Institute of Arthritis and Musculoskeletal and Skin Diseases and the Centers for Disease Control and Prevention with respect to scleroderma, and for other purposes.

S. 1554

At the request of Mr. HARKIN, the name of the Senator from Louisiana (Ms. LANDRIEU) was added as a cosponsor of S. 1554, a bill to amend the Juvenile Justice and Delinquency Prevention Act of 1974 to prevent later delinquency and improve the health and well-being of maltreated infants and toddlers through the development of local Court Teams for Maltreated Infants and Toddlers and the creation of a National Court Teams Resource Center to assist such Court Teams, and for other purposes.

S. CON. RES. 36

At the request of Mrs. LINCOLN, the names of the Senator from Connecticut (Mr. LIEBERMAN) and the Senator from Alabama (Mr. SESSIONS) were added as cosponsors of S. Con. Res. 36, a concurrent resolution supporting the goals and ideals of "National Purple Heart Recognition Day."

S. CON. RES. 37

At the request of Mr. JOHANNES, the names of the Senator from Indiana (Mr. BAYH), the Senator from Oklahoma (Mr. INHOFE) and the Senator from Alaska (Mr. BEGICH) were added as cosponsors of S. Con. Res. 37, a concurrent resolution supporting the goals and ideals of senior caregiving and affordability.

S. RES. 210

At the request of Mrs. LINCOLN, the names of the Senator from New York (Mr. SCHUMER) and the Senator from Virginia (Mr. WARNER) were added as cosponsors of S. Res. 210, a resolution designating the week beginning on November 9, 2009, as National School Psychology Week.

S. RES. 233

At the request of Mr. BROWNBAC, the name of the Senator from Kansas (Mr. ROBERTS) was added as a cosponsor of S. Res. 233, a resolution commending Russ Meyer on his induction into the National Aviation Hall of Fame.

AMENDMENT NO. 2225

At the request of Mrs. MURRAY, the name of the Senator from Washington (Ms. CANTWELL) was added as a cosponsor of amendment No. 2225 proposed to H.R. 2997, a bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2229

At the request of Mr. BROWNBAC, the name of the Senator from Ohio (Mr.

BROWN) was added as a cosponsor of amendment No. 2229 proposed to H.R. 2997, a bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

AMENDMENT NO. 2236

At the request of Ms. SNOWE, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of amendment No. 2236 intended to be proposed to H.R. 2997, a bill making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

STATEMENTS ON INTRODUCED
BILLS AND JOINT RESOLUTIONS

By Mrs. FEINSTEIN (for herself,
Mr. KERRY, Mr. DODD, Mr.
LEAHY, and Ms. MIKULSKI):

S. 1556. A bill to require the Secretary of Veterans Affairs to permit facilities of the Department of Veterans Affairs to be designated as voter registration agencies, and for other purposes; to the Committee on Veterans' Affairs.

Mrs. FEINSTEIN. Mr. President, I rise to introduce the Veteran Voting Support Act of 2009 with Senator KERRY, and our cosponsors: Senators DODD and LEAHY.

This is a straightforward bill that shows our veterans the respect that they deserve. Veterans have supported and served our Nation—many at great risk and sacrifice. It is unacceptable for us to allow barriers to exist that make it more difficult for them to exercise their right to vote.

The bill that Senator KERRY and I are introducing today would require the Department of Veterans Affairs to take steps to assist veterans with voter registration and to make it easier for them to obtain ballots and cast their votes.

The most recent Census data we have—from a 2005 report—indicates that more than 20 percent of our veterans are not registered to vote. That means that almost 5 million veterans do not have an opportunity to cast their ballots.

Yet, we have massive VA programs in place that provide veterans with healing and medical care, and ensure that they thrive on their return from military service.

In total, there are 1,261 total VA facilities. The Veterans Health Administration operates 155 medical centers, 135 nursing homes, 717 ambulatory care and clinic facilities; 45 residential rehabilitation treatment programs, and 209 vet centers.

In those facilities there are as many as 5 million veterans who are not registered to vote. That strikes me as a critical need unmet.

Even more disturbing, in certain cases, the VA has been hostile to calls for it to facilitate voter registration and voting.

More than 2 years ago, I learned that a Department of Veterans Affairs facility in California had been opposing voter registration services since 2004. I began inquiring and received conflicting answers, but what was clear was that there was no cooperation or work to help veterans that used the facility to vote.

In Connecticut, Secretary of State Susan Bysiewicz defied the VA's directive and tried to gain entry to a West Haven VA facility.

She intended to provide nonpartisan voter registration services, as well as to show veterans how to use the new disabled-access voting systems.

Guess what. She was turned away at the door.

As she was standing outside the door, she met a 91-year-old gentleman, a veteran of World War II. Secretary Bysiewicz asked him if he would like to be registered to vote, and he said that he would.

After registering, he made the comment that "I wanted to do this last year—but there was no-one there to help me." That is wholly unacceptable.

Last year, throughout the year, Senator KERRY and I exchanged multiple letters with the VA on this issue. We were told that VA officials believed providing voting support or allowing groups to do so would violate the Hatch Act.

The Hatch Act, however, prohibits partisan political activities from being conducted by Federal employees, on official time. It has not been interpreted to include nonpartisan voter registration by the Office of Special Counsel, which interprets the Hatch Act. Furthermore, the veterans served by VA facilities are generally not Federal employees.

The VA then argued that nonpartisan voter registration services would cause "disruptions to facility operations."

That claim is even more dubious. Unless "Rock the Vote" comes to VA facilities, voter registration drives are about as tame an activity as you can get.

The law allows the Federal Government to choose to assist people with voter registration if the State requests that a federal agency be designated as a registration facility under the National Voter Registration Act and the agency accepts. Several States, including my home State of California, under the leadership of Secretary Bowen, asked the VA designate facilities within their States under the National Voter Registration Act. But they were refused.

Finally, after much negotiation, the VA settled on a new and substantially improved policy that allows state and local election officials, as well as non-

partisan groups, access to VA facilities for voter registration as long as they coordinate with the facility. This is a significant improvement, no doubt.

I believe, however, that Federal law is still necessary to ensure that these voluntary policies are never rolled back, and that enforcement mechanisms are in place.

This is why we are introducing the Veteran Voting Support Act of 2009. The bill would require the VA to provide voter registration forms whenever veterans enroll in the VA health care system, or change their status or address in that system.

It would say that VA facilities must assist veterans who have trouble with their voter registration forms in the same way that they help veterans fill out other forms, and it would say that veterans must be able to access and receive assistance with absentee ballots at VA facilities.

It would allow nonpartisan groups and election officials to provide nonpartisan voter information and registration services to veterans.

And it would allow Attorney General enforcement through civil suits and injunctions and require an annual report to Congress from the Department of Veterans Affairs on progress related to this legislation.

It is a cornerstone of our democracy that every eligible citizen should be registered and able to cast their vote.

This bill recognizes that nonpartisan and civil rights groups have long played a critical role in helping people with the voter registration process.

I believe it is time that we ensure that the Department of Veterans Affairs will provide veterans with the support they deserve to register, cast their vote, and have that vote counted.

I hope my colleagues will join me in supporting the Veteran Voting Support Act of 2009.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1556

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veteran Voting Support Act of 2009".

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Veterans have performed a great service to, and risked the greatest sacrifice in the name of, our country, and should be supported by the people and the Government of the United States.

(2) Veterans are especially qualified to understand issues of war, foreign policy, and government support for veterans, and they should have the opportunity to voice that understanding through voting.

(3) The Department of Veterans Affairs should assist veterans to register to vote and to vote.

SEC. 3. VOTER REGISTRATION AND ASSISTANCE.

(a) **IN GENERAL.**—The Secretary of Veterans Affairs (in this section referred to as the “Secretary”) shall provide a mail voter registration application form to each veteran—

(1) who seeks to enroll in the Department of Veterans Affairs health care system (including enrollment in a medical center, a community living center, a community-based outpatient center, or a domiciliary of the Department of Veterans Affairs health care system), at the time of such enrollment; and

(2) who is enrolled in such health care system—

(A) at any time when there is a change in the enrollment status of the veteran; and

(B) at any time when there is a change in the address of the veteran.

(b) **PROVIDING VOTER REGISTRATION INFORMATION AND ASSISTANCE.**—The Secretary shall provide to each veteran described in subsection (a) the same degree of information and assistance with voter registration as is provided by the Veterans Administration with regard to the completion of its own forms, unless the applicant refuses such assistance.

(c) **TRANSMITTAL OF VOTER REGISTRATION APPLICATION FORMS.**—

(1) **IN GENERAL.**—The Secretary shall accept completed voter registration application forms for transmittal to the appropriate State election official.

(2) **TRANSMITTAL DEADLINE.**—

(A) **IN GENERAL.**—Subject to subparagraph (B), a completed voter registration application form accepted at a medical center, community living center, community-based outpatient center, or domiciliary of the Department of Veterans Affairs shall be transmitted to the appropriate State election official not later than 10 days after the date of acceptance.

(B) **EXCEPTION.**—If a completed voter registration application form is accepted within 5 days before the last day for registration to vote in an election, the application shall be transmitted to the appropriate State election official not later than 5 days after the date of acceptance.

(d) **REQUIREMENTS OF VOTER REGISTRATION INFORMATION AND ASSISTANCE.**—The Secretary shall ensure that the information and assistance with voter registration that is provided under subsection (b) will not—

(1) seek to influence an applicant's political preference or party registration;

(2) display any such political preference or party allegiance;

(3) make any statement to an applicant or take any action the purpose or effect of which is to discourage the applicant from registering to vote; or

(4) make any statement to an applicant or take any action the purpose or effect of which is to lead the applicant to believe that a decision to register or not register has any bearing on the availability of services or benefits.

(e) **LIMITATION ON USE OF INFORMATION.**—No information relating to registering to vote, or a declination to register to vote, under this section may be used for any purpose other than voter registration.

(f) **ENFORCEMENT.**—

(1) **NOTICE.**—

(A) **NOTICE TO THE FACILITY DIRECTOR OR THE SECRETARY.**—A person who is aggrieved by a violation of this section or section 4 may provide written notice of the violation to the Director of the facility of the Department of Veterans Affairs health care system

involved or to the Secretary. The Director or the Secretary shall respond to a written notice provided under the preceding sentence within 20 days of receipt of such written notice.

(B) **NOTICE TO THE ATTORNEY GENERAL AND THE ELECTION ASSISTANCE COMMISSION.**—If the violation is not corrected within 90 days after receipt of a notice under subparagraph (A), the aggrieved person may provide written notice of the violation to the Attorney General and the Election Assistance Commission.

(2) **ATTORNEY GENERAL.**—The Attorney General may bring a civil action in an appropriate district court for such declaratory or injunctive relief as is necessary to carry out this section or section 4.

SEC. 4. ASSISTANCE WITH ABSENTEE BALLOTS.

(a) **IN GENERAL.**—Consistent with State and local laws, each director of a community living center, a domiciliary, or a medical center of the Department of Veterans Affairs health care system shall provide assistance in voting by absentee ballot to veterans residing in the community living center or domiciliary or who are inpatients of the medical center, as the case may be.

(b) **ASSISTANCE PROVIDED.**—The assistance provided under subsection (a) shall include—

(1) providing information relating to the opportunity to request an absentee ballot;

(2) making available absentee ballot applications upon request, as well as assisting in completing such applications and ballots; and

(3) working with local election administration officials to ensure proper transmission of absentee ballot applications and absentee ballots.

SEC. 5. INFORMATION PROVIDED BY NON-PARTISAN ORGANIZATIONS.

The Secretary of Veterans Affairs shall permit nonpartisan organizations to provide voter registration information and assistance at facilities of the Department of Veterans Affairs health care system, subject to reasonable time, place, and manner restrictions, including limiting activities to regular business hours and requiring advance notice.

SEC. 6. ASSISTANCE PROVIDED BY ELECTION OFFICIALS AT DEPARTMENT OF VETERANS AFFAIRS FACILITIES.

(a) **DISTRIBUTION OF INFORMATION.**—

(1) **IN GENERAL.**—Subject to reasonable time, place, and manner restrictions, the Secretary of Veterans Affairs shall not prohibit any election administration official, whether State or local, party-affiliated or non-party affiliated, or elected or appointed, from providing voting information to veterans at any facility of the Department of Veterans Affairs.

(2) **VOTING INFORMATION.**—In this subsection, the term “voting information” means nonpartisan information intended for the public about voting, including information about voter registration, voting systems, absentee balloting, polling locations, and other important resources for voters.

(b) **VOTER REGISTRATION SERVICES.**—The Secretary of Veterans Affairs shall provide reasonable access to facilities of the Department of Veterans Affairs health care system to State and local election officials for the purpose of providing nonpartisan voter registration services to individuals, subject to reasonable time, place, and manner restrictions, including limiting activities to regular business hours and requiring advance notice.

SEC. 7. ANNUAL REPORT ON COMPLIANCE.

The Secretary of Veterans Affairs (in this section referred to as the “Secretary”) shall

submit to Congress an annual report on how the Secretary has complied with the requirements of this Act. Such report shall include the following information with respect to the preceding year:

(1) The number of veterans who were served by facilities of the Department of Veterans Affairs health care system.

(2) The number of such veterans who requested information on or assistance with voter registration.

(3) The number of such veterans who received information on or assistance with voter registration.

(4) Information with respect to written notices submitted under section 3(f), including information with respect to the resolution of the violations alleged in such written notices.

SEC. 8. RULES OF CONSTRUCTION.

(a) **NO INDIVIDUAL BENEFIT.**—Nothing in this Act may be construed to convey a benefit to an individual veteran.

(b) **NO EFFECT ON OTHER LAWS.**—Nothing in this Act may be construed to authorize or require conduct prohibited under any of the following laws, or to supersede, restrict, or limit the application of such laws:

(1) The Voting Rights Act of 1965 (42 U.S.C. 1973 et seq.).

(2) The Voting Accessibility for the Elderly and Handicapped Act (42 U.S.C. 1973ee et seq.).

(3) The Uniformed and Overseas Citizens Absentee Voting Act (42 U.S.C. 1973ff et seq.).

(4) The National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.).

(5) The Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).

(6) The Rehabilitation Act of 1973 (29 U.S.C. 701 et seq.).

By Mr. BEGICH:

S. 1560. A bill to amend the Outer Continental Shelf Lands Act to provide for the sharing of certain outer Continental Shelf revenues from areas in the Alaska Adjacent Zone; to the Committee on Energy and Natural Resources.

Mr. BEGICH. Mr. President, I rise today for the first time on this floor to mark the 50th anniversary of Alaska's statehood and to draw the attention of my colleagues to an urgent issue that affects not only my State but all of our States—the issue of global climate change.

This year, thanks to actions taken in this very Chamber, Alaska is celebrating its golden anniversary of statehood. Acquiring the rights and responsibilities of full citizenship was the culmination of a dream for citizens of the 49th State. Statehood granted us the ability to exercise control over our vast natural resources and gave us a full voice in our national government. In the half century since, Alaska has grown from the Nation's largest supplier of salmon to become the Nation's storehouse of both seafood and energy.

Because of its strategic location near the top of the globe, Alaska plays a critical role in our Nation's defense. During the Cold War, the superpowers stared down each other across the frozen polar ice cap. Thanks to a thaw in the geopolitical climate, the “ice curtain” separating Alaska and Russia

melted some 20 years ago. Today, it is a change in the climate itself that present serious new challenges—and great opportunities—to my State and our Nation.

Alaska is now at Ground Zero for the effects of global climate change. I take this opportunity today to detail how that is affecting the lives of Alaskans. I will describe a package of legislation I am introducing to prepare my State and the Nation for the next 50 years. During that time, the Arctic will play an even larger role in the Nation's commerce, foreign policy, and energy independence.

Mr. President, to me there is no more dramatic illustration of global warming in Alaska than these two pictures taken at Portage Glacier, just about 50 miles south of Anchorage. The top photo, taken by my dad in 1970, shows me and two of my brothers and a sister. The glacier is clearly in view. The bottom photo was taken 35 years later, in 2005. It is of my son, Jacob, standing in the exact same spot at the same time of year. The glacier is nowhere to be seen because it has dramatically receded due to global warming.

Today in the Arctic, the sea is melting so fast that most of it could be gone in 30 years. You can clearly see it in this polar projection of the Arctic. The implications of the loss are enormous. Devastating for species such as the polar bear, walrus, and seals, which depend on ice for their very survival; life-altering for Arctic residents who have depended on marine mammals for their nutritional and cultural needs for thousands of years; literally earth-shattering for entire Alaskan Arctic communities, which are being wiped away by erosion and thawing permafrost.

When this global air-conditioner is knocked off kilter, it accelerates climatic changes we are already witnessing around the globe that neither science nor our political systems can stop.

Consider these examples.

Storms raging over waters that once were frozen solid but which are now ice-free for much of the year are eroding sections of the Alaska shoreline at rates of 45 feet per year or more. This undermines entire coastal villages like Shishmaref and Kivalina.

Thawing permafrost is causing roads and the foundations of homes to buckle.

A recent study by the University of Alaska's Institute of Social and Economic Research estimated that the impacts of climate change will increase the cost of maintaining or replacing just today's public infrastructure in my State by \$6 billion.

The potential release of massive amounts of methane now sealed in the permafrost threaten to accelerate the pace of climate change. That is known to scientists as "Arctic Feedback."

Warming water temperatures are pushing cold water species north and attracting warm water species from the south. Fishermen in Sitka are encountering the giant Humboldt squid from Mexico.

Tuna—whose usual habitat favors the tropics—have been caught near Homer. And invasive species such as green crab are moving steadily northward.

Ocean acidification—the result of absorption of carbon into our marine waters—weakens shellfish, coral, and even plankton, the very first link of the marine food chain.

At the G-8 Summit last month in Italy, developing nations agreed to the principle of limiting the average increase in the Earth's temperature to no more than 2 degrees Celsius above pre-industrial levels.

In the American Arctic, we exceeded that long ago. The diminishing ice creates opportunities in the Arctic, but even these pose new challenges. For example, the Beaufort and Chukchi seas are believed to contain almost twice as much oil as already has been produced from the North Slope.

Arctic oil and gas development has been conducted safely on-shore in Alaska. Alaskans also have the technology to safely produce it off-shore.

But subsistence users who rely on marine mammals for their way of life are legitimately concerned about the special challenges of how to prevent and respond to an oil spill in broken sea ice.

The diminishing Arctic ice pack could open new grounds to commercial fishing, which can create new jobs. This also presents challenges to manage fish stocks in this region as we learn more about the impact of fishing in these previously inaccessible waters.

Opening the Northwest Passage, the Northern Sea Route and eventually the polar sea, will bring an increase in shipping and even tourism to the Arctic. This means new economic development and additional jobs to the northern part of our state.

Our neighbors have taken notice of the warming Arctic, too. This picture of a Russian submersible planting that country's flag on the North Pole's ocean floor was shocking to Americans and other Arctic nations.

The Swedish Foreign Minister, whose nation is president of the European Union this year, demonstrates that Europe understands these changes when he recently said the melting polar sea ice is creating revolutionary new transportation possibilities between the Atlantic and Pacific.

Although Alaskans are well aware of the impacts of climate change in our State, national decisionmakers are just starting to come to grips with its challenges and opportunities.

A proposed American Arctic policy was adopted in the final days of the Bush administration. While not per-

fect, it highlights many areas that need further focus.

Here in the Congress, climate change has risen to a high priority in these Halls and in the Obama administration.

I commend these many initiatives and pledge my cooperation with other Members of this body and the national administration.

To advance that effort, today I am introducing a package of seven bills to address these challenges, almost all of which have been caused by, or made worse by, climate change.

I call this package—Inuvikput. It is a word from the Inupiaq Eskimos of the Alaska North Slope which means "the place where we live."

I can think of no more appropriate term coming from the very people who are being affected every day by climatic changes in America's Arctic, the place they have called home for thousands of years.

Mr. President, my package starts with improving our fundamental understanding of the region. We need to invest in basic science to better understand Arctic oceanography, meteorology, biology of its fish and marine mammals, as well as natural resources and oil and gas potential.

We need a coordinated research plan. It should start with baseline observations and include better science supporting Arctic-specific oil spill prevention and response.

This plan also must include local and traditional knowledge. After all, some of the first and most accurate predictions of Arctic climate change were from Native elders.

My bill calls on the Secretary of Commerce to undertake a comprehensive strategy to coordinate Arctic research, to make recommendations to Congress on a long-term Arctic Ocean research plan and to provide the resources for this vital mission.

We also need to promote Pan-Arctic research, especially with our Russian and Canadian neighbors, to address scientific issues that span international borders.

My second bill would provide the United States equal standing with other Arctic nations when it comes to our participation in the international Arctic Council and other forums.

Other leading Arctic nations—Russia, Canada, Norway—are represented by ambassador-level diplomats on the Council.

I appreciate the dedication of those who have represented us before the Arctic Council and other forums. I also thank Secretary Clinton and other high level diplomats for their interest in the Arctic. But the United States needs a permanent representative on an equal footing with the representatives of other nations in these important forums. Our Ambassador should advocate American interests in

science, sustainable development, transportation and our defense posture.

The third piece of legislation deals with preparedness for the coming expanded use of the Arctic. We must increase our investment in basic infrastructure to maintain a permanent presence in the Arctic, for scientific, economic development and national security missions.

Critical to that is the need to replace our fleet of icebreakers. The *Polar Sea* and the currently idled *Polar Star* have both served beyond their 30-year life. The *Healy* is newer, but designed primarily for scientific research.

That scientific mission is important. But we need an icebreaking fleet to assert our national interests by patrolling our Arctic waters, monitor increased traffic, and respond to search and rescues, oil spills and other incidents.

In addition to their life-saving mission, the Coast Guard is a vital partner with Alaska's commercial fishing industry. This \$4 billion industry is one of our Nation's truly American industries, providing 58,000 jobs. Our Coast Guard needs facilities to serve as a base for aerial surveillance, spill prevention and emergency response capabilities in the Arctic.

Currently, our closest Coast Guard air base is located in Kodiak, a 900-mile commute just to reach the Arctic Coast. That's like patrolling the Gulf of Mexico from air bases in New York.

I applaud the stamina of our Coast Guard crews who have kept our C-130s in the Arctic skies by performing maintenance work on the ramp in sub-freezing conditions. The least we could do is provide them with a heated hangar. My legislation would address that need and other critical infrastructure needs.

Fourth, we must achieve a balance in environmentally responsible resource development in the Arctic. A diminished ice cap may clear the way for more affordable development of the enormous energy reserves the U.S. Geological Service says lie beneath Arctic waters. This region contains an estimated 30 billion barrels of oil and 220 trillion cubic feet of natural gas.

These resources can create thousands of American jobs and help assure our national energy security.

We must get the science right and provide the infrastructure necessary to protect human and animal life and the environment.

To help achieve that, my measure calls on the Coast Guard to assess Arctic development and develop the necessary infrastructure.

It also requires the Secretary of Commerce to direct research to prevent and improve oil spill recovery in Arctic waters.

My fifth bill deals with the benefits of energy development in the Arctic. Most Alaskans support oil and gas ex-

ploration in the Outer Continental Shelf. We can do development there in the right way, as shown here.

Another example is BP's Liberty field, located off Alaska's northern coast. To minimize impacts, directional drilling from this island pad can tap oil reserves 8 miles away in the water.

As a part of this package, my bill extends to Alaskans the same share of Federal revenues that residents of the gulf coast States currently receive. It would direct a portion of those revenues to those most affected—the residents of Alaska's North Slope—where communities have depended on marine mammals from these same waters for thousands of years. I believe the Arctic's resources belong to the people of the Arctic and should be shared among them.

My sixth bill deals with a critical omission from the new Presidential directive on the Arctic—addressing the health problems of Arctic people.

Alaskans and others who live in Northern latitudes experience numerous health problems, including higher rates of alcohol abuse, diabetes, high blood pressure and, tragically death from injury and suicide.

In many cases, it is unclear what causes these problems. More research is necessary into prevention and treatment.

This bill proposes a study of mental and behavioral health issues in the Arctic. It would create an "Arctic desk" at the National Institutes of Health that was called for in Federal legislation in 1984 but has never been established.

Finally, it would institute a health assessment program at the Centers for Disease Control focused on the Arctic. This vital research will not only benefit residents of my State but citizens across the country.

The seventh bill in this package addresses the huge losses of coastal Alaskan territory, as a result of dramatic climate change. A June 2009 Government Accountability Study on this issue says: "most of Alaska's more than 200 Native villages are affected to some degree by flooding and erosion." In some cases, entire Arctic villages in my State are at risk of serious erosion or of being washed into the sea.

To make matters worse, some of the most severe flooding in recent history occurred this spring. Millions of dollars in damage was done to Alaska communities, prompting State and Federal disaster declarations.

To address these issues, I propose creation of an Arctic adaptation fund. This fund would help the State of Alaska, Alaska Native organizations, affected Arctic communities, and the private sector deal with the impacts of climate change. This includes flooding, erosion, permafrost melting, and damage to public transportation systems

and buildings. The fund also would assist in dealing with habitat restoration, clean energy development, and other economic development activities.

Mr. President, I am considering introducing an additional piece of legislation in this package. It focuses on providing the people of Alaska's Arctic with a greater voice in development decisions affecting their lives.

This bill would establish an Arctic Regional Citizens Advisory Council. It would be modeled after similar councils operating successfully in the Prince William Sound and Cook Inlet regions of Alaska.

At the request of North Slope Borough Mayor Edward Itta and our constituents there, I agreed to hold off on this bill for now so we can continue the conversation with the people of the region, along with industry and regulatory stakeholders.

In addition to the legislation I am introducing today, Senate ratification of two treaties would dramatically improve our Nation's ability to address Arctic climate change.

The first is the Convention on the Law of the Sea. Negotiated in 1982, this treaty is designed to settle long-standing disputes over national rights to offshore waters and resources. The Senate's ratification of this treaty would put the United States at the table at a time of great change in the Arctic.

I note support for the Law of the Sea Treaty comes from a broad spectrum of organizations, from environmental groups and oil companies to the U.S. military.

I strongly support ratification of the Law of the Sea Treaty and will be proud to cosponsor this measure.

The second key international agreement the Senate should ratify to address Arctic health issues is the Treaty on Persistent Organic Pollutants, or POPs.

These pollutants—PCBs, DDT, dioxin, and even fire retardants—are carried by wind and sea currents to the Arctic. They are then trapped by the ice and are stored in the fatty tissue of fish and marine mammals that are a main component of the local subsistence diet.

The POPs treaty was adopted in 2001. But like the Law of the Sea, it has never been ratified. It is time that changed. I am honored to be a cosponsor of Senator HARKIN's bill, S. 519, to implement provisions of this treaty.

I look forward to working with the chairman and ranking member of the Foreign Relations Committee and the Obama Administration to bring these treaties forward to the Senate for consideration as soon as possible.

Mr. President, because of Alaska, America is an Arctic nation. My State has over 700 miles of shoreline along the Arctic Ocean, and over 100 million acres above the Arctic Circle. If you define Arctic by temperature, it encompasses an even broader area that

includes the Bering Sea and the Aleutian Islands.

Through the diligent work of many scientists, we have learned much over the past century. But there is much we still do not understand.

This century, and the next 50 years of Alaska statehood, brings great challenges and even greater opportunities. To succeed, we must address the broad policy implications of an ice-diminishing Arctic on the diplomatic, scientific, and national security fronts.

We must make the needed investments to ensure the United States maintains its leadership at the top of our globe. We must listen to and address the needs of the residents of the Arctic.

With this Inuvikput package of legislation, we will take a major step toward achieving these important goals.

As they say in America's Arctic, Qyanaqqak. Thank you.

By Mr. SPECTER (for himself and Mr. CASEY):

S. 1568. A bill to assist in the establishment of an interpretive center and museum in Bethlehem, Pennsylvania, to protect and interpret the history of the industrialization of the United States; to the Committee on Energy and Natural Resources.

Mr. SPECTER. Mr. President, I have sought recognition to introduce legislation that will honor and preserve the industrial legacy of our Nation for the benefit of current and future generations. The bill, which I am introducing along with my Pennsylvania colleague Senator BOB CASEY, would establish a partnership between the Department of Interior and the National Museum of Industrial History; a museum and interpretive center to be located at the site of the former Bethlehem Steel Plant in Bethlehem, PA.

The industrial revolution was a critical period in American history, during which our country and the foundation of our national economy experienced an unprecedented transition. It is important that people, especially children and future generations, have an opportunity to learn about the history of American industrialization and how it shaped our world and our lives. For this opportunity to be realized, the timeless stories and treasured relics of our industrial history must be preserved, interpreted and made available for all to see, study and enjoy. The National Museum of Industrial History will exist for just this purpose.

The Museum will be located at an ideal site to tell the story of America's industrial history because the former tenant of the site was a lead character in the story. The Bethlehem Steel Company was a world-leader in steel production for nearly 150 years and truly epitomized the industrial revolution and expansion throughout the 19th and 20th centuries. Steel produced in

Bethlehem was used to build some of our country's most treasured structures and landmarks, including the Chrysler Building in New York City and the Golden Gate Bridge in San Francisco. Bethlehem Steel was a major contributor to the war effort during the first and second World Wars, building many ships and supplying much of the armored plating and large-caliber guns for our armed forces. Bethlehem Steel began to cease much of its operation in the 1990s and was bought by another steel company in 2001. The closing of Bethlehem Steel marked the end of an era and also created one of the largest brownfield sites in the country. It is on this site, rich in history and industrial heritage, where the National Museum of Industrial History will stand as a monument to industry and as an educational resource to the public.

The legislation I have introduced will establish an agreement between the Department of Interior and the National Museum of Industrial History, wherein the Department will assist in the creation and program development of the Museum. Every dollar provided by the Federal Government would have to be matched by a non-Federal source. The Museum has a long history of working with the Federal Government. The National Museum of Industrial History was the first museum to become affiliated with the Smithsonian Institute. This partnership spawned the Smithsonian Institute's "Affiliates Program," which now has over 150 members around the country.

I urge my colleagues to support this legislation.

By Ms. STABENOW:

S. 1569. A bill to expand our Nation's Advanced Practice Registered Nurse workforce; to the Committee on Finance.

Ms. STABENOW. Mr. President, I rise today to introduce legislation to address our growing workforce shortage. I am pleased to be joining my good friend, Congresswoman LOIS CAPPS, a nurse herself, in introducing this legislation. Our legislation is supported by AARP, the American Academy of Nurse Practitioners, the American Association of Colleges of Nursing, the American Association of Nurse Anesthetists, the American College of Nurse Practitioners, the American College of Nurse-Midwives, the American Nurses Association, the National Association of Pediatric Nurse Practitioners, and the National Organization of Nurse Practitioner Faculties.

Since its creation in 1965, Medicare has provided some support for the costs of nursing education. While relatively small as compared to support for graduate medical education for physicians, \$150 million vs. \$9 billion per year, Medicare has for many years been the largest federal source of funding for nurse training. While nursing edu-

cation and patient care needs have changed tremendously since 1965, Medicare's policy in this area has not kept up to date.

My bill amends Medicare to provide incentives to expand the number of advanced practice registered nurses, APRN, trained and to prepare them to undertake the essential cost-saving reforms to our health care delivery system: an increased focus on primary and preventive care, improved coordination of care, access to primary care and anesthesia services in rural and medically underserved areas, and enhanced efforts to reduce costly medical errors that will lower health care costs and improve patient care. This legislation also focuses on training nurses in community-based settings, such as community health centers, rural clinics and individual health professional offices, arming them with the practical clinical experience they need.

The respected economic analysis firm The Lewin Group has conducted a thorough analysis of this proposal. They found that it would increase the number of APRNs graduating by 25 percent. This is a very significant increase and one that is greatly needed. Additionally, training more APRNs will help us develop more faculty, which are desperately needed to train the next generation of nurses. Every nursing school dean in Michigan has told me that this is a huge issue to them.

This relatively modest investment in APRNs will provide Americans, especially those in rural and other areas of health care shortages, with the primary and preventive care, care coordination, and chronic care management they too often lack today.

At a time when our country faces a shortage of healthcare professionals, funding for the clinical education of APRNs, including nurse practitioners, certified nurse-midwives, certified registered nurse anesthetists, and clinical nurse specialists is vitally important to meet the demand for expanded health care, which is expected under a newly reformed delivery system.

Mr. President, I ask unanimous consent that a letter of support be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JULY 29, 2009.

Hon. DEBBIE STABENOW,
U.S. Senate,
133 Senate Hart Building, Washington, DC.

DEAR SENATOR STABENOW: On behalf of the undersigned organizations, we would like to express our support for your legislation that will amend Title XVIII of the Social Security Act to provide payment to hospitals for the costs of expanded advanced practice nurse training programs. At a time when our country faces a shortage of healthcare professionals, funding for the clinical education of Advanced Practice Registered Nurses (APRNs), including nurse practitioners, certified nurse-midwives, certified registered

nurse anesthetists, and clinical nurse specialists is vitally important to meet the demand for expanded health care, which is expected under a newly reformed delivery system.

APRNs are ideally suited to help implement delivery system reforms such as an increased focus on primary, transitional, and preventive care, enhancing access for rural and medically underserved populations, improving care coordination, chronic care management, and reducing costly medical errors. Yet in 2008, U.S. nursing schools turned away 6,904 qualified applicants from graduate nursing programs due to insufficient numbers of faculty, clinical sites, classroom space, clinical preceptors, and budget constraints. This Medicare funding would expand the current focus to nursing education at the graduate level. It would also expand clinical education provided through Medicare funding to include home and community-based settings as well as hospitals, using affiliations between accredited schools of nursing and community-based health care settings. The outcome would be a much more robust APRN workforce to meet growing demand especially among the Medicare population and those in underserved areas. In fact, according to a Lewin report commissioned by AARP to investigate this type of proposal, your bill would increase the number of APRNs by 25%.

We applaud your efforts and those of your staff for introducing Graduate Nursing Education legislation, which will benefit future APRNs so they can provide high quality, cost effective care to the most vulnerable populations in all areas across the country. Thank you for your recognition of the role APRNs will play in a reformed healthcare system.

Sincerely,

AARP, American Academy of Nurse Practitioners, American Association of Colleges of Nursing, American Association of Nurse Anesthetists, American College of Nurse Practitioners, American College of Nurse-Midwives, American Nurses Association, National Association of Pediatric Nurse Practitioners, National Organization of Nurse Practitioner Faculties.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 234—SUPPORTING THE GOALS AND IDEALS OF NATIONAL SAVE FOR RETIREMENT WEEK 2009

Mr. CONRAD (for himself, Mr. ENZI, and Mr. CARDIN) submitted the following resolution; which was considered and agreed to:

S. RES. 234

Whereas people in the United States are living longer and the cost of retirement continues to rise, in part because the number of employers providing retiree health coverage continues to decline and retiree health care costs continue to increase at a rapid pace;

Whereas Social Security remains the bedrock of retirement income for the great majority of the people of the United States, but was never intended by Congress to be the sole source of retirement income for families;

Whereas recent data from the Employee Benefit Research Institute indicates that, in the United States, less than 3% of workers or

their spouses save for retirement, and that the actual amount of retirement savings of workers lags far behind the amount that will be needed to adequately fund their retirement years;

Whereas saving for retirement is a key component to overall financial health and security during retirement years;

Whereas many workers may not be aware of retirement savings options, or may not have focused on the importance of, and need for, saving for retirement;

Whereas many employees have access to defined benefit and defined contribution plans to help prepare for retirement, yet many may not take advantage of employer-sponsored defined contribution plans at all or to the full extent allowed by the plans under Federal law;

Whereas many workers saving for retirement through tax-preferred savings plans have experienced declines in account values due to the recent economic downturn and market decline, making continued contributions all the more important;

Whereas all workers, including public- and private-sector employees, employees of tax-exempt organizations, and self-employed individuals, can benefit from the advantages of tax-preferred savings plans, and from increased awareness of the need to develop personal budgets, and financial plans; and

Whereas October 18 through October 24, 2009, has been designated as "National Save for Retirement Week 2009": Now, therefore, be it

Resolved, That the Senate—

(1) supports the goals and ideals of National Save for Retirement Week 2009;

(2) supports efforts to raise public awareness of the need to use efficiently the substantial tax revenues, estimated to exceed \$127,000,000,000 for the fiscal year 2009 budget, that subsidize retirement savings;

(3) supports efforts to raise public awareness of the importance of saving adequately for retirement and of the availability of tax-preferred employer-sponsored retirement savings plans; and

(4) calls on States, localities, schools, universities, nonprofit organizations, businesses, other entities, and the people of the United States to observe National Save for Retirement Week with appropriate programs and activities with the goal of increasing the retirement savings for all the people in the United States.

SENATE RESOLUTION 235—DESIGNATING AUGUST 16, 2009, AS "NATIONAL AIRBORNE DAY"

Ms. MURKOWSKI (for herself, Mr. REED, Ms. SNOWE, Mr. INHOFE, Mr. BYRD, Mr. VOINOVICH, Mr. BEGICH, Mr. LEVIN, Mr. KERRY, Mr. BURR, Mr. CRAPO, Mrs. HAGAN, Mr. ROBERTS, Mr. INOUE, Mrs. MURRAY, Mr. COCHRAN, Mr. CONRAD, Mrs. LINCOLN, Mr. BURRIS, Mr. ROCKEFELLER, Mr. BINGAMAN, Mr. CARDIN, Mr. REID, Mr. THUNE, Mr. SCHUMER, Mr. CASEY, Mr. MERKLEY, Mr. LIEBERMAN, Mr. BOND, Mr. BROWN, and Mr. CORKER) submitted the following resolution; which was considered and agreed to:

S. RES. 235

Whereas the airborne forces of the Armed Forces have a long and honorable history as units of adventuresome, hardy, and fierce warriors who, for the national security of the

United States and the defense of freedom and peace, project the effective ground combat power of the United States by Air Force air transport to the far reaches of the battle area and, indeed, to the far corners of the world;

Whereas August 16 marks the anniversary of the first official Army parachute jump on August 16, 1940, an event that validated the innovative concept of inserting United States ground combat forces behind a battle line by means of a parachute;

Whereas the United States experiment with airborne infantry attack began on June 25, 1940, when the Army Parachute Test Platoon was first authorized by the Department of War, and was launched when 48 volunteers began training in July 1940;

Whereas the success of the Army Parachute Test Platoon in the days immediately before the entry of the United States into World War II led to the formation of a formidable force of airborne units that have served with distinction and have had repeated success in armed hostilities;

Whereas among those airborne units are the former 11th, 13th, and 17th Airborne Divisions, the venerable 82nd Airborne Division, the versatile 101st Airborne Division (Air Assault), and the airborne regiments and battalions (some as components of those divisions, some as separate units) that achieved distinction as the elite 75th Ranger Regiment, the 173rd Airborne Brigade, the 187th Infantry (Airborne) Regiment, the 503rd, 507th, 508th, 517th, 541st, and 542nd Parachute Infantry Regiments, the 88th Glider Infantry Regiment, the 509th, 551st, and 555th Parachute Infantry Battalions, the 325th and 327th Glider Infantry, and the 550th Airborne Infantry Battalion;

Whereas the achievements of the airborne forces during World War II prompted the evolution of those forces into a diversified force of parachute and air-assault units that, over the years, have fought in Korea, Vietnam, Grenada, Panama, the Persian Gulf region, and Somalia, and have engaged in peacekeeping operations in Lebanon, the Sinai Peninsula, the Dominican Republic, Haiti, Bosnia, and Kosovo;

Whereas the modern-day airborne force that has evolved from those World War II beginnings is an agile, powerful force that, in large part, is composed of the 82nd Airborne Division, the 101st Airborne Division (Air Assault), and the 75th Ranger Regiment;

Whereas the modern-day airborne force also includes other elite forces composed entirely of airborne trained and qualified special operations warriors, including Army Special Forces, Marine Corps Reconnaissance units, Navy SEALs, and Air Force combat control teams, each of which is part of the United States Special Operations Command;

Whereas in the aftermath of the terrorist attacks on the United States on September 11, 2001, the 75th Ranger Regiment, special forces units, and units of the 82nd Airborne Division and the 101st Airborne Division (Air Assault), together with other units of the Armed Forces, have been prosecuting the war against terrorism by carrying out combat operations in Afghanistan, training operations in the Philippines, and other operations elsewhere;

Whereas in the aftermath of the terrorist attacks on the United States on September 11, 2001, airborne units played a pivotal role in the war in Afghanistan, including the unflinching pursuit of the enemies of the United States during the battles of Mazar-i Sharif, Kabul, Qala-i-Jangi, Tora Bora, and Operation Anaconda;

Whereas United States paratroopers, which include the 82d Airborne Division, 75th Ranger Regiment, Special Operations Forces, 173rd Airborne Brigade Combat team, and elements of the 4th Brigade 25th Infantry Division, have demonstrated bravery and honor in an effort to pursue the enemies of the United States, to stabilize Afghanistan, and to strive for calm in a troubled region;

Whereas in the aftermath of the announcement of Operation Iraqi Freedom by President George W. Bush in March 2003, the 75th Ranger Regiment, special forces units, and units of the 82nd Airborne Division, the 101st Airborne Division (Air Assault), the 173rd Airborne Brigade, and the 4th Brigade Combat Team (Airborne) of the 25th Infantry Division, together with other units of the Armed Forces, have been prosecuting the war against terrorism, carrying out combat operations, conducting civil affairs missions, and assisting in establishing democracy in Iraq;

Whereas the airborne forces are, and will continue to be, at the ready and the forefront until the Global War on Terrorism is concluded;

Whereas of the members and former members of the United States airborne forces, all have achieved distinction by earning the right to wear the "Silver Wings of Courage" of the United States airborne forces, thousands have achieved the distinction of making combat jumps, 69 have earned the Medal of Honor, and hundreds have earned the Distinguished-Service Cross, Silver Star, or other decorations and awards for displays of such traits as heroism, gallantry, intrepidity, and valor;

Whereas the members and former members of the United States airborne forces are all members of a proud and honorable fraternity of the profession of arms that is made exclusive by those distinctions which, together with their special skills and achievements, distinguish them as intrepid combat parachutists, special operation forces, and, in former days, glider troops;

Whereas the history and achievements of the members and former members of the airborne forces of the United States Armed Forces warrant special expressions of the gratitude of the people of the United States; and

Whereas, since the airborne community celebrates August 16 as the anniversary of the first official jump by the Army Parachute Test Platoon, August 16 would be an appropriate day to recognize as National Airborne Day; Now, therefore, be it

Resolved, That the Senate—

(1) designates August 16, 2009, as "National Airborne Day"; and

(2) calls on the people of the United States to observe National Airborne Day with appropriate programs, ceremonies, and activities.

SENATE RESOLUTION 236—COMMEMORATING THE 175TH ANNIVERSARY OF THE ABOLITION OF SLAVERY IN THE BRITISH EMPIRE ON AUGUST 1, 1834

Mr. CARDIN (for himself, Mr. VOINOVICH, Mr. HARKIN, and Mr. BROWNBAC) submitted the following resolution; which was considered and agreed to:

S. RES. 236

Whereas the United States and the United Kingdom have become beacons of freedom and democracy around the world;

Whereas the history of the people of Africa is inextricably tied to the histories of the United States and the United Kingdom;

Whereas, for centuries, millions of people from Africa and their descendants were enslaved in the United States and the territories of the British Empire;

Whereas the slave trade spanned many regions of the world, including Africa, the Caribbean, the United States, and territories of the British Empire;

Whereas the people of Africa forced into slavery were dehumanized, humiliated, abused, and often separated from their families to be sold;

Whereas the institution of slavery, predicated upon racist beliefs, infected and corrupted the social fabrics of the United States and the United Kingdom;

Whereas the Underground Railroad embodied courage, hospitality, and fortitude, and served as an impetus for the abolition of slavery;

Whereas the Underground Railroad provided a means of escape from slavery by incorporating a network of abolitionists, secret routes, and safe houses throughout the United States and the territories of the British Empire;

Whereas the efforts of Harriet Tubman and like-minded abolitionists in the Underground Railroad helped tens of thousands of slaves escape to freedom during the early 19th century;

Whereas Harriet Tubman demonstrated her fearless devotion to liberty during her service as a conductor on the Underground Railroad and was responsible for leading fugitive slaves through the countryside to safe houses;

Whereas Harriet Tubman became known as "Moses" among slaves and abolitionists because her estimated 19 trips in the decade following her emancipation in 1849 to States that permitted slavery led to the liberation of approximately 300 slaves;

Whereas the Fugitive Slave Law of 1850 jeopardized the safety of escaped slaves in the United States;

Whereas the establishment of Underground Railroad safe houses in Canada, a territory of the British Empire, provided a safe haven for escaped slaves;

Whereas the abolition of slavery in the British Empire on August 1, 1834, established a chief terminal for the Underground Railroad and laid the foundation for the eventual abolition of slavery in the United States;

Whereas the Salem Chapel British Methodist Episcopal Church in St. Catharines, Ontario, Canada, served as an important center of abolitionist activity and served as the final destination for many escaped slaves;

Whereas many freed slaves became members of Salem Chapel British Methodist Episcopal Church and settled in the community; and

Whereas the abolition of slavery in the British Empire influenced the United States by setting the precedent that the dehumanizing practice of slavery would not, and could not, be tolerated if a Nation is to conform with the fundamental tenets of democracy and equality for all people; Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the fundamental importance of the abolition of slavery in the British Empire in the history of the United States and Canada; and

(2) celebrates the 175th anniversary of the abolition of slavery in the British Empire on August 1, 1834.

AMENDMENTS SUBMITTED AND PROPOSED

SA 2241. Mr. JOHANNIS (for himself, Mr. NELSON of Nebraska, Mr. LEVIN, and Ms. STABENOW) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

SA 2242. Mr. JOHANNIS (for himself and Mr. NELSON of Nebraska) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2243. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2244. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2245. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2246. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 2226 proposed by Mr. NELSON of Florida (for himself, Mr. REID, and Mr. MARTINEZ) to the amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2247. Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2248. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2249. Mrs. HUTCHISON submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2250. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2251. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2252. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2253. Mr. CHAMBLISS (for himself and Mr. HARKIN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2254. Mr. CHAMBLISS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2255. Mr. VITTER submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2256. Mr. DODD (for himself, Mr. KENNEDY, Mr. KERRY, Mr. WHITEHOUSE, Mr. LIEBERMAN, and Mr. REED) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2257. Mr. NELSON, of Nebraska submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2258. Mr. NELSON, of Nebraska submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2259. Ms. LANDRIEU submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2260. Mr. FEINGOLD (for himself, Mr. SANDERS, Mr. KOHL, Mr. SCHUMER, and Mr. GRASSLEY) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2261. Mr. FEINGOLD (for himself and Mrs. GILLIBRAND) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2262. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2263. Mr. SCHUMER (for himself, Mr. SANDERS, Ms. KLOBUCHAR, Mrs. GILLIBRAND, Mrs. MURRAY, Ms. SNOWE, and Mrs. SHAHEEN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2264. Ms. STABENOW (for herself, Mr. CASEY, and Mr. SANDERS) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2265. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2266. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2267. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2268. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2269. Mr. SANDERS submitted an amendment intended to be proposed to

amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2270. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2271. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2272. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2273. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2274. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2275. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2276. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2277. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2278. Mrs. GILLIBRAND (for herself, Mr. SANDERS, and Mr. SPECTER) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2279. Mr. KOHL submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2280. Mr. KOHL submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2281. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2282. Mr. CARDIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2283. Mr. DODD (for himself, Mr. WHITEHOUSE, and Mr. LIEBERMAN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2284. Mr. DODD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2285. Mr. NELSON, of Nebraska (for himself, Mr. GRASSLEY, and Mr. JOHANNIS) submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2286. Mr. CORKER submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2287. Mr. CORKER submitted an amendment intended to be proposed by him to the bill H.R. 2997, supra; which was ordered to lie on the table.

SA 2288. Mr. KOHL proposed an amendment to amendment SA 2248 submitted by Mr. COBURN to the amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

SA 2289. Mr. KOHL (for himself and Mr. BROWNBAC) proposed an amendment to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, supra.

TEXT OF AMENDMENTS

SA 2241. Mr. JOHANNIS (for himself, Mr. NELSON of Nebraska, Mr. LEVIN, and Ms. STABENOW) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 19, line 9, before the period, insert the following: “: *Provided further*, That of the amount available under this heading, at least \$17,764,000 shall be used for the tuberculosis program (including at least \$3,000,000 for tuberculosis indemnity and depopulation)”.

SA 2242. Mr. JOHANNIS (for himself and Mr. NELSON of Nebraska) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 17, line 8, strike “\$911,394,000” and insert “\$913,394,000, of which \$17,764,000 shall be used for the tuberculosis program (including at least \$3,000,000 for tuberculosis indemnity and depopulation), of which \$2,000,000 shall be derived by reducing the amount available under the heading ‘DEPARTMENTAL ADMINISTRATION’”.

SA 2243. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration,

and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

At the appropriate place, insert the following:

SEC. 7 _____. Notwithstanding any other provision of this Act, each amount provided under the heading "RURAL BUSINESS—COOPERATIVE SERVICE" in title III is reduced by the pro rata percentage required to reduce the total amount provided under that heading by \$124,800,000.

SA 2244. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 51, beginning on line 10, strike "": *Provided further,*" and all that follows through "technologies" on line 20.

SA 2245. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

Beginning on page 75, strike line 16 and all that follows through page 76, line 3.

SA 2246. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 2226 proposed by Mr. NELSON of Florida (for himself, Mr. REID, and Mr. MARTINEZ) to the amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. 7 _____. (a) In this section, the term "conference" means a meeting that—

(1) is held for consultation, education, awareness, or discussion;

(2) includes participants who are not all employees of the same agency;

(3) is not held entirely at an agency facility;

(4) involves costs associated with travel and lodging for some participants; and

(5) is sponsored by 1 or more agencies, 1 or more organizations that are not agencies, or a combination of such agencies or organizations.

(b) Not later than September 30, 2011, the Secretary of Agriculture shall submit to the appropriate committees of Congress and post on the public Internet website of the Department of Agriculture (referred to in this section as the "Department") in a searchable, electronic format, a report on each conference for which the Department paid travel expenses during fiscal year 2010 that includes—

(1) the itemized expenses paid by the Department, including travel expenses and any Department expenditure to otherwise support the conference;

(2) the primary sponsor of the conference;

(3) the location of the conference; and

(4) in the case of a conference for which the Department was the primary sponsor, a statement that includes—

(A) a justification of the location selected;

(B) a description of the cost efficiency of the location;

(C) the date of the conference;

(D) a brief explanation of how the conference advanced the mission of the Department; and

(E) the total number of individuals whose travel or attendance at the conference was paid for in part or full by the Department.

(c) Notwithstanding any other provision of this Act, the aggregate amount made available under this Act for expenses of the Department relating to conferences in fiscal year 2010, including expenses relating to conference programs, staff, travel costs, and other conference matters, may not exceed \$12,000,000.

SA 2247. Mr. COBURN submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

PROHIBITION ON NO-BID CONTRACTS, GRANTS, AND EARMARKS

SEC. _____. (a) Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act may be—

(1) used to make any payment in connection with a contract not awarded using competitive procedures in accordance with the requirements of section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253), section 2304 of title 10, United States Code, and the Federal Acquisition Regulation;

(2) awarded by grant not subjected to merit-based competitive procedures, needs-based criteria, and other procedures specifically authorized by law to select the grantee or award recipient; or

(3) spent on a congressionally directed spending item, as defined by Rule XLIV of the Standing Rules of the Senate, not subjected to merit-based competitive procedures, needs-based criteria, and other procedures specifically authorized by law to select the grantee to perform the activity to be provided by the congressionally directed spending item.

(b) This prohibition shall not apply to the awarding of contracts or grants with respect to which—

(1) no more than one applicant submits a bid for a contract or grant; or

(2) Federal law specifically authorizes a grant or contract to be entered into without regard for these requirements, including formula grants for States.

SA 2248. Mr. COBURN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropri-

tions for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

At the appropriate place, insert the following:

PROHIBITION ON NO-BID CONTRACTS AND GRANTS

SEC. _____. (a) Notwithstanding any other provision of this Act, none of the funds appropriated or otherwise made available by this Act may be—

(1) used to make any payment in connection with a contract not awarded using competitive procedures in accordance with the requirements of section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253), section 2304 of title 10, United States Code, and the Federal Acquisition Regulation;

(2) awarded by grant not subjected to merit-based competitive procedures, needs-based criteria, and other procedures specifically authorized by law to select the grantee or award recipient; or

(3) spent on a congressionally directed spending item, as defined by Rule XLIV of the Standing Rules of the Senate, not subjected to merit-based competitive procedures, needs-based criteria, and other procedures specifically authorized by law to select the grantee to perform the activity to be provided by the congressionally directed spending item.

(b) This prohibition shall not apply to the awarding of contracts or grants with respect to which—

(1) no more than one applicant submits a bid for a contract or grant; or

(2) Federal law specifically authorizes a grant or contract to be entered into without regard for these requirements, including formula grants for States.

SA 2249. Mrs. HUTCHISON submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) The Senate finds that—

(1) agriculture is a national security concern;

(2) the United States suffers from periodic disasters which affects the food and fiber supply of the United States;

(3) the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8701 et seq.) established 5 permanent disaster programs to deliver timely and immediate assistance to agricultural producers recovering from losses;

(4) as of the date of enactment of this Act, of those 5 disaster programs—

(A) none are available, finalized, and implemented to deliver urgently needed assistance for 2009 producer losses; and

(B) only 1 is being implemented for 2008 losses;

(5) Texas producers are suffering from 1 of the worst droughts since the 1920's and need immediate relief; and

(6) the Secretary of Agriculture has previously authorized various forms of disaster assistance by providing funding under section 32 of the Act of August 24, 1935 (7 U.S.C.

612c), and through the Commodity Credit Corporation.

(b) It is the sense of the Senate that the Secretary of Agriculture should use all of the discretionary authority available to the Secretary to make available immediate relief and assistance for agricultural producers suffering losses as a result of the 2009 droughts.

SA 2250. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. 7 _____. Notwithstanding any other provision of this Act, each amount provided to the Secretary of Agriculture under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) that remains unobligated as of the date of enactment of this Act is reduced by the pro rata percentage required to reduce the total unobligated amount provided to the Secretary by that Act by \$6,475,000,000.

SA 2251. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. _____. Notwithstanding any other provision of this Act, provisions of this Act requiring that funds be for the purposes, and in the amounts, specified in the table titled "Congressionally Designated Projects" in the report to accompany this Act shall have no force or effect.

SA 2252. Mr. DEMINT submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. 7 _____. Notwithstanding any other provision of this Act, each amount provided by this Act is reduced by the pro rata percentage required to reduce the total amount provided by this Act by \$234,128,000.

SA 2253. Mr. CHAMBLISS (for himself and Mr. HARKIN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Not later than 60 days after the date of enactment of this Act, the Administrator of the Foreign Agricultural Service shall submit to the appropriate committees of Congress a report that describes the status of the reorganization of the Foreign Agricultural Service and any future plans of the Administrator to modify office structures to meet existing, emerging, and new priorities.

SA 2254. Mr. CHAMBLISS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. None of the funds made available by this Act may be used to pay the salaries and expenses of any employee of the Department of Agriculture to assess any agency any greenbook charge or to use any funds acquired through an assessment of greenbook charges made prior to the date of enactment of this Act.

SA 2255. Mr. VITTER submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. The Commissioner of Food and Drugs, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, shall conduct a study and, not later than 240 days after the date of enactment of this Act, submit a report to Congress on the technical challenges associated with inspecting imported seafood. The study and report shall—

(1) provide information on the status of seafood importation, including—

(A) the volume of seafood imported into the United States annually, by product and country of origin;

(B) the number of physical inspections of imported seafood products conducted annually, by product and country of origin; and

(C) a listing of the United States ports of entry for seafood imports by volume;

(2) provide information on imported seafood products, by product and country of origin, that do not meet standards as set forth in the applicable food importation law, including the reason for which each such product does not meet such standards;

(3) identify the fish, crayfish, shellfish, and other sea species most susceptible to violations of the applicable food importation law;

(4) identify the aquaculture and mariculture practices that are of greatest concern to human health; and

(5) suggest methods for improving import inspection policies and procedures to protect consumers in the United States.

SA 2256. Mr. DODD (for himself, Mr. KENNEDY, Mr. KERRY, Mr. WHITEHOUSE,

Mr. LIEBERMAN, and Mr. REED) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Notwithstanding any other provision of law and until the receipt of the decennial census in the year 2010, the Secretary of Agriculture may fund community facility and water and waste disposal projects of communities and municipal districts and areas in Connecticut, Massachusetts, and Rhode Island that have been considered eligible for funding by the appropriate rural development field office of the Department of Agriculture at some time during the past fiscal year.

SA 2257. Mr. NELSON of Nebraska submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 80, between lines 22 and 23, insert the following:

(c)(1) Section 531(c)(2) of the Federal Crop Insurance Act (7 U.S.C. 1531(c)(2)) is amended by inserting before the period at the end the following: "using, in the case of beef cattle, 3 weight classes consisting of less than 400 pounds, 400 pounds or more but less than 800 pounds, and 800 pounds or more".

(2) Section 901(c)(2) of the Trade Act of 1974 (19 U.S.C. 2497(c)(2)) is amended by inserting before the period at the end the following: "using, in the case of beef cattle, 3 weight classes consisting of less than 400 pounds, 400 pounds or more but less than 800 pounds, and 800 pounds or more".

(3) The amendments made by this subsection take effect on June 18, 2008.

SA 2258. Mr. NELSON of Nebraska submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 80, between lines 22 and 23, insert the following:

(c) In determining the market value of the applicable beef cattle on the day before the death of the beef cattle under section 531(c)(2) of the Federal Crop Insurance Act (7 U.S.C. 1531(c)(2)) and section 901(c)(2) of the Trade Act of 1974 (19 U.S.C. 2497(c)(2)), the Secretary of Agriculture shall use 3 weight

classes for the beef cattle consisting of less than 400 pounds, 400 pounds or more but less than 800 pounds, and 800 pounds or more.

SA 2259. Ms. LANDRIEU submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 745. REPORT ON TOURISM FOR RURAL COMMUNITIES.

(a) IN GENERAL.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Agriculture, in consultation with the Administrator of the Small Business Administration and the Director of the Office of Travel and Tourism Industries of the Department of Commerce, shall report to the Committees on Appropriations of the House of Representatives and of the Senate on developing the tourism potential of rural communities.

(b) CONTENT OF THE REPORT.—The report required by subsection (a) shall—

(1) identify existing Federal programs that provide assistance to rural small businesses in developing tourism marketing and promotion plans relating to tourism in rural areas;

(2) identify existing Federal programs that assist rural small business concerns in obtaining capital for starting or expanding businesses primarily serving tourists; and

(3) include recommendations, if any, for improving existing programs or creating new Federal programs that may benefit tourism in rural communities.

SA 2260. Mr. FEINGOLD (for himself, Mr. SANDERS, Mr. KOHL, Mr. SCHUMER, and Mr. GRASSLEY) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. ____. The Secretary of Agriculture shall, to the maximum extent practicable,

collaborate and consult with, and provide technical assistance and data to, other appropriate Federal agencies conducting any oversight, investigation, or other action to improve or ensure fair competition in agriculture and related industries, such as oversight of markets, antitrust examinations, or examinations of disparities between farm and retail prices.

SA 2261. Mr. FEINGOLD (for himself and Mrs. GILLIBRAND) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 24, line 20, before the period at the end insert the following: “: *Provided further*, That the Administrator of the Farm Service Agency shall provide appropriate technical assistance and other support (including collaborating on farm loan restructuring criteria) for any expansion of the Home Affordable Modification Program of the Department of the Treasury to cover farm loans or similar new voluntary or mandatory programs for farm loan foreclosure mitigation or restructuring by recipients of funds under the Troubled Asset Relief Program established under title I of the Emergency Economic Stabilization Act of 2008 (12 U.S.C. 5211 et seq.) or commercial lenders in general”.

SA 2262. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 2, between lines 20 and 21, insert the following:

OFFICE OF ADVOCACY AND OUTREACH

For necessary expenses to establish and operate the Office of Advocacy and Outreach within executive operations, \$3,000,000: *Provided*, That the same amount of funds is provided to each of the Socially Disadvantaged Farmers Group and the Small Farms and Beginning Farmers and Ranchers Group: *Pro-*

vided further, That the Director of the Office of Advocacy and Outreach shall not be required to report to any Assistant Secretary or Undersecretary of the Department of Agriculture.

On page 6, line 3, strike “\$41,319,000” and insert “\$38,319,000”.

SA 2263. Mr. SCHUMER (for himself, Mr. SANDERS, Ms. KLOBUCHAR, Mrs. GILLIBRAND, Mrs. MURRAY, Ms. SNOWE, and Mrs. SHAHEEN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 745. MILK IMPORT EQUITY ACT.

(a) SHORT TITLE.—This section may be cited as the “Milk Import Tariff Equity Act”.

(b) IMPOSITION OF TARIFF-RATE QUOTAS ON CERTAIN CASEIN AND MILK CONCENTRATES.—

(1) CASEIN AND CASEIN PRODUCTS.—

(A) IN GENERAL.—The Additional U.S. notes to chapter 35 of the Harmonized Tariff Schedule of the United States are amended—

(i) by striking “Additional U.S. Note” and inserting “Additional U.S. Notes”;

(ii) in note 1, by striking “subheading 3501.10.10” and inserting “subheadings 3501.10.05, 3501.10.15, and 3501.10.20”; and

(iii) by adding at the end the following new note:

“2. The aggregate quantity of casein, caseinates, milk protein concentrate, and other casein derivatives entered under subheadings 3501.10.15, 3501.10.65, and 3501.90.65 in any calendar year shall not exceed 55,477,000 kilograms. Articles the product of Mexico shall not be permitted or included under this quantitative limitation and no such article shall be classifiable therein.”.

(B) RATES FOR CERTAIN CASEINS, CASEINATES, AND OTHER DERIVATIVES AND GLUES.—Chapter 35 of the Harmonized Tariff Schedule of the United States is amended by striking subheadings 3501.10 through 3501.90.60 and inserting the following new subheadings, with the article descriptions for subheadings 3501.10 and 3501.90 having the same degree of indentation as the article description for subheading 3502.20.00:

“ 3501.10	Casein:			
	Milk protein concentrate:			
3501.10.05	Described in general note 15 of the tariff schedule and entered pursuant to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, MX, SG) 0.3¢/kg (AU)	12¢/kg
3501.10.15	Described in additional U.S. note 2 to this chapter and entered according to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, SG) 0.3¢/kg (AU)	12¢/kg
3501.10.20	Other	\$2.16/kg	Free (MX)	\$2.81/kg
3501.10.55	Other:			
	Suitable only for industrial uses other than the manufacture of food for humans or other animals or as ingredients in such food	Free		Free
	Other:			

3501.10.60	Described in general note 15 of the tariff schedule and entered pursuant to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, MX, SG) 0.3¢/kg (AU)	12¢/kg	
3501.10.65	Described in additional U.S. note 2 to this chapter and entered according to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, SG) 0.3¢/kg (AU)	12¢/kg	
3501.10.70	Other	\$2.16/kg	Free (MX)	\$2.81/kg	
3501.90	Other:				
3501.90.05	Casein glues	6%	Free (A*, CA, CL, E, IL, J, JO, MX) 3% (SG) 4.5% (AU)	30%	
3501.90.30	Other: Suitable only for industrial uses other than the manufacture of food for humans or other animals or as ingredients in such food	6%	Free (A*, CA, CL, E, IL, J, JO, MX, SG) 0.3¢/kg (AU)	30%	
3501.90.55	Other: Described in general note 15 of the tariff schedule and entered pursuant to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, MX, SG) 0.3¢/kg (AU)	12.1¢/kg	
3501.90.65	Described in additional U.S. note 2 to this chapter and entered according to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, SG) 0.3¢/kg (AU)	12.1¢/kg	
3501.90.70	Other	\$2.16/kg	Free (MX)	\$2.81/kg	”.

(2) MILK PROTEIN CONCENTRATES.—

(A) IN GENERAL.—The Additional U.S. notes to chapter 4 of the Harmonized Tariff Schedule of the United States are amended—

(i) in note 13, by striking “subheading 0404.90.10” and inserting “subheadings 0404.90.05, 0404.90.15, and 0404.90.20”; and

(ii) by adding at the end the following new note:

“27. The aggregate quantity of milk protein concentrates entered under subheading

0404.90.15 in any calendar year shall not exceed 18,488,000 kilograms. Articles the product of Mexico shall not be permitted or included under this quantitative limitation and no such article shall be classifiable therein.”

(B) RATES FOR CERTAIN MILK PROTEIN CONCENTRATES.—Chapter 4 of the Harmonized Tariff Schedule of the United States is amended by striking subheadings 0404.90 through 0404.90.10 and inserting the following

new subheadings, with the article description for subheading 0404.90 having the same degree of indentation as the article description for subheading 0404.10 and with the article descriptions for subheadings 0404.90.05, 0404.90.15, and 0404.90.20 having the same degree of indentation as the article description for subheading 0405.20.40:

“ 0404.90	Other:				
0404.90.05	Milk protein concentrates: Described in general note 15 of the tariff schedule and entered pursuant to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, MX, SG) 0.3¢/kg (AU)	12¢/kg	
0404.90.15	Described in additional U.S. note 27 to this chapter and entered pursuant to its provisions	0.37¢/kg	Free (A*, CA, CL, E, IL, J, JO, SG) 0.3¢/kg (AU)	12¢/kg	
0404.90.20	Other	\$1.56/kg	Free (MX)	\$2.02/kg	”.

(3) EFFECTIVE DATE.—

(A) IN GENERAL.—The amendments made by this section apply to goods entered, or withdrawn from warehouse for consumption, on or after the first day of the first month after the date that is 90 days after the date of the enactment of this Act.

(B) TRANSITIONAL PROVISIONS.—

(i) CHAPTER 35.—Notwithstanding the amendments made by paragraph (1), in the case of any calendar year that includes the effective date described in subparagraph (A), the aggregate amount of casein, caseinates, milk protein concentrate, and other casein derivatives entered under subheadings 3501.10.15, 3501.10.65, and 3501.90.65 shall not exceed an amount equal to 151,992 kilograms multiplied by the number of calendar days remaining in such year beginning with such effective date.

(ii) CHAPTER 4.—Notwithstanding the amendments made by paragraph (2), in the case of any calendar year that includes the effective date described in subparagraph (A),

the aggregate amount of milk protein concentrates entered under subheading 0404.90.15 shall not exceed an amount equal to 50,652 kilograms multiplied by the number of calendar days remaining in such year beginning with such effective date.

(C) COMPENSATION AUTHORITY.—

(1) IN GENERAL.—If the provisions of subsection (b) require, the President—

(A) may enter into a trade agreement with any foreign country or instrumentality for the purpose of granting new concessions as compensation in order to maintain the general level of reciprocal and mutually advantageous concessions; and

(B) may proclaim such modification or continuance of any general rate of duty, or such continuance of duty-free or excise treatment, or any quantitative limitation, as the President determines to be required or appropriate to carry out any such agreement.

(2) LIMITATIONS.—

(A) IN GENERAL.—No proclamation shall be made pursuant to paragraph (1) decreasing

any general rate of duty to a rate which is less than 70 percent of the existing general rate of duty.

(B) SPECIAL RULE FOR CERTAIN DUTY REDUCTIONS.—If the general rate of duty in effect is an intermediate stage under an agreement in effect before August 6, 2002, under section 1102(a) of the Omnibus Trade and Competitiveness Act of 1988 or under an agreement entered into under section 2103 (a) or (b) of the Bipartisan Trade Promotion Authority Act of 2002, the proclamation made pursuant to paragraph (1) may provide for the reduction of each general rate of duty at each such stage by not more than 30 percent of such general rate of duty, and may provide for a final general rate of duty which is not less than 70 percent of the general rate of duty proclaimed as the final stage under such agreement.

(C) ROUNDING.—If the President determines that such action will simplify the computation of the amount of duty computed with

respect to an article, the President may exceed the limitations provided in subparagraphs (A) and (B) by not more than the lesser of—

- (i) the difference between such limitation and the next lower whole number, or
- (ii) one-half of 1 percent ad valorem.

SA 2264. Ms. STABENOW (for herself, Mr. CASEY, and Mr. SANDERS) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 55, lines 3 through 5, strike “\$233,388,000, to remain available through September 30, 2011: *Provided*,” and insert “\$250,570,000, to remain available through September 30, 2011: *Provided*, That \$180,000,000 of that amount is used to carry out the commodity supplemental food program established under section 5 of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note; Public Law 93-86): *Provided further*, That it is the sense of the Senate that the Secretary of Agriculture should use a portion of the funds to expand the commodity supplemental food program to 6 approved but unfunded State programs: *Provided further*,”.

SA 2265. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 53, line 7, before the period, insert the following: “: *Provided further*, That each school or institution located in the State of Vermont that is participating in the summer food service program for children, the child and adult care food program, the school lunch program, or the school breakfast program shall be considered eligible to elect commodity letters of credit in lieu of entitlement commodities in accordance with section 18(b) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1769(b))”.

SA 2266. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 60, line 24, before the semicolon, insert the following: “, of which \$1,000,000 shall be used by the Center to conduct a study of obesity and report the results of the study to Congress”.

SA 2267. Mr. SANDERS submitted an amendment intended to be proposed to

amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 59, line 22, strike “\$2,995,218,000” and insert “\$2,996,218,000, of which \$1,000,000 shall be used by the Center for Food Safety and Applied Nutrition to conduct a study on obesity and report the results of the study to Congress and shall be derived by transfer of the amount made available under the heading ‘ANIMAL AND PLANT HEALTH INSPECTION SERVICE’ of title I for the National Animal Identification program”.

SA 2268. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 24, line 24, strike “\$4,369,000” and insert “\$6,369,000”.

SA 2269. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 24, line 24, strike “\$4,369,000” and insert “\$6,369,000, of which \$2,000,000 shall be derived by transfer of the amount made available under the heading ‘ANIMAL AND PLANT HEALTH INSPECTION SERVICE’ for the National Animal Identification program”.

SA 2270. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 53, line 7, before the period, insert the following: “: *Provided further*, That of the total amount available, \$2,500,000 shall be used to carry out the school community garden pilot program established under section 18(g)(3) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1769(g)(3))”.

SA 2271. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration,

and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 52, lines 22 and (23), strike “\$16,799,584,000, to remain available through September 30, 2011,” and insert “\$16,802,084,000, to remain available through September 30, 2011, of which \$2,500,000 shall be used to carry out the school community garden pilot program established under section 18(g)(3) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1769(g)(3)) and shall be derived by transfer of the amount made available under the heading ‘ANIMAL AND PLANT HEALTH INSPECTION SERVICE’ of title I for the National Animal Identification program”.

SA 2272. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 55, after line 21, add the following:
DAIRY PRODUCT PRICE SUPPORT PROGRAM

For the purposes described in section 1501(c) of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8771(c)), \$400,000,000.

SA 2273. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 55, after line 21, add the following:
DAIRY PRODUCT PRICE SUPPORT PROGRAM

For the purposes described in section 1501 of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8771), \$400,000,000.

SA 2274. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 55, after line 21, add the following:
DAIRY PRODUCT PRICE SUPPORT PROGRAM

For the purposes described in section 1501(c) of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8771(c)), \$350,000,000.

SA 2275. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBAC) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration,

and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 24, line 12, strike “\$1,253,777,000” and insert “\$1,653,777,000”.

SA 2276. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 24, line 12, strike “\$1,253,777,000” and insert “\$1,603,777,000”.

SA 2277. Mr. SANDERS submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 29, between lines 8 and 9, insert the following:

DAIRY PRODUCT PRICE SUPPORT PROGRAM

For the Secretary to increase the purchase prices under section 1501(c) of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8771(c)) of cheddar cheese in blocks, cheddar cheese in barrels, and nonfat dry milk to not less than \$1.40, \$1.37, and \$0.97 per pound, respectively, \$400,000,000.

SA 2278. Mrs. GILLIBRAND (for herself, Mr. SANDERS, and Mr. SPECTER) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7. (a) There is appropriated, out of any funds in the Treasury not otherwise appropriated, such funds as are necessary for the Secretary of Agriculture to carry out the milk income loss contract program under section 1506 of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8773) for the period beginning on March 1, 2009, and ending on June 30, 2009, in accordance with this section.

(b) In carrying out the milk income loss contract program during the period described in subsection (a), the Secretary shall use—

(1) the payment rate described in section 1506(c) of the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8773(c)), except that the percentage in paragraph (3) of that subsection shall be 90 percent; and

(2) the payment quantity described in section 1506(e) of that Act, except that the

pound limitation in paragraph (2)(A) of that subsection shall be the pro rata share of 5,960,000 pounds for each fiscal year.

(c) For purposes of Senate enforcement, this section is designated as an emergency requirement and necessary to meet emergency needs pursuant to section 403 of S. Con. Res. 13 (111th Congress), the concurrent resolution on the budget for fiscal year 2010.

SA 2279. Mr. KOHL submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7. (a) Section 5(h) of the Food and Nutrition Act of 2008 (7 U.S.C. 2014(h)) is amended by adding at the end the following:

“(4) NUTRITION ASSISTANCE BENEFITS DURING PUBLIC HEALTH EMERGENCY.—

“(A) DEFINITIONS.—

“(i) ELIGIBLE CHILD.—The term ‘eligible child’ means a child (as defined in section 12(d) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1760(d)) who, if not for the closure of the school attended by the child due to a public health emergency, would receive free or reduced price school meals under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.) and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) at the school.

“(ii) PUBLIC HEALTH EMERGENCY.—The term ‘public health emergency’ means the declaration of a public health emergency by the Secretary of Health and Human Services under section 319 of the Public Health Service Act (42 U.S.C. 247d).

“(iii) SCHOOL.—The term ‘school’ has the meaning given the term in section 12(d) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1760(d)).

“(B) EMERGENCY STANDARDS.—

“(i) IN GENERAL.—The Secretary may, after consultation with the Secretary of Health and Human Services, approve State agency plans for temporary emergency standards of eligibility and levels of benefits under this Act for households with eligible children.

“(ii) RELATION TO OTHER LAW.—The Secretary may promulgate standards under clause (i) without regard to section 4(c) of this Act or section 553 of title 5, United States Code.

“(C) EMERGENCY PLANS.—Plans approved by the Secretary under this paragraph may provide for supplemental allotments to households receiving benefits under this Act, and issuances to households not already receiving benefits, through the EBT card system established under section 7.

“(D) BENEFITS LEVELS.—Assistance provided to a household under this section shall be equivalent to the value of free or reduced price meals that would have been provided to the eligible children of the household under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.) and the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) at the school attended by the eligible children if the school was not closed as a result of a public health emergency.

“(E) MINIMUM CLOSURE.—The Secretary shall not provide assistance under this paragraph in the case of a school that is closed for less than 5 consecutive days.

“(F) RELEASE OF INFORMATION.—Notwithstanding any other provision of law, the Secretary may authorize State educational agencies and school food authorities administering a school meal program under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.) or the Child Nutrition Act of 1966 (42 U.S.C. 1771 et seq.) to release to appropriate officials administering the supplemental nutrition assistance program such information regarding children who are or may be eligible for free or reduced price school meals as may be necessary to carry out this paragraph.

“(G) WAIVERS.—In carrying out this paragraph, the Secretary may approve waivers of the reporting requirements otherwise applicable under subsection (f), limits on certification periods otherwise applicable under section 3(f), and other administrative requirements otherwise applicable to State agencies.

“(H) TERMINATION OF AUTHORITY.—This paragraph shall be effective only for fiscal year 2010.”.

(b) EMERGENCY PURCHASE AUTHORITY.—Section 32 of the Act of August 24, 1935 (7 U.S.C. 612c) is amended—

(1) by striking “Sec. 32. There” and inserting the following:

“SEC. 32. COMMODITY BENEFITS.

“(a) IN GENERAL.—There”; and

(2) by adding at the end the following:

“(b) COMMODITY ASSISTANCE.—

“(1) IN GENERAL.—The Secretary may use funds made available under this section to purchase commodities for emergency distribution in any area of the United States—

“(A) in the event of a declaration of public health emergency under section 319 of the Public Health Service Act (42 U.S.C. 247d); and

“(B) on receipt of information from State agencies demonstrating that the situation warrants the distribution of the commodities.

“(2) TERMINATION OF AUTHORITY.—This subsection shall be effective only for fiscal year 2010.”.

(c) OFFSET.—The amendments made by subsections (a) and (b) shall be carried out using \$2,000,000 derived from a reduction of the amount made available under the heading “SALARIES AND EXPENSES” under the heading “ANIMAL AND PLANT HEALTH INSPECTION SERVICE” in title I.

SA 2280. Mr. KOHL submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place insert the following:

Whereas sudden loss in late 2008 of export-market based demand equivalent to about three percent of domestic milk production has thrown the U.S. dairy industry into a critical supply-demand imbalance; and

Whereas an abrupt decline in U.S. exports was fueled by the onset of the global economic crisis combined with resurgence of milk supplies in Oceania; and

Whereas the U.S. average all-milk price reported by the National Agriculture Statistics Service from January through May of 2009, has averaged \$4.80 per hundredweight below the cost of production; and

Whereas approximately \$3.9 billion in dairy producer equity has been lost since January; and

Whereas anecdotal evidence suggests that U.S. dairy producers are losing upwards of \$100 per cow per month; and

Whereas the Food, Conservation, and Energy Act of 2008 extended the counter-cyclical Milk Income Loss Contract (MILC) support program and instituted a "feed cost adjuster" to augment that support; and

Whereas the Secretary of Agriculture in March transferred approximately 200 million pounds of nonfat dry milk to USDA's Food and Nutrition Service in a move designed to remove inventory from the market and support low-income families; and

Whereas the Secretary on March 22nd reactivated USDA's Dairy Export Incentive Program (DEIP) to help U.S. producers meet prevailing world prices and develop international markets; and

Whereas the Secretary announced on July 31, 2009 a temporary increase in the amount paid for dairy products through the Dairy Product Price Support Program (DPPSP), an adjustment that is projected to increase dairy farmers' revenue by \$243 million; and

Whereas U.S. dairy producers face unprecedented challenges that threaten the stability of the industry, the nation's milk production infrastructure, and thousands of rural communities: Now, therefore, be it

Resolved, That it is the sense of the Senate that the Secretary of Agriculture and the President's Office of Management and Budget should continue to closely monitor the U.S. dairy sector and use all available discretionary authority to ensure its long-term health and sustainability.

SA 2281. Mr. FEINGOLD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Section 404 of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7624) is amended—

(1) by striking "Agricultural Research Service" each place it appears and inserting "Agricultural Research Service and the Forest Service"; and

(2) in subsection (c), by adding at the end the following:

"(3) **AUTHORITY OF SECRETARY.**—To carry out a cooperative agreement with a private entity under paragraph (1), the Secretary may rent to the private entity equipment, the title of which is held by the Federal Government."

SA 2282. Mr. CARDIN submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) The Commissioner of Food and Drugs, in consultation with the Secretary of Agriculture, shall conduct a study on the labeling of personal care products regulated by the Food and Drug Administration for which organic content claims are made. Such study shall include—

(1) a survey of personal care products for which the word "organic" appears on the label; and

(2) a determination, based on statistical sampling of the products identified under paragraph (1), of the accuracy of such claims.

(b) The Commissioner of Food and Drugs shall—

(1) not later than 270 days after the date of enactment of this Act, submit to the Committees on Agriculture, Nutrition, and Forestry, Appropriations, and Health, Education, Labor, and Pensions in the Senate and the Committees on Agriculture, Appropriations, and Energy and Commerce in the House of Representatives a report on the findings of the study under subsection (a); and

(2) provide such Committees with any recommendations on the need to establish labeling standards for personal care products for which organic content claims are made, including whether the Food and Drug Administration should have pre-market approval authority for personal care product labeling.

SA 2283. Mr. DODD (for himself, Mr. WHITEHOUSE and Mr. LIEBERMAN) submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Notwithstanding any other provision of law, the Secretary of Agriculture may fund community facility and water and waste disposal projects of communities and municipal districts in Connecticut, Massachusetts, and Rhode Island that have been previously funded by the Secretary and were under construction as of January 1, 2009.

SA 2284. Mr. DODD submitted an amendment intended to be proposed to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Notwithstanding any other provision of law and until the receipt of the decennial census in the year 2010, the Secretary of Agriculture may fund community facility and water and waste disposal projects of communities and municipal districts and areas in Connecticut, Massachusetts, and Rhode Island that filed applications for the projects with the appropriate rural development field office of the Depart-

ment of Agriculture prior to August 1, 2009, and were determined by the field office to be eligible for funding.

SA 2285. Mr. NELSON of Nebraska (for himself, Mr. GRASSLEY, and Mr. JOHANNES) submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. 7 _____. (a) The Senate finds that—

(1) with livestock producers facing losses from harsh weather in 2008 and continuing to face disasters in 2009, Congress wanted to assist livestock producers in recovering losses more quickly and efficiently than previous ad hoc disaster assistance programs;

(2) on June 18, 2008, Congress established the livestock indemnity program under section 531(c) of the Federal Crop Insurance Act (7 U.S.C. 1531(c)) and section 901(c) of the Trade Act of 1974 (19 U.S.C. 2497(c)) as a permanent disaster assistance program to provide livestock producers with payments of 75 percent of the fair market value for livestock losses as a result of adverse weather such as floods, blizzards, and extreme heat;

(3) on July 13, 2009, the Secretary of Agriculture promulgated rules for the livestock indemnity program that separated non adult beef animals into weight ranges of "less than 400 pounds" and "400 pounds and more"; and

(4) the "400 pounds and more" range would fall well short of covering 75 percent market value payment for livestock in these higher ranges that are close to market weight.

(b) It is the sense of the Senate that the Secretary of Agriculture—

(1) should strive to establish a methodology to calculate more specific payments to offset the cost of loss for each animal as was intended by Congress for calendar years 2008 through 2011; and

(2) should work with groups representing affected livestock producers to come up with this more precise methodology.

SA 2286. Mr. CORKER submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. _____. REIMBURSEMENT OF AUTOMOBILE DISTRIBUTORS.

(a) **IN GENERAL.**—Notwithstanding any other provision of law, any funds provided by the United States Government, or any agency, department, or subdivision thereof, to an automobile manufacturer or a distributor thereof as credit, loans, financing, advances, or by any other agreement in connection with such automobile manufacturer's or distributor's proceeding as a debtor under title 11, United States Code, shall be conditioned upon use of such funds to fully reimburse all dealers of such automobile manufacturer or manufacturer's distributor for—

(1) the cost incurred by such dealers in acquisition of all parts and inventory in the

dealer's possession as of the date on which the proceeding under title 11, United States Code, by or against the automobile manufacturer or manufacturer's distributor is commenced, on the same basis as if the dealers were terminating pursuant to existing franchise agreements or dealer agreements; and

(2) all other obligations owed by such automobile manufacturer or manufacturer's distributor under any other agreement between the dealers and the automobile manufacturer or manufacturer's distributor, including, without limitation, franchise agreement or dealer agreements.

(b) **INCLUSION IN TERMS.**—Any note, security agreement, loan agreement, or other agreement between an automobile manufacturer or manufacturer's distributor and the Government (or any agency, department, or subdivision thereof) shall expressly provide for the use of such funds as required by this section. A bankruptcy court may not authorize the automobile manufacturer or manufacturer's distributor to obtain credit under section 364 of title 11, United States Code, unless the credit agreement or agreements expressly provided for the use of funds as required by this section.

(c) **EFFECTIVENESS OF REJECTION.**—Notwithstanding any other provision of law, any rejection by an automobile manufacturer or manufacturer's distributor that is a debtor in a proceeding under title 11, United States Code, of a franchise agreement or dealer agreement pursuant to section 365 of that title, shall not be effective until at least 180 days after the date on which such rejection is otherwise approved by a bankruptcy court.

SA 2287. Mr. CORKER submitted an amendment intended to be proposed by him to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "TARP Recipient Ownership Trust Act of 2009".

SEC. 2. AUTHORITY OF THE SECRETARY OF THE TREASURY TO DELEGATE TARP ASSET MANAGEMENT.

Section 106(b) of the Emergency Economic Stabilization Act of 2008 (12 U.S.C. 5216(b)) is amended by inserting before the period at the end the following: ", and the Secretary may delegate such management authority to a private entity, as the Secretary determines appropriate, with respect to any entity assisted under this Act".

SEC. 3. CREATION OF MANAGEMENT AUTHORITY FOR DESIGNATED TARP RECIPIENTS.

(a) **FEDERAL ASSISTANCE LIMITED.**—Notwithstanding any provision of the Emergency Economic Stabilization Act of 2008, or any other provision of law, no funds may be expended under the Troubled Asset Relief Program, or any other provision of that Act, on or after the date of enactment of this Act, until the Secretary of the Treasury transfers all voting, nonvoting, and common equity in any designated TARP recipient to a limited liability company established by the Secretary for such purpose, to be held and managed in trust on behalf of the United States taxpayers.

(b) **APPOINTMENT OF TRUSTEES.**—

(1) **IN GENERAL.**—The President shall appoint 3 independent trustees to manage the

equity held in the trust, separate and apart from the United States Government.

(2) **CRITERIA.**—Trustees appointed under this subsection—

(A) may not be elected or appointed Government officials;

(B) shall serve at the pleasure of the President, and may be removed for just cause in violation of their fiduciary responsibilities only; and

(C) shall serve without compensation for their services under this section.

(c) **DUTIES OF TRUST.**—Pursuant to protecting the interests and investment of the United States taxpayer, the trust established under this section shall, with the purpose of maximizing the profitability of the designated TARP recipient—

(1) exercise the voting rights of the shares of the taxpayer on all core governance issues;

(2) select the representation on the boards of directors of any designated TARP recipient; and

(3) have a fiduciary duty to the American taxpayer for the maximization of the return on the investment of the taxpayer made under the Emergency Economic Stabilization Act of 2008, in the same manner and to the same extent that any director of an issuer of securities has with respect to its shareholders under the securities laws and all applications of State law.

(d) **LIQUIDATION.**—The trustees shall liquidate the trust established under this section, including the assets held by such trust, not later than December 24, 2011, unless the trustees submit a report to Congress that liquidation would not maximize the profitability of the company and the return on investment to the taxpayer.

SEC. 4. DEFINITIONS.

As used in this Act—

(1) the term "designated TARP recipient" means any entity that has received financial assistance under the Troubled Asset Relief Program or any other provision of the Emergency Economic Stabilization Act of 2008 (Public Law 110-343), such that the Federal Government holds or controls not less than a 20 percent ownership stake in the company as a result of such assistance;

(2) the term "Secretary" means the Secretary of the Treasury or the designee of the Secretary; and

(3) the terms "director", "issuer", "securities", and "securities laws" have the same meanings as in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c).

SA 2288. Mr. KOHL proposed an amendment to amendment SA 2248 submitted by Mr. COBURN to the amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

In lieu of the matter proposed to be inserted, insert the following:

SEC. 7. None of the funds appropriated or otherwise made available by this Act may be used by the Secretary of Agriculture or the Commissioner of Food and Drugs to enter into any Federal contract unless the contract is—

(1) entered into in accordance with the requirements of section 303 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 253) or chapter 137 of title 10,

United States Code, and the Federal Acquisition Regulation described in section 6(a) of the Office of Federal Procurement Policy Act (41 U.S.C. 405(a)); or

(2) otherwise authorized by law to be entered into without regard to the laws cited in paragraph (1).

SA 2289. Mr. KOHL (for himself and Mr. BROWNBACK) proposed an amendment to amendment SA 1908 submitted by Mr. KOHL (for himself and Mr. BROWNBACK) to the bill H.R. 2997, making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes; as follows:

On page 85, line 16, strike "inspections." and insert the following:

inspections: *Provided further*, That this section shall be applied in a manner consistent with United States obligations under international trade agreements.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON VETERANS' AFFAIRS

Mr. KOHL. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be authorized to meet during the session of the Senate on Monday, August 3, 2009, in the Reception Room immediately off the Senate Floor after today's vote at 5:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON WATER AND WILDLIFE

Mr. KOHL. Mr. President, I ask unanimous consent that the Subcommittee on Water and Wildlife of the Committee on Environment and Public Works be authorized to meet during the session of the Senate on Monday, August 3, 2009, at 2 p.m. in room 406 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON FEDERAL FINANCIAL MANAGEMENT, GOVERNMENT INFORMATION, FEDERAL SERVICES, AND INTERNATIONAL SECURITY AND SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT, THE FEDERAL WORKFORCE, AND THE DISTRICT OF COLUMBIA

Mr. KOHL. Mr. President, I ask unanimous consent that the Committee on Homeland Security and Governmental Affairs' Subcommittee on Federal Financial Management, Government Information, Federal Services, and International Security and Subcommittee on Oversight of Government Management, the Federal Workforce, and the District of Columbia be authorized to meet during the session of the Senate on Monday, August 3, 2009, at 3 p.m., to conduct a hearing entitled "Eliminating Wasteful Contractor Bonuses."

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGES OF THE FLOOR

Mr. BROWNBACK. Mr. President, I ask unanimous consent that Rachana

Chhin of my office be granted the privileges of the floor during the remainder of debate on this bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KOHL. I ask unanimous consent that Honor Keeler from Senator BINGAMAN's office be granted the privileges of the floor for the pendency of H.R. 2997 and all amendments thereto.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. I ask unanimous consent that Stephanie Woodward and Jeremy Girtton be granted the privilege of the floor for the duration of today's session.

The PRESIDING OFFICER. Without objection, it is so ordered.

NATIONAL CHILDHOOD CANCER AWARENESS DAY

Mr. DODD. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of S. Res. 200 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 200) designating September 12, 2009, as "National Childhood Cancer Awareness Day."

There being no objection, the Senate proceeded to consider the resolution.

Mr. DODD. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements related to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 200) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 200

Whereas childhood cancer is the leading cause of death by disease for children in the United States;

Whereas an estimated 12,500 children in this Nation are diagnosed with cancer each year;

Whereas an estimated 2,300 children in this Nation lose their lives to cancer each year;

Whereas the results of peer-reviewed clinical trials have raised the standard of care and improved the 5-year cancer survival rate in children to greater than 80 percent overall;

Whereas more than 40,000 children and adolescents in the United States currently are being treated for childhood cancers;

Whereas up to ⅓ of childhood cancer survivors are likely to experience at least one life-altering or life-threatening late effect from treatment; and

Whereas childhood cancer occurs regularly and randomly and spares no racial or ethnic

group, socioeconomic class, or geographic region: Now, therefore, be it

Resolved, That the Senate—

(1) designates September 12, 2009, as "National Childhood Cancer Awareness Day";

(2) requests that the Federal Government, States, localities, and nonprofit organizations observe the day with appropriate programs and activities, with the goal of increasing public knowledge of the risks of cancer;

(3) recognizes the profound toll a diagnosis of cancer has on children, families, and communities and pledges to make its prevention and cure a public health priority; and

(4) urges public and private sector efforts to promote awareness, invest in research, and improve treatments for childhood cancer.

NATIONAL SAVE FOR RETIREMENT WEEK

Mr. DODD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. Res. 234, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 234) supporting the goals and ideals of National Save for Retirement Week 2009.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DODD. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 234) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 234

Whereas people in the United States are living longer and the cost of retirement continues to rise, in part because the number of employers providing retiree health coverage continues to decline and retiree health care costs continue to increase at a rapid pace;

Whereas Social Security remains the bedrock of retirement income for the great majority of the people of the United States, but was never intended by Congress to be the sole source of retirement income for families;

Whereas recent data from the Employee Benefit Research Institute indicates that, in the United States, less than ⅓ of workers or their spouses save for retirement, and that the actual amount of retirement savings of workers lags far behind the amount that will be needed to adequately fund their retirement years;

Whereas saving for retirement is a key component to overall financial health and security during retirement years;

Whereas many workers may not be aware of retirement savings options, or may not have focused on the importance of, and need for, saving for retirement;

Whereas many employees have access to defined benefit and defined contribution

plans to help prepare for retirement, yet many may not take advantage of employer-sponsored defined contribution plans at all or to the full extent allowed by the plans under Federal law;

Whereas many workers saving for retirement through tax-preferred savings plans have experienced declines in account values due to the recent economic downturn and market decline, making continued contributions all the more important;

Whereas all workers, including public- and private-sector employees, employees of tax-exempt organizations, and self-employed individuals, can benefit from the advantages of tax-preferred savings plans, and from increased awareness of the need to develop personal budgets, and financial plans; and

Whereas October 18 through October 24, 2009, has been designated as "National Save for Retirement Week 2009": Now, therefore, be it

Resolved, That the Senate—

(1) supports the goals and ideals of National Save for Retirement Week 2009;

(2) supports efforts to raise public awareness of the need to use efficiently the substantial tax revenues, estimated to exceed \$127,000,000,000 for the fiscal year 2009 budget, that subsidize retirement savings;

(3) supports efforts to raise public awareness of the importance of saving adequately for retirement and of the availability of tax-preferred employer-sponsored retirement savings plans; and

(4) calls on States, localities, schools, universities, nonprofit organizations, businesses, other entities, and the people of the United States to observe National Save for Retirement Week with appropriate programs and activities with the goal of increasing the retirement savings for all the people in the United States.

NATIONAL AIRBORNE DAY

Mr. DODD. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of S. Res. 235, which was submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 235) designating August 16, 2009, as "National Airborne Day."

There being no objection, the Senate proceeded to consider the resolution.

Mr. DODD. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 235) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 235

Whereas the airborne forces of the Armed Forces have a long and honorable history as units of adventuresome, hardy, and fierce warriors who, for the national security of the United States and the defense of freedom and peace, project the effective ground combat power of the United States by Air Force air

transport to the far reaches of the battle area and, indeed, to the far corners of the world;

Whereas August 16 marks the anniversary of the first official Army parachute jump on August 16, 1940, an event that validated the innovative concept of inserting United States ground combat forces behind a battle line by means of a parachute;

Whereas the United States experiment with airborne infantry attack began on June 25, 1940, when the Army Parachute Test Platoon was first authorized by the Department of War, and was launched when 48 volunteers began training in July 1940;

Whereas the success of the Army Parachute Test Platoon in the days immediately before the entry of the United States into World War II led to the formation of a formidable force of airborne units that have served with distinction and have had repeated success in armed hostilities;

Whereas among those airborne units are the former 11th, 13th, and 17th Airborne Divisions, the venerable 82nd Airborne Division, the versatile 101st Airborne Division (Air Assault), and the airborne regiments and battalions (some as components of those divisions, some as separate units) that achieved distinction as the elite 75th Ranger Regiment, the 173rd Airborne Brigade, the 187th Infantry (Airborne) Regiment, the 503rd, 507th, 508th, 517th, 541st, and 542nd Parachute Infantry Regiments, the 88th Glider Infantry Regiment, the 509th, 551st, and 555th Parachute Infantry Battalions, the 325th and 327th Glider Infantry, and the 550th Airborne Infantry Battalion;

Whereas the achievements of the airborne forces during World War II prompted the evolution of those forces into a diversified force of parachute and air-assault units that, over the years, have fought in Korea, Vietnam, Grenada, Panama, the Persian Gulf region, and Somalia, and have engaged in peacekeeping operations in Lebanon, the Sinai Peninsula, the Dominican Republic, Haiti, Bosnia, and Kosovo;

Whereas the modern-day airborne force that has evolved from those World War II beginnings is an agile, powerful force that, in large part, is composed of the 82nd Airborne Division, the 101st Airborne Division (Air Assault), and the 75th Ranger Regiment;

Whereas the modern-day airborne force also includes other elite forces composed entirely of airborne trained and qualified special operations warriors, including Army Special Forces, Marine Corps Reconnaissance units, Navy SEALs, and Air Force combat control teams, each of which is part of the United States Special Operations Command;

Whereas in the aftermath of the terrorist attacks on the United States on September 11, 2001, the 75th Ranger Regiment, special forces units, and units of the 82nd Airborne Division and the 101st Airborne Division (Air Assault), together with other units of the Armed Forces, have been prosecuting the war against terrorism by carrying out combat operations in Afghanistan, training operations in the Philippines, and other operations elsewhere;

Whereas in the aftermath of the terrorist attacks on the United States on September 11, 2001, airborne units played a pivotal role in the war in Afghanistan, including the unflinching pursuit of the enemies of the United States during the battles of Mazar-i Sharif, Kabul, Qala-i-Jangi, Tora Bora, and Operation Anaconda;

Whereas United States paratroopers, which include the 82d Airborne Division, 75th Rang-

er Regiment, Special Operations Forces, 173rd Airborne Brigade Combat team, and elements of the 4th Brigade 25th Infantry Division, have demonstrated bravery and honor in an effort to pursue the enemies of the United States, to stabilize Afghanistan, and to strive for calm in a troubled region;

Whereas in the aftermath of the announcement of Operation Iraqi Freedom by President George W. Bush in March 2003, the 75th Ranger Regiment, special forces units, and units of the 82nd Airborne Division, the 101st Airborne Division (Air Assault), the 173rd Airborne Brigade, and the 4th Brigade Combat Team (Airborne) of the 25th Infantry Division, together with other units of the Armed Forces, have been prosecuting the war against terrorism, carrying out combat operations, conducting civil affairs missions, and assisting in establishing democracy in Iraq;

Whereas the airborne forces are, and will continue to be, at the ready and the forefront until the Global War on Terrorism is concluded;

Whereas of the members and former members of the United States airborne forces, all have achieved distinction by earning the right to wear the "Silver Wings of Courage" of the United States airborne forces, thousands have achieved the distinction of making combat jumps, 69 have earned the Medal of Honor, and hundreds have earned the Distinguished-Service Cross, Silver Star, or other decorations and awards for displays of such traits as heroism, gallantry, intrepidity, and valor;

Whereas the members and former members of the United States airborne forces are all members of a proud and honorable fraternity of the profession of arms that is made exclusive by those distinctions which, together with their special skills and achievements, distinguish them as intrepid combat parachutists, special operation forces, and, in former days, glider troops;

Whereas the history and achievements of the members and former members of the airborne forces of the United States Armed Forces warrant special expressions of the gratitude of the people of the United States; and

Whereas, since the airborne community celebrates August 16 as the anniversary of the first official jump by the Army Parachute Test Platoon, August 16 would be an appropriate day to recognize as National Airborne Day: Now, therefore, be it

Resolved, That the Senate—

(1) designates August 16, 2009, as "National Airborne Day"; and

(2) calls on the people of the United States to observe National Airborne Day with appropriate programs, ceremonies, and activities.

COMMEMORATING THE 175TH ANNIVERSARY OF THE ABOLITION OF SLAVERY IN THE BRITISH EMPIRE

Mr. DODD. Mr. President, I ask unanimous consent the Senate proceed to the immediate consideration of S. Res. 236, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 236) Commemorating the 175th anniversary of the abolition of slavery in the British Empire on August 1, 1834.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DODD. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 236) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 236

Whereas the United States and the United Kingdom have become beacons of freedom and democracy around the world;

Whereas the history of the people of Africa is inextricably tied to the histories of the United States and the United Kingdom;

Whereas, for centuries, millions of people from Africa and their descendants were enslaved in the United States and the territories of the British Empire;

Whereas the slave trade spanned many regions of the world, including Africa, the Caribbean, the United States, and territories of the British Empire;

Whereas the people of Africa forced into slavery were dehumanized, humiliated, abused, and often separated from their families to be sold;

Whereas the institution of slavery, predicated upon racist beliefs, infected and corrupted the social fabrics of the United States and the United Kingdom;

Whereas the Underground Railroad embodied courage, hospitality, and fortitude, and served as an impetus for the abolition of slavery;

Whereas the Underground Railroad provided a means of escape from slavery by incorporating a network of abolitionists, secret routes, and safe houses throughout the United States and the territories of the British Empire;

Whereas the efforts of Harriet Tubman and like-minded abolitionists in the Underground Railroad helped tens of thousands of slaves escape to freedom during the early 19th century;

Whereas Harriet Tubman demonstrated her fearless devotion to liberty during her service as a conductor on the Underground Railroad and was responsible for leading fugitive slaves through the countryside to safe houses;

Whereas Harriet Tubman became known as "Moses" among slaves and abolitionists because her estimated 19 trips in the decade following her emancipation in 1849 to States that permitted slavery led to the liberation of approximately 300 slaves;

Whereas the Fugitive Slave Law of 1850 jeopardized the safety of escaped slaves in the United States;

Whereas the establishment of Underground Railroad safe houses in Canada, a territory of the British Empire, provided a safe haven for escaped slaves;

Whereas the abolition of slavery in the British Empire on August 1, 1834, established a chief terminal for the Underground Railroad and laid the foundation for the eventual abolition of slavery in the United States;

Whereas the Salem Chapel British Methodist Episcopal Church in St. Catharines, Ontario, Canada, served as an important center of abolitionist activity and served as the final destination for many escaped slaves;

Whereas many freed slaves became members of Salem Chapel British Methodist Episcopal Church and settled in the community; and

Whereas the abolition of slavery in the British Empire influenced the United States by setting the precedent that the dehumanizing practice of slavery would not, and could not, be tolerated if a Nation is to conform with the fundamental tenets of democracy and equality for all people: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the fundamental importance of the abolition of slavery in the British Empire in the history of the United States and Canada; and

(2) celebrates the 175th anniversary of the abolition of slavery in the British Empire on August 1, 1834.

MEASURE READ THE FIRST TIME—H.R. 3435

Mr. DODD. Mr. President, I understand that H.R. 3435 has been received from the House and is at the desk.

The PRESIDING OFFICER. The clerk will report the bill by title for the first time.

The legislative clerk read as follows:

A bill (H.R. 3435) making supplemental appropriations for Fiscal Year 2009 for the Consumer Assistance to Recycle and Save Program.

Mr. DODD. I ask for its second reading and object to my own request.

The PRESIDING OFFICER. Objection is heard. The bill will have its second reading on the next legislative day.

APPOINTMENT

The PRESIDING OFFICER. The Chair, on behalf of the Republican leader, pursuant to Public Law 111-25, announces the appointment of the following individual to serve as a member of the Ronald Reagan Centennial Commission for the life of the commission: the Honorable ROBERT BENNETT of Utah.

ORDERS FOR TUESDAY, AUGUST 4, 2009

Mr. DODD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 10 a.m. tomorrow, Tuesday, August 4; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and the Senate resume consideration of Calendar No. 105, H.R. 2997, the Agriculture appropriations bill, with the time until 10:30 equally divided and controlled between the managers and Senator McCain or their designees; further, I ask that the filing deadline for second-degree amendments be 10:15 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DODD. Mr. President, under the previous order, at approximately 10:30 a.m., the Senate will proceed to a series of two rollcall votes. Upon the completion of the second vote, the Senate will recess until 2:15 p.m. for the weekly caucus luncheons.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. DODD. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 8:50 p.m., adjourned until Tuesday, August 4, 2009, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate:

CONSUMER PRODUCT SAFETY COMMISSION

ANNE M. NORTHUP, OF KENTUCKY, TO BE A COMMISSIONER OF THE OF THE CONSUMER PRODUCT SAFETY COMMISSION FOR A TERM OF SEVEN YEARS FROM OCTOBER 27, 2004, VICE SAUNDRA BROWN ARMSTRONG, RESIGNED.

EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Meetings scheduled for Tuesday, August 4, 2009 may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 5

Time to be announced

Homeland Security and Governmental Affairs

Business meeting to consider the nominations of Alexander G. Garza, of Missouri, to be Assistant Secretary of Homeland Security and Chief Medical Officer, Ernest W. Dubester, of Virginia, to be a Member, and Julia Atkins Clark, of Maryland, to be General Counsel, both of the Federal Labor Relations Authority.

S-216, Capitol

9:30 a.m.

Banking, Housing, and Urban Affairs

To hold hearings to examine proposals to enhance the regulation of credit rating agencies.

SD-538

10 a.m.

Commerce, Science, and Transportation

To hold hearings to examine the nominations of Dennis F. Hightower, of the District of Columbia, to be Deputy Secretary of Commerce, and Robert S. Adler, of North Carolina, and Anne M. Northup, both to be a Commissioner of the Consumer Product Safety Commission.

SR-253

Foreign Relations

To hold hearings to examine the nomination of David C. Jacobson, of Illinois, to be Ambassador to Canada, Department of State.

SD-419

Homeland Security and Governmental Affairs

To hold hearings to examine the nomination of Kelvin J. Cochran, to be Administrator, United States Fire Administration, Federal Emergency Manage-

ment Agency, Department of Homeland Security.

SD-342

2 p.m.

Commerce, Science, and Transportation

Business meeting to consider S. 1078, to authorize a comprehensive national cooperative geospatial imagery mapping program through the United States Geological Survey, to promote use of the program for education, workforce training and development, and applied research, and to support Federal, State, tribal, and local government programs, S. 30, to amend the Communications Act of 1934 to prohibit manipulation of caller identification information, S. 251, to amend the Communications Act of 1934 to permit targeted interference with mobile radio services within prison facilities, S. 952, to develop and promote a comprehensive plan for a national strategy to address harmful algal blooms and hypoxia through baseline research, forecasting and monitoring, and mitigation and control while helping communities detect, control, and mitigate coastal and Great Lakes harmful algal blooms and hypoxia events, S. 1538, to establish a black carbon and other aerosols research program in the National Oceanic and Atmospheric Administration that supports observations, monitoring, modeling, S. 1539, to authorize the National Oceanic and Atmospheric Administration to establish a comprehensive greenhouse gas observation and analysis system, and the nominations of Christopher P. Bertram, of the District of Columbia, and Susan L. Kurland, of Illinois, both to be Assistant Secretary, and Daniel R. Elliott, III, of Ohio, to be a Member of the Surface Transportation Board, all of the Department of Transportation, Patricia D. Cahill, of Missouri, to be a Member of the Board of Directors of the Corporation for Public Broadcasting, Christopher A. SENATE—Tuesday, August 4, 2009

The Senate met at 10 a.m. and was called to order by the Honorable ROLAND W. BURRIS, a Senator from the State of Illinois.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal God, we are grateful for Your mercies renewed every morning and for Your faithfulness every night. As the dew refreshes the Earth morning by morning, let Your spirit restore the faith and energy of our lawmakers. Give them the discernment to understand the challenges of our times and the wisdom to devise ways to meet them. Lord, keep them open and alert to Your providential leading, as You guide them to a destination that will bring glory to Your Name. May the collective talents of our Senators be mobilized in the awesome task of building a better Nation and world. Make their hands ready to lift burdens and their hearts eager to respond in service to humanity.

We pray in Your great Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable ROLAND W. BURRIS led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, August 4, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROLAND W. BURRIS, a Senator from the State of Illinois, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. BURRIS thereupon assumed the Chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks, we will resume consideration of the Agriculture appropriations bill, with the time until 10:30 equally divided and controlled between the two managers or their designees. At 10:30, the Senate will proceed to a series of two rollcall votes in relation to the pending McCain amendments. Following the votes, the Senate will recess until 2:15 p.m. to allow for the weekly caucus luncheons. The time will be expanded a little bit today because the Democrats are going to the White House for the caucus today, rather than here in the Mansfield Room. As a reminder to all Senators, the filing deadline for second-degree amendments is 10:15 this morning. We have every belief we can complete the Agriculture appropriations bill today. I hope so because as soon as we finish that we are going to move to the nomination of Sonia Sotomayor to be an Associate Justice of the Supreme Court of the United States.

MEASURE PLACED ON THE CALENDAR—H.R. 3435

Mr. REID. Mr. President, H.R. 3435 is at the desk. It is my understanding it is due for a second reading.

The ACTING PRESIDENT pro tempore. The clerk will report the bill by title for the second time.

The legislative clerk read as follows:

A bill (H.R. 3435) making supplemental appropriations for fiscal year 2009 for the Consumer Assistance to Recycle and Save Program.

Mr. REID. I ask unanimous consent that any further proceedings in this matter not proceed. I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

The bill will be placed on the calendar.

SOTOMAYOR NOMINATION

Mr. REID. Mr. President, a long 10 weeks ago, President Obama made history when he nominated the Nation's first Hispanic to be a Justice of the U.S. Supreme Court, and only the third woman. This week, the Senate will make history when we confirm her.

Judge Sonia Sotomayor is an American of tremendous qualifications. Both her academic record and her career experience are second to none. She graduated summa cum laude from Princeton University and went on to do as well at Yale, where she was a member of the Law Review. She has served

as a prosecuting attorney, a lawyer in private practice; she was on the trial bench and an appellate judge. After she is confirmed, she will be the only Justice in the current Supreme Court with experience as a trial judge—experience that I believe will be valuable to her colleagues.

One of the objections people have had about the makeup of the Court is that people come with basically no experience in the courtroom other than the appellate judges who sit in back rooms and listen to arguments once in a while and not in a courtroom listening to cases being presented, sustaining and overruling objections, and listening to arguments to the jury. They simply have not had that experience. She has. She has developed a 17-year record as a moderate, mainstream judge.

When the judge testified before the Senate Judiciary Committee for 4 grueling days, she respectfully and thoroughly answered questions from both sides of the aisle—Democrats and Republicans. This week, the Senate will debate her nomination. It will be a fair debate. It will be a full debate.

I appreciate the statements from my colleagues on the other side of the aisle who have said they will vote to confirm her to the Supreme Court.

Many Senators have very thoughtfully said they regret how politicized the process of confirming judges has become in recent years. An unsung hero in the battle for the judiciary is LAMAR ALEXANDER, the Senator from Tennessee. Senator ALEXANDER has been Governor of the State of Tennessee. He was in the Cabinet as Secretary of Education. During the very difficult nuclear option, when there was a knockdown, drag-out fight that I felt would have ruined the basic makeup of the Senate and what the Senate stood for, it was he who quietly and in the background came up with the idea of the Gang of 14. Basically, he said to me and to others: Why don't we have an equal number of Democrats and Republicans sit down and try to work this out. He took none of the limelight. He stepped back, and the process he suggested went forward.

He has decided to vote for Sonia Sotomayor. Most of his colleagues are not going to do that. I am sure if you ask LAMAR ALEXANDER why he decided to do that, of course, the qualifications are fine, but I think one reason he wants to do it is he believes in having temperate suggestions on both sides of the aisle to make a better Senate.

So I am very fond of LAMAR ALEXANDER. I appreciate his ability to bring sides together, and I appreciate his

standing up in this instance for this judge, because the process of confirming judges has become in recent years very politicized. Whose fault is it? It is probably the fault of both sides. It is something that just got out of hand. Hopefully, we can bring it back to where it has been in the past.

I have tried during the time I have been the majority leader to allow full and firm debate. There have been limited instances out of necessity where we haven't had full opportunities to amend pieces of legislation. That is the way it used to be when I came here, and that is the way I hope it is going to be in the future.

In light of the battle we have had in the past over the so-called nuclear option, I appreciate the sentiments of a number of Senators. LINDSEY GRAHAM is an example. LINDSEY GRAHAM has had editorials all over the country written on his behalf. Columns have been written in major newspapers in Nevada complimenting the Senator from South Carolina for the statements he made regarding this judicial problem we have now.

I am disappointed that not more of my colleagues on the other side of the aisle are likely to vote for this outstanding nominee, particularly in light of her record and qualifications, but maybe in the future things will get better. I am, however, grateful for the respect my colleagues have shown her throughout this process, even those who have said they are not going to vote for her.

I look forward to voting to confirm Judge Sotomayor as soon as we can so that she can continue her commendable service to our country.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

SOTOMAYOR NOMINATION

Mr. MCCONNELL. Mr. President, the Senate will soon begin debate on the nomination of Judge Sonia Sotomayor to be an Associate Justice of the Supreme Court. Before that debate begins, I wish to make a few observations.

First, I thank the chairman and the ranking member of the Judiciary Committee, along with their respective staffs, for conducting what can only be described as a dignified and respectful hearing. I know it was gratifying to them, as it was to me, to hear Judge Sotomayor say that every single Senator who had promised to give her the opportunity to explain her views had kept that promise. It was equally gratifying to hear Senators DURBIN and SCHUMER describe the hearings as respectful and fair.

As I have often said, our goal in the Senate should be to disagree without being disagreeable. I think we hit the mark during the hearings on Judge Sotomayor, and the Judiciary Committee should be commended for it. As we begin final consideration, our goal should be the same: Those who support the nomination will make their case, those who oppose it will make theirs, and then we will vote, fulfilling our constitutional responsibility with the seriousness and the deliberation the American people expect.

Over several weeks, I have outlined my concerns about the nominee in some detail. Once the hearing was over, I said that those concerns had only multiplied. But the primary reason I will not support this nomination, as I have already said, is because I cannot support the so-called empathy standard upon which Judge Sotomayor was selected and to which she, herself, has subscribed in her writings and rulings.

As I have said, the empathy standard is a very fine quality. And I have no doubt that Senator Obama, now President Obama, had very good intentions when he made the case for a so-called empathy standard as a Senator, a candidate, and now as President. But when it comes to judging—when it comes to judging—empathy is only good if you are lucky enough to be the person or group for whom the judge in question has empathy. In those cases, it is the judge, not the law, which determines the outcome. That is a dangerous road to go down if you believe, as I do, in a nation not of men but of laws.

Judge Sotomayor has impressed all of us with her life story, but if empathy is the new standard, then the burden is on nominees such as she who are chosen on that basis to demonstrate a firm commitment to equal justice under the law. On the contrary, Judge Sotomayor has openly doubted the ability of judges to adhere to this core principle, and she has even doubted the wisdom of them doing so.

In her writings and in her speeches, Judge Sotomayor has repeatedly stated that there is no objectivity or neutrality in judging. Let me say that again. Judge Sotomayor has repeatedly stated that there is no objectivity or neutrality in judging. She has said her experiences will affect the facts she chooses to see as a judge. Her experiences will affect the facts she chooses to see as a judge. She has argued that in deciding cases judges should bring their sympathies and prejudices to bear. She has dismissed judicial impartiality as an "aspiration" that cannot be met even in most cases. She has even questioned whether a judge trying to be as fair as possible in applying the law does a disservice both to the law and to society. These statements suggest not just a sense that impartiality is not possible but that it is not even worth the effort.

Nothing could be more important in evaluating a judicial nominee than where they stand on the question of equal justice. As I have said, Americans expect one thing when they walk into a courtroom—whether it is traffic court or the Supreme Court—and that is equal treatment under the law. Americans have accepted serious ideological differences in Supreme Court nominees over the years. But one thing they will never, ever tolerate is a belief that some groups are more deserving of a fair shake than others. Nothing could be more offensive to the American sensibility than that.

Judge Sotomayor is certainly a fine person with an impressive story and a distinguished background. But a judge must be able to check his or her personal or political agenda at the courtroom door and do justice evenhandedly, as the judicial oath requires. This is the most fundamental test. It is a test that Judge Sotomayor does not pass.

I yield the floor.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of H.R. 2997, which the clerk will report.

The legislative clerk read as follows:

A bill (H.R. 2997) making appropriations for Agriculture, Rural Development, Food and Drug Administration, and Related Agencies programs for the fiscal year ending September 30, 2010, and for other purposes.

Pending:

Kohl/Brownback amendment No. 1908, in the nature of a substitute.

Kohl (for Murray/Baucus) amendment No. 2225 (to amendment No. 1908), to allow State and local governments to participate in the conservation reserve program.

Kohl (for Nelson (FL) amendment No. 2226 (to amendment No. 1908), to prohibit funds made available under this act from being used to enforce a travel or conference policy that prohibits an event from being held in a location based on a perception that the location is a resort or vacation destination.

McCain amendment No. 1912 (to amendment No. 1908), to strike a provision relating to certain watershed and flood prevention operations.

McCain amendment No. 2030 (to amendment No. 1908), to prohibit funding for an earmark.

Johanns/Nelson (NE) amendment No. 2241 (to amendment No. 1908), to provide funding for the tuberculosis program of the Animal and Plant Health Inspection Service.

Brownback (for Barrasso) amendment No. 2240 (to amendment 1908), to require the Secretary of Agriculture to conduct a State-by-State analysis of the impacts on agricultural

producers of the American Clean Energy and Security Act of 2009 (H.R. 2452, as passed by the House of Representatives on June 26, 2009).

Coburn amendment No. 2243 (to amendment No. 1908), to eliminate double-dipped stimulus funds for the Rural Business-Cooperative Service account.

Coburn amendment No. 2244 (to amendment No. 1908), to support the proposal of the President to eliminate funding in the bill for digital conversion efforts of the Department of Agriculture that are duplicative of existing Federal efforts.

Coburn amendment No. 2245 (to amendment No. 1908), to strike a provision providing \$3,000,000 for specialty cheeses in Vermont and Wisconsin.

Coburn amendment No. 2248 (to amendment No. 1908), to prohibit no-bid contracts and grants.

Coburn amendment No. 2246 (to amendment No. 2226), to provide additional transparency and accountability for spending on conferences and meetings of the Department of Agriculture.

Kohl amendment No. 2288 (to amendment No. 2248), to provide requirements regarding the authority of the Secretary of Agriculture and the Commissioner of Food and Drugs to enter into certain contracts.

Sanders amendment No. 2276 (to amendment No. 1908), to modify the amount made available for the Farm Service Agency.

Sanders amendment No. 2271 (to amendment No. 1908), to provide funds for the school community garden pilot program, with an offset.

The ACTING PRESIDENT pro tempore. Under the previous order, the time until 10:30 a.m. will be equally divided and controlled between the managers and the Senator from Arizona, Mr. MCCAIN, or their designees.

Mr. MCCAIN. Mr. President, I suggest the absence of a quorum and ask that the time be divided equally on both sides.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MCCAIN. Mr. President, what are the proceedings under the unanimous consent agreement?

The ACTING PRESIDENT pro tempore. The time until 10:30 is equally divided.

Mr. MCCAIN. Following that, there would be a vote on two amendments; is that correct?

The ACTING PRESIDENT pro tempore. That is correct.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the second rollcall vote be vitiated and replaced by a voice vote.

The ACTING PRESIDENT pro tempore. Is there objection?

Without objection, it is so ordered.

AMENDMENT NO. 1912

Mr. MCCAIN. Mr. President, this vote will be on amendment No. 1912. The

amendment eliminates, as recommended by the President of the United States, the USDA Watershed and Flood Prevention Operations Program, also known as the Small Watershed Program.

This program is the perfect example of how reckless earmarking can devastate a well-intentioned government program. Like the previous four Presidents' budgets, this administration has proposed to terminate this account—four previous Presidents—because “Congress has earmarked virtually all of this program in recent years, meaning that the agency is unable to prioritize projects on any merit-based criteria, such as cost-effectiveness.”

According to the Congressional Research Service, the Small Watershed Program was 97 percent earmarked in fiscal year 2009, which severely marginalized the ability of the U.S. Department of Agriculture to evaluate and prioritize projects.

A 2003 Office of Management and Budget study showed this program has a lower economic return than any other Federal flood prevention program, including those in the Army Corps of Engineers and the Federal Emergency Management Agency.

The onslaught of earmarks over the years has most certainly contributed to the current backlog of about 300 unfunded authorized small watershed projects, totaling \$1.2 billion.

As was originally intended, the Small Watershed Program may be a worthwhile program, but by inundating it with so-called “congressionally designated projects,” the program is challenged to function properly to the point where four previous Presidents have recommended its termination. Nevertheless, the Appropriations Committee hasn't given up on plundering it just yet. The bill provides \$24.3 million for this program, including \$16.5 million in earmarks for various unauthorized projects.

I urge my colleagues to support the President's recommendation. Again, I will quote from the President's recommendation—the President of the United States:

The administration proposes to terminate the Watershed and Flood Prevention Operations Program. The Congress has earmarked virtually all of this program in recent years, meaning that the agency is unable to prioritize projects on any merit-based criteria, such as cost-effectiveness.

So it goes on and on. Every analysis is that it has a lower economic return than any other program. Four Presidents have sought to eliminate it. We will probably lose this vote. But if there is ever a graphic example that once a program is established and once you fund it, it acquires a constituency and a powerful special interest and that funding continues on and on—we are proving, and we will continue to prove as we go through the appropri-

tions bills, that there is no program that, once it exists, is going to be eliminated by this body, and that the appropriators continue to defy not only the President of the United States but logic and good sense as we amass deficits of monumental proportions which are mortgaging our children's and grandchildren's futures.

We cannot even stop a program the President wants terminated, that has no value, that the Office of Management and Budget and any objective observer will say deserves termination. It is only \$24.3 million, but the appropriators will join and jawbone others, and we will lose this vote, the same way we lost a vote yesterday that, again, had been recommended for termination by the President of the United States.

I didn't come up with this. It wasn't my idea to terminate it, although I certainly do think we should. It was the idea of the President of the United States. It is also every objective observer's idea. We will prove that not only will we not eliminate that program, but we send the message to the country that this program—even though the President wants it terminated, even though it has a clear record of total inefficiency—we will continue to maintain.

Sooner or later, there will be more tea parties and more protests, and the American people are going to rise up and say: Stop it.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin is recognized.

Mr. KOHL. Mr. President, this program provides for cooperation between the Federal Government, State government agencies, and local organizations to prevent erosion, floodwater and sediment damages, and to further the conservation and proper utilization of lands in authorized watersheds.

This program helps communities prepare detailed watershed work plans for flood prevention projects in cooperation with soil conservation districts and other local sponsoring organizations.

Annual natural resource benefits include 90 million tons of soil saved from erosion; 47,000 miles of streams and stream corridors enhanced or protected; more than 1.8 million acre-feet of water conserved; nearly 280,000 acres of wetlands created, enhanced or restored; and over 9 million acres of upland wildlife habitat created, enhanced, or restored.

This is a very important program. I urge Senators to oppose this amendment.

The ACTING PRESIDENT pro tempore. The Senator from Kansas is recognized.

Mr. BROWNBACK. Mr. President, I have a lot of sympathy for the comments made by the Senator from Arizona. I think he has accurate points.

My colleague from Wisconsin makes points, as well, about the program overall.

My point in rising is to say that the system is very difficult to change and to get things pulled out. That is why we have to change the system. What I have put forward for years is a proposal to take a BRAC-type process—the military base closing process—and have it looked at and make a recommendation to the Congress and then one vote on the entire package. That is a way we found to eliminate military bases.

When a program like this is started, or others, there are people who say: Wait a minute. This works for my district even if it doesn't work for somebody else. This is a high-priority project, even if it is not for somebody else. That system is such that it is built to spend, not built to cull, where you can cull things out and say this one doesn't look good, but this does, in trying to get it through a body of 100 people. We are trying to get an Agriculture appropriations bill through that we have not been able to get done in 3 years. We haven't had floor time for an Agriculture appropriations bill. We are trying to move this forward.

I think the Senator has some excellent points. We need to pass this sort of BRAC process for the rest of government so we actually do go at a culling process that everybody has faith in, which has worked before on military bases and we now can apply to the rest of government. That is a system where we can eliminate things, which we need to do in a number of areas. It is not going to happen on a one-shot-by-one-shot basis because some people say: This is a program that really works for my area. Then we get hung up on the floor with lengthy battles, and then we are never able to get the bill through.

I urge my colleagues—and I hope some on the majority side will look at this CARFA bill, we call it, to see about putting that in place so we can get at these in a systematic way that everybody is agreeable to.

I yield the floor.

Mr. KOHL. Mr. President, I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Is there a sufficient second?

There is a sufficient second.

The question is on agreeing to amendment No. 1912.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The ACTING PRESIDENT pro tempore. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 27, nays 70, as follows:

[Rollcall Vote No. 257 Leg.]

YEAS—27

Barrasso	DeMint	Martinez
Bayh	Enzi	McCain
Bunning	Feingold	McCaskill
Burr	Graham	McConnell
Carper	Grassley	Menendez
Coburn	Gregg	Risch
Corker	Johanns	Sessions
Cornyn	Kaufman	Thune
Crapo	Kyl	Webb

NAYS—70

Akaka	Franken	Nelson (FL)

Dorgan	Merkley	Wicker
Durbin	Murkowski	Wyden
Ensign	Murray	
Feinstein	Nelson (NE)	

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The amendment (No. 1912) was rejected.

Mr. KOHL. Mr. President, I move to reconsider the vote.

Mr. BROWNBACK. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The ACTING PRESIDENT pro tempore. The Senator from Wisconsin.

AMENDMENT NO. 2030

Mr. GRASSLEY. Mr. President, I want to speak in opposition to the amendment of the Senator from Arizona to strike funding for Iowa State University's Rural Vitality Center.

According to the Small Business Administration, Iowa historically has ranked near the bottom nationally in business startups. Small businesses with less than five employees account for 86 percent of Iowa businesses, yet these enterprises increasingly are bypassed by existing entrepreneurial assistance and capital networks, particularly in nonmetro areas. The Iowa Rural Vitality Project is Iowa State University's response to help foster innovation and economic vitality in rural Iowa.

The Vitality Center engages with academic institutions, community leaders, and economic development agencies to leverage resources. The center provides statewide leadership by building community capacity for assisting and supporting entrepreneurs and community foundations.

During the past year, the Vitality Center has led an effort to organize a statewide microloan foundation and complementary community microen-

terprise development initiatives. The program targets low- and moderate-income people and underserved rural areas. The microloan program helps fund businesses that don't quite meet the commercial lenders' requirements for credit, which is even more important during these tight lending times. This initiative is creating two to three new business startups per month that would not otherwise exist.

According to Iowa State University, the funding approved for fiscal year 2010 will be used to encourage the development of 20 community-based entrepreneurial development systems, allow for expanded philanthropic capacity in 10 community foundation projects, and research new strategies for enhancing rural vitality for rural and underserved communities. Their program, with this funding, will help continue their creation of jobs across the State.

The Feds aren't the only ones supporting this center. They have received grants from private sources and the State legislature for their efforts. It also receives a \$1 for \$1 match from each community demonstration project for approximately 10 projects, and approximately a \$2 non-Federal to \$1 Federal match from Iowa State University on the center operations budget.

I urge my colleagues to oppose the amendment to strike the funding for this center.

AMENDMENT NO. 2030

Mr. KOHL. Mr. President, all time is yielded back on McCain amendment No. 2030.

The ACTING PRESIDENT pro tempore. Is there further debate on the amendment?

If not, the question is on agreeing to the amendment.

The amendment (No. 2030) was rejected.

The ACTING PRESIDENT pro tempore. The majority leader.

Mr. REID. Mr. President, I ask unanimous consent that Senator BROWN be recognized for a period of approximately 8 minutes, followed by Senator SANDERS, to speak until 11:15 a.m., until our recess occurs.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Ohio.

HEALTH CARE REFORM

Mr. BROWN. Mr. President, I rise again, as I have every day for the last week or so, to share some letters from Ohioans—from people in Painesville, Findlay, Lima, Springfield, Zanesville, and all over my State—which speak to people and their health care situations.

We hear discussion in this Chamber of market exclusivity and the gateway and the exchanges and all these kinds of Washington terms that people don't necessarily understand, but we don't talk often enough about how this

health care system today is damaging the country. We don't think often enough about the situations people find themselves in.

We are not just enacting health care reform. If we do nothing, if we continue down this road, it means that small businesses, that are so overwhelmed with health care costs, are going to go out of business; that more small businesses are going to have to eliminate their insurance programs; and larger businesses—our biggest companies in the country—are having trouble competing internationally because of health care costs. People are paying huge costs out of pocket for their copays or deductibles, and so they cannot afford health care insurance. This means many people have deferred care, which is no care.

At the same time, we see the Nation's insurance companies all too often using preexisting conditions to deny care; using lifetime caps to deny care. This system is broken. Many parts of the system work, and the point of this bill is to protect what works and to fix what is broken in our health care system.

For 4 or 5 minutes, I wish to share some letters I have received from people around my State of Ohio about the situations they are facing with their health care. This is Debra, from Adams County. Adams County is three counties east of Cincinnati on the Ohio River.

Debra writes:

In October 2003, I discovered I had breast cancer. Luckily we found it early and I was treated with a lumpectomy and radiation treatments. I'm doing fine now. But I had to fight with the insurance companies to pay for the radiation treatments. I had 32 radiation sessions and they were over \$800 per treatment. To 2002 I paid \$218 per month for health insurance. Over the next 3 years my premiums were increased to \$550 per month. Today, the insurance company increased premiums to \$719 per month.

We are not poor but we are not rich, but \$719 per month for insurance is half of what I receive in a month. I cannot afford to pay that amount. No insurance company wants to take me because of my preexisting breast cancer condition. I don't know what I am going to do. If I cancel the insurance and then I come down with cancer again or another serious illness, we will lose everything we worked so hard for all our lives.

I paid for my own insurance since 1985 and have never asked for help, but I can't do this. Please can you help me?

Think about this. This is a woman who was paying \$200 per month for health insurance. She paid for health insurance for almost 25 years. Then she gets sick. Then she had to fight with her insurance to get them to even pay for the treatment. Then they more than tripled the cost of her health insurance.

That is not what health insurance should do. That is not what a functioning good health care system should do. That is why we need this health

care reform, to help people such as Debra in Adams County.

Barbara from Delaware County, an increasingly suburban but somewhat rural county straight north of Columbus, central Ohio. Barbara writes:

I had excellent insurance when employed for many years. Then I was laid off when I turned 63. I went without insurance and tried to find a health insurance policy which I could afford. I was very happy to turn 65 and have Medicare.

After having worked for 30 years, I am very grateful for both Social Security and for Medicare. At the age of 68, I don't mind paying into the system since I am glad to be part of a system that helps all of us who are in our advanced years. The security of knowing that I would be covered if something unforeseen would occur keeps my stress level down.

Barbara lost her job at 63, lost her insurance, fortunately had no catastrophic illness or disease happen between 63 and 65 until she got on Medicare. But when I hear this kind of assessment—when I hear her talk about Social Security and Medicare and how it has been for her—and then last night on this Senate floor I heard one of my colleagues on the other side of the aisle talk about how government cannot do anything right, we don't want government involved in health care, this is all a conspiracy of big government intrusion into our lives—think about Social Security; think about Medicare.

We know government has run Social Security and Medicare pretty darn well. Medicare has an administrative cost of well under 5 percent. Private insurance has administrative costs of 15, 20, 25, sometimes 30 percent. We know this health care system—this is not going to be a single-payer system. People will have choices between the public option and individual insurance plans. That is the way we are going to rebuild this health care system. If you are in health care that you appreciate and you are satisfied with, you can keep it. We are going to put some consumer protections on it to make it better.

Barbara speaks so articulately about why Medicare and Social Security work.

The last couple of letters I will read—this is from Cynthia, from Mercer County, on the Indiana border in western Ohio.

My son had a cyst removed in February that cost \$8,000 and I had hernia surgery in May that cost \$12,000. My insurance company picked up some of the cost but I only make \$31,000 a year. We can't even afford my property taxes. My son also has a learning disability and will likely not go to college this fall; therefore, my insurance company sees fit to drop him from coverage in October when he turns 19. Americans who work hard should be at least granted excellent affordable health care without breaking the bank. Let's get the best care possible, not just a Band-Aid.

Cynthia's son, when he turns 19, gets dropped off the insurance plan. Our leg-

islation says if you choose to, you can stay on your parents' insurance plan until you turn 26. So it gets people through those tough years of school, looking for a job, maybe into the military, coming out of the military—all the things that happen in young lives. Our bill protects people up to age 26.

Today, under the status quo, Cynthia is not protected. Cynthia's son is not protected. Cynthia cannot afford these huge costs, these huge premiums, these huge copays and deductibles. That is why we need a change.

The last letter I will read is from Mike from Ross County. The county seat of Ross County is Chillicothe, a couple of counties south of Columbus. Mike writes:

I am a self-employed small businessman. I am unable to obtain insurance for my wife and one of my two daughters. I live that risk every day, praying that my wife and daughter do not need major medical care. This is America, we can and must do better than that.

One of the things we did in this bill was put together special provisions for small business people so if you are self-employed, if you run a small business, you can get insurance at a more reasonable cost. We know big insurance companies charge small business much more per person than they charge larger businesses. This will allow small business to go with other small businesses in what we call the exchange, and they will get much better rates because the insurance costs and the costs of illness and treatment will be spread over hundreds of thousands of people instead of only 5 or 6 or 10 people in one of these health care plans in a small business.

This also has tax credits, additional tax credits for small businesses. We are going to see a lot of help in this legislation for small business.

I will close again saying our health care bill that was voted out of the Health, Education, Labor, and Pensions Committee protects what works in our health care system and fixes what is broken. If you are happy with your health care insurance, you can keep it. If you are happy with your employer plan, you can keep it. We will build some consumer protections around it.

If you are not happy, you are dissatisfied, or you don't have insurance, you will get insurance under this bill.

I yield the floor.

The PRESIDING OFFICER (Mrs. GILLIBRAND). The Senator from Vermont is recognized.

AMENDMENT NO. 2276

Mr. SANDERS. Madam President, I thank the Senator and applaud his strong efforts in fighting for health care for all Americans. I want to take a few minutes right now to touch on an issue that in fact has not gotten a lot of discussion here in Congress and that is that family-based dairy agriculture

is on the verge of collapse. This is not a regional issue, this is a national issue. From the east coast to the west coast, what we are seeing is prices plummeting for dairy farmers way below the cost of production. If Congress does not act, all over America rural communities are going to be suffering economically. People are going to be losing their jobs. The American people increasingly will not be able to obtain fresh locally produced food.

As we talk about stimulus, as we talk about trying to revive this economy, let's remember rural America and let's remember the dairy farmers throughout this country who are producing an important part of the food we consume. At this moment, dairy farmers across the country are suffering from the lowest milk prices in four decades. Let me repeat that. Dairy farmers across the country are suffering from the lowest milk prices in four decades.

In the last year, the price farmers receive for their milk has plummeted 41 percent, to \$11.30 per hundredweight. To understand how low \$11.30 per hundredweight is, you must understand it takes \$17 or \$18 to produce a hundredweight of milk. In other words, for every cow that is milked, the farmer is losing a substantial amount of money.

As a result of these low prices, many family farms have gone out of business and, if we do not act immediately, you are going to see many more, from one end of this country to the other, close up. I can tell you in the State of Vermont there was a lot of publicity surrounding a farm in the southern part of our State that had been in one family since the Revolutionary War—since the Revolutionary War. But because of these horrendously low milk prices, that farm has gone up for sale.

This is not just an issue for dairy farmers. This is not just an issue for rural communities. This is an issue for every American who wants to gain access to good quality, locally produced food.

All over this country people are saying no, I don't want my food coming in from China, I don't want my food coming in from places all over the world. I want to see the quality food that is produced in my area, in my State, in my region. If we do not act to protect family-based dairy agriculture, we are going to increasingly lose that opportunity.

Let me underline this. I know the people familiar with dairy always say these are great regional fights, the Northeast is fighting the Midwest is fighting the Southeast is fighting the west coast, and every region has its own set of priorities.

This is not a regional issue, this is a national issue. Let me talk a little bit about what is happening, briefly, in various regions around the country. California Farmers Union President

Joaquin Contente spoke about the situation in his State of California. He testified:

In my lifelong history as a dairy farmer, I have never seen prices this far below our cost for this long and I have never seen so many dairy producers so desperate for relief. In my county alone—

This is in California, not Vermont.

In my county alone, 25 dairies have either filed or are in the process of filing for bankruptcy and many more are closer to bankruptcy each day.

Joaquin Contente, California Farmers Union president.

Let me talk about Texas, the Southwest. The executive director of the Texas Association of Dairymen spoke about the situation in his State of Texas. He said:

This is the worst situation I have seen since 1970. Some say it is the worst since the depression.

That is the State of Texas. Let me talk about the Midwest, Wisconsin. A Stanley, WI dairy farmer stated:

In my area, farmers are burning up their equity accumulated over their lifetimes. One farmer in my area had to cash out his wife's IRA just to get crops planted this spring. My parish priest in my small town has had to counsel one or more dairy farmers a week to prevent their suicides. And we know of reports across the country of farm suicides that have already occurred.

These are just a few examples from California and Texas. I can go on and on about what is going on in California and the Northeast.

Last week, after Congress's strong urging, Secretary Vilsack announced that the government would spend \$243 million to raise price supports for dairy farmers, and we very much appreciate the Secretary and the Obama administration's quick response to our needs. That support is important. It is likely to raise milk price supports by about \$1.25 per hundredweight, but that is nowhere near enough of what we need when in fact cost of production is \$17 or \$18 per hundredweight.

This afternoon I will be offering legislation cosponsored by you, Senator GILLIBRAND, cosponsored by Senator SCHUMER, Senator TOM UDALL, Senator SPECTER, and Senator JEANNE SHAHEEN, among others. This amendment will go a long way to help farmers over the short-term crisis.

Long term, obviously we need to do some fundamental rethinking about dairy agriculture, how you bring long-term stability to the dairy industry and end that volatility that has been rampant in that industry for so many years. There are so many ideas out there about how we bring long-term stability for dairy farmers in this country. This is short-term relief to make sure farmers all over this country do not go out of business. What this amendment would do is provide the Secretary of Agriculture with \$350 million in additional funding for milk price supports. That would, again,

bring the price up about another \$1.50 per hundredweight. This short-term help could mean the difference between economic viability or financial disaster for dairy farmers from one end of this country to the other.

Once again, all of us are focused on how we get out of this deep recession. All of us are focused on how we create decent-paying jobs. I urge my colleagues, do not forget about rural America. Rural America, whether it is Vermont, Wisconsin, California, Colorado—rural America is hurting. They need help as well.

Later on this afternoon I will be bringing forth this very important amendment to provide some economic support for rural America and hope to have the support of all my colleagues.

THE CALENDAR

Mr. SANDERS. Madam President, I ask unanimous consent the Senate proceed to the immediate consideration of the following postal naming bills en bloc: Calendar Nos. 133 through 144: S. 748, S. 1211, S. 1314, H.R. 774, H.R. 987, H.R. 1271, H.R. 1397, H.R. 2090, H.R. 2162, H.R. 2325, H.R. 2422, and H.R. 2470.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SANDERS. I ask unanimous consent the bills be read a third time and passed en bloc, the motions to reconsider be laid on the table en bloc, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

CESAR E. CHAVEZ POST OFFICE

The bill (S. 748) to redesignate the facility of the United States Postal Service located at 2777 Logan Avenue in San Diego, California, as the "Cesar E. Chavez Post Office," was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 748

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CESAR E. CHAVEZ POST OFFICE.

(a) REDESIGNATION.—The facility of the United States Postal Service located at 2777 Logan Avenue in San Diego, California, and known as the Southeastern Post Office, shall be known and designated as the "Cesar E. Chavez Post Office".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Cesar E. Chavez Post Office".

JACK F. KEMP POST OFFICE BUILDING

The bill (S. 1211) to designate the facility of the United States Postal Service located at 60 School Street, Orchard

Park, New York, as the "Jack F. Kemp Post Office Building," was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1211

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. JACK F. KEMP POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 60 School Street, Orchard Park, New York, shall be known and designated as the "Jack F. Kemp Post Office Building".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Jack F. Kemp Post Office Building".

DR. MARTIN LUTHER KING, JR. POST OFFICE

The bill (S. 1314) to designate the facility of the United States Postal Service located at 630 Northeast Killingsworth Avenue in Portland, Oregon, as the "Dr. Martin Luther King, Jr. Post Office," was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1314

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DR. MARTIN LUTHER KING, JR. POST OFFICE.

(a) DESIGNATION.—The facility of the United States Postal Service located at 630 Northeast Killingsworth Avenue in Portland, Oregon, shall be known and designated as the "Dr. Martin Luther King, Jr. Post Office".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Dr. Martin Luther King, Jr. Post Office".

LIEUTENANT COMMANDER ROY H. BOEHM POST OFFICE BUILDING

The bill (H.R. 2470) to designate the facility of the United States Postal Service located at 19190 Cochran Boulevard FRNT in Port Charlotte, Florida, as the "Lieutenant Commander Roy H. Boehm Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

KILE G. WEST POST OFFICE BUILDING

The bill (H.R. 2422) to designate the facility of the United States Postal Service located at 2300 Scenic Drive in Georgetown, Texas, as the "Kile G. West Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

LAREDO VETERANS POST OFFICE

The bill (H.R. 2325) to designate the facility of the United States Postal Service located at 1300 Matamoros Street in Laredo, Texas, as the "Laredo Veterans Post Office," was considered, ordered to a third reading, read the third time, and passed.

GERALDINE FERRARO POST OFFICE BUILDING

The bill (H.R. 774) to designate the facility of the United States Postal Service located at 46-02 21st Street in Long Island City, New York, as the "Geraldine Ferraro Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

JOHN SCOTT CHALLIS, JR. POST OFFICE

The bill (H.R. 987) to designate the facility of the United States Postal Service located at 601 8th Street in Freedom, Pennsylvania, as the "John Scott Challis, Jr. Post Office," was considered, ordered to a third reading, read the third time, and passed.

ELIJAH PAT LARKINS POST OFFICE BUILDING

The bill (H.R. 1271) to designate the facility of the United States Postal Service located at 2351 West Atlantic Boulevard in Pompano Beach, Florida, as the "Elijah Pat Larkins Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

CAROLINE O'DAY POST OFFICE BUILDING

The bill (H.R. 1397) to designate the facility of the United States Postal Service located at 41 Purdy Avenue in Rye, New York, as the "Caroline O'Day Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

FREDERIC REMINGTON POST OFFICE BUILDING

The bill (H.R. 2090) to designate the facility of the United States Postal Service located at 431 State Street in Ogdensburg, New York, as the "Frederic Remington Post Office Building," was considered, ordered to a third reading, read the third time, and passed.

HERBERT A LITTLETON POSTAL STATION

The bill (H.R. 2162) to designate the facility of the United States Postal Service located at 123 11th Avenue South in Nampa, Idaho, as the "Her-

bert A Littleton Postal Station," was considered, ordered to a third reading, read the third time, and passed.

Mr. SANDERS. I yield to the chairman, Senator KOHL.

Mr. KOHL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. MCCASKILL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—Continued

Mrs. MCCASKILL. I rise for a minute to concur with the comments of my colleague from Vermont, Senator SANDERS.

I have spent some time on the phone over the last few weeks with dairy producers in Missouri. What is happening is heartbreaking. And in this economic downturn, it is hard to look everywhere we can be looking. One day, the car sector is grabbing our attention; another day, we are talking about what is going on in terms of utility costs for our constituents; another day, we are back talking about whether people can even afford health care. There are so many places we are trying to look and do what is necessary to get us through this rough patch.

Unfortunately, the independent producers do not have a whole lot of lobbyists out there. A lot of the big, multinational agricultural corporations have plenty of help. But the families I know, the families I have talked to, who are trying to continue to produce dairy products for this Nation in the family way and in the independent way, are really on the ropes.

I ask unanimous consent that I be added as a cosponsor to Senator SANDERS' amendment and that we remember it is not just our car manufactures that are in trouble right now. In almost every sector of our economy, we have trouble, and we cannot neglect one area of our economy in an effort to help another area of our economy.

I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KOHL. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Madam President, I ask that it be in order to make a point of order en bloc on several pending amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 2225, 2226, 2246 2248, AND 2288

Mr. KOHL. Madam President, I make a point of order that the following amendments are not germane postclosure: amendments Nos. 2225, 2226, 2246, 2248, and 2288.

The PRESIDING OFFICER. The point of order is well taken. The amendments fall.

Mr. KOHL. I ask unanimous consent that at 2:15 p.m., the Senate resume consideration of the Coburn amendment No. 2244; that Senator HARKIN be recognized to speak for up to 15 minutes, to be followed by Senator COBURN for as much time as he consumes; that following Senator COBURN's remarks, the Senate then proceed to vote in relation to the Coburn amendment No. 2244, with no amendment in order to the amendment prior to the vote; further, that upon disposition of amendment No. 2244, the Senate then resume the following amendments, with 2 minutes of debate prior to each vote: amendments Nos. 2245, 2243; that no amendments be in order to either amendment prior to a vote; and that no amendments be in order to any of the amendments listed here.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. I yield the floor.

RECESS

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 2:15 p.m.

Thereupon, the Senate, at 11:22 a.m., recessed until 2:15 p.m. and reassembled when called to order by the Acting President pro tempore.

AGRICULTURE, RURAL DEVELOPMENT, FOOD AND DRUG ADMINISTRATION, AND RELATED AGENCIES APPROPRIATIONS ACT, 2010—Continued

AMENDMENT NO. 2244

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will resume consideration of amendment No. 2244 offered by the Senator from Oklahoma, Mr. COBURN.

Mr. COBURN. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARKIN. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HARKIN. Mr. President, the Senate Agriculture appropriations bill contains \$4.9 million to help public television stations meet the Federal man-

date to provide over-the-air digital signals to rural areas, similar to last year's funding level. Rural public television stations throughout the country are at extreme disadvantage when faced with the task of converting their stations and vast network of translators from analog to digital transmission. Why? Because they are spread over a larger geographic area—private and some of the network stations—and they have a much smaller population base to draw upon when funding system improvements than their urban counterparts. Urban stations have a bigger population base.

To date, most rural stations have focused their resources on converting transmitters to meet the Federal mandate. The funding provided in this Agriculture appropriations bill will be critical to helping stations transmit their signals far enough to reach people in rural areas far from the transmitters. Generally, stations have these transmitters send a signal out over the airwaves, but in a large number of cases they need translators. They take the transmitter signal at a certain point and then they boost the power so they can send it further out. That was also true under the old analog system. Obviously, the analog translators would not work for digital, so we need digital translators. In most cases, for technical reasons, the digital translators cover less of an area, particularly in places that are hilly or mountainous, so additional translators are needed.

At present, we have millions of people living in rural America who simply cannot get the over-the-air digital signal. These funds are allocated on a peer-review process within the Rural Utilities Service of the Department of Agriculture. For example, in my State of Iowa, a large number of people in the Dubuque area are not receiving the Iowa public TV digital over-the-air signal now because of the lack of a digital translator which gets its signal from a Cedar Rapids-Waterloo transmitter. I understand also that the Oklahoma public television system received considerable funding through this program a few years ago. But many other State systems have very real needs that have not been met. Few public TV stations are able to acquire the needed funds to do this. In the current 2009 round, public TV stations requested about three times the available needed funding we have in the USDA program. While it is true that both the Department of Commerce and the Corporation for Public Television do provide equipment for public TV stations, it is also true that these funds are both inadequate to fully meet all the needs they are intended for, and they have not been providing significant funds for translators.

The Corporation for Public Broadcasting provides about \$36 million for public TV and radio stations for equip-

ment. They have provided digital equipment, shifting analog libraries to digital, and power equipment. But they have not focused on digital translators. It is not their mission to focus on the special needs of rural areas such as the Rural Utilities Service must do. Even if they do in the future provide some funding for translators, the total we now need is going to be far more than the funds that will be available in the coming fiscal year. Even if they did have the funds, they asked for three times the amount of funding that we have in this bill to build these translators. The Department of Commerce also has a program which provides equipment, again not focused on translators. They provide equipment such as network operations equipment that allows stations to take signals from a national broadcast and send them out over their transmitters. They provide emergency funding when there is a local equipment failure but, again, they have a very limited amount of money for translators.

Again, there is a considerable need for additional funds for digital TV to reach rural America. The lack of a single translator can mean that 100,000 households are not able to get over-the-air digital signals. These funds are badly needed. I thank my friend from Oklahoma for letting me go first because I have to chair a hearing at 2:30. I wished to make these comments because I have real-time experience with these translators in my State in Dubuque. But there are other places in rural Iowa that are on the fringes of where the transmitters are, and they have to have these translators to get the signal out.

Again, one could say: Well, they charge the people. But there are not that many people. They deserve to have public television also. That is what this money was for, the \$4.9 million, to help them get these translators. It is not only Iowa, any State that has a lot of rural area, especially if it is hilly or mountainous, needs translators. I am not an expert in this area whatsoever, but I know they cost money. I do know the need is there. All I can say is, they had asked for three times more than what we have in this bill. So if there are some other funds in Commerce or in the Corporation for Public Broadcasting, I rather doubt they will be able to anywhere meet the need that is out there, and they will be back again next year asking for more money to get these translators built, as we switch from the analog to digital.

I, respectfully, request that the Senate oppose the Coburn amendment.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. COBURN. Mr. President, I am constantly amazed. We have three separate programs, of which this administration says we don't need one penny

from the Department of Agriculture for this. That is what they say. They say we have plenty of money in CPB to do everything that is needed with the translator stations this year. We are 92 percent complete on everything that has been translated. This is similar to every government program. They never die. Not only do we have the Department of Commerce that is going to have additional funding this year for that very same thing, we have the Corporation for Public Broadcasting. The fact is, they want it to go through the Agriculture Department because there is more control. We can direct it. We can have more control.

We are in a crisis. We will have close to a \$2 trillion deficit this year. Here we have \$4.9 million that the administration says isn't needed. They want to get rid of it. They are right. What do we do? Every time we come to approach a program, we decide we can't eliminate it. Every family in America today is eliminating a lot of programs for themselves.

This appropriations bill is an atrocity. I will go through it so everybody can see what it is. In fiscal 2009, the grand total for this was \$128 billion. It is now \$123 billion. Do you know why it is there? They got \$20 billion from mandatory in the stimulus and another \$6 billion in the stimulus. So this isn't a decrease. It is outrageous the amount of money we are spending. We will go through it line by line.

Agriculture programs in 2009, discretionary were \$6.85 billion. They are \$7.22 billion. That is a 6-percent increase. The mandatory spending was \$18 billion. It is now \$22 billion. That is a 21-percent increase. Plus they got \$1 billion in the stimulus. So if you add that to the \$30 billion, we actually have \$31 billion compared to \$24 billion this year. Think about what kind of increase that is. Title II conservation programs was \$969 million in 2009. We gave \$340 million, which hasn't been spent yet; it will be spent this year. Yet we increase it another 4.5 percent to \$1.015 billion.

Rural development, they got \$3 billion this year. In this bill they get 2.7. That is an 11-percent increase. That doesn't count the \$4.36 billion that was given in the stimulus. Domestic food programs went from \$76 million to \$86 million. We need that now, no complaint there. We have a lot of people requiring our help right now, but they also got \$20 billion which hasn't been spent yet in the stimulus. So we have gone from \$76 million to \$106 million, a 45-percent increase. Foreign assistance, we spent \$1.5 billion on foreign assistance in agricultural programs in 2009. This is at \$2 billion, a 33-percent increase. Plus they got \$700 million in the stimulus that has not been spent. So add that together and you have \$2.1 billion versus 1.5.

It is ridiculous the amount of money that is in this appropriations bill. All

these ought to be trimmed back based on what the stimulus was doing rather than growing them at four times the rate of inflation. We are growing government in this bill four times the rate of inflation. We are going to have a \$2 trillion deficit and we are proud of this bill? This bill is a stinker.

FDA Commodities Futures Trading, \$2.1 billion to \$2.527 billion, a 20-percent increase in one year. Let's talk about some of the separate programs. Agricultural research got increased \$200 million. By the time you add in what we did in the stimulus, it goes from \$1.18 to \$1.23 billion. That is where most of the earmarks are stolen from, agricultural research, and most of that money isn't applied to research. It gets directed through an earmark. National Institute of Food and Agriculture Research went from 1.22 billion to 1.3, an \$80 million increase, a 6.76-percent increase; Economic research, up \$3 million, just a 4-percent increase; Statistical service, up 7 percent; Animal health inspection, up 4 percent; Agricultural marketing services, up 5 percent; Grain inspection packers, up about 4 percent; Food safety, where we should be increasing funding because of the problems we have had, is up only 2 percent. Where we have the problems, we are not increasing the appropriations. We are actually barely keeping even with inflation. But on food safety, we don't increase it. Farm service salaries, they increase \$90 million, a 6.5-percent increase, plus we gave \$50 million in the stimulus; Farm service agency loans, if you add in the stimulus, which has not been spent, we get to \$195 million from \$147 million. That is a 33.3-percent increase.

Federal crop insurance: Up \$1 billion, from \$6.5 billion to \$7.5 billion. That is a 12-percent increase.

Conservation programs. Mr. President, \$340 million NRCS was given in the stimulus. It has not been spent yet. And \$962 million is what we had last year. Mr. President, \$1.015 billion, plus the \$340 million, and what you get is a 33-percent increase.

Conservation operations: No money in the stimulus. We go from \$853 million to \$949 million. That is an 8-percent increase.

Watershed and flood prevention is flat. It is flat. We have all these water conservation dams that are falling apart. Kind of like in our highway bill, we fix the earmarks, but we do not take care of the bridges. That is what we are doing on the watershed.

RC&D, the President terminated it. Finally we got one that is going under.

Rural development: Salaries up 8 percent.

Rural housing: Counting the \$330 million we did in the stimulus that has not been spent, you have a \$430 million increase—\$130 million increase over it, about a 7-percent increase.

You can keep going. I will not continue to bore my colleagues. But the

fact is, overall in this bill, we have a tremendous increase in spending when you consider what we did in the stimulus—not a decrease—taking into account for that.

Now back to this amendment. All this amendment does is cut \$4.9 million—\$4.9 million—out of a \$124 billion bill. The reason this amendment is offered is because the administration is doing the right thing. They are eliminating a program that is not needed now. We can say anything we want, but we have three agencies doing the same thing, and what the administration recognized, to their credit, is we do not need three agencies doing the same thing. What we need is one agency accountable. We are 92 percent complete, and let them be responsible for finishing it and save the American taxpayer some money.

That is what the Obama administration wanted to do with this elimination. But, no, it comes right back. Each of the three programs that presently do this work—the USDA, the Commerce Department's PTFP, and the Corporation for Public Broadcasting—is a part of their respective agency's budget. Unless we eliminate it, we are going to spend that money, and it will not be well spent, it will not be wisely spent, it will not be efficiently spent. It will just be spent, and they will ask for more next year. Even when we are at 97 percent or 98 percent complete, we will see the same request to come. The logic was because they asked for three times as much; therefore, \$4.9 million ought to be OK. Well, \$4.9 million is not OK when we need zero out of the Department of Agriculture to begin with.

One of the things the Obama administration wants to do is to streamline this process, not have three agencies going through this. They want to consolidate the current three-pronged effort into one efficient program that is already in existence. And nobody denies that CPB has done a pretty good job with the public television stations and the translator stations through their money.

The USDA received \$14 million in 2004, \$10 million in 2005, \$5 million in each of the years 2006 through 2008. PTFP—which is the Department of Commerce—has gone all the way from 1998, when they got \$12.5 million—and every year, all the way up—to 2002, when they got \$36 million; and then they went back down to \$15 million in 2007. They did not get any money in 2008 because they did not need it.

The Corporation for Public Broadcasting, however, has gotten, on average, over \$35 million a year, and they got \$29 million last year. Plus we spent \$650 million in the stimulus on this program. It has not all been spent. So we are lining up. We have plenty of money in the stimulus package, and then we are going to ask for another \$4.9 million.

This is exactly the reason the American people are disgusted with Congress. This is a bill that is out of its bounds in terms of its spending. It has not recognized what is in the stimulus that has not been spent. So what we are doing is we are actually going to increase the debt through this bill that is going to be spent.

To put that in personal terms, what does that mean? A \$2 trillion deficit is \$6,000 for every man, woman, and child in this country. That is what we are going to do this year: We are going to spend \$6,000 per man, woman, and child more than we take in for every man, woman, and child in this country. And do you know what. We are on course to do exactly the same thing next year with this kind of appropriations bill. There is no check with reality in the Senate as far as when it comes to spending money, and I refuse to apologize for looking out for the next two generations when we do not have the courage to say no to anybody. What we say is: Yes, I will get this bill for you so you can look good at home.

Well, who is looking out for the 2- and 3- and 4- and 5-year-olds in this country who, when they were born, took on almost \$500,000 worth of unfunded liabilities? Our debt is going to double in the next 5 years. It is going to triple in the next 10 years. There is no effort in this bill to make that less burdensome on those children.

With that, I yield the floor on this amendment.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2248

Mr. COBURN. Mr. President, I want to talk about an amendment I offered that has been ruled nongermane by the Parliamentarian. I flatly disagree with that ruling, and I want the American people to understand what we have ruled nongermane.

We offered an amendment that said grants and contracts under this bill should be competitively bid. Think about that. When we go out to spend money—with the six or seven exemptions in the contracting clause, and the fact that maybe for some things only one person can apply to it, which have been accepted in that—we said for American taxpayers to get value, we ought to ask and mandate that competitive bidding take place on grants and contracts in this bill.

Not one of these has ever passed the Senate, and I want to tell you why. It is because we do not want things to be competitively bid. We do not want your

dollars to be spent wisely, efficiently, and effectively because when we do that we take away our political power to say somebody is going to get a contract or somebody is going to get a grant.

So this amendment, which was offered, specifically excluded earmarks because the complaint last week, when I offered the same amendment on the previous bill, was that if they are authorized—and remember, an earmark goes to a specific person, a specific company, those well connected in Washington—I specifically eliminated earmarks from this amendment so we would not have the excuse to say we do not want things competitively bid. But what we were going to find, had this amendment gone to a vote, is that it would have been voted down, too, because the problem is not in America, the problem is right here.

We view political power and incumbency more precious than we view the economic realities and sustenance of this country and the true freedom of the people in this country. We diminish that because we think our positions ought to be enhanced, and we ought to secure our next election by making sure we are the dolers of everything good, and that we can actually connect those who give big campaign contributions to great rewards from the Congress when it comes to appropriations bills. What this amendment would do is require that the contract be competitively bid according to the law. We actually have a law that says contracts have to be competitively bid, except Congress routinely excuses that on appropriations bills.

Just so the American people get this, we don't competitively bid contracts on these appropriations bills. We don't competitively bid the grants. We don't mandate that they are competitively bid, although some grants are competition-based but not based on dollars, based on performance. So Congress wins and the American people lose. Every time one of these bills goes through here without competitive bidding, our children are the real losers.

The President of the United States has said it is his policy that anything over \$25,000 the government buys in this country ought to be competitively bid. Yet routinely it is his supporters who vote against that. President Obama means it, but we can't get it through here. We have \$350 billion a year of documented waste, fraud, and duplication in the discretionary budget, plus Medicare fraud every year. There has been no attempt to accept amendments to eliminate that, to lessen that.

The fact is, we are on idle pilot to grow this government 8 percent this year in spite of the \$787 billion stimulus. If you are sitting at home thinking about that, not very many people have 8 percent more income this year.

So one of two things is going to happen in the next 18 months in this country. Here is what is going to happen. Either we are going to default on our debt because people are going to quit loaning us money or the average middle-income taxpayer is going to see a tax hike because, if we take all the income of the top 5 percent of people in this country, we cut our deficit only in half. If we take all the income—I am talking about a 100-percent tax rate of the top 5 percent earners in this country—we will cut our deficit in half.

So if you are a middle-class American, no matter whether you think some people should pay more than they do—5 percent pays 80 percent of the taxes in this country—you can bet that in the next 18 months, you are going to see a middle-class tax increase go through this body. The reason it is going to go through is because we will not apply any common sense to the appropriations bills.

Most American families are cutting back on their spending; some because they have lost their jobs, others because they are worried and they are fearful. What is the Federal Government doing? I am not talking about the stimulus bill. We are actually increasing spending. We are not making the hard choices about what is a priority and what is not; what is a necessity and what is not. We are not eliminating anything. We are building up everything, just like the last amendment we talked about. There is absolutely zero need for that program in the Department of Agriculture, but next year we will have the same debate again.

I have an amendment on cheeses. I am not going to do it because there is no reason to waste the Senate's time. But we created a demonstration project back in the early 1990s with Wisconsin and Vermont and we have been funding it ever since. They have this outstanding large specialty cheese production in Wisconsin and Vermont. They don't need any money, but we are going to send them more money this year because we did last year. The fact is, the specialty cheeses they make cost two and three times what regular cheese costs and they are luxury items, but we are going to fund that not because they need it, not because they are not competitive, not because they haven't grown their industry, but because we have funded it before.

Now ask yourself, if you read the Constitution, where is it in the Constitution that we are supposed to give two States millions and millions of dollars for an agricultural program that should be funded by the State if they want to do it or funded by the individuals who actually produce the cheese and are making good money. But we are going to continue to do it.

So I am not going to offer that amendment. I am not going to waste

the time of the Senate on it. But there is a real question of why we are in the trouble we are in as a nation today. It is because we ignore what the Constitution tells us to do. We ignore what our oath tells us to do, what we swear to do, which is uphold the Constitution. And within that is the enumerated powers, as well as the 10th amendment. The 10th amendment says whatever is not specifically spelled out—specific—and if you read what Jefferson and Madison had to say about what that meant, you will find that all of those responsibilities are left to the States and to the people. That is what they said.

We have this “cash for clunkers” going on right now, and the Senate is going to vote for an increase in that program. But the reason we are having to do that is because we can’t manage it. We have proven—the Department of Transportation—they don’t even know how many applications they have from people. They don’t even know if they have over the number. What they know is they have approved \$760 million of the money so far, but that doesn’t count all of the applications that have come in from the dealers. Here we are incentivizing the purchase of cars, taking money from our grandkids, and Americans are smart enough to know if they can get 4,500 bucks back from the Federal Government, they will take advantage of that. So we have created this wonderful increase in demand for automobiles. But why not an increase in demand for boats or how about RVs or how about refrigerators? They are more efficient. Why not give somebody a \$500 credit on their refrigerator? Why are we limiting this to the automobile industry that we now as taxpayers have the responsibility of bailing out of debt?

The fact is, we are clueless. We are not plugged in to what the average American family is going through in terms of a budget. We will not apply that same standard to their money up here, and their kids, our kids, and our grandkids are the ones who are going to suffer.

So ask yourself a question: Why would the Senate not allow an amendment on competitively bidding the contracts and grants in this bill? Hundreds of millions of dollars that we are going to pay much too much for, an area where we could save a tremendous amount of money, and if it is grant programs that truly do a great job, we could get more of that great job done if we got it done more efficiently. It is pretty disturbing that we are so far off course with what we are doing and, more importantly, how we are doing it.

With that, I yield the floor and note the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT NO. 2246

Mr. COBURN. Mr. President, I wish to speak on the pending amendment No. 2246, which caps the amount of money the U.S. Department of Agriculture spends on conferences and requires transparency on the purpose and cost of the conference sponsored or attended by the U.S. Department of Agriculture.

This is a report I issued a year ago on the \$90 million in conference costs the U.S. Department of Agriculture has spent. It is a pretty detailed report. You can go to my Web site and get it. But it tells about the lack of attention to any sort of fiscal discipline.

By the way, the Department of Agriculture is the worst practitioner of all of the agencies of the Federal Government on conferences, in terms of wasteful conferences, in terms of the number of people going to conferences—by far the worst. In 2001, USDA spent \$6 million on conferences. Within 5 years, that went to \$19 million. They tripled.

All this amendment says is, in 2010—9 years later—they can’t spend more than double what they spent in 2001. That allows conferences to grow 11 percent a year. Twelve million dollars for conferences is a lot of money. That is less than the amount they spent this last year. It is less than any amount they have spent since 2001, but it is still double what they have spent in 2001.

This amendment also requires an itemized list of expenses and expenditures by the Department on the conference, who the primary sponsor of the conference is, the location of the conference, a justification of the location, including the cost efficiency of the location, the total number of individuals whose travel to the conference was paid for by the Department, and an explanation of how the agency advanced the mission by attending the conference.

It is about transparency. I have seen it quoted before, and I believe it is true: The greatest pleasure in the world is to spend somebody else’s money. What our agencies are doing in many instances is not being frugal with the tax dollars we give them. The Department of Agriculture is a great example of that, when they are running close to \$20 million a year—not this last year but still above \$12 million—on conferences, and when we have the technology now to eliminate half the conferences.

I don’t have any problem with travel. I don’t have any problem with them going to conferences that are legitimate. But I do have a problem with a

3½-times increase in the amount of conferences they attend, especially given our economic situation today.

So this is fairly straightforward. We should put a cap on it. We should limit it. It is my hope my colleagues will do that.

With that, I yield the floor and note an absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Ms. STABENOW. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. UDALL of Colorado). Without objection, it is so ordered.

Ms. STABENOW. Mr. President, I understand we are in the process of putting together a series of votes, but while we have a moment, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

THE CARS PROGRAM

Ms. STABENOW. First, I thank our leaders on this important Agriculture bill—the chairman, whom I appreciate so much for all of his hard work; he has a great bill in front of us, along with the ranking member from Kansas.

I wish to speak about legislation the ranking member, Senator BROWNBAC, and I have been working on now for some time. The first piece of it has proven to be extremely effective, despite the naysayers. It has come back even more successful than we thought it would. I thank Senator BROWNBAC for working with me. Making sure this is fully paid for within the recovery package is important to Senator BROWNBAC, and this achieves that. I thank him for partnering with me and understanding the significance of what we have been working to do.

The CARS Program has truly been an incredible success. In only a week, it has proven to be an excellent way to stimulate the economy. Dealers haven’t seen this level of customer excitement in years. I can tell you, as someone who grew up on a car lot—my dad and grandfather had an Oldsmobile dealership when I was growing up. This is important to small towns as well as big cities across the country.

We are not only helping to save the over 160,000 dealership jobs across the country, but it is making our air cleaner and reducing oil consumption. So far, we have seen a 61-percent increase in vehicle fuel economy, which I think is surprising, as we hoped for an increase and we hoped people would turn in vehicles with lower mileage and get a higher mileage vehicle. In fact, we have seen even greater results than we thought we would. They are trading in vehicles averaging 15.8 miles per gallon, and the new vehicles average 25.4

miles per gallon. So this is extremely significant.

What is even more important is that is \$700 to \$1,000 a year in lower gas prices for the average family. At this time, when money is so tight, when people are concerned about saving every penny, this is a good deal for consumers, a good deal for the environment, for the economy, small businesses, as well as, certainly, everyone involved in the auto industry.

It is also significant that 83 percent of the trade-ins are trucks and 60 percent of the new vehicles are small cars. So we are seeing people move away from their clunker truck into a more energy-efficient car. That is good news for the environment and for fuel economy for the average family as well.

This has been a great program, with over 250,000 cars sold. Dealers are packed and sales are booming. At a GM dealership in Ferndale, MI, foot traffic was up 60 percent just last week, according to the general manager.

It is not just dealerships being helped, as I indicated. Steel and aluminum producers have announced that they expect a benefit from the program, as more cars are made to meet demand generated by the program. Scrap recyclers, which supply the steel industry, which have also been hurting lately, are also seeing a pickup in business. The boost to these industries isn't just immediate either. Analysts predict that the benefits will have a lasting impact. So we are talking broadly about manufacturing materials, as well as the small businesses in the communities involved.

Getting people into showrooms and excited again is having a psychological impact on consumers and businesses as well. This is happening all over the country.

The Houston Chronicle reports that more than 70 percent of the clunkers being traded in are SUVs, and 84 percent of the new vehicles are small, fuel-efficient cars.

The Brownsville Herald in Texas quotes Don Johnson, the owner of The Real Don Johnson Chrysler-Jeep-Hyundai, who said:

This is a good deal for the people. It's a good deal for us because we will sell more cars, but it's a good deal for people.

The Daily Record in Dunn, NC, reports strong interest and increased traffic in dealerships. Dan Lowe, from John Hiester Chrysler Jeep Dodge in Lillington, NC, said his dealership is getting 25 to 30 calls a day about the CARS Program. He told the newspaper:

We are excited about anything that gets cars off the lot.

This is certainly doing that.

A Pennsylvania car dealer, Bill Rosado, told the Wall Street Journal:

I can't believe I'm saying this: I need more Chrysler inventory.

Then he said:

My goodness, I've got to rehearse that line a couple times.

This program has been extremely successful in a very short amount of time.

The House, because of its success, as we all know, has acted to add additional dollars by moving from one program in the recovery package into this program. I thank them very much for doing that and for the leadership of my partner in the House, BETTY SUTTON, and the delegation from Michigan, who worked so hard, and also those from Ohio, Indiana, and others as well.

In the Senate, we have had great bipartisan support. Again, I thank my bipartisan cosponsor, Senator BROWNBACK, and I thank Senator VOINOVICH as well. We have been partnering on something that makes sense. This is taking some stimulus dollars and putting them directly into a stimulus that is visible; it is working, it is putting money into the economy, and it is saving people money on gas. It is something I believe is important to continue.

I will close by also thanking our leader, Senator REID, who has once again been extremely supportive of bringing this forward so we have an opportunity to vote. I am hopeful we will see a strong, bipartisan vote on this important stimulus.

I thank the Chair.

The PRESIDING OFFICER. The Senator from Oklahoma.

AMENDMENT NO. 2243 WITHDRAWN

Mr. COBURN. Mr. President, I ask unanimous consent to withdraw amendment No. 2243.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is withdrawn.

Mr. COBURN. Mr. President, I note that the Senator from Michigan noted everyone who won. Let me tell you who did not win and that is our kids and grandkids. Americans are not stupid. If you give them 4,500 bucks, they are going to find any old car they have that is running and they have held for a long time. All our farmers are going to the barns. That is why you are getting pickups. They haven't been driving the pickups for years. But they are cranking them up to make them run and trading them in so they can get 4,500 bucks.

The people who lose are our kids. It is \$3 billion we are talking about to go to help people buy cars. But where are we going to get the \$3 billion? We are going to steal it from our children. What other part of the economy should we not be incentivizing? How about the appliance makers? How about the television makers?

I also ask unanimous consent—actually, I have discussed this with the chairman. Rather than ask for a recorded vote, we will have a voice vote on amendment No. 2245.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2244

Mr. COBURN. I also note that we will have a vote on the amendment in terms of eliminating \$4.9 million for a duplicative program in the Department of Agriculture.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? At this moment, there is not a sufficient second.

Mr. KOHL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROWNBACK. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROWNBACK. Mr. President, I inform my colleagues, we are trying to get to a final conclusion on this bill. It is an important bill, but also a number of Members want to speak on the Sotomayor nomination to the Supreme Court. The attempt is to get this bill moving forward. I think we are close to a final UC to get to passage of this bill.

I wish to comment before we move into that sequence about the importance of the agriculture industry. It is a key issue in my State, and it is a key issue in Wisconsin, the State of the leader of this subcommittee. It is an industry that has done better than a number of others have been doing during this recessionary time period. It is one that is a good performer for us on exports. We have one of the best exporting models, as far as business in agriculture, in this country. Because it is very competitive, it has a lot of capital intensity to it, a lot of intellectual brain power put behind it, both at the public and private level.

It is one of those models in which we compete and do well globally. We are also aggressive in our trade policy to push for free trade, but if other countries are going to subsidize, we will back up our guys and say: If you subsidize your agricultural industry, then we are going to do it to fight you back on it. We don't take any guff around the world. We want a free-trade world, but if you are going to attack us, we are going to respond. If you have missiles, we have missiles, and we are going to do it. That model has worked well to create a very competitive, very growth-oriented, very export-oriented business that is globally competitive, high technology, and one I think that is moving well into the future.

We have a lot of things going on in agriculture, and a number of them are funded in this bill. We want to see the industry expand in the energy business. A lot of us are very supportive of ethanol. Some are saying: I am for it, but I want the next generation of ethanol. We are funding that, as far as getting into cellulosic ethanol.

We are looking at other types of fuels. One that is interesting for some people is on algae production into a diesel type of fuel. We are doing something on wind because wind is what generally blows across the Plains in your State, Mr. President, my State and a number of others and harvesting that in such a way that we can get it to other markets—the electric markets—and add a cost-competitive rate so it is not one that drives it up.

All of this does take a lot of effort. I want to acknowledge that some colleagues on my side are saying: I am not satisfied with this bill; I don't like some of the items in this bill. I say to them: I agree. There are provisions in this bill I don't like. But it is part of us getting a process to move an Agriculture appropriations bill through, something we have not been able to get through on the floor for over 3 years in a stand-alone type of bill, on a very important industry that is globally competitive, that has been a good one for us in this recessionary time period we are in.

I note we have a lot of problems with this bill, but I also say I think we have a lot we are doing right with it and looking forward into the future of what we can do to be very supportive.

I note a couple of things that are going on that are important for us as a country in agriculture on which we can get some crosscurrents.

Norman Borlaug, an agronomist from Texas A&M, is known as the father of the green revolution that brought a lot of the new technology to feed the world. This has been over a career. He won the Nobel Peace Prize in 1970 for his contributions to the green revolution.

I mention him because he is a key person in looking to the future of how the world is fed and fed at a good level. He notes it is important for us to do things in an environmentally sensitive and environmentally sound way but that we also need to fund high-yield, disease-resistant wheat varieties. We need to be able to use plant genetics that are in some places around the world. Some are saying: We don't like your alterations on plant genetics. We need to be able to do this. To feed a hungry world, we are going to have to use agricultural pesticides, insecticides, and fertilizer, and that gets into crosscurrents. They say: I want all the agricultural production, but I don't want these inputs brought into it. We don't have a model for that to work yet.

It is important we support organic food markets and organic food production, but we cannot go that way fully. It is the sort of thing we cannot feed a hungry world on on a cost-competitive basis, a globally competitive industry, if you say we are going to pull out all these tools that have made the green revolution work.

I think it is also important that we fund into the next generation of genetics and technology in this area. I was interested in one of my travels across Kansas. Last year, we had a time where some of my corn farmers could not plant for a couple days, and it was not because it was wet. It was because the satellite went down. Their global positioning system on their corn planter would not work, so they could not plant their corn because the satellite was down. I am going: Well, that is an interesting excuse. I haven't heard that one before. But it wasn't an excuse. It was a fact of life. To plant these crops and do the best job—and they apply just the right amount of fertilizer to that soil and that crop in that specific location will take—it takes a global positioning satellite that has had the data read into it and fed back. That is how high tech the industry is.

I don't want us to move away from that level of technology and input; otherwise, I think we are going to lose our edge.

We also have some developments in the environmental field that I think are interesting. We have people in Kansas and other places around the country who are working on things such as green concrete. You ask: What would that be? It is concrete that has soy oil brought into it to help it be an environmentally sound, renewable type of process. They already are making the foam matting in the seat in your car out of soybeans. So when you sit in a new Mustang—in particular, I know that car for sure—the foam rubber is made out of soybeans. I guess if you get caught in a Colorado blizzard and don't have anything to eat for a week or two, you can eat the seat.

I don't think it is edible.

But my point is, that, again, is an investment in the technology we are putting in this Agriculture appropriations bill to make new things that will work.

This bill is an increase in funding. I don't like that because I think we should not be doing those sorts of funding increases. A major portion of that is the WIC Program. When we get into a recession, we get more and more people needing food. They are not able to pay for it themselves, and the government steps up. That is the problem when we have a recession—government costs go up, government receipts go down, and you get caught in this trap.

One of the reasons why I think a program such as Cash for Clunkers is interesting is because it stimulates the economy, not the government. It gets that economy rolling, which is 80 percent of us balancing the budget. It is getting the economy moving. We have to restrain our spending and do a better job of that.

I think we also need to be a lot more targeting of our programs. Programs such as the WIC Program and this Agriculture appropriations bill are a con-

sequence of a bad economy. I don't like it, but I think the key for us is to be an economic stimulus and not a government stimulus.

On the whole, while I think we have problems with this bill, I like the overall trend of what we are doing in the agricultural industry. I like what the chairman has focused on in this bill.

On top of these items, I note for my colleagues, we put a special effort on the food aid program and getting the food aid program updated. To me, the needs of those who are in very difficult circumstances in refugee camps and different places around the world—we spend too much on transportation and administration on food aid. Nearly 60 percent goes into those two. That number has to come down. But we need to get more food on the target because, in many cases, we are what stands between that person and starvation and death. It is the food aid, the generous food aid of the American people, that flows through this appropriations bill that does that.

The Food and Drug Administration is also in this bill, and that is part of the increase. The development and the increasing need for different types of drugs are addressed in this bill as well.

We have to get more innovative on FDA. I would like to see us in the neglected disease categories find more truncated procedures that approve drugs that have narrower, smaller marketplaces. That is in this bill.

While I believe there are a number of things negative about this bill, I think the chairman has put together an overall good bill. I am glad we are getting to the point where we can move this one on through, conference it, and bring it back separately, as well so we can recognize this very important industry. It is important in my State and it is important in the States of all the Members, and we should do this separately instead of rolling it together in some sort of omnibus bill like we too often have done.

I believe we are getting close to getting to a final UC. That would be my hope so we can move this bill forward.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SANDERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SANDERS. Mr. President, I will take a few minutes while we are waiting until procedures get lined up to say a few words about an amendment I am offering which is going to come up for a vote fairly soon. This is an amendment which addresses the crisis in dairy all over this country. It is an amendment that is supported by Senator SNOWE, Senator UDALL of New

Mexico, Senator SCHUMER, Senator BENNET of Colorado, Senator SPECTER, Senator MCCASKILL, Senator GILLIBRAND, Senator KLOBUCHAR, Senator SHAHEEN, and Senator CASEY. As you will note, these are people from all over the country. What we are not talking about here is a regional issue, we are talking about a national issue.

I want to pick up on a point for a moment that Senator MCCASKILL made earlier this morning. I think it is important. All of us know that today our country is in a major economic crisis, the deepest recession since the Great Depression. But sometimes what media does, and maybe what we do here in Congress, is focus on that crisis in the areas where there is, if you like, concentrated misery, such as Detroit, which has undergone terrible problems, thousands of people on a given day have lost their jobs, and sometimes, in the midst of the economic crisis facing our country, we forget what is happening in rural areas, in small towns all over this country. Sometimes when farms go out of business, farms that have been owned by a family for generations, when rural communities go into, literally, an economic depression, we don't pay quite as much attention to that. It is not on the front pages of the New York Times. The fact is, right now rural America is in the midst of a very serious economic crisis. Unemployment is extremely high.

One of the particular areas where we are seeing not just a deep recession but, in fact, a depression is within the dairy industry. In the last year, if you can believe it, the price dairy farmers—many of them small, family-based dairy farmers—have received for their milk has plummeted by 41 percent. In the last year, it has gone down by 41 percent. The reality of what that means is that farmers today, for every gallon of milk they are producing, are losing money. It is not that they are making a little bit, they are losing money. What we are seeing, not just in the Northeast, not just in the Midwest, not just in the Southeast, not just in the West, but all over this country, are family farmers going out of business, plunging their rural economies and their communities into depression-type economics.

Let me quote, if I might, from people from different parts of the country.

A Minnesota dairy farmer writes:

This situation is unlike any experienced in the past and the width and depth cannot continue to be ignored. It has not discriminated based on herd size or geographic location. Dairy farmers of all sizes and across all regions of the country are enduring an unprecedented disaster.

That is from Minnesota.

The President of the California Farmers Union—when we talk about dairy, sometimes California is in another world from the rest of the country because their herds are much larger.

By the way, I should say the National Farmers Union is supporting this amendment, and 11 agricultural commissioners and secretaries from States are supporting this amendment as well, as is the DFA, the Dairy Farmers of America, which is the largest dairy farm cooperative in America.

This is what the fellow who is the head of the California Farmer's Union says. His name is Joaquin Contente. He testified:

[I]n my lifetime history as a dairy farmer, I have never seen our prices remain this far below our costs this long and I have never seen so many dairy producers so desperate for relief. In my county alone 25 dairies have either filed or are in the process of filing for bankruptcy and many more are closer to bankruptcy each day.

From Texas, the executive director of the Texas Association of Dairymen said:

This is the worst situation I have seen since 1970. Some say it is the worst since the Depression.

From Wisconsin, a dairy farmer states:

In my area farmers are burning up the equity accumulated over their lifetimes. One farmer in my area had to cash out his wife's IRA just to get his crops planted this spring. My parish priest in my small town has had to counsel one or more dairy farmers a week to prevent their suicides.

Those are just a few examples from Wisconsin, California, and Texas. Trust me, I could tell you many similar stories from the State of Vermont.

Once again, as we attempt to revitalize our economy, let's not forget about rural America. Let's not forget about dairy farmers. Let's support this legislation which will provide \$350 million to increase dairy support prices. I look forward to the support of my colleagues.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KOHL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2284 TO AMENDMENT NO. 1908

Mr. KOHL. I ask unanimous consent that the pending amendment be set aside and the Senate now consider amendment No. 2284.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. KOHL], for Mr. DODD, proposes an amendment numbered 2284 to amendment No. 1908.

The amendment is as follows:

(Purpose: To require the Secretary of Agriculture to fund certain projects in communities and municipal districts in Connecticut, Massachusetts, and Rhode Island)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. Notwithstanding any other provision of law and until the receipt of the decennial census in the year 2010, the Secretary of Agriculture may fund community facility and water and waste disposal projects of communities and municipal districts and areas in Connecticut, Massachusetts, and Rhode Island that filed applications for the projects with the appropriate rural development field office of the Department of Agriculture prior to August 1, 2009, and were determined by the field office to be eligible for funding.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2284) was agreed to.

Mr. KOHL. Mr. President, I move to reconsider the vote and move to lay that motion on the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENTS NOS. 2241; 2280; 2271, AS MODIFIED; 2282, AS MODIFIED; 2249, AS MODIFIED; AND 2266, AS MODIFIED

Mr. KOHL. Mr. President, I now ask unanimous consent that the Senate consider the following amendments en bloc: Nos. 2241 and 2280; that amendments Nos. 2271, 2282, 2249, and 2266 be modified with the changes at the desk; that the aforementioned amendments, as modified, if modified, be agreed to en bloc; and that the motions to reconsider be laid upon the table en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2241) was agreed to.

The amendments were agreed to, as follows:

AMENDMENT NO. 2280

At the appropriate place insert the following:

Whereas sudden loss in late 2008 of export-market based demand equivalent to about three percent of domestic milk production has thrown the U.S. dairy industry into a critical supply-demand imbalance; and

Whereas an abrupt decline in U.S. exports was fueled by the onset of the global economic crisis combined with resurgence of milk supplies in Oceania; and

Whereas the U.S. average all-milk price reported by the National Agriculture Statistics Service from January through May of 2009, has averaged \$4.80 per hundredweight below the cost of production; and

Whereas approximately \$3.9 billion in dairy producer equity has been lost since January; and

Whereas anecdotal evidence suggests that U.S. dairy producers are losing upwards of \$100 per cow per month; and

Whereas the Food, Conservation, and Energy Act of 2008 extended the counter-cyclical Milk Income Loss Contract (MILC) support program and instituted a 'feed cost adjuster' to augment that support; and

Whereas the Secretary of Agriculture in March transferred approximately 200 million pounds of nonfat dry milk to USDA's food and Nutrition Service in a move designed to remove inventory from the market and support low-income families; and

Whereas the Secretary on March 22nd reactivated USDA's Dairy Export Incentive Program (DEIP) to help U.S. producers meet prevailing world prices and develop international markets; and

Whereas the Secretary announced on July 31, 2009 a temporary increase in the amount paid for dairy products through the Dairy Product Price Support Program (DPPSP), an adjustment that is projected to increase dairy farmers' revenue by \$243 million; and

Whereas U.S. dairy producers face unprecedented challenges that threaten the stability of the industry, the nation's milk production infrastructure, and thousands of rural communities;

Now therefore be it resolved, That it is the sense of the Senate that the Secretary of Agriculture and the President's Office of Management and Budget should continue to closely monitor the U.S. dairy sector and use all available discretionary authority to ensure its long-term health and sustainability.

AMENDMENT NO. 2271, AS MODIFIED

(Purpose: To provide funds for the school community garden pilot program, with an offset)

On page 52, lines 22 and (23), strike "\$16,799,584,000, to remain available through September 30, 2011," and insert "\$16,801,584,000, to remain available through September 30, 2011, of which \$2,000,000 may be used to carry out the school community garden pilot program established under section 18(g)(3) of the Richard B. Russell National School Lunch Act (42 U.S.C. 1769(g)(3)) and shall be derived by transfer of the amount made available under the heading 'ANIMAL AND PLANT HEALTH INSPECTION SERVICE' of title I for 'SALARIES AND EXPENSES'".

AMENDMENT NO. 2282, AS MODIFIED

(Purpose: To seek recommendations from the Commissioner of Food and Drug regarding the need to establish labeling standards for personal care products for which organic content claims are made)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) The Commissioner of Food and Drugs, in consultation with the Secretary of Agriculture, may conduct a study on the labeling of personal care products regulated by the Food and Drug Administration for which organic content claims are made. Any such study shall include—

(1) a survey of personal care products for which the word "organic" appears on the label; and

(2) a determination, based on statistical sampling of the products identified under paragraph (1), of the accuracy of such claims.

(b) If the Commissioner of Food and Drugs conducts a study described in subsection (a), such Commissioner shall—

(1) not later than 270 days after the date of enactment of this Act, submit to the Committees on Agriculture, Nutrition, and Forestry, Appropriations, and Health, Education, Labor, and Pensions in the Senate and the Committees on Agriculture, Appropriations, and Energy and Commerce in the House of Representatives a report on the findings of the study under subsection (a); and

(2) provide such Committees with any recommendations on the need to establish labeling standards for personal care products for which organic content claims are made, including whether the Food and Drug Administration should have pre-market approval authority for personal care product labeling.

AMENDMENT NO. 2249, AS MODIFIED

(Purpose: To express the sense of the Senate relating to the provision of disaster assistance)

On page 85, between lines 16 and 17, insert the following:

SEC. 7 _____. (a) The Senate finds that—

(1) agriculture is a national security concern;

(2) the United States suffers from periodic disasters which affects the food and fiber supply of the United States;

(3) the Food, Conservation, and Energy Act of 2008 (7 U.S.C. 8701 et seq.) established 5 permanent disaster programs to deliver timely and immediate assistance to agricultural producers recovering from losses;

(4) as of the date of enactment of this Act, of those 5 disaster programs—

(A) none are available, finalized, and implemented to deliver urgently needed assistance for 2009 producer losses; and

(B) only 1 is being implemented for 2008 losses;

(5) According to the Drought Monitor the State of Texas is suffering from extreme and exceptional drought conditions, the highest level of severity.

(6) the Secretary of Agriculture has previously authorized various forms of disaster assistance by providing funding under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), and through the Commodity Credit Corporation.

(b) It is the sense of the Senate that the Secretary of Agriculture should use all of the discretionary authority available to the Secretary to make available immediate relief and assistance for agricultural producers suffering losses as a result of the 2009 droughts.

AMENDMENT NO. 2266, AS MODIFIED

On page 61, line 23, after the colon, insert the following:

"*Provided further*, That the Commissioner, through the Center for Food Safety and Applied Nutrition, may conduct a study and, not later than one year after the date of enactment of this Act, submit a report to Congress on the psychological, physiological, and neurological similarities between addiction to certain types of food and addiction to classic drugs of abuse;"

AMENDMENT NO. 2249

Mrs. HUTCHISON. Mr. President, I rise today to talk about a sense-of-the-Senate resolution that I am offering. This sense-of-the-Senate resolution seeks to address drought aid that producers in my home State of Texas desperately need.

Texas is in the throes of one of the worst droughts in 50 years. We are seeing the hottest, driest summer on record over a large portion of the State, but especially in central and south Texas. Lack of rainfall and sustained record triple-digit temperatures for weeks have scorched crops and rangeland throughout parts of Texas causing drought losses to reach \$3.6 billion. The Texas AgriLife Extension Service predicts this total could rise above \$4.1 billion in producer losses if sufficient rainfall isn't received to revive crops and forage.

In the Food, Conservation, and Energy Act of 2008, also known as the farm bill, which I supported, Congress established five permanent disaster programs to deliver timely and immediate assistance to producers recovering from losses. The logic behind establishing the permanent disaster program was to ensure producers who have eligible losses receive timely assist-

ance. I agreed with the inclusion of this provision and I supported it. For too many years, producers had to wait months and even years to receive assistance from USDA. The problem today is USDA has not finalized any of the five disaster programs included in the farm bill. While the Department is working to finalize these programs, farmers and ranchers in Texas are seeing their crops, and livestock herds, diminish due to the excessive heat and drought.

My sense of the Senate simply urges the Secretary of USDA to use any of his discretionary authority to provide immediate assistance for producers who are sustaining losses as a result of this extraordinary drought. The Secretary has authority to provide quick assistance and he has used these authorities in past extraordinary circumstances. Our farmers and ranchers need immediate assistance; they cannot continue to wait for bureaucratic reg. writing. Please join me in encouraging the Secretary to use the tools at his disposal to provide any available assistance as quickly as possible.

AMENDMENT NO. 2240

Mr. KOHL. I will make a point of order that amendment No. 2240 is not germane postcloture.

The PRESIDING OFFICER. The point of order is well taken. The amendment falls.

Mr. KOHL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KAUFMAN). Without objection, it is so ordered.

Mr. REID. Mr. President, I now ask unanimous consent that after Senator COBURN moves to commit the bill with instructions, that there be 10 minutes of debate equally divided and controlled between Senators KOHL and COBURN or their designees; that upon the use of that time, the motion be set aside and the Senate then resume consideration of the Sanders amendment, No. 2276; that then Senator BROWNBACK or his designee be recognized to raise a budget point of order against the amendment; that after the point of order is raised, then the motion to waive the relevant point of order be considered made; that the Senate then proceed to vote in relation to the Coburn motion to commit; that upon disposition of that motion, the Senate then proceed to vote on the motion to waive the relevant Budget Act point of order; that if the motion to waive is successful, then the amendment be agreed to and the motion to reconsider be laid upon the table; that no further amendments or motions be in order;

that upon disposition of all pending amendments, the substitute amendment, as amended, if amended, be agreed to, the bill then be read a third time, and the Senate proceed to vote on passage of the bill; that upon passage, the Senate insist on its amendment, request a conference with the House on the disagreeing votes of the two Houses, and that the Chair be authorized to appoint conferees on the part of the Senate, with the subcommittee plus Senator INOUE appointed as conferees; further, that if a budget point of order is raised against the substitute amendment, then it be in order for another substitute amendment to be offered minus the offending provisions but including any amendments which have been agreed to, and that no further amendments be in order; that the substitute amendment, as amended, if amended, be agreed to, and the remaining provisions beyond adoption of the original substitute amendment remaining in effect.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. REID. I further ask unanimous consent that in the sequence of votes as described above, there be 2 minutes of debate prior to each vote equally divided and controlled in the usual form, and that after the first vote in the sequence, the remaining votes be limited to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I ask unanimous consent that the vote sequence be as follows: Coburn, No. 2244; Coburn, No. 2245; Coburn motion to commit; Sanders motion to waive the Budget Act point of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. With the Republican leader here on the floor now, I ask unanimous consent that upon disposition of H.R. 2997, the Senate proceed to executive session to consider Calendar No. 309, the nomination of Sonia Sotomayor to be Associate Justice of the Supreme Court, and that the first hour of debate be under the control of the chair and ranking member of the committee, Senators LEAHY and SESSIONS, to be followed by 2 hours of debate, with the time equally divided and controlled between the majority and the Republicans.

Mr. President, before I ask whether my friend will accept this, I just want to lay out to the body, I am glad we are going to this. Everyone should understand we have other things to do before we leave here. We are going to do them before we have a final vote on this Supreme Court nominee. We have to work something out on travel promotion, and we have to work something out on the so-called cash for clunkers. The other matters we are going to put over until a subsequent time, but we will at

least have some preconceived idea of what we are going to do when we get back.

I want everyone to be alerted that this is not the end of the work session before us.

The PRESIDING OFFICER. Is there objection?

Mr. MCCONNELL. Mr. President, reserving the right to object, and I will not be objecting, I just want to make a point for all of our colleagues. The very important debate on the Supreme Court nominee will commence in a while. It is important for people not to wait until the end. We need to get people on over to make their speeches. I know there are a number of Members on the Republican side of the aisle who do intend to speak to the nomination. I encourage them to begin that sometime soon.

The PRESIDING OFFICER. The majority leader.

Mr. REID. Mr. President, I appreciate the statement of my friend. Everything relating to this nomination has been very civil, fair. Senator LEAHY, the chairman of the committee, and the ranking member, Senator SESSIONS, have done an outstanding job of setting an example of how the debate should be handled here on the floor.

There are strong feelings regarding this nomination. That is the way it should be. I was told last night that there are as many as 28 Republicans who wish to speak on this matter. Of course, a lot of Democrats will also want to speak.

I want to lay out, as my friend, the Republican leader, did, we are going to be working into the evenings. People should not wait around here until tomorrow saying, I will put it off until tomorrow, or maybe I will wait until Thursday. There may not be a Thursday. We need to get these speeches done. They are all important. They are important for the RECORD this body makes.

I would hope people would work with the floor staff to set up a way to proceed. What we are going to do is if at all possible, have a Democrat speak, a Republican speak, go back and forth. If there is not one of the other party here, we are not going to wait around until a Republican or Democrat shows up. If there is someone here ready to speak, that person will be recognized and the person who was supposed to be here can wait until some subsequent time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The time will now be equally divided on the Coburn amendment No. 2244.

Who yields time?

MOTION TO COMMIT

Mr. COBURN. I have a motion to commit at the desk.

The PRESIDING OFFICER. The clerk will report the motion.

The bill clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] moves to commit the bill H.R. 2997 to the Committee on Appropriations of the Senate with instructions to report the same back to the Senate making the following changes:

(1) Amend the amounts appropriated in the bill so as to report back a bill with an aggregate discretionary level of appropriations for fiscal year 2010 at an amount that is 2 percent greater than the \$20,662,300,000 enacted for fiscal year 2009, excluding funds made available for any discretionary or mandatory direct food assistance program, as is appropriate given—

(A) the minimal growth of the budgets of families of the United States due to the fiscal challenges of the United States; and

(B) the \$2,000,000,000,000 deficit and \$11,500,000,000,000 debt of the United States.

Mr. COBURN. Mr. President, the reason for this motion to commit is what we see on the discretionary side of this budget—not the food stamps, not the food support, not the areas in this budget that actually help people get through the tough times—a 15-percent increase in discretionary spending.

We are going to have near a \$2 trillion deficit this year. We spent \$20 billion last year. But then we spent another \$6 billion in the stimulus which still has not been spent. So if you were to add the stimulus to it, you would see a 50-percent increase in the Agriculture discretionary budget. That is entirely too much money.

All this motion to commit says is, bring it back to us with a realistic expectation of what families are having to do. Again, I would caution my colleagues, this has nothing to do with food. We do not eliminate or lessen those mandatory requirements.

But in the operation of the USDA and the Department of Agriculture, let's have the government live within the same parameters that the rest of us are living within now which is—actually we are going to have a negative rate of inflation this year and incomes that are not going to grow significantly.

What we are asking for is still a rate higher than inflation but some fiscal responsibility that says we should live within our means. So when we spent \$20 billion last year, through the end of this month, then we gave another \$6 billion with the stimulus, and now we come forward with a budget that says we are going to spend \$23 billion, a full 15-percent, 14-some-percent increase in the discretionary programs at the Department of Agriculture.

I find it obscene. I find it irresponsible. I find it almost elite that we will not relate to what the rest of the American people are going through, and we have bill after bill after bill, and in a time when our country is on its back and our budget deficits have never been so high, we are going to increase discretionary spending at a rate we have not seen in 10 years in this country. There is no call for it. There is no excuse for it. There is no defending it.

I would note that, in fact, on every amendment I have stood up on, other

than the one Senator HARKIN defended, we have not had anyone defend this bill. Let's hear a defense of the 15-percent increase for this bill in discretionary spending. The idea is, let's not defend it, let's just not answer the charge.

But the fact is, we are growing the discretionary portion of the Federal Department of Agriculture by 15 percent this year. It ought not to be.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KOHL. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KOHL. Mr. President, as I stated at the outset of this bill, it does reflect an increase in spending over the previous year. But let's be clear, 90 percent of the discretionary increase is for WIC, food and drug safety, humanitarian food assistance, and rural rental housing. These four items are among the most important things that government does.

To put it a little more in context, the largest overall increases in this bill are not in discretionary programs at all. The largest single increase in the bill is for nutrition programs such as the Supplemental Nutrition Assistance Program. That program, and programs combined with other programs, are together funded at \$9.1 billion higher than last year. These are mandatory programs that reflect the state of our economy and serve as a very basic human safety net.

Other mandatory increases involve farm support and crop insurance programs and funding \$3.4 billion higher than last year. These programs operate as they are authorized, and this spending is what is required to pay farmers and ranchers the benefits they are entitled to receive under the law.

The Senator is correct that the spending in this bill is higher than last year. But much of that increase is attributable to mandatory programs that do not change through an appropriations bill. With regard to overall spending, Congress has spoken on that question through the budget resolution and the allocations that are made to each subcommittee for discretionary spending. This bill is about how we apportion that discretionary spending to best serve the American people and the people throughout the world. This bill has a proper priority.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COBURN. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. The honorable chairman noted that most of the increase in spending is in mandatory. This motion to commit does not say anything about mandatory. This is about discretionary. This is about the things we get to decide on. This is about the discretionary side of this bill, not the mandatory side. So we are not confused. This is not about those substantive items that are mandated through the farm bill. This is about what we have discretion to control, and we have indiscretion with this bill because we are going to allow it to grow by 15 percent.

I yield the floor and yield back the remainder of my time.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. I ask unanimous consent that both sides yield back their time and I ask for the yeas and nays.

Mr. KOHL. No objection.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The Senator from Pennsylvania.

Mr. SPECTER. I ask unanimous consent to speak for up to 5 minutes in support of the Sanders amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2276

Mr. SPECTER. Mr. President, the dairy farmers in Pennsylvania and the Nation are receiving record low prices for their products, prices that we have not seen since the late 1970s.

From January through June of this year, the price received by farmers was 37 percent below that of a year earlier. Feed costs, by comparison, have fallen by 11 percent. In this year, the U.S. Department of Agriculture expects the all-milk price to average between \$11.85 per hundredweight and \$12.15 per hundredweight, down from \$18.29 last year, and 18 to 20 percent below the 10-year average.

Exports, which have driven much of the recent growth in the dairy industry, have fallen from 11 percent of production last year. According to the Pennsylvania Department of Agriculture, these losses are translated into losses as high as \$1,000 per cow per year, so that a farmer milking 100 cows will lose as much as \$100,000 this year.

This amendment provides the U.S. Department of Agriculture with \$350 million in additional funds to enable it to increase the level at which the government buys surplus dairy products off the market.

This funding would allow the Secretary to raise the support price on three different types of dairy products. That is a brief statistical summary of the problems which the dairy farmers are facing, not only in the my State, Pennsylvania, but across the country.

I recently convened a session in my office to hear in some detail the plight

of the dairy farmers. I have traveled the State. Before August is finished, I will have visited all of Pennsylvania's 67 counties, which is a practice I make, covering virtually every county every year.

I have seen firsthand the desperate plight of the farmers of our State. We had been considering a number of amendments to this bill, but they have been ruled not germane. For those who may be watching this program—this session; it is really a program, but it is a session of the Senate—that means technically we could not offer other legislation.

But I compliment the distinguished Senator from Vermont who has structured this amendment in a way which will enable the Department of Agriculture to meet this pressing problem.

Recently about a dozen Senators met with the Secretary of Agriculture, and the conclusion was that the Department of Agriculture, the Obama administration, wanted to help farmers by raising price supports, but they lacked the money to do so. So this amendment, if adopted—and I urge my colleagues to adopt it—and there is pretty widespread concern about milk prices covering virtually every section of the United States. I urge my colleagues to adopt this amendment to give some very much needed relief to the dairy farmers.

I yield the floor.

AMENDMENT NO. 2285

Mr. KOHL. Mr. President, notwithstanding the previous order, I ask unanimous consent that amendment No. 2285 be considered and agreed to and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 2285) was agreed to, as follows:

(Purpose: To express the sense of the Senate regarding the livestock indemnity program)

At the appropriate place, insert the following:

SEC. 7 _____. (a) The Senate finds that—

(1) with livestock producers facing losses from harsh weather in 2008 and continuing to face disasters in 2009, Congress wanted to assist livestock producers in recovering losses more quickly and efficiently than previous ad hoc disaster assistance programs;

(2) on June 18, 2008, Congress established the livestock indemnity program under section 531(c) of the Federal Crop Insurance Act (7 U.S.C. 1531(c)) and section 901(c) of the Trade Act of 1974 (19 U.S.C. 2497(c)) as a permanent disaster assistance program to provide livestock producers with payments of 75 percent of the fair market value for livestock losses as a result of adverse weather such as floods, blizzards, and extreme heat;

(3) on July 13, 2009, the Secretary of Agriculture promulgated rules for the livestock indemnity program that separated non adult beef animals into weight ranges of "less than 400 pounds" and "400 pounds and more"; and

(4) the "400 pounds and more" range would fall well short of covering 75 percent market value payment for livestock in these higher ranges that are close to market weight.

(b) It is the sense of the Senate that the Secretary of Agriculture—

(1) should strive to establish a methodology to calculate more specific payments to offset the cost of loss for each animal as was intended by Congress for calendar years 2008 through 2011; and

(2) should work with groups representing affected livestock producers to come up with this more precise methodology.

AMENDMENT NO. 2280, AS MODIFIED

Mr. KOHL. I ask unanimous consent that the previously agreed-to amendment No. 2280 be modified with the changes at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment, as modified, was agreed to, as follows:

At the appropriate place, insert the following:

Findings:

Sudden loss in late 2008 of export-market based demand equivalent to about three percent of domestic milk production has thrown the U.S. dairy industry into a critical supply-demand imbalance; and

An abrupt decline in U.S. exports was fueled by the onset of the global economic crisis combined with resurgence of milk supplies in Oceania; and

The U.S. average all-milk price reported by the National Agriculture Statistics Service from January through May of 2009, has averaged \$4.80 per hundredweight below the cost of production; and

Approximately \$3.9 billion in dairy producer equity has been lost since January; and

Anecdotal evidence suggests that U.S. dairy producers are losing upwards of \$100 per cow per month; and

The Food, Conservation, and Energy Act of 2008 extended the counter-cyclical Milk Income Loss Contract (MILC) support program and instituted a 'feed cost adjuster' to augment that support; and

The Secretary of Agriculture in March transferred approximately 200 million pounds of nonfat dry milk to USDA's food and Nutrition Service in a move designed to remove inventory from the market and support low-income families; and

The Secretary on March 22nd reactivated USDA's Dairy Export Incentive Program (DEIP) to help U.S. producers meet prevailing world prices and develop international markets; and

The Secretary announced on July 31, 2009 a temporary increase in the amount paid for dairy products through the Dairy Product Price Support Program (DPPSP), an adjustment that is projected to increase dairy farmers' revenue by \$243 million; and

U.S. dairy producers face unprecedented challenges that threaten the stability of the industry, the nation's milk production infrastructure, and thousands of rural communities;

The Senate states that the Secretary of Agriculture and the President's Office of Management and Budget should continue to closely monitor the U.S. dairy sector and use all available discretionary authority to ensure its long-term health and sustainability.

VOTE ON AMENDMENT NO. 2244

The PRESIDING OFFICER. The question is on agreeing to the Coburn amendment No. 2244.

The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 37, nays 60, as follows:

[Rollcall Vote No. 258 Leg.]

YEAS—37

Alexander	Ensign	Lugar
Barrasso	Enzi	Martinez
Bayh	Feingold	McCain
Bennett	Graham	McCaskill
Bunning	Grassley	McConnell
Burr	Gregg	Risch
Carper	Hatch	Sessions
Chambliss	Hutchison	Thune

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The amendment (No. 2244) was rejected.

VOTE ON AMENDMENT NO. 2245

The PRESIDING OFFICER. The question occurs on Coburn amendment No. 2245.

Mr. LEAHY. Mr. President, I yield back the time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment.

The amendment (No. 2245) was rejected.

Mr. REID. Mr. President, I move to reconsider the vote.

Mr. BEGICH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MOTION TO COMMIT

The PRESIDING OFFICER. There is 2 minutes, equally divided, on the motion by the Senator from Oklahoma.

The Senator from Oklahoma.

Mr. COBURN. Mr. President, this is a motion to commit.

The discretionary portion of this appropriations bill grows 15 times faster than the rate of inflation. This is a motion that says it ought to come back to

us growing two times the rate of inflation.

There is no excuse for us to pass this kind of spending in this type of climate. I would ask for the support of this motion.

The PRESIDING OFFICER. Who yields time in opposition?

Mr. KOHL. Mr. President, I oppose the motion to commit.

The PRESIDING OFFICER. Is all time yielded back? All time is yielded back.

Mr. COBURN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There appears to be.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 32, nays 65, as follows:

[Rollcall Vote No. 259 Leg.]

YEAS—32

Barrasso	Enzi	Martinez
Bayh	Graham	McCain
Bunning	Grassley	McCaskill
Burr	Gregg	McConnell
Chambliss	Hatch	Risch
Coburn	Hutchison	Sessions

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The motion was rejected.

Mr. FEINGOLD. Mr. President, I move to reconsider the vote.

Mrs. MCCASKILL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

AMENDMENT NO. 2276

Mr. BROWNBACk. Mr. President, parliamentary inquiry: What is the next item of business?

The PRESIDING OFFICER. Amendment No. 2276.

Mr. BROWNBACk. Mr. President, with the Sanders amendment being the issue now, I will raise to my colleagues a point of order.

I understand the difficulty the dairy industry is in. We have dairy industry in Kansas, and it is an important business. Certainly, prices are difficult and they are having trouble.

However, the Sanders amendment would provide the Farm Service Agency with an additional \$350 million. Unfortunately, even if we could agree that additional funding was necessary, the amendment was put in such a way that it cannot work; it is not drafted appropriately. There is no mechanism to move the funding from the FSA salaries and expenses account to the Dairy Product Price Support Program.

For these reasons, regrettably, I cannot support the amendment. The pending amendment, No. 2276, offered by the Senator from Vermont, increases spending by \$350 million. This additional spending would cause the underlying bill to exceed the subcommittee's section 302(b) allocation.

Therefore, I raise a point of order against the amendment pursuant to section 302(f) of the Congressional Budget Act.

The PRESIDING OFFICER. The Senator from Vermont is recognized.

Mr. SANDERS. Mr. President, pursuant to section 904 of the Congressional Budget Act of 1974, I move to waive the applicable sections of this act for purposes of the pending amendment.

This amendment is supported by a number of Senators, not just from the east coast or Midwest or Southwest or the West but from all over the country—among others, Senators SNOWE, UDALL of New Mexico, SCHUMER, BENNETT, COLLINS, FRANKEN, CASEY, UDALL of Colorado, SPECTER, McCASKILL, GILLIBRAND, KLOBUCHAR, and SHAHEEN.

We are united from every section of the country to make the point that when we talk about the deep recession we are facing, this is a recession that is impacting rural America very severely, and we cannot forget about rural America.

Right now, at this moment, dairy farmers across the country are suffering from the lowest milk prices in four decades. In the last year, the price farmers received for milk has plummeted 41 percent. I ask for support on the amendment.

Mr. BROWNBACk. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The yeas and nays resulted—yeas 60, nays 37, as follows:

[Rollcall Vote No. 260 Leg.]

YEAS—60

Akaka	Franken	Murray
Baucus	Gillibrand	Nelson (NE)
Bayh	Grassley	Nelson (FL)

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The PRESIDING OFFICER. On this vote, the yeas are 60, the nays are 37. Three-fifths of the Senators duly chosen and sworn having voted in the affirmative, the motion is agreed to. The point of order is rendered moot.

The question is on agreeing to the amendment.

Without objection, the amendment is agreed to.

The amendment (No. 2276) was agreed to.

NATIONAL ANIMAL DISEASE CENTER FUNDING

Mr. HARKIN. Mr. President, I thank the chairman and ranking member of the Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Subcommittee, along with the chairman and ranking member of the Appropriations Committee, for agreeing to work with me to secure in this bill an additional \$3.4 million per year in conference, above the baseline funding level, for research addressing emerging animal disease threats at the National Animal Disease Center, NADC, in Ames, IA. NADC is a world class research facility that provides vital research to identify emerging animal dis-

eases and develop effective methods to prevent and treat emerging threats to animal agriculture, our food supply and human health.

Over the past few years we have seen the emergence of a number of threats to the livestock industry in the United States such as the avian influenza and H1N1 virus. Not only do these diseases pose a threat to animal health, but they also represent a threat to human health. Work at NADC is vitally important to protecting animal and human health and improving the lives of millions of people worldwide.

Additional resources provided in this bill for ongoing research at NADC on emerging animal disease are vital to the livestock industry. In the early days of the H1N1 outbreak misinformation cost pork producers in the United States an estimated \$7.2 million a day, even though H1N1 was never found in pigs in the United States. Developing additional capacity for vaccine discovery and rapid detection of emerging animal disease is important in protecting human health and animal agriculture.

I thank you again for working to provide this needed, continuing, research funding for emerging animal disease at NADC.

Mr. KOHL. Mr. President, I thank my friend from Iowa for his comments. The impacts of emerging animal diseases are felt in many far-ranging sectors of the economy and human health. The impact of threats to the health of livestock can have a devastating impact on producers. Misleading information about an emerging disease can also spread across the country rapidly. This underscores the importance of rapid detection and diagnosis of emerging animal diseases.

I am pleased to work with you to include in the final version of the fiscal year 2010 agriculture spending bill \$3.4 million in additional resources, above the baseline, to continue NADC's role as one of the preeminent research institutions on emerging animal diseases. This is intended to be additional funding that will be part of the base funding for NADC in future years.

Mr. BROWNBACk. Mr. President, I would like to also thank the Senator from Iowa for his comments. I agree with Chairman KOHL and Senator HARKIN on this need and will work hard towards accomplishing this goal in conference. The recent H1N1 scare also illustrates the dangers of zoonotic diseases to the human and animal populations. If we know how to stop these diseases soon after they are diagnosed, we can help stop the spread of the disease in animals, and possibly the transmission to humans. The reverse is also true; the H1N1 scare also taught us that humans can also pass diseases to the animals. The more knowledge that can be discovered about emerging animal diseases, the more likely it is that

we can address them before they become a significant problem. Ongoing funding provided for the NADC will be vitally important in protecting human and animal health.

Emerging animal diseases, like the H1N1 virus, can have a devastating impact on animal agriculture in the form of reduced exports and slaughter of infected herds and flocks. Additional ongoing resources provided in this bill will make sure the livestock industry is in a safe and secure place.

Mr. INOUE. Mr. President, I would like to echo my colleagues' comments. A recent Agriculture Research Service report indicated, "Because swine are also susceptible to infection with avian and human influenza viruses, genetic re-assortment between these viruses and/or swine influenza viruses can occur." The potential for swine to develop novel viruses that can impact human health highlights the importance of the additional ongoing resources in this bill for the NADC. It is my intention to support the subcommittee's efforts as enunciated to provide the specific resources noted above in fiscal year 2010 and over the long term.

Mr. COCHRAN. Mr. President, I agree with my colleagues regarding the additional funding provided for NADC. Providing additional resources in this bill for ongoing research at NADC on emerging animal diseases will help protect animal and human health.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

Ms. STABENOW. Mr. President, I would like to engage Senator KOHL in a colloquy concerning funding for the Commodity Supplemental Food Program.

It is my understanding that this bill provides the budget request and will meet current demand according to USDA. I know that the House-passed measure includes additional funding to add caseload and bring new States into this critically important program. I strongly support the level of funding provided in the House-passed measure and expanding the program into the six States USDA has approved: Arkansas, Oklahoma, Delaware, Utah, New Jersey, and Georgia.

I hope that as this bill goes to conference we can work together to reconcile those differences.

Mr. KOHL. I can assure Senator STABENOW that we will do all that we can to continue to improve this important program.

Ms. STABENOW. I appreciate Chairman KOHL's assurance. This program is critically important to thousands of seniors in Michigan and nationwide who cannot afford to buy the foods they need to meet their special dietary needs.

EMERALD ASH BORER

Mr. KOHL. I would like to enter into a colloquy with my colleague from New York.

Mrs. GILLIBRAND. I thank the Chairman for entering into a colloquy with me and for his hard work on this bill. I wanted to quickly discuss the need to add New York to the list of States threatened by the emerald ash borer—an invasive insect that has destroyed over 50 million ash trees in the U.S. to date.

Originally found in Michigan, the emerald ash borer has been steadily making its way eastward and is now threatening to decimate the 900 million ash trees across New York State. This invasive species threatens a billion dollar timber industry that supplies furniture makers, hardware stores, and the wood for Louisville Slugger baseball bats.

The emerald ash borer larvae burrow through trees, preventing them from receiving essential nutrients and water, eventually causing the tree to die. Thousands of traps have been set in Cattaraugus and Chautauqua Counties, but more funding will be needed to stop the spread and ensure that New York's forests are not forever altered.

The current committee report lists 12 States which are affected by this invasive pest. I would ask that New York be added to that list during conference.

Mr. KOHL. I would like to thank my colleague for bringing this to my attention and I will certainly address this issue during conference.

Mrs. GILLIBRAND. I thank the Chairman for his help and leadership.

FOOD AND AGRICULTURE POLICY INSTITUTE

Mr. BROWNBAC. Mr. President, I would like to raise an issue that has been brought to my attention by the Senator from Georgia, Mr. ISAKSON. The Senator was mistakenly credited with having requested funding for the Food and Agriculture Policy Research Institute in Senate Report 111-39. I want to assure him that this will be corrected during the conference negotiations on the Agriculture appropriations bill.

Mr. KOHL. I thank Senator BROWNBAC for raising this issue. I, too, want Senator ISAKSON to know that this will be corrected during conference.

SOUTHERN PLAINS RANGE RESEARCH STATION

Mr. INHOFE. Mr. President, as a neighboring agriculture State, it is a pleasure to work with the Senator from Kansas, in fact both Senators from Kansas, on numerous issues that provide for important research, relief, and aid to our States. I ask that language be included in the conference report indicating the urgent need for additional scientific personnel at the Southern Plains Range Research Station in Woodward, OK, near our joint borders, through the Agricultural Research Service in order to establish a Center for Warm-Season Grasses Research at the station in fiscal year 2010.

The Southern Plains Range Research Station is a research unit of the

USDA's Agricultural Research Service. It has a mission to conduct research that addresses the challenges and opportunities associated with managing America's rangelands through innovative production practices and improved plant germplasm. The current research program at the station includes a team of three scientists: a ruminant nutritionist for range-livestock production research, a research agronomist for germplasm evaluation, and a geneticist for breeding improved plants. The goal of establishing and developing a Center for Warm Season Grasses Research would be improved plant materials management alternatives for rangelands and pastures in the southern plains. This center would provide a focused effort in native and introduced warm-season grass research to address issues with biofuels and feedstock production which is a critical issue to farmers and ranchers throughout the country. Additional personnel are needed to accomplish this mission. The addition of these two essential scientists will assist the Southern Plains Range Research Station in working towards its goal of establishing itself as the Center for Warm-Season Grasses Research in the south central United States.

Mr. BROWNBAC. I appreciate working with the Senator from Oklahoma on various agriculture issues, and can address this issue in the conference report.

OFFICE OF ADVOCACY AND OUTREACH

Mr. FEINGOLD. I rise to discuss a new and relatively small office within USDA that will help ensure the Department adequately addresses the needs of all farmers and ranchers. For too long, USDA has not had adequate focus on policy, programs, and outreach for small farms, beginning farmers and ranchers, and minority farmers and ranchers. A provision in the Food, Conservation and Energy Act of 2008, the farm bill, which was partially based on a proposal I made with Senator HARKIN is intended to reverse that situation by creating the Office of Advocacy and Outreach. The farm bill provision places the new office within executive operations at the Department to ensure that it has overarching coordination functions across all of the mission areas of USDA and that the director of the office is not within any of the under or assistant secretariats so he or she can have a higher profile and be better able to analyze and improve access to the functions and activities of USDA across the entire Department. The office will have two divisions—the socially disadvantaged farmers and ranchers group and the small and beginning farmers and ranchers group.

The socially disadvantaged farmers group includes a new Advisory Committee on Minority Farmers established under section 14009 of the farm bill, and a new farmworker coordinator

established in section 14013 of the farm bill. The existing functions of the current Office of Outreach and Diversity that serve socially disadvantaged producers and minority serving institutions are also transferred to the Office of Advocacy and Outreach.

The small and beginning farmers and ranchers group is given responsibility for continuing and building upon the functions for the existing Office of Small Farms Coordination, the existing Small Farms and Beginning Farmer and Rancher Council, and the existing Advisory Committee for Beginning Farmers and Ranchers, plus a consultative role on the administration of the Beginning Farmer and Ranchers Development Program administered by CSREES.

The new office builds upon the recommendations made to Congress by the Government Accountability Office. The new office will establish departmental goals and objectives, measure outcomes, and provide input into programmatic and policy directions and decisions. The office will also improve outreach and assistance to these farm communities in order to help make the goals and objectives a reality.

It is very important this new office receive an appropriation so it can begin its important and historic mission. It is my understanding the administration's request for \$3 million is provided for in the House bill. I would ask Chairman KOHL if it is his intent to try to find a way to secure funding for the new office during conference.

Mr. KOHL. I thank my colleague from Wisconsin. He has been a leader in this effort and I always appreciate his input and counsel. The Department has under consideration a number of reorganization options that affect a range of departmental functions. My hope is that between now and the time conference negotiations are complete we can have a little more clarity on all these proposals and find a way to make progress in the areas my colleague outlines. Our very able Secretary of Agriculture is trying to make the pieces fit together and I will do likewise during conference negotiations.

Mr. FEINGOLD. I am also concerned with information coming from the Department of a possible plan to move the Office out of Executive Operations and to place it elsewhere. This is very troubling. Congress was very clear about where the office was to be situated and I believe it is the responsibility of USDA to follow the law in this regard. I would like to ask the Senator from Iowa, the chairman of the Committee on Agriculture, Nutrition and Forestry, if he agrees with my assessment.

Mr. HARKIN. I thank my friend from Wisconsin for his hard work to ensure beginning farmers and minority farmers have adequate representation within USDA programs. The Senator is cor-

rect. The 2008 farm bill contains statutory language that establishes the Office of Advocacy and Outreach within the executive operations of the Department of Agriculture's organizational structure.

I would also like to stress the vital importance of USDA moving forward to establish this office as quickly as possible. It has now been more than a year since the farm bill was enacted into law and it is time for USDA to move forward in establishing the office so that it can begin to carry out its mission of ensuring that the needs of small and beginning farmers, as well as socially disadvantaged farmers, are effectively addressed by the Department of Agriculture throughout its various programs and activities.

Mr. FEINGOLD. I thank the Senator for that assurance.

Let me make one final point. As I mentioned, the law creates two divisions within the OA&O. Both areas are extremely important. It is my firm belief that any funding provided for this office should be equally divided between the two divisions, after accounting for the funds to establish the overall Director of the office.

Mr. DURBIN. Mr. President, this important program, administered by the Natural Resource Conservation Service within USDA, provides for cooperation between the Federal Government, State government agencies, and local organizations to prevent erosion, floodwater, and sediment damages. The program also promotes the conservation and proper utilization of land in authorized watersheds. WFPO helps communities prepare detailed watershed work plans for flood prevention projects in cooperation with soil conservation districts and other local sponsoring organizations.

As a result of this program, over 11,000 flood protection and water conservation structures have been built across the United States. Each year, these structures provide over \$292 million of flood damage prevention to agricultural land and over \$399 million of flood damage is prevented to roads, bridges, homes and other structures.

There are other benefits as well—these projects protect and restore natural resources. Annually, 90 million tons of soil are saved from erosion. Forty-seven thousand miles of streams and stream corridors are enhanced and protected. More than 1.8 million acre-feet of water are conserved. Nearly 280 thousand acres of wetlands are created, enhanced or restored. Over 9 million acres of upland wildlife habitat is created, enhanced or restored.

In Illinois, DuPage County has been working to rebuild the watershed around various branches of the DuPage River. The county wishes to reduce the incidence of flooding and damage to homes, businesses, and wildlife habitat. This program will allow for enhanced

flood protection of the Meacham Grove reservoir and provide vital flood control for homes and businesses downstream.

This effort is supported by a number of communities in DuPage County including the Roselle, Bloomingdale, Itasca, Wood Dale and Addison. Operation of the reservoir will be optimized by allowing storm water to enter the reservoir at a lower elevation. This will provide storm water storage for smaller, more frequent rainfall events. It will also improve the water quality of surrounding communities by allowing pollutants and sediment to settle out in the reservoir instead of being transported downstream.

This program has been very successful in Illinois, and I know many of my colleagues have similar stories from their States. I do not believe we should wait for a flood before we identify a problem. Federal investment in these types of projects can help reduce the Federal investment necessary in the event of a flood disaster. Watershed projects prevent flooding and the damage floods cause to public facilities, roads, bridges, homes, and businesses. They conserve water, improve water quality, reduce soil erosion, and create wildlife habitats. We should reduce the vulnerability of our population to flood damage and improve our stewardship of the natural and beneficial functions of our floodprone areas. I oppose the amendment by my colleague from Arizona, and ask that others do the same.

The PRESIDING OFFICER. The majority leader.

Mr. REID. Mr. President, first, I compliment the managers of this bill, Senator KOHL and Senator BROWNBACK. They have done a remarkably good job. We completed this major appropriations bill in a couple of days. One day was pretty short. They have done very good work.

We are going to vote on final passage, and then we are going to go to the debate on the Supreme Court nominee. Senator MCCONNELL and I said earlier today we have a lot of Senators who wish to speak on this nomination. We don't want anyone to feel they do not have time to speak. But we are going to go in this order: We will have a Democrat and Republican. The cloakrooms have to be notified that you want to come and speak. If people wait until Wednesday night or Thursday to speak, there may not be an opportunity to speak on this nomination.

We know we have at least 28 Republicans who wish to speak and there is probably a like number of Democrats who wish to speak on this nomination who have not already spoken. We hope Senators will indicate to staff how much time they need, and then when they tell Senators they need to be available at a certain time, I hope all Senators will try to do that.

If there is not a Democrat available when it is the Democrats' turn, then

we will move to another Republican, and vice versa.

The debate in the committee has been outstanding. I think Senator LEAHY and Senator SESSIONS have done a very good job on an issue that people feel very strongly about on both sides. There is no reason the debate that is going to be on the Senate floor should not be as dignified as it was in the Judiciary Committee.

We are going to move to the nomination as soon as we finish final passage. This will be the last vote of the night. We will try to work out a program so we can finish this week. We have a little bit of work to do. I think there has been an agreement between Senator MCCONNELL and me on what needs to get done. We have a few problems explaining what our desire is to some of the Senators. We will do that as quickly as we can.

Mr. LEAHY. Will the Senator yield?

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I see my friend, the distinguished Senator from Alabama, on the floor. We have also discussed this. Senator SESSIONS and I will open the debate, as the leader has said. I suggest everybody on this side check with the staff to set up a list.

Again, I urge people to come at the time they said. I agree with the leader, if they do not, we go to the next person and finish it up. I hope it will not be the case we will be in long quorum calls and then everybody says let's talk. I think the leaders have set a fair schedule, and we should go forward.

The PRESIDING OFFICER. The substitute amendment, as amended, is agreed to.

The amendment (No. 1908), as amended, is agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. KOHL. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The bill having been read the third time, the question is, Shall the bill, as amended, pass?

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Maryland (Ms. MIKULSKI) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 80, nays 17, as follows:

[Rollcall Vote No. 261 Leg.]

YEAS—80

Akaka	Gillibrand	Nelson (NE)
Alexander	Grassley	Nelson (FL)
Baucus	Hagan	Pryor

NOT VOTING—3

Byrd	Kennedy	Mikulski
------	---------	----------

The bill (H.R. 2997), as amended, was passed, as follows:

(The bill will be printed in a future edition of the RECORD.)

Mr. BROWNBACK. Mr. President, I move to reconsider the vote and to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. KOHL. Mr. President, I want to take a minute to thank Senator BROWNBACK, with whom I have worked extremely well on this bill. He has made great contributions to the bill, and he has a wonderful staff—Fitz Elder, Stacy McBride, and Katie Toskey—who also made great contributions. On my side, Galen Fountain, Jessica Frederick, Dianne Nellor, and Bob Ross made great contributions.

We are all very proud of the product, we are pleased with the vote, and we are happy it is over.

Mr. BROWNBACK. Mr. President, I, too, want to take a moment to thank my colleague Senator KOHL who has worked on this for some period of time. I thought this was one of the smoothest appropriations bill we have had flow through the floor. I congratulate our colleague and particularly his work and that of the staff to make this happen: Galen Fountain, Jessica Frederick on his staff, Bob Ross, Dianne Nellor; on mine, Fitz Elder, Stacy McBride, Katie Toskey, and then Riley Scott and Melanie Benning were also key on it.

There is an item about which I have some consternation at the end where we broke the 302(b) allocation. My hope

is in conference we can get that worked back down because clearly we have a huge budget crisis on our hands and we have to hit these numbers. I know it was an important issue to the chairman on dairy funding and that is an important issue; particularly if you are from Wisconsin, that is an important issue. It is my hope we can work that down.

I do think it shows a lot of support and strength when you have a major bipartisan vote on this bill at the end. My hope is that is the way we will operate in the body, in a bipartisan way so we can move things through for the good of the country.

We are in the minority, obviously, but there is no reason we cannot work these issues together as much as we possibly can. Senator KOHL was excellent to work with. I appreciate that chance to do it.

I look forward to us getting this through on a stand-alone basis, not rolled together in an omnibus package if at all possible. I think it is an important package, one we should be able to do that with. I think we have the ability to get that done.

I yield the floor.

Mr. KOHL. Mr. President, I thank Senator BROWNBACK for his kind words. I would also like to not end the proceedings without mentioning an individual on my staff, Phil Karting, who did a tremendous job and was an important part of the product that was finally put forth.

The PRESIDING OFFICER. Under the previous order, the Senate insists on its amendment and requests a conference with the House, and the Chair appoints the follow conferees.

The PRESIDING OFFICER appointed Mr. KOHL, Mr. HARKIN, Mr. DORGAN, Mrs. FEINSTEIN, Mr. DURBIN, Mr. JOHNSON, Mr. NELSON of Nebraska, Mr. REED, Mr. PRYOR, Mr. SPECTER, Mr. INOUE, Mr. BROWNBACK, Mr. BENNETT of Utah, Mr. COCHRAN, Mr. BOND, Mr. MCCONNELL, Ms. COLLINS, and Mr. SHELBY conferees on the part of the Senate.

Mr. LEAHY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

NOMINATION OF SONIA
SOTOMAYOR TO BE AN ASSO-
CIATE JUSTICE OF THE SU-
PREME COURT OF THE UNITED
STATES

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to executive session to consider the following nomination which the clerk will report.

The legislative clerk read the nomination of Sonia Sotomayor, of New York, to be an Associate Justice of the Supreme Court of the United States.

The PRESIDING OFFICER. Under the previous order, the first hour will be under the control of the chair and the ranking member of the committee.

Mr. LEAHY. I thank the distinguished Presiding Officer, also himself a member of the Judiciary Committee. He sat through and participated in all of the hearings on Judge Sotomayor.

When the Judiciary Committee began the confirmation hearing on the nomination of Judge Sotomayor to the Supreme Court, in my opening statement I recounted an insight from Dr. Martin Luther King, Jr. I did this because it is often quoted by President Obama, the man who nominated her. The quote is:

Let us realize the arc of the moral universe is long, but it bends towards justice.

Each generation of Americans has sought that arc toward justice. Indeed, that national purpose is inherent in our Constitution. In the Constitution's preamble, the Founders set forth to establish justice as one of the principal reasons that "We the people of the United States" joined together to "ordain and establish" the Constitution. This is intertwined in the American journey with another purpose for the Constitution that President Obama often speaks about. We all admit it is the unfinished goal of forming "a more perfect Union." Our Union is not yet perfected, but we are making progress with each generation.

That journey began with improvements upon the foundation of our Constitution through the Bill of Rights and then it continued with the Civil War amendments, the 19th amendment's expansion of the right to vote for women, the Civil Rights Act of 1964, the Voting Rights Act of 1965, and the 26th amendment's extension of the vote to young people. These actions have marked progress along the path of inclusion. They recognize the great diversity that is the strength of our Nation.

Judge Sotomayor's journey to this nomination is truly an American story. She was raised by a working mother in the Bronx after her father died when she was a child. She rose to win top honors as part of one of the first classes of women to graduate from Princeton. She excelled at Yale law school.

She was one of the few women in the Manhattan District Attorney's Office in the mid-1970s. She became a Federal trial judge and then the first Latina judge on a Federal appeals court when she was confirmed to the second circuit over a decade ago.

I might note on a personal basis, I am a member of the bar of the second circuit, as well as the Federal District Court of Vermont. That is the circuit I belong to as a member of the Vermont bar. I know how excited we were in the second circuit when she became a judge.

She is now poised to become the first Latina Justice and actually only the third woman to serve on the U.S. Supreme Court. She has broken barriers along the way. She has become a role model to many. Her life journey is a reminder to all of the continuing vitality of the American dream.

Judge Sotomayor's selection for the Supreme Court also represents another step toward the establishment of justice. I have spoken over the last several years about urging Presidents—I have done this with Presidents of both political parties—to nominate somebody from outside the judicial monastery to the Supreme Court. I believe that experience, perspective, an understanding of how the world works and how people live—how real people live and the effect decisions will have on the lives of people—these have to be very important qualifications.

One need look no further than the Lilly Ledbetter and the Diana Levine cases to understand the impact each Supreme Court appointment has on the lives and freedoms of countless Americans.

In the Ledbetter case, five Justices on the Supreme Court struck a severe blow to the rights of working families across our country. In effect, they said we can pay women less than men for the exact same work. Congress acted to protect women and others against discrimination in the workplace more than 40 years ago, yet we still struggle to ensure that all Americans, women and men, receive equal pay for equal work. It took a new Congress and a new President to strike down the immunity the Supreme Court had given to employers who discriminate against their workers and successfully hide their wrongdoing.

The Supreme Court had allowed them to do that. We changed that again. I remember the pride I had when I stood beside President Obama when he signed his first piece of legislation into law, the Lilly Ledbetter law, which says something that every one of us should know instinctively in our heart and soul: that women should be paid the same as men for the same kind of work.

But for all the talk about "judicial modesty" and "judicial restraint" with the nominees of a Republican President

at their confirmation hearings, we have seen a Supreme Court these last 4 years that has been anything but modest and restrained.

I understand decrying judicial activism when judges have simply substituted their judgment for that of elected officials. That is what we have seen these last few years from the conservative members of the Supreme Court.

When evaluating Judge Sotomayor's nomination, I believe Senators should consider what kind of Justice she will be. Will she be in the mold of these activists who have gutted legislation designed to protect Americans from discrimination in their jobs and in voting, laws meant to protect the access of Americans to health care and education, and laws meant to protect the privacy of all Americans from an overreaching government? I think not and I hope not.

The reason I think not and hope not is I have been looking at what kind of judge she has been for the last 17 years and that is not the kind of judge she has been for 17 years. Keep in mind, this is a nominee who has had more experience on the Federal court than any nominee to the Supreme Court in decades. What we see is she has applied the law to the facts of the cases she has considered. She has done that while understanding the impact of her decisions on those before the court.

Those who struggle to pin the label of judicial activist on Judge Sotomayor are met by her very solid record of judging based on the law. She is a restrained, experienced, and thoughtful judge who has shown no bias in her rulings.

The charge of some Senate Republican leaders that they fear she will show bias is refuted over and over again in her record of 17 years. In fact, her record as a judge is one of rendering decisions impartially and neutrally. No one has pointed to decisions that evidence bias. No one has shown any pattern of her inserting her own personal preferences into her judicial decisions. No one can because that does not exist. That is not who she is nor is it the type of judge she has been.

As her record demonstrates and her testimony before the Judiciary Committee reinforced, she is a restrained and fair and impartial judge who applies the law to the facts to decide cases—the kind of judge that any one of us who practiced law would want to appear before, whether we were plaintiff or defendant, government or respondent, rich or poor. Ironically, the few decisions for which she has been criticized are cases in which she did not reach out to change the law or to defy judicial precedent; in other words, cases in which she refused to "make law" from the bench.

In her 17 years on the bench there is not one example, let alone a pattern, of

her ruling based on bias or prejudice or sympathy. She has been true to her oath. She has faithfully and impartially performed her duties under the Constitution.

As a prosecutor—a distinguished prosecutor—and then as a judge, she has administered justice without favoring one group of persons over another. In fact, she testified directly to this point. She said:

I have now served as an appellate judge for over a decade, deciding a wide range of constitutional, statutory and other legal questions. Throughout my 17 years on the bench, I have witnessed the human consequences of my decisions. Those decisions have not been made to serve the interest of any one litigant, but always to serve the larger interests of impartial justice.

About 12 years ago in a case called *City of Boerne v. Florida*, the Supreme Court struck down the Religious Freedom Restoration Act, a law that Congress had passed to protect religious freedom. Since then, an activist conservative group of Justices has issued a number of rulings that further restricted the power of Congress under section 5 of the 14th amendment.

They have limited other important Federal statutes such as the Violence Against Women Act, and they have done this by using a test created out of whole cloth, without any root in either history or in the text of our Constitution. Scholars across the political spectrum have criticized the Supreme Court's rulings in this line of cases, including Judge Michael McConnell and Judge John Noonan, Jr., both Republican appointees to the Federal bench.

Let's have some history. Hundreds of thousands of Americans lost their lives fighting a civil war to end the enslavement of millions of Americans. After the war, we transformed our founding charter, the Constitution, into one that embraced equal rights and human dignity through the reconstruction amendments by not only abolishing slavery but also by guaranteeing equal protection of the law for all Americans and prohibiting the infringement of the right to vote on the basis of race.

But these reconstruction amendments to our Constitution are not self-implementing. Both the 14th and 15th amendments to the Constitution contain sections giving Congress the power to enforce the amendments. Congress acts to secure Americans' voting rights when it passes statutes like the Voting Rights Act pursuant to its authority to implement the 14th and 15th amendment's guarantees of equality. Congress acts to ensure the basis for our democratic system of government when we provide for implementation of this principle.

In contrast to the resistance that met the initial enactment of the Voting Rights Act of 1965—something that brought about enormous debate in this country—3 years ago, Republicans and Democrats in the Senate and House of

Representatives came together to reauthorize key expiring provisions of the Voting Rights Act. This overwhelmingly bipartisan effort sought to preserve the rights of all Americans to equal access to the democratic process.

I stood with President George W. Bush when he proudly signed that restoration. But earlier this year, I attended the oral argument in a case challenging the constitutionality of the reenacted Voting Rights Act.

It appeared from the questions posed by the conservative Justices that they were ready to apply the troubling line of rulings in which they have second guessed Congress in order to strike down a key provision of the Voting Rights Act, one of this country's most important civil rights laws. Lacking a fifth vote for such a seismic shift, the constitutional ruling was avoided. But I remain concerned that the Supreme Court nonetheless remains poised to overturn other decisions made by Congress in which we decide how best to protect the rights and well-being of all American people.

I believe Judge Sotomayor will be a Justice who will continue to do what she has done as a judge for the last 17 years. I believe she will show appropriate deference to Congress when it passes laws to protect the freedoms of Americans.

I also believe she will have an understanding of the real world impact of the Supreme Court's decisions, which will be a welcome addition. When she was designated by the President, Judge Sotomayor said:

The wealth of experiences, personal and professional, have helped me appreciate the variety of perspectives that present themselves in every case that I hear. It has helped me to understand, respect and respond to the concerns and arguments of all litigants who appear before me, as well as the views of my colleagues on the bench. I strive never to forget the real-world consequences of my decisions on individuals, businesses, and government.

Well, it took a Supreme Court that understood the real world to see that the seemingly fair-sounding doctrine of "separate but equal" was in reality a straitjacket of inequality and it was offensive to the Constitution.

We had "separate but equal." For years in this country, we had segregation. We had segregation in our schools. It was a blight on the idea of a colorblind Constitution. And all Americans have come to respect the Supreme Court's unanimous rejection of racial discrimination and inequality in *Brown v. Board of Education*. That was a case about the real-world impact of a legal doctrine.

But just 2 years ago, in the Seattle school desegregation case, we saw a narrowly divided Supreme Court undercut the heart of the landmark *Brown v. Board* decision, a decision that was unanimous. The Seattle school district valued racial diversity and was volun-

tarily trying to maintain diversity in its schools. By a five-to-four vote, the conservative activists on the Court said that program was prohibited. That decision broke with more than half a century of equal protection jurisprudence, and I believe it set back the long struggle for equality in this country.

Justice Stevens wrote that the Chief Justice's opinion twisted *Brown v. Board* in a "cruelly ironic" way.

I think most Americans understand that there is a crucial difference between a community that does its best to ensure that schools include children of all races and one that prevents children of some races from attending certain schools. I mean, real-world experience tells us that. Those of us who are parents, grandparents, we know this.

Justice Breyer's dissent criticized the Chief Justice's opinion as applying an "overly theoretical approach to case law, an approach that emphasizes rigid distinctions . . . in a way that serves to mask the radical nature of today's decision. Law is not an exercise in mathematical logic."

Actually, I might say, if it were, we could just have computers on our Supreme Court.

Chief Justice Warren, a Justice who came to the Supreme Court with real-world experience as a State attorney general and Governor, recognized the power of a unanimous decision in *Brown v. Board*.

The Roberts Court, in its narrow desegregation decision 2 years ago, ignored the real-world experience of millions of Americans and chose to depart from the most hallowed precedents of the Supreme Court.

I am hopeful and confident that when she serves as a Justice on the Supreme Court of the United States, Sonia Sotomayor, a woman from the South Bronx who has overcome so much, will be mindful of the real-world experiences of Americans.

Those critics who devalue her judicial record and choose to misconstrue a few lines from speeches, ignore the aspiration behind those speeches. In fact, Judge Sotomayor begins the part of the speech so quoted by critics with the words "I would hope." She would "hope" that she and other Latina judges would be "wise" in their decision-making and that their experiences would help inform them and help provide that wisdom. I hope so, too. Just as I hope that Justices Thomas' early life leads him to, as he testified in his confirmation hearing, "stand in the shoes of other people." And I hope that Justice Alito's immigrant heritage, as he too discussed in his confirmation hearing, helps him understand the plight of the powerless in our society.

Judge Sotomayor also said in her speeches that she embraced the goal that: "[J]udges must transcend their personal sympathies and prejudices and aspire to achieve a greater degree of

fairness and integrity based on the reason of law." I am going to be saying more about this as we go along, but I would note that her critics missed that Judge Sotomayor was pointing out a path to greater fairness and fidelity to the law by acknowledging that despite the aspirations of impartiality she shares with other judges, judges are human. Her critics seem to ignore her modesty in claiming not to be perfect. I would like to know which one of the 100 U.S. Senators could claim to be perfect. There are some who could; I am not one of them.

By acknowledging that judges come to the bench with experiences and personal viewpoints, they can be on guard against those views influencing judicial outcomes. By striving for a more diverse bench drawn from judges with a wider set of backgrounds and experiences, we can better ensure that the decisions of the Court will be freer of limited viewpoints or narrow biases.

All Supreme Court nominees have talked about the value they will bring to the bench from their backgrounds and experiences. That diversity of experience is a strength, not a weakness, in achieving an impartial judiciary. A more diverse bench with a better understanding of the real world impact of decisions can help avoid the pitfalls of the Supreme Court's decisions these last years.

Let me point to just one example because judges—just as Senators bring their experience to this body—judges do, too.

Judge Sotomayor sat on a three-judge panel that heard a case involving strip searches of adolescent girls in a juvenile detention center. The parents of two female children challenged Connecticut's blanket strip search policy for all those admitted to juvenile detention centers as a violation of the fourth amendment's prohibition against unreasonable searches. Two of the male judges on the Second Circuit upheld the strip searches of the young girl.

In dissent, Judge Sotomayor cited controlling circuit precedent describing what is involved in the strip searches of these girls who had never been charged with a crime—keep in mind that they had never been charged with a crime—and without any basis for individual suspicion. She said that courts "should be especially wary of strip searches of children, since youth is a time and condition of life when a person may be most susceptible to influence and to psychological damage." She also emphasized that since many of these girls had been victims of abuse and neglect, they may be more vulnerable mentally and emotionally than other youths their age.

The Supreme Court recently decided a similar case, the Redding case. They found that school officials violated the fourth amendment rights of a young

girl by conducting an intrusive strip search of her underclothes while looking for the equivalent of a pain reliever many of us have in our medicine cabinet. During oral arguments in that case, one of the male Justices compared the search to simply changing for gym classes. Several of the other Justices answered with laughter—not the reaction I would have if that was my adolescent daughter. And Justice Ginsburg, the lone female Justice on the Supreme Court, described the search as humiliating to young girls. She spoke out. She did not join in that laughter.

Ultimately, the Supreme Court decided that case by a vote of 8 to 1. Justice Souter, the Justice whom Judge Sotomayor is nominated to replace, wrote the opinion for the Court. Of course, that position mirrored that of Judge Sotomayor. I suspect that it was Justice Ginsburg's understanding of the intrusiveness of the strip search of the young girl that ultimately prevailed. Can we say our life experience bears no weight in what we do?

Among the very first purposes of the Constitution is "to establish justice." It is a purpose that has animated the improvements we have made over generations to our Constitution. It is a purpose engraved in the words over the entrance of the Supreme Court. These words are in Vermont marble, and they say, "Equal Justice Under Law." All the dozens and dozens of times I have walked into the Supreme Court, up those steps straight out across from this Chamber, I have always paused to read those words, "Equal Justice Under Law." Is that not what we should stand for?

I hope and believe Judge Sotomayor understands the critical importance of both fairness and justice. A decade ago, she gave another speech in which she spoke about the meaning of justice. She said, "Almost every person in our society is moved by that one word. It is a word embodied with a spirit that rings in the hearts of people. It is an elegant and beautiful word that moves people to believe that the law is something special."

I believe Judge Sotomayor will live up to those words when she is confirmed, as she will be confirmed to the U.S. Supreme Court. The senior Senator from Vermont will vote for that confirmation.

I yield the floor and reserve the remainder of my time.

The PRESIDING OFFICER (Mrs. SHAHEEN). The Senator from Alabama is recognized.

Mr. SESSIONS. I appreciate the opportunity to speak. Before I do, I want to say that we had some disagreements as we went along about how to conduct the hearings. But Chairman LEAHY made a commitment that we would have a fair hearing, that every Senator would have an opportunity to question

the witnesses and have the time to follow up, and he complied with that. I think we had a good hearing.

Judge Sotomayor was voted out of the committee, and I appreciate her kind words to me and to our colleagues on how she felt she was treated. I think the hearings were fair and effectively discussed the important issues raised by this nomination.

Our confirmation process began with the President indicating that empathy was a standard that he believes should be applied to selecting judges. There is some disagreement about that. I am one of those who do not believe that is a legal standard. It is a kind of standard that is closer to a political standard, and we need to be careful that politics do not infect the judiciary.

I certainly do not profess to be able to say with certainty how Judge Sotomayor will perform if confirmed to the Supreme Court.

History shows that Justices, once confirmed, often surprise. I have previously expressed my evaluation and decision in this matter. I will just say I hope I am wrong. But I have concluded that the nominee has a fully formed judicial philosophy, one that is held by quite a few other lawyers and judges, but it is a philosophy contrary to the classical underpinnings of the American legal system, a system that has blessed us so much. Edmond Burke, in his famous speech "On Conciliation with the Colonies," urged the King to avoid war, noting that the Colonies were simply asserting the rights to which they had become accustomed. He observed that almost as many copies of Blackstone's Commentaries on the Laws were being sold in America as in England.

From the beginning, Americans have honored law because, I suspect, it was the arena in which the poor individual citizen could and often did prevail against the powerful. Even before the Revolution, judges, juries, and English law decided cases. It was a people's power controlled by law that would prevail even over the political wishes of the powerful. Laws, Burke noted, were to be created by the people through their elected representatives, not judges. Law in the new Republic was not an abstract. It was concrete. The laws meant what they said. If by some loophole even an evil act was not covered by criminal law, the prisoner was to go free.

Importantly, our system rested upon a near universally held belief that law and order were necessary for freedom and progress to occur. It further rested on the firm belief that there was such a thing as objective truth and that if a real effort was put forth, truth could be ascertained. For most, this was an easy concept, since a belief in God, the ultimate truth, was widespread. Thus, the legal system was arranged to best discover truth. Rules of evidence, cross-

examination, and the adversarial system were parts of the design to discover truth. Many nations have tried to replicate it without success. It is a national treasure, our legal system.

I believe our Federal courts are the greatest dispensers of justice the world has ever known. For 15 years, I practiced full time as a Federal attorney before Federal judges. I saw the system operate. I have seen State and local judges, Republicans and Democrats, serve faithfully day after day, adhering to the ideal of objectivity, fairness, and law. But many intellectuals in recent decades look upon such an approach as anti-intellectual. They conclude such thinking that judges actually do in an ideal way, they find this is hopelessly naive. They think it is unrealistic. The brilliant jurist and intellectual Jerome Frank, quoted favorably by Judge Sotomayor in a law review article, said as much in the early part of the last century.

Since then, many theorists have gone even further, moral relativists, postmodernists, deconstructionists, critical legal studies adherents, they all come from the same pond. They don't believe—some don't—that there is an ascertainable truth. They believe these ideals actually confuse thinking and mislead. They believe it is results that count.

I don't agree. The American people don't agree. Ideals are important. High standards can be reached. Not every time, I am sure, but most times. If the ideal is not ardently sought, it will be reached less and less. The American people are not cynics who settle for less than the ideal of impartiality and equal justice for the poor and the rich under the Constitution and the laws of this country. Each judge operates under the Constitution and laws of this country. They expect, rightly, that every judge will be fully committed to the heritage of law and the judicial oath they take to follow it.

That is why I have expressed the view since this process has begun, that we are at a fork in the road, perhaps. Will we continue to adhere to the classical ideal of American jurisprudence, or will we follow results-oriented judging, where judges cease to be committed to the law and equal justice because they know it is not possible. Do they believe words are just words? Do they believe the Constitution can be made to say what one wants it to say? In this world, the Constitution cannot bind a judge to what the judge considers an unwise result. Instead, we should see the Constitution as a flexible, living document. Under this view, judges are not just umpires. Judges are more powerful. Judges can make the Constitution and law say what they would prefer it to say. Judges can ensure that the right team wins. Judges can make policy. That is the seductive siren call of judicial activism, and judi-

cial activism is an impropriety that can be embraced by conservatives as well as liberals.

Our former chairman, Senator HATCH, has often said: Activism is a tendency in a judge to allow their personal and political views and values to override the law and the facts of a case to achieve a result they think is desirable. That is what is not acceptable in our system.

That is why, at the most fundamental level, many have a problem with this nominee. It seems clear from her writings and speeches that she is a devotee of the new philosophy of judging. Her speeches, over the years, are quite clear on this matter, although her hearing testimony backtracked from it in a somewhat confusing manner.

Regrettably, I was not able to support her nomination in committee, nor will I support her nomination before the full Senate. I would like to discuss in greater detail a few of the reasons that lead me to that conclusion. There are more things that will be discussed later as we go along, but let me say a few things now.

Even before the nomination of Judge Sotomayor, I made clear what my criteria would be for assessing a Supreme Court nominee: impartiality, commitment to the rule of law, integrity, legal experience, and judicial temperament. Judge Sotomayor possesses the well-rounded resume I like to see in a Supreme Court Justice. She has a wonderful personal story. She was a prosecutor. She was a private practitioner. She was a trial judge, and she was an appellate judge. Those are good experiences for a judge on the Supreme Court. However, her speeches and cases she has decided are troubling because they reflect the lack of a proper sense of the clearly stated constitutional rights that are guaranteed to American citizens. Her testimony was her opportunity to convince us she would be the type of Justice we could vote for. Instead her answers lacked clarity, the consistency and courage of conviction one looks for in a nominee to the Supreme Court.

In many instances, she raised more questions through her testimony than she answered. Judge Sotomayor's expressed judicial philosophy rejects openly the ideal of impartial and objective justice. Instead, her philosophy embraces and accepts the impact that background, personal experience, gender, sympathies, and prejudices—these are her words—have on judging. A fair and plain reading of these speeches—read in context—calls into question Judge Sotomayor's commitment to impartiality and objectivity. When given an opportunity to explain this philosophy, as was reflected in speech after speech, year after year, Judge Sotomayor dodged and deflected. In many cases, her answers could not be squared with the facts.

It has been suggested we should disregard those speeches. It has been suggested they are just words, that they are merely meant to inspire. In short, it has been suggested the words of the speeches simply do not matter. But words do matter. Words are important. They must have meaning or the result is chaos. No one should know this more than a judge. Her speeches and academic writings were not offhand comments delivered without the aid of notes. They were carefully crafted to dispute the notion that impartiality is realistic, or even possible. These were not the musings of a second-year law student. They were all delivered after she was a Federal judge. They were delivered to a number of different audiences, a number of different forums, including a bar association.

In her speeches and academic articles, Judge Sotomayor describes other approaches to judging and her approach to the law. She describes the factors judges should consider when reaching decisions. She describes her fully formed judicial philosophy. She challenges the mainstream concept of judging.

Make no mistake, judicial philosophy matters. It guides judges. It tells them what to consider. Importantly, it tells them what not to consider. Judicial philosophy is quite different from a judge's personal, political, moral or social views that a judge is to set aside when they decide a case. That is what blindfolded justice means. When a judge puts on that robe, they are, in effect, saying to everyone in that courtroom that their personal biases and prejudices and so forth will not impact the fairness of the ruling they are called upon to make.

Judges in trial and appellate courts, of course, are constrained by precedent. Even if a trial or appellate judge harbors a radical approach to the law, the threat of reversal restricts that judge's ability to employ that philosophy. But on the Supreme Court, however, these restrictions are removed. On the Supreme Court, there is no additional review. On the Supreme Court, a judicial philosophy that is fully formed is permitted to reach full bloom. As a liberal law dean recently said in the Los Angeles Times: "There's a huge difference between being a court of appeals judge who is bound by precedent and a Supreme Court justice who can rewrite those precedents."

That is why judicial philosophy matters. Frankly, after reviewing her consistent speeches in preparation for the confirmation hearing, I expected Judge Sotomayor to defend her views. I expected her to defend her statement that "[t]he law that lawyers practice and judges declare is not a definitive, capital 'L' law that many would like to think exists."

I expected her to defend the notion that the court of appeals is where “policy is made.” I expected her to defend her statements in favor of using foreign law to interpret American statutes and her statement that there is “no objective stance, but only a series of perspectives.”

However, during her testimony, many of Judge Sotomayor’s answers were inconsistent with her record and others were evasive and not adequate. On several occasions, Judge Sotomayor appeared to run away from the philosophy she had so publicly articulated. Other answers, I concluded, were not plausible.

It has been repeatedly suggested that Judge Sotomayor’s words and speeches are being taken out of context. I have read the speeches in their entirety. Her words are not taken out of context. In fact, when one reads her speeches in their entirety, in context, the impact is more troubling, not less.

For example, Judge Sotomayor said, on repeated occasions, that she “willingly accept[s] that . . . judge[s] must not deny the differences resulting from experience and heritage but attempt . . . continuously to judge when those opinions, sympathies and prejudices are appropriate.”

When I asked whether there was “any circumstance in which a judge should allow prejudices to impact decision-making,” she replied: “Never their prejudices.”

This is quite the opposite of what her speeches said. In the hearing, she said her speeches discussed “the very important goal of the justice system . . . to ensure that the personal biases and prejudices of a judge do not influence the outcome of a case.” Well said. But that is not what her speeches said—in context or line by line. She was not urging that judges guard against their prejudices, as their oath calls on them to do. She was accepting that a judge’s prejudices may influence their decisions.

Similarly, Judge Sotomayor repeatedly stated she accepts that who she is will “affect the facts I choose to see” as a judge—the facts she chooses to see as a judge. She accepts this. When I asked her about this statement, she said: “It’s not a question of choosing to see some facts or another, Senator. I didn’t intend to suggest that.”

But that is what she said repeatedly. She accepts the fact that who she is will “affect the facts I choose to see” as a judge. The context of her speech states a clear philosophy. Judge Sotomayor was contrasting her own views with that of Judge Cedarbaum and Justice O’Connor, two women judges of prominence. Of course, Justice O’Connor was a former member of the Supreme Court. The context was her view that “[i]n short . . . the aspiration”—I am quoting her—“the aspiration to impartiality . . . is just that,

an aspiration.” Such a statement evidences a lack of the kind of firm commitment to fairness and to the judicial oath of impartiality that is expected, in my opinion.

We have heard again and again that our concerns are based on three words: The “wise Latina woman.” That is not the case. We are talking about a judicial philosophy, as reflected in speech after speech, year after year. That is what is causing the problem here.

Senator COBURN, at the hearing, made a point that I think is worthy of emphasizing: that her refusal to effectively defend her own speeches and statements was almost as troubling as the philosophy contained within those speeches.

As the Washington Post, in endorsing her, on July 19, in their editorial, said:

Judge Sotomayor’s attempts to explain away and distance herself from [the “wise Latina” statement] were unconvincing and at times uncomfortably close to disingenuous, especially when she argued that her reason for raising questions about gender or race was to warn against injecting personal biases into the judicial process. Her repeated and lengthy speeches on the matter do not support that interpretation.

In Judge Sotomayor’s opening statement, she said that her philosophy is “fidelity to the law.” But her record demonstrates that, if true, her view is far different than mine. For example, she has advocated for the use of foreign law by American judges. Once again, we are left with statements made at the hearing, though, that were in direct conflict with statements made before she was nominated.

As Judge Sotomayor noted in her April 2009 speech—April of this year—before the Puerto Rico American Civil Liberties Union, the current debate regarding the use of foreign law in the courts, she noted, pits two distinct views against one another. On one side sit Justices Scalia and Thomas, who believe that foreign law should not be used in interpreting the U.S. Constitution. That is correct, in my view. On the other side is Justice Ginsburg, who believes that courts should be more aggressive in their use of foreign law.

In this speech in April, Judge Sotomayor clearly indicated who she thinks has the better view of the issue, stating that she “share[s] more the ideas of Justice Ginsburg . . . in believing, that unless American courts are more open to discussing the ideas raised by foreign cases, and by international cases, that we are going to lose influence in the world.”

Moreover, Judge Sotomayor talked approvingly about two recent Supreme Court cases in which Justices did look to foreign law precisely to interpret our Constitution. That is a very clear position. I think it is incorrect, but it is a clear one. Others adhere to it.

When she came before the Judiciary Committee, however, Judge Sotomayor articulated a very different view of foreign law, stating:

Foreign law cannot be used as a holding or a precedent or to bind or to influence the outcome of a legal decision interpreting the Constitution or American law that doesn’t direct you to that law.

Well, that is quite a different position from the theme and statements in her April speech.

So I agree with my colleagues who lamented Judge Sotomayor’s tendency to avoid answering questions, with one colleague noting her “extreme caution” in answering. I do not think many would dispute that she was less forthcoming than Judges Alito and Roberts, our latest confirmations to the Court just a few years ago.

In addition to her stated judicial philosophy, I am also quite concerned regarding how Judge Sotomayor has approached the most important constitutional cases that have come to her court. Most of the cases a court of appeals judge considers are routine, fact dominated, and do not offer novel questions or require substantial legal discussion. Still, a few important cases that present new and critical issues do periodically come before the courts of appeals. These cases can give insight into how the nominee will handle the many such cases that regularly come before the Supreme Court.

Within the last 3 years, Judge Sotomayor has heard three monumentally important cases at the circuit level: the constitutional right to be free of racial discrimination, the right to keep and bear arms, and the fifth amendment right to keep one’s own property.

In all three of these cases, Judge Sotomayor joined or authored very brief opinions—very brief opinions, oddly brief opinions—that avoided the kind of careful analysis we would expect of an appellate judge. In all three cases, individuals went to court with the plain text of the Constitution on their side. In each case, Judge Sotomayor reached conclusions that denied individual Americans their rights that they were asserting against governmental power.

When confronted with an appeal based on fundamental notions of equal protection of the laws, Judge Sotomayor, to be charitable, took a pass. By now we are familiar with the basic facts of the New Haven firefighters, the Ricci case. Eighteen firefighters brought suit against the city of New Haven after the city threw out the results of a promotional exam. It was thrown out because not enough of certain minorities did well enough on the exam. Judge Sotomayor’s decision in the case is troubling. Her curious one-paragraph summary order, and the Supreme Court’s subsequent reversal, are the starting points. But there is more. And there is a reason that so much attention has been focused on this case.

Her initial attempted disposal of the case by summary order was, quite simply, unacceptable and an embarrassment. A summary order is, by circuit rule, only for cases in which there is no legal principle worthy of discussion. In the end, every Supreme Court Justice concluded she applied the wrong legal standard in granting a judgment against the firefighters and for the city before a trial occurred, and a majority of the Supreme Court found that the firefighters' case was so strong that they were entitled to a verdict for their side on the evidence that already existed without a trial.

The Supreme Court understood the importance of this case—why we care about it as Americans. As they said of Judge Sotomayor's logic:

Allowing employers to violate the disparate-impact liability would encourage race-based action at the slightest hint of disparate impact. . . . That would amount to a de facto quota system. . . .

That is the Supreme Court language. I was struck by something one firefighter, Lieutenant Vargas, said to us—that his testimony before the Senate was the first opportunity he had to tell his story because the district court threw out the case before he even had a trial. On appeal, Judge Sotomayor initially dismissed the case by summary order, meaning that a hard copy of her order was never even delivered to the other judges on the court. Had one of her colleagues, Judge Cabranes, apparently, independently, not heard about the case and sought a full review—a rehearing en banc is what he sought through the whole Second Circuit—it is likely the Supreme Court would never have even known the case existed or considered the case. It is also likely Lieutenant Vargas would never have had the opportunity to tell his story, to explain to his children his profound hope that, as a result of his efforts, they would be judged on their merit and not on their race or their ethnicity.

In response to my questions, Judge Sotomayor also claimed that her Ricci decision was controlled by "established" Supreme Court precedent, saying "a variety of different judges on the appellate court were looking at the case in light of established Supreme Court and Second Circuit precedent." But the Supreme Court did not see it that way. The Supreme Court noted that "few, if any, precedents in the Court of Appeals" discuss this issue.

As noted commentator Stuart Taylor has recently confirmed, even if Judge Sotomayor had believed her panel was bound by Second Circuit precedent, review and rehearing by the whole Second Circuit would have provided the opportunity to review those previous cases afresh and to overrule them if they were unsound. But Judge Sotomayor cast the deciding vote against rehearing this case by the full

circuit. She defended her ruling and defended whatever authority existed at the time in the Second Circuit.

The case is also troubling to me because Judge Sotomayor had pledged to me during her confirmation, in 1997, that she would follow the Supreme Court's decision in *Adarand*—a well-known case—and subject any preference for one race over another race to the Court's established standard of strict judicial scrutiny. When I asked her about this promise she had made, I, once again, found her answer to be dismaying. She stated that the cases I asked about, the seminal equal protection cases—*Adarand* and so forth—"were not what was at issue in this decision." She was talking about the Ricci case.

But that is not right. There were two very clear claims made by the firefighters in this case—one based on a statutory right and one based on the equal protection clause of the Constitution.

One need only look at—

The PRESIDING OFFICER. The Chair wants to advise the Senator that his initial 30 minutes has been used, and so the Senator would be moving into the next period of debate.

Mr. SESSIONS. Madam President, I ask unanimous consent to have 5 additional minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Madam President, we will discuss some of the other cases in more detail later. But one need only look at the papers filed in the district court and the court of appeals to see that the *Adarand* issue and the constitutional question were central issues in this case. Look at Judge Cabranes' decision, where one of the first cases he cites is *Adarand*. One does not expect this type of mistake or a lack of accuracy from a Supreme Court nominee in a case of this importance, when she understands she will have to discuss before the Judiciary Committee.

Judge Sotomayor repeatedly stated, including in her opening statement, that litigants deserve explanations; that she looks into the facts, delves into the record, and explains to litigants why she rules for or against them. I have read the one-paragraph Ricci opinion. Judge Sotomayor did not afford the firefighters the respect they deserved.

I have also considered very carefully Judge Sotomayor's views regarding the Second Amendment, and I am troubled by her record and not reassured by the answers she gave during the hearing.

In sum, she effectively held that the Second Amendment—the right to keep and bear arms—does not bind the States, and that means any city or any State in America, if her opinion is upheld, can ban all guns in those jurisdictions. If her opinion is not reversed, that is what will happen in America. I

would note the Supreme Court, in ruling on the Heller case, held clearly for the first time that the Second Amendment is an individual right that applied to the District of Columbia, which effectively banned firearms in the District of Columbia. They said that was not constitutional, that the citizens of the District of Columbia have a constitutional right to keep and bear arms and it cannot not be eliminated.

So if the Sotomayor opinion is upheld, I can only say the Second Amendment might be viable in the District of Columbia but not in the other cities and States throughout the country.

With regard to the takings case, one of the most significant takings cases in recent years, she ruled against a private landowner who had his property taken. He intended to build one kind of pharmacy on it. A developer who was working with the city utilized the powers of the city to attempt to extort money from that individual so he could build another private drugstore on that lot. When the owner refused, the city condemned the man's property, gave it to the developer, who then built his own kind of drugstore there. I believe this is in violation of the constitutional protection that private property can only be taken for public use.

So words have meaning. The Constitution and laws of the United States have meaning. People come to courts to assert their rights under the Constitution and laws. In these three cases I have mentioned, the litigants did not have their rights properly listened to nor protected, in my opinion. Is it because she would have preferred different results from the promotional exam for firefighters? Is it because she did not believe in the rights protected by the Second Amendment as set forth in the Constitution? Is it because she favors redevelopment?

We are left to wonder because the cases were certainly not decided based on the plain language of the Constitution, and she did not openly and thoroughly in any one of these cases engage in a serious discussion of issues raised. Each was just a page or two or three.

One of the most important tools of a judge is words. The meaning of words is obviously where the power of our Constitution and laws is found. When a judge feels empowered to redefine the meaning of words in our Constitution, they feel empowered to amend our Constitution. If they don't like the death penalty, maybe they will call it unconstitutional. If they don't like the right to keep and bear arms, maybe they will say the Second Amendment doesn't apply to States and cities.

In a recent speech before this nomination, Professor Allen C. Guelzo, a two-time winner of the Lincoln Prize, wisely noted that a constitutional system resides on a bedrock of shared assumptions. While it may seem to be a

collection of laws and statutes, the most important thing is that "those laws and statutes depend first on a reverence for words, for reason, and for orderliness."

He adds that "reverence must grow . . . from the confidence that words, reasons . . . really do protect" the rights of citizens.

Citizens must know their rights, when clearly stated in the Constitution, will be steadfastly protected by the courts. It is here that I have significant qualms. The ease by which the nominee reconciled or attempted to reconcile fundamentally different statements in speeches at our hearing evidences a lack of respect for the meaning of words. Her explanation of controversial decisions lacked clarity, a very serious shortfall indeed for a Supreme Court Justice.

So I came to this process with an open mind regarding Judge Sotomayor. She has many wonderful qualities, and I truly mean that. And I like her. She was ever graceful in her testimony. But certain aspects of her record troubled me—whether, for example, she has the kind of deep commitment to the ideal of objectivity and impartiality that I believe necessary. I had hoped those concerns would be addressed effectively. Unfortunately, many of the answers did little to ease my concerns but, instead, reinforced them and led to more unanswered questions. Regrettably, I cannot support her nomination to a lifetime appointment to the U.S. Supreme Court.

I thank the Chair and yield the floor. The PRESIDING OFFICER. The Senator from California.

Mrs. FEINSTEIN. Madam President, it should be no surprise that my views are not those of the distinguished ranking member of our Judiciary Committee but somewhat different. I have served on this committee for over 16 years now. I have sat through the confirmation hearings of four Supreme Court Justices. I am very proud to say I believe the President made an excellent choice, and I enthusiastically support this nominee.

Judge Sotomayor is a warm and intelligent woman. More importantly, though, she is a solid, tested, and mainstream Federal judge. Her personal story is one of hard work. She has risen above all kinds of obstacles, and she has perseverance. She is a role model for women in the law, and I cannot help but feel a sense of enormous pride in her achievements, her nomination, and, hopefully, before the end of the week, her confirmation to be a Supreme Court Justice.

As I said at the confirmation hearings, a Supreme Court Justice should possess at least five qualities.

One, broad and relevant experience. So how does she stand? You can't find a nominee with better experience than Judge Sotomayor.

She has 29½ years of relevant legal experience, and she has seen the law from all sides.

For 4½ years she was a prosecutor in New York City. She prosecuted murders, robberies, and child pornography cases as an assistant district attorney. She worked with law enforcement officers and victims of crime, and she sent criminals to jail.

We heard from the distinguished New York City District Attorney, Mr. Morgenthau, who said he looked for bright young people, and he found her and he heard her story and she had been to Princeton. She graduated summa cum laude. She went to Yale Law School. She was editor of the Law Review.

She came to his attention, and he went to recruit her as a prosecutor in New York City. For 8 years after that, she practiced business law as a litigator in a private firm. She worked on complex civil cases involving real estate law, banking law, contracts, and intellectual property law.

Then, she was appointed by George Herbert Walker Bush—as we might fondly say "Bush 41"—as a U.S. district court judge for 6 years. She heard roughly 450 cases in the district court up close and personal, where litigants come before the judge and the judge gains a sense of what the Federal court means to an individual.

I think that is important to know on the Supreme Court. She saw there firsthand the impact of the law on people before her.

Then she was appointed by President Clinton. For 11 years she has been a Federal appellate court judge on the Second Circuit Court of Appeals. She has been on the panel for more than 3,000 Federal appeals, and she has authored opinions in more than 600 cases. These 11 years were rigorous and appropriate training ground for the Supreme Court.

Judge Sotomayor will be the only sitting Justice with experience on both the Federal trial and appellate courts, and she has more Federal judicial experience than any Supreme Court nominee in the last 100 years. That is a substantial qualification.

Secondly, a Supreme Court Justice should have deep knowledge of the law and the Constitution. I believe her broad experience gives her firsthand knowledge of virtually every area of the law.

As a prosecutor she tried criminal cases—homicides, assaults, pornography cases—those crimes that destroy lives.

As a business lawyer, she examined contracts, represented clients in complex civil litigation, and tried intellectual property disputes.

As a district court judge she presided over criminal and civil jury trials; she sentenced defendants; she resolved complicated business disputes; and she reached decisions in discrimination

and civil tort cases where people had been unfairly treated, injured, or harmed.

Finally, as an appellate judge, she has grappled with the difficult and critical questions that arise when people disagree about what our Constitution and our Federal statutes mean today. So she certainly has ample experience.

Third, a Supreme Court Justice should have impeccable judicial temperament and integrity. Anyone who watched Judge Sotomayor at her confirmation hearings has seen her temperament and demeanor firsthand. She is warm, she is patient, and she is extremely intelligent. She sat at that table with a broken ankle up on a box hour after hour and day after day in a hot room listening to members of the Judiciary Committee pepper her with questions. Not at any time did she lose her presence, lose her cool, or show anger. She showed determination and patience and perseverance. I think that means a great deal.

At times, the hearings became quite heated, but she would remain calm even in the face of provocative questioning.

So I am not surprised the American Bar Association and the New York City Bar Association gave her their highest rating.

As one of her Republican-appointed colleagues on the Second Circuit said: "Sonia Sotomayor is a well-loved colleague on our court. Everybody from every point of view knows she is fair and decent in all her dealings. The fact is, she is truly a superior human being."

What greater compliment could there be for a prospective Supreme Court nominee?

After spending time with her during our one-on-one meeting and participating in her confirmation hearings, I agree. She is a walking, talking example of the very best America can produce. She has overcome adversity. Here is a woman—a child—the product of a poor Puerto Rican family living in a housing project in New York. She is 8 years old, she finds herself with juvenile diabetes. She is 9 years old, her father dies. She goes to school. She struggles with the language. She overcomes it. She graduates from high school. She goes to Princeton. She succeeds in every way, shape, and form, as I said, summa cum laude, and then on to Yale and a member of the Yale Law Review. She overcame adversity and she kept going.

She has given back to her country and her community, and she is now on track to become the first Latina Justice of the U.S. Supreme Court and only the third woman ever appointed to that Court.

I not only will vote for her, I will do so with great pride.

Finally, a Supreme Court Justice should exhibit mainstream legal reasoning and a firm commitment to the

law. I have heard people say that they don't believe she will follow the law.

I sat in the room during those 4 days of hearings. There was never an instance that I saw where she moved away from legal precedent and the law.

I have said before, and I say today, I am somewhat concerned about the current Supreme Court. As I see it, conservative activists have succeeded in moving our Court to the right of mainstream American thought.

In just the last 2 years, this has been abundantly clear. The Justices have disregarded precedent at an alarming rate, and they have rewritten the law in ways that make clear that they are not just "calling balls and strikes."

In 2007, the Court held that a school district cannot consider race when it assigns students to schools—even to ensure any amount of racial diversity. This is *Parents Involved in Community Schools v. Seattle School District*, 551 U.S. 701, 2007.

It held that women who were paid less than men had to sue within 180 days—even when they had no way of knowing they were paid less, or they lost their right to back pay. This is *Lily Ledbetter v. Goodyear Tire & Rubber Co. Inc.*, 550 U.S. 618, 2007. The occupant of the chair is new to the Senate. One of the first things we did was pass the Lily Ledbetter law to overcome that Supreme Court decision.

The Court held for the first time since 1911 that manufacturers could fix minimum prices for their products. This is *Leegin Creative Leather Products Inc. v. PSKS, Inc.*, 551 U.S. 877, 2007.

It held that the Endangered Species Act did not apply to certain Federal actions—even though the Court, in 1978, said the Act had "no exception." This is *National Association of Home Builders v. Defenders of Wildlife*, 551 U.S. 644, 2007.

And it held that Congress could pass a law restricting access to OB/GYN services for women without including an exception for when a woman's health is at risk. This is *Gonzales v. Carhart*, 550 U.S. 124, 2007.

That last decision was not only dangerous to a woman's health, it is also contrary to the Court's opinions in *Roe*, in 1973; in *Ashcroft*, in 1983; in *Casey* and *Thornburgh*, both in 1992; in *Carhart I* in 2000; and in *Ayotte*, in 2006. So this Court of conservative activists cast aside precedent and "super-precedent" to do essentially what they believe—not to follow the precedent, which was simply thrust aside.

The Supreme Court's shift to the right and discarding of precedent is not just an ivory tower issue either. These decisions have real-life impact.

Last week, *USA Today* reported that older white men, 55 years or older, are losing jobs at the highest rate since the Great Depression. This is *Dennis Cauchon*. In this Recession, Older

White Males See Jobs Fade, *USA Today*, July 30, 2009.

This is troubling. We have a law—the Age Discrimination in Employment Act—that is supposed to protect workers from being laid off because of their age. But 2 months ago, the Supreme Court changed the burden of proof under that law, making it harder for older workers to get protection when they are fired, demoted, or not given a job because of their age. This is *Jack Gross v. FBL Financial Services, Inc.*, 129 S. Ct. 2343, 2009.

Let me be clear, in my view, after 16 years on this committee: The Justices on the Supreme Court are not umpires; they do not just call balls and strikes. And they are not computers. It matters who sits on our Supreme Court, and it matters whether they will respect precedent and follow the law.

Judge Sotomayor is a nominee with a 17-year record of following the law. She has faithfully applied the law to the facts in case after case.

We have a research service called the Congressional Research Service. It is a neutral, respected adjunct to what we do in the Senate and the House. It carries out significant research. They took a look at her record, examined it, and this is what they said:

Her decisions do not fall along any ideological spectrum. The most consistent characteristic of her approach as an appellate judge has been an adherence to the doctrine of stare decisis—the upholding of past judicial precedents.

When her record is objectively researched by the number one objective research service we have, she has been found to abide by court precedent. They have essentially said she is not an activist, she follows legal precedent. When her confirmation hearing ended, even one Senator who is now voting against Judge Sotomayor said this:

I actually agree that your judicial record strikes me as pretty much in the mainstream of judicial decisionmaking.

This is Senator JOHN CORNYN, Confirmation Hearings for Judge Sonia Sotomayor, July 16, 2009.

Judge Sotomayor's mainstream record, her respect for precedent, and her commitment to the law have earned her the support of groups that cut across party lines.

She has been endorsed by law enforcement groups, such as the International Association of Chiefs of Police; civil rights groups, such as the Leadership Conference for Civil Rights; business groups, such as the U.S. Chamber of Commerce—yes, they have endorsed her; former officials from both parties, including conservative lawyer Kenneth Starr; and legal groups, such as the American Bar Association.

This is a nominee with a solid record, with more Federal judicial experience than any nominee in a century, and with widespread support.

There are those who oppose her because of a line from a speech she made—one line in 29½ years of legal experience.

Second, there are those who oppose her because of one case. It is the *Ricci* case—the New Haven case involving firefighters. But Judge Sotomayor was squarely in the mainstream in that case. She followed established precedent. That is what the district court said in an almost 50-page opinion. This is *Ricci v. DeStefano*, 2006 U.S. Dist. LEXIS 73277, 2006, unpublished opinion. Her Second Circuit panel unanimously agreed. This is *Ricci v. DeStefano*, 530 F.3d 87, 2007.

At about the same time, in the U.S. District Court in Tennessee, a judge held that in a nearly identical situation, the Memphis Police Department could replace a promotional exam that it feared was discriminatory.

Last year, a three-judge circuit court panel on the Sixth Circuit—including one judge appointed by President George W. Bush—agreed. This is *Oakley v. City of Memphis*, No. 07-6274, 6th Cir. 2008, unpublished opinion. So there was agreement on the courts.

It is true that five Justices, in a 5-to-4 opinion on the Supreme Court, disagreed, and their decision is now the law of the land. This is *Ricci v. DeStefano*, 129 S. Ct. 2658, 2009. I was a mayor for 9 years of a difficult city going through a number of affirmative action cases. I can tell you that this ruling has placed cities in what Justice Souter called a "damned if you do, damned if you don't situation."

I agree with that. If a city has to prove that it would lose in court before replacing a civil service exam it believes is discriminatory, this jeopardizes virtually any exam they might choose.

Finally, and most important, there is the third point of opposition, and that is the National Rifle Association. The NRA actively opposes Judge Sotomayor. They say they are scoring her confirmation vote. They will tell their members that any Senator who votes to confirm Judge Sotomayor has voted against the NRA's priorities. So let's look at that for a minute.

The NRA says Judge Sotomayor erred in the case of *United States v. Sanchez-Villar*, a 2004 case. In this case, an illegal immigrant named Jose Sanchez-Villar was caught dealing crack cocaine and carrying a gun in New York City. This is *United States v. Sanchez-Villar*, 99 Fed. Appx. 256, 2004.

Those are the facts of the case. A jury convicted. On appeal, the defendant argued, among other things, that to prohibit him from carrying a gun in New York City violated the second amendment.

Judge Sotomayor and her colleagues unanimously rejected his argument and upheld the conviction. The NRA is apparently upset that Judge

Sotomayor and her colleagues did not agree with Mr. Sanchez-Villar's second amendment argument.

But in 2004, when this case was decided, the law had been clear for 65 years. The Supreme Court had said in 1939 that the second amendment only related to militia service and judges all across our country had followed that decision for decades. This is *United States v. Miller*, 307 U.S. 174, 1939.

Would the NRA have preferred that Judge Sotomayor rule against 65 years of settled law and hold that an undocumented drug dealer had a constitutional right to carry a gun in New York City? Do you want that, Mr. President? Do I want that in my State? The answer is absolutely no.

The NRA also says Senators should oppose Judge Sotomayor's nomination because of another case, *Maloney v. Cuomo*. This is *Maloney v. Cuomo*, 554 F.3d 56, 2009. There, Judge Sotomayor and her colleagues unanimously upheld a New York law banning a particular Japanese martial arts weapon called nunchakus.

The unanimous decision said the second amendment limits only the Federal Government, not the States. Why would Judge Sotomayor and her colleagues say that? Because it was binding Supreme Court law. Look at the decisions:

In 1876, the Supreme Court held that the second amendment only applies to the Federal Government. That was *United States v. Cruikshank*, 92 U.S. 542 1876. It said it again in 1886, in *Presser v. Illinois*, 116 U.S. 252, 1886, and again, in 1894, in *Miller v. Texas*, 153 U.S. 535, 1894.

The Fourth Circuit followed that law and said in 1995 that the second amendment only applies to the Federal Government. That case was *Love v. Pepersack*, 47 F.3d 522, 1995. The Sixth Circuit agreed in 1998, in *People's Rights Organization v. City of Columbus*, 152 F.3d 522, 1998. Judge Sotomayor's own court, the Second Circuit, agreed in 2005, in *Bach v. Pataki*, 408 F.3d 75, 2005.

Then last year, Justice Scalia wrote in footnote 23 of the famous *Heller* opinion:

[Our] decisions in *Presser v. Illinois* and *Miller v. Texas* reaffirmed that the Second Amendment only applies to the Federal Government.

That case was *District of Columbia v. Heller*, 128 S.Ct. 2783, 2008. Justice Scalia is not exactly a liberal Supreme Court Justice, and that is his view:

Presser v. Illinois and *Miller v. Texas* reaffirm that the second amendment only applies to the Federal Government.

Finally, just 2 months ago, three Republican appointees on the Seventh Circuit agreed that the second amendment only applies to the Federal Government. They said anyone who doubts this need only read Justice Scalia's opinion. And that case was the Na-

tional Rifle Association v. City of Chicago, 567 F.3d 856, 2009.

So once again Judge Sotomayor's decision was squarely in agreement with court after court after court.

Some of my colleagues have said that the Ninth Circuit disagreed. It is true that three of its judges did. But last week, the full Ninth Circuit voted to review these three judges' decision and to rehear it as a full court en banc. And that case is *Nordyke v. King*, No. 07-15763, En Banc Order, Ninth Circuit, July 29, 2009.

The NRA tried its case before the Seventh Circuit and lost. They lost in front of three Republican-appointed judges.

Let me summarize. Judge Sonia Sotomayor has 29½ years of relevant legal experience. She has a 17-year record of following the law. She has experience, temperament, and knowledge. She will be, in my view, a fine Supreme Court Justice.

Supreme Court Justices do not merely call balls and strikes; they make decisions that determine whether acts of Congress will stand or fall. They decide how far the law will go to protect the safety and rights of all of us. They have the power to limit or expand civil rights protections. They have great leeway to interpret the laws protecting or limiting a woman's right to choose. And they can expand or limit child pornography laws and campaign finance laws and so many more.

I believe Judge Sotomayor is an exceptional person who brings a rich background as a prosecutor, a business lawyer, a trial judge, and appellate court judge. And her 17-year record of judicial temperance shows she will faithfully apply the law. I cannot tell you how proud I will be to vote to confirm her as an Associate Justice on the Supreme Court. I sincerely hope that a dominant majority of my colleagues will do the same.

I yield the floor.

THE PRESIDING OFFICER (Mr. UDALL of Colorado). The Senator from New Jersey.

MR. MENENDEZ. Mr. President, I rise in proud support of the confirmation of Judge Sonia Sotomayor. We are not only about to cast a vote this week that will make history, but we are about to stand witness in some small way to the coming age of America.

The great Founders of this democracy built a nation on an idea and an ideal. They devised the unique experiment in a new form of government built on tolerance, equal rights, justice, and a constitution that protected us from the mighty sword of tyranny. They forged a community from shared values, common principles, yet preserved the freedom of every citizen to pursue happiness and reach for the stars no matter their position, no matter their circumstance at birth.

It was a revolutionary notion that in America one is not bound by his or her

social or economic status; that if we work hard, reach further, aim higher, everything—anything—is possible.

Unlike other nations united by common history, common language, and common culture, America prides itself on its motto: *E pluribus unum*—out of many, one. In our blind rush to one side of the political spectrum or the other, we too often forget those words. We too often forget that we are united in our differences in a vast melting pot forged from common values and an ideal of freedom that is the envy of the world.

Today, as we prepare to confirm Judge Sotomayor, the full realization of that ideal is closer than it has ever been. I know it, I feel it, for I have lived it. I stand here, someone who himself came from humble beginnings, raised in a tenement building in a neighborhood in Union City, NJ, a son of immigrants, first in my family to go to college, and now in a nation of 300 million people, 1 of 100 Members of the U.S. Senate.

I never dreamed growing up that one day I would have the distinct honor to come to the floor of the Senate to rise in favor of the confirmation of an eminently qualified Hispanic woman who grew up in the Bronx across the river from the old tenement I lived at in Union City. I never dreamed that as a U.S. Senator of Hispanic heritage, I would have the privilege of standing in the well of this Chamber to cast a historic vote for the first Hispanic woman on the highest Court in the land. So for me personally, my vote for Judge Sonia Sotomayor will be a proud moment, one I will always remember as a highlight of my time in the Senate.

When Judge Sotomayor takes her seat on the U.S. Supreme Court, America will have come of age. We will need only to look at the portrait of the Justices of the new Supreme Court to see how far we have come as a nation, who we really are as a people, what we stand for, and what our Founders intended us to be. It will be a striking portrait—one of strength, diversity, spirit, and wisdom, the portrait of a nation united by common concerns, yet still too often divided by deeply held individual beliefs.

There are those in this Chamber who, because of those deeply held beliefs, will vote for Judge Sotomayor and those who will not, each for their own reasons, each in part because of who they are, where they grew up, how their perspective has been uniquely shaped by their individual circumstances and experiences. Their vote will be based on their own logic, their own reasoning, how they interpret the facts and the testimony before them. Each of us will analyze and debate those facts from our own perspective. We will hold to our own intellectual positions. We will disagree. Some will find fault with Judge Sotomayor's

choice of words. Some will interpret her statements and rulings differently than she may have clearly intended. Some will question her temperament, her judgment, the details of her decisions. But in this debate and, ultimately, in the final analysis, none of us can deny the role our experience will play in our decision. None of us can deny our backgrounds, our upbringing, the seminal events that shaped our life. We cannot deny who we are. All we can ask of ourselves—of any of us—is that wisdom, intelligence, reason, and logic will always prevail in the decisions we make.

Those who would say a U.S. Senator or a Justice of the U.S. Supreme Court does not carry something with them from their experience are simply out of touch with reality. But let us remember that who we are is not a measure of how we judge; it is merely the prism through which we analyze the facts. The real test is how we think and what we do.

Let's be clear. Given the facts, given the evidence before us, Sonia Sotomayor is one of the most qualified and exceptionally experienced nominees to come before the Senate. I am proud to stand in favor of her confirmation, not because of where she came from, not because we share a proud ethnicity, but because of Judge Sotomayor's experience and vast knowledge of the law. I am proud to stand in favor of her nomination not because she is a Hispanic woman but because of her commitment to the rule of law and her respect for the Constitution; not because of the depth of her theoretical knowledge and respect for precedent but because of her practical experience fighting crime; not because of one statement she may have made years ago outside the courtroom but because of a career-long, proven record of dedication to equal justice under law. Nothing—I repeat nothing—should be more important to any nominee than a dedication to those simple words chiseled above the entrance to the Supreme Court: "Equal Justice Under Law."

These are the reasons I am proud to stand in support of her confirmation, and these are the reasons I believe Judge Sotomayor should be unanimously confirmed by the Senate. But I know that will not be the case. I know there will be few on the other side of the aisle who will cast their vote in support of her. I know some of my colleagues have suggested that Judge Sotomayor may not have the judicial temperament necessary to serve on the Supreme Court. To those Senators who get up and say that, I say watch the hearings again. Watch them closely. Listen to what was asked, watch her responses, take note of the depth, the dignity, and clarity of her answers. Be aware of the deference she showed every Senator on the committee, her

tone, the tenor of her responses, her rebuttals, and then tell me she does not have the proper judicial temperament.

I think most Americans who watched her, who listened to her, would respectfully disagree. Most Americans do not care about one specific statement out of hundreds of statements. They care about the person. They care about the experience. They care about honor and decency and dignity and fairness. They care about who she is and what she has accomplished in her long judicial career. Put simply, they care about the record, and the record is clear. It shows she has a deep and abiding respect for the Constitution. It shows that the leaders of prominent legal and law enforcement organizations who know her best, those who have actually seen her work, say she is an exemplary, fair, and highly qualified judge. It shows a crime fighter who as a prosecutor put the "Tarzan murderer" behind bars. It shows a judge who has upheld the convictions of drug dealers, sexual predators, and other violent criminals. And it highlights a deep and abiding respect for the liberties and protections granted by the Constitution, including the first amendment rights of those with whom she strongly disagrees.

Judge Sotomayor's credentials are impeccable. Set aside for a moment the fact that she graduated at the top of her class at Princeton. Set aside her tenure as editor of the Yale Law Review, her work for Robert Morgenthau in the Manhattan District Attorney's Office, her successful prosecution of child abusers, murderers, and white-collar criminals. Set aside her courtroom experience and practical hands-on knowledge of all sides of the legal system. Even set aside her appointment by George H.W. Bush to the U.S. District Court in New York and her appointment by Bill Clinton to the U.S. Court of Appeals and the fact that she was confirmed by both a Democratic majority Senate and a Republican majority Senate, which alone tells this Senator, if she was qualified then, she must be qualified now. Set all that aside, and you are still left with someone who would bring more judicial experience to the Supreme Court than any Justice in the last 70 years, more Federal judicial experience than anyone nominated to the Court in the last century. Her record clearly shows that someone so experienced, so skilled, so committed, so focused on the details of the law can be an impartial arbiter who follows the law and still has a deep and profound understanding of the effect her decisions will have on the day-to-day lives of everyday people.

With all due respect to my colleagues who plan to vote against this nominee, what speaks volumes about Judge Sotomayor's temperament, what speaks volumes about her experience, what speaks volumes about her record

is that the worst—the very worst—her opponents can accuse her of is an accident of geography that gave her the unique ability to see the world from the street view, from the cheap seats. I know that view very well. I grew up in it. I can tell you that certainly it gives you a unique perspective on life. It engenders compassion. It engenders pathos. It focuses a clear lens on the lives of those whose struggles are more profound than ours, and whose problems run far deeper. Yes, I know that view well, and it remains with me today, and it will remain with me all of my life.

I daresay there may be no greater vantage point from which to view the world—to see the whole picture—than a tenement in Union City or a housing project in the Bronx. Thomas Jefferson, in his first inaugural address said:

I shall often go wrong through defect of judgment. When right, I shall often be thought wrong by those whose positions will not command a view of the whole ground.

Judge Sonia Sotomayor surely commands a full, wide expansive view of the whole ground. It is a strength, not a weakness. It is who she is, not what she will do or how she will judge. It is the long view, and it gives her an edge where she may see what others cannot. And that is a gift that will benefit this Nation as a whole.

I ask my colleagues to take the long view and see what this nomination means in the course of this Nation's glorious history. For me, the ideal, the idea of America, the deep and abiding wisdom of our Founders, will have come of age when Judge Sonia Sotomayor raises her right hand, places her hand on the Bible, and takes the solemn oath of office. With it, the portrait of the Justices of the U.S. Supreme Court will more clearly reflect who we are as a nation, what we have become, and what we stand for as a fair, just, and hopeful people. Let that be our charge. Let that be our legacy. Let someone who is committed to the Constitution, to the rule of law, to precedent—and who has exhibited that over a lifetime of work—be our next Supreme Court Justice.

I am proud and honored to support the confirmation of Judge Sonia Sotomayor as the next Justice of the U.S. Supreme Court.

And finally, numerous civil rights, Latino, and law enforcement organizations join me in supporting Judge Sotomayor's nomination. I ask unanimous consent to have printed in the RECORD letters of support from the following organizations: Mexican American Legal Defense and Education Fund, the National Hispanic Leadership Agenda, the National Puerto Rican Coalition, the National Fraternal Order of Police, the National Organization of Black Law Enforcement Executives, Federal Hispanic Law Enforcement Officers Association, the

United States Hispanic Chamber of Commerce, the Arizona Hispanic Chamber of Commerce, and the Fort Worth Hispanic Chamber of Commerce, to name a few.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MEXICAN AMERICAN LEGAL DEFENSE
AND EDUCATIONAL FUND,

Los Angeles, CA, July 7, 2009.

Hon. PATRICK J. LEAHY,
*Chairman, Committee on the Judiciary, U.S.
Senate, Washington, DC.*

Hon. JEFF SESSIONS,
*Ranking Member, Committee on the Judiciary,
U.S. Senate, Washington, DC.*

DEAR CHAIRMAN LEAHY AND RANKING MEMBER SESSIONS: On behalf of the Mexican American Legal Defense and Educational Fund (MALDEF), I write to express our support for the confirmation of Judge Sonia Sotomayor to the United States Supreme Court. Judge Sotomayor is an outstanding choice to replace retiring Justice David Souter. She has an impeccable record of accomplishment that is worthy of serving on the highest court in the nation. She possesses all of the credentials and experience that make her highly qualified to sit on the Supreme Court. Significantly, she is one of the most qualified candidates to be considered for Associate Justice in recent history.

The American Bar Association has unanimously rated Judge Sotomayor "well qualified" for the Court, its highest rating. She has broad and bipartisan support. She has been endorsed by eight national law enforcement groups. She has the support of Former President Herbert Walker Bush and former Supreme Court Justice Sandra Day O'Connor.

Judge Sotomayor has extensive experience as a trial attorney having worked in both the public and private sectors. She was an Assistant District Attorney in New York for five years where she tried dozens of criminal cases including murders, robberies, police misconduct, and fraud. Former New York District Attorney Robert Morgenthau described her as a "fearless and effective prosecutor." She was a corporate litigator in private practice for eight years as a partner at the law firm of Pavia & Harcourt where she handled cases in real estate, employment, banking, contracts, and intellectual property law.

She has served as a federal judge for 17 years. She was the youngest judge appointed to the federal bench in the Southern District of New York where she served for six years and heard over 450 cases. She has been on the U.S. Court of Appeals for the Second Circuit—one of the most demanding circuits in the country—for 11 years. As a federal appellate judge she has participated in over 3000 panel decisions and authored approximately 400 published decisions. She has handled complex legal and constitutional matters. Her decisions are faithful to both legal doctrines and factual details.

If confirmed, Judge Sotomayor would bring more federal judicial experience to the Supreme Court than any justice in 100 years and more overall judicial experience than anyone confirmed to the Court in the past 70 years. She also would be the only Justice with experience as a trial judge.

Judge Sotomayor's educational accomplishments demonstrate her strong work ethic and clarity of focus starting from a young age. She graduated summa cum laude from Princeton University and is a graduate

of Yale Law School where she was an Editor on the Law Review, a distinction reserved for only the top law students.

Judge Sotomayor has a demonstrated commitment to the community. She has been a lecturer at Columbia Law School and an adjunct professor at NYU Law School. She served on the board of the Development School for Youth whose mission is to develop work skills for inner city young people. She has served on the Boards of Directors of the New York Mortgage Agency, the New York City Campaign Finance Board and the Puerto Rican Legal Defense and Education Fund.

The Latino community shares in the pride of the nation at President Obama's nomination of this exceptional jurist. The diversity she will add to the Court is a strength that will enhance respect and dignity for the judicial system. MALDEF respectfully requests the opportunity to testify in support of Judge Sotomayor's confirmation.

Judge Sotomayor is an individual of exceptional talent, experience and commitment to justice. We urge her swift confirmation.

Very truly yours,

HENRY L. SOLANO,
Interim President & General Counsel.

JUNE 9, 2009.

Hon. PATRICK LEAHY,
*Chairman, U.S. Senate, Committee on the Judiciary, Dirksen Senate Office Building,
Washington, DC.*

DEAR SENATOR LEAHY: The National Hispanic Leadership Agenda (NHLEA), comprised of thirty-one of the leading national and regional Hispanic civil rights and public policy organizations, representing a diverse Latino community and millions of members nationwide, would like to request a meeting regarding the nomination of Judge Sonia Sotomayor to become the next United States Supreme Court Justice. As community advocates with a vested interest in serving the public good, members of our coalition would like to meet with you and discuss Judge Sotomayor's nomination. NHLEA represents a vast array of constituencies that include veterans, academics, legal experts, labor activists, federal employees, elected officials, medical professionals and members of the media, among many other community leaders who unequivocally support the nomination of Judge Sotomayor based on the merits of her judicial record and overall experience.

The NHLEA mission and objectives call for providing a clearinghouse of information to the Hispanic community; providing a unified voice on relevant issues; and providing a much needed voice on legislative issues that have direct implications for our members nationwide. The composition of NHLEA includes groups with Mexican, Puerto Rican, Dominican, and Cuban leadership, as well as the membership of countless other Hispanic and Latin-American interests. The common issues of education, civil rights, immigration, economic empowerment, health, and government accountability transcend ethnic origin and racial identity, as evidenced by the breadth of these different groups. The Hispanic community is larger and more diverse than ever, numbering close to 50 million persons and making up over 16% of the combined population of the United States, Puerto Rico, and the United States territories.

We look forward to your response as we would like to schedule meetings for the week of June 15th–19th. Should you have any questions, please contact Alma Morales Riojas, Secretary/Treasurer of the National Hispanic Leadership Agenda and President and CEO of

MANA, A National Latina Organization or James Albino, Director, Hispanic Federation.

Sincerely,

DR. GABRIELA D. LEMUS,
*Chair, Board of Directors,
National Hispanic Leadership Agenda.*

NATIONAL PUERTO RICAN COALITION, INC.,
Washington, DC, July 13, 2009.

Hon. PATRICK J. LEAHY,
*Chairman, Committee on the Judiciary, U. S.
Senate, Russell Senate Office Building,
Washington, DC.*

Hon. JEFF SESSIONS,
*Ranking Member, Committee on the Judiciary,
U.S. Senate, Russell Senate Office Building,
Washington, DC.*

DEAR CHAIRMAN LEAHY AND RANKING MEMBER SESSIONS: On behalf of the National Puerto Rican Coalition Inc. (NPRC), representing the interests of over 8 million U.S. citizens in the states and Puerto Rico, I would like to express our full and enthusiastic support for the confirmation of the Honorable Judge Sonia Sotomayor to the United States Supreme Court. Her personal and professional experiences make her uniquely sensitive and qualified to address the concerns of all Americans in our nation's highest court.

Judge Sotomayor's personal story of growing up as a daughter of Puerto Rican parents in a Bronx housing project, and eventually going on to study in Princeton and Yale, is an authentic reflection of the power for motivated and talented people in our society to overcome hardship and achieve success. This experience allows her a profound sensitivity to the challenging conditions of life which are the reality for a significant portion of the U.S. population and will provide her with a unique perspective on how to justly and equally apply our nation's laws.

In her professional life Judge Sotomayor's legal career has included not only criminal prosecution and commercial litigation, but also academia and appointment to the federal bench. For the past ten years, her intellect, integrity, and consensus-building have made her a highly respected jurist on the Second Circuit. This followed a distinguished career as a federal trial judge, during which Judge Sotomayor's pragmatism and resolve brought the national baseball strike to an end that satisfied all parties. She then taught for over nine years at the New York University School of Law and at Columbia Law School and has been a mentor to hundreds of attorneys and students as well as a member of the Puerto Rican and the Hispanic National Bar Associations. This wealth of experience has impressed upon her both the law's potential, as well as its limits. Since her nomination was announced she has received endorsements and praise from across the country.

As the Senate holds confirmation hearings, NPRC will be watching carefully to ensure that the Senate treats Judge Sotomayor fairly. Our organization firmly believes that Judge Sotomayor is the best choice for our country's next Supreme Court Justice. Therefore, NPRC will include her confirmation vote as part of our NPRC Community Accountability Rating. I hope and trust that you and your colleagues will enthusiastically support her nomination.

Sincerely,

RAFAEL FANTAUZZI,
President & CEO.

NATIONAL FRATERNAL ORDER OF POLICE,
Washington, DC, June 9, 2009.

Hon. PATRICK J. LEAHY,
Chairman, Committee on the Judiciary, U.S.
Senate, Washington, DC.

Hon. JEFFERSON B. SESSIONS III,
Ranking Member, Committee on the Judiciary,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN AND SENATOR SESSIONS: I am writing on behalf of the members of the Fraternal Order of Police to advise you of our support for the nomination of Judge Sonia M. Sotomayor to join the Supreme Court of the United States.

Following her graduation from Yale Law School, Judge Sotomayor joined the District Attorney's office in Manhattan, where she tried dozens of cases during her tenure, including winning a conviction of the "Tarzan murderer". She worked closely with rank-and-file law enforcement officers during her time as a prosecutor, and, as described by the legendary Manhattan District Attorney Robert Morgenthau as a "fearless and effective prosecutor."

After spending some time in private practice, Judge Sotomayor returned to public service and was nominated by President George H. W. Bush for a seat on the U.S. District Court for the Southern District of New York. The Committee on the Judiciary unanimously approved her nomination, and she was confirmed in the Senate by unanimous consent. Upon confirmation, Judge Sotomayor became the youngest sitting judge in the Southern District of New York.

Her first high profile case involved a labor issue—*Silverman v. Major League Baseball Player Relations Committee, Inc.* By issuing an injunction preventing the owners from imposing a new collective bargaining agreement, it can be argued that Judge Sotomayor helped save baseball, and certainly baseball fans, from a long, drawn out labor dispute.

In 1998, she was named to the U.S. Court of Appeals for the Second Circuit, one of the most demanding circuits in the country, by President William J. Clinton. As an appellate judge, she has participated in over 3000 panel decisions and authored roughly 400 opinions, handling difficult issues of constitutional law, complex procedural matters, and lawsuits involving complicated business organizations. Over the course of her career, she has demonstrated herself to be a sharp and fact-driven jurist, analyzing each case on its merits and weighing the facts before rendering any decision.

While her ruling in *Ricci v. Destefano* has been getting most of the media attention, we would like to bring another case to your attention, *Pappas v. The City of New York*, et al. New York City Police Officer Thomas Pappas was fired for distributing through the U.S. mail racially offensive material from his home. While the Second Circuit upheld the termination of Officer Pappas, Judge Sotomayor dissented noting that his First Amendment rights took precedence because he did not occupy a high-level supervisory, confidential or policymaking role within the department.

In other cases which came before her, both civil and criminal, Judge Sotomayor has often sided with law enforcement officers acting in good faith by upholding convictions on appeal. It is clear that she weighs the facts in evidence and makes her rulings based on the merits of the case. She is a model jurist—tough, fair-minded, and mindful of the constitutionally protections afforded to all U.S. citizens.

I believe that the President has made an excellent choice in naming Judge Sonia S.

Sotomayor to the Supreme Court of the United States and, on behalf of the more than 327,000 members of the Fraternal Order of Police, I am proud to endorse her nomination. If I can be of any additional support on this matter, please do not hesitate to contact me or Executive Director Jim Pasco in my Washington, D.C. office.

Sincerely,

CHUCK CANTERBURY,
National President.

NATIONAL ORGANIZATION OF
BLACK LAW ENFORCEMENT EXECUTIVES,
Alexandria, VA, June 8, 2009.

Hon. PATRICK J. LEAHY,
U.S. Senate,
Washington, DC.

Hon. JEFF SESSIONS,
U.S. Senate,
Washington, DC.

DEAR SENATORS LEAHY AND SESSIONS: The National Organization of Black Law Enforcement Executives (NOBLE), an organization of approximately 3,000 primarily African American law enforcement CEOs and command level officials writes to express its support for President Barack Obama's nomination of U.S. District Court Judge Sonia Sotomayor as Associate Justice of the U.S. Supreme Court.

It is critically important to NOBLE, that a Supreme Court justice exercises the ability to interpret the Constitution in a manner that respects the fundamental rights of all people, and that is fair. Judge Sotomayor has credible service; her transition from local prosecutor, to U.S. District Court judge, to U.S. Appeals Court jurist has afforded her the opportunity to experience the breadth of criminal, civil and administrative law issues. The critical issues involving the dialectical contradictions of inequities and fairness across the spectrum of employment, education, housing, the status of juvenile offenders and the enforcement of law are of deep concern to us and are issues that we believe she will be sensitive to.

Furthermore, as the cases before the Court become more challenging, and with science and technology related issues advancing at such a rapid pace, we believe that Judge Sotomayor is imminently qualified to look at our 200-year-old Constitution in a manner that is relevant to today's world. It is interesting to note a recent White House Press Office statistic, "If confirmed, Sotomayor would bring more federal judicial experience to the Supreme Court than any justice in 100 years, and more overall judicial experience than anyone confirmed for the Court in the past 70 years".

Law enforcement is a profession that is constantly evolving and we believe that there is a seat among the top of that criminal justice system for this great American. We trust that the Senate will look at her character and act quickly on her confirmation.

Respectfully,

JOSEPH A. McMILLAN,
National President.

FEDERAL HISPANIC LAW ENFORCEMENT OFFICERS ASSOCIATION,
Tampa, FL, July 16, 2009.

Hon. PATRICK LEAHY,
Chairman,

Hon. JEFF SESSIONS,
Ranking Member,
Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR SENATORS LEAHY AND SESSIONS, The Federal Hispanic Law Enforcement Officers

Association (FHLEOA) is pleased to join the myriad of other law enforcement groups and associations throughout our nation in support of the president's nomination of Judge Sonia Sotomayor to serve as associate justice of the United States Supreme Court.

Judge Sotomayor's personal story, educational achievements, prosecutorial history, and overall common sense approach and commitment to the law and law enforcement are indeed impressive. But more impressive is the fact that if confirmed, she will bring more federal judicial experience to our highest court than any justice in the last hundred years.

Her record as a public servant is simply outstanding, and her court rulings are indicative of a clear understanding of the law. We believe our nation will be well served with Judge Sotomayor as an Associate Justice of the Supreme Court.

FHLEOA is proud to endorse the nomination of Judge Sotomayor to the U.S. Supreme Court and we look forward to her quick confirmation by the Senate.

Respectfully,

SANDALIO GONZALEZ,
National President.

UNITED STATES HISPANIC
CHAMBER OF COMMERCE,
Washington, DC, June 23, 2009.

Hon. PATRICK LEAHY,
Russell Senate Office Building,
Washington, DC.

DEAR SENATOR LEAHY: On behalf of the United States Hispanic Chamber of Commerce (USHCC)—the national representative for almost 3 million Hispanic-owned businesses—and the undersigned organizations, we write to express our support for the confirmation of Judge Sonia Sotomayor as Associate Justice of the Supreme Court of the United States. In her seventeen years of service to date as a federal trial and appellate judge, and throughout the course of her entire career, Judge Sotomayor has strongly distinguished herself through her outstanding intellectual credentials and her deep respect for the rule of law, establishing herself beyond question as fully qualified and ready to serve on the U.S. Supreme Court.

Judge Sotomayor will be an impartial, thoughtful, and highly-respected addition to the Court. Her unique personal background is compelling, and will be both a tremendous asset while serving on the Court and a historic inspiration to others. Her legal career further demonstrates her qualifications to serve in this position. After graduating from Yale Law School, where she served as an editor for the *Yale Law Journal*, Judge Sotomayor spent five years as a criminal prosecutor in Manhattan. She then spent eight years as a corporate litigator with the firm of Pavia and Harcourt, where she gained expertise in a wide range of civil law areas such as contracts and intellectual property. In 1992, on the bipartisan recommendation of her home-state Senators, President George H.W. Bush appointed her District Judge for the Southern District of New York. In recognition of her outstanding record as a trial judge, President Bill Clinton elevated her to the U.S. Court of Appeals in 1998.

During her long tenure on the federal judiciary, Judge Sotomayor has participated in thousands of cases, and has authored approximately 400 opinions at the appellate level. She has demonstrated a thorough understanding of a wide range of highly complicated legal issues, and has a strong reputation for deciding cases based upon the

careful application of the facts to the law. Her record and her inspiring personal story indicate that she understands the judiciary's role in protecting the rights of all Americans, in ensuring equal justice, and respecting our Constitutional values—all within the confines of the law. Moreover, her well-reasoned and pragmatic approach to cases will allow litigants to feel, regardless of the outcome, that they were given a fair day in court.

Given her stellar record and her reputation for fairness, Judge Sotomayor has garnered broad support across partisan and ideological lines, earning glowing praise from colleagues who know her best in the judiciary, law enforcement community, academia, and the legal profession. Her Second Circuit colleague (and also her former law professor) Judge Guido Calabresi describes her as "a marvelous, powerful, profoundly decent person. Very popular on the court because she listens, convinces and can be convinced—always by good legal argument. She's changed my mind, not an insignificant number of times." Judge Calabresi also discredited concerns about Judge Sotomayor's bench manner, explaining that he compared "the substance and tone of her questions with those of his male colleagues and his own questions. And I must say I found no difference at all." Judge Sotomayor's colleague Judge Roger Miner, speaking of her ideology, argued that "I don't think I'd go as far as to classify her in one camp or another. I think she just deserves the classification of outstanding judge." And New York District Attorney Robert Morgenthau, her first employer out of law school, hailed her for possessing "the wisdom, intelligence, collegiality, and good character needed to fill the position for which she has been nominated."

We urge you not to be swayed by the efforts of a small number of ideological extremists to tarnish Judge Sotomayor's outstanding reputation as a jurist. These efforts have included blatant mischaracterizations of a handful of her rulings, as well as efforts to smear her as a racist based largely on one line in a speech that critics have taken out of context from the rest of her remarks. The simple fact is that after serving seventeen years on the federal judiciary to date, she has not exhibited any credible evidence whatsoever of having an ideological agenda, and certainly not a racist one. We hope that your committee will strongly reject the efforts at character assassination that have taken place since her nomination.

In short, Judge Sotomayor has an incredibly compelling personal story and a deep respect for the Constitution and the rule of law. Her long and rich experiences as a prosecutor, litigator, and judge match or even exceed those of any of the Justices currently sitting on the Court. Furthermore, she is fair-minded and ethical, and delivers thoughtful rulings in cases based upon their merits. For these reasons, the undersigned organizations strongly urge you to swiftly confirm Judge Sotomayor to the Supreme Court.

Sincerely,

USHCC

ARIZONA HISPANIC
CHAMBER OF COMMERCE,

June 29, 2009.

Hon. PATRICK J. LEAHY,
Chairman, Committee on the Judiciary,
U.S. Senate, Washington, DC.

Hon. JEFF SESSIONS,
Ranking Member, Committee on the Judiciary,
U.S. Senate, Washington, DC.

DEAR CHAIRMAN LEAHY AND RANKING MEMBER SESSIONS: As the new President and CEO

of the Arizona Hispanic Chamber of Commerce, I write to express our organization's support for the confirmation of Judge Sonia Sotomayor as Associate Justice of the Supreme Court of the United States. In her seventeen years of service to date as a federal trial and appellate judge, and throughout the course of her entire career, Judge Sotomayor has strongly distinguished herself through her outstanding intellectual credentials and her deep respect for the rule of law, establishing herself beyond question as fully qualified and ready to serve on the Supreme Court.

Judge Sotomayor will be an impartial, thoughtful, and highly-respected addition to the Supreme Court. Her unique personal background is compelling, and will be both a tremendous asset to her on the Court and a historic inspiration to others. Her legal career further demonstrates her qualifications to serve on our nation's highest court.

During her long tenure on the federal judiciary, Judge Sotomayor has participated in thousands of cases, and has authored approximately 400 opinions at the appellate level. She has demonstrated a thorough understanding of a wide range of highly complicated legal issues, and has a strong reputation for deciding cases based upon the careful application of the facts of cases to the law.

Judge Sotomayor has garnered broad support across partisan and ideological lines, earning glowing praise from colleagues in the judiciary, law enforcement community, academia, and legal profession who know her best.

I urge you not to be swayed by the efforts of a small number of detractors who only wish to tarnish Judge Sotomayor's outstanding reputation as a jurist. These efforts have included blatant mischaracterizations of a handful of her rulings, as well as efforts to smear her as a racist based largely on one line in a speech that critics have taken out of context from the rest of her remarks. We hope that your committee will strongly reject the efforts at character assassination that have taken place since her nomination.

In short, Judge Sotomayor has an incredibly compelling personal story and a deep respect for the Constitution and the rule of law. Her long and rich experiences as a prosecutor, litigator and judge match or even exceed those of any of the Justices currently sitting on the Court. Furthermore, she is fair-minded and ethical, and delivers thoughtful rulings in cases based upon their merits. For these reasons, I strongly urge you to vote to confirm Judge Sotomayor.

Respectfully,

ARMANDO A. CONTRERAS,
President and CEO,
Arizona Hispanic Chamber of Commerce.

FORT WORTH HISPANIC
CHAMBER OF COMMERCE,
17 July 2009.

Hon. PATRICK J. LEAHY,
Senator of the United States of America, Chair-
man, Committee on the Judiciary, U.S. Sen-
ate, Washington, DC.

Subject: Judge Sonia Sotomayor confirmation recommendation.

DEAR SENATOR LEAHY: The Fort Worth Hispanic Chamber of Commerce's Board of Directors and membership are writing on behalf of Judge Sonia Sotomayor's confirmation as the next United States Supreme Court Justice. We recommend your committee's most favorable and highest recommendation possible to the Senate in favor of her confirmation.

The Fort Worth Hispanic Chamber of Commerce, including experienced federal and state court attorneys, have reviewed Judge Sotomayor's education, experience and her opinions as a jurist; it is our consensus she is eminently qualified, talented and possesses the desire to be an excellent Supreme Court justice. It is clear from an early age she has been driven to excel; a 1976 Princeton University summa cum laude graduate and a graduate of the Yale University School of Law. While at Yale Law School, she was selected to serve as an editor of the Yale Law Journal. Her legal experience includes serving as a New York County Assistant District Attorney, and partner with the law firm of Pavia & Harcourt focusing on intellectual property, international litigation and complex export trading cases. Judge Sotomayor has distinguished herself as a U.S. District Court Judge for the Southern District of New York and now as judge with the United States Court of Appeals for the Second Circuit.

Her proven record on a variety of topics, issues and legal reasoning make her an excellent nomination. It is our firm belief Judge Sotomayor will apply and interpret the legal precedents under the law and will uphold the law with equal justice. We highly endorse Judge Sotomayor's confirmation and urge your vote of approval at your earliest convenience.

Sincerely,

ROSA NAVEJAR,
President/CEO.

Mr. MENENDEZ. Mr. President, with that, I yield the floor.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. WHITEHOUSE. Mr. President, I am honored to join my distinguished colleague from New Jersey here today on the Senate floor to speak in support of the confirmation of Judge Sonia Sotomayor as the next Associate Justice of the U.S. Supreme Court.

I had the privilege to sit on the Judiciary Committee for her confirmation hearing, and I join all of my committee colleagues on both sides of the aisle who have complimented Chairman LEAHY for a very well-run hearing. I was proud to vote for Judge Sotomayor in the Judiciary Committee, and I will be proud to vote for her confirmation here on the Senate floor.

Judge Sotomayor's remarkable education and professional qualifications, her commitment to public service, her uncontroversial 17-year record on the Federal bench—longer than any nominee in 100 years—her responsiveness and patient judicial temperament at the hearing, all confirm to me her pledge that she will respect the role of Congress as representatives of the American people; that she will decide cases based on the law and the facts before her; that she will not prejudge any case but listen to every party that comes before her; and that she will respect precedent and limit herself to the issues that the Court must decide; in short, that she will use the broad discretion of a Supreme Court Justice wisely.

I applaud those of my colleagues who have acknowledged that Judge

Sotomayor falls well within the mainstream of the American legal profession. At the same time, it is disappointing that so few Republican colleagues have been willing to recognize her clear qualifications for our highest Court. The nearly unanimous party-line opposition offered by Republicans in committee and here on the floor raises serious concerns whether some of my colleagues would ever be willing to vote for anyone outside of the Federalist Society. To my Republican colleagues in opposition, I ask: What Democratic nominee would you vote for, if not Judge Sotomayor, with her vast experience, her commitment to the rule of law, proven indisputably over 17 years, her remarkable credentials, and her extraordinary moving American life story?

Unfortunately, Judge Sotomayor seems to be walking proof that conservative political orthodoxy is now their confirmation test, masked as concerns about judicial activism. Many of my Republican colleagues unfairly ignore her long record to base criticisms on strained interpretations of a few routine and appropriate circuit court opinions and a few remarks taken out of context. Those criticisms feel, quite frankly, like the criticisms of someone who is determined to find fault with a nominee.

Take, for example, the New Haven firefighters case. The *per curiam* opinion in *Ricci* was based on controlling second circuit and Supreme Court precedent. The sixth circuit took the same approach in a similar case arising in Memphis. The role of a circuit court is to follow existing precedence of the Supreme Court and the circuit court. That is what the *Ricci per curiam* did. The Supreme Court may have reversed, but it did so 5 to 4 on the basis of an entirely new test it created. It is absurd to call Judge Sotomayor an activist for following existing precedent. If you want a judicially conservative opinion, the *Ricci per curiam* is just that.

The decision in *Maloney* was also properly conservative in a judicial sense. It approaches with caution a newly minted and narrowly enacted constitutional right whose extension to the States would upset generations of practice and experience by sovereign States regulating guns within their borders. A seventh circuit panel, with two very prominent conservative judges on it, correctly did exactly the same thing. A ninth circuit panel reached a different conclusion, and then that decision was vacated by the circuit to reconsider that case *en banc*.

Rather than engaging in a serious inquiry of Judge Sotomayor's fitness for the Supreme Court, many of my colleagues have made this nomination into a referendum on whether the newly minted right to bear arms should be incorporated against the

States for the first time in our Nation's history. This is doubly unfair. First, Judge Sotomayor could not answer questions at her hearing that would suggest how she would rule in later cases. That is inappropriate. Second, it is inappropriate to try to force on a judge a particular political view as the price of admission to her judicial office.

Criticisms of a few stray lines in Judge Sotomayor's various speeches are equally perplexing. Judge Sotomayor's long and noncontroversial 17-year judicial record should allay any concerns about those remarks, but so should the context of those speeches themselves. The "wise Latina" comment we have heard so much about came in a speech that argued how important it is for judges to guard against bias and to be aware of their own prejudices. Is it not better and truer to admit that we all have prejudices we must manage than to pretend that White males form some sort of ideal cultural baseline that has no biases?

Senator SPECTER said it well at the committee vote. "There is nothing wrong with a little ethnic pride and a desire to encourage her law student audience." Maybe we should try to put ourselves in their shoes. Perhaps, with a little empathy ourselves, it might be easier to understand how a profession and a judiciary dominated by White males might look to those young law students, and how important a little encouragement to them might be that their experiences might give them something valuable to contribute; that they are not the exception; that they are welcome and fully a part of our society, and that they bring something valuable not only to the profession but, one day, perhaps, even to the judiciary.

In sum, my Republican colleagues' criticisms of Judge Sotomayor appear to be grounded in conservative political ideology rather than legitimate concern that Judge Sotomayor is not fit to serve on the Supreme Court, grounded in a desire for more of the rightwing Justices who in recent years have filled out a conservative wing on the Supreme Court. That wing has marched the Court deliberately to the right in the last few years, completely discrediting the Republican claim that judges are mere "umpires."

Jeffrey Toobin is a well-respected legal commentator, particularly focusing on the Supreme Court. He has recently reported:

In every major case since he became the Nation's 17th Chief Justice, Roberts has sided with the prosecution over the defendant, the State over the condemned, the executive branch over the legislative, and the corporate defendant over the individual plaintiff. And is it a coincidence that this pattern has served the interests and reflected the values of the contemporary Republican Party?

Some coincidence. Some umpire.

The phrase "liberal judicial activism" is now conservative speak for any outcome the far right dislikes. They did not use it when the conservative block of the Court announced, by the barest of a 5-to-4 margin, an individual right to bear arms that had gone unnoticed by the Supreme Court for the first 220 years of its history. If that is not an activist decision, the term has no meaning. It is just activism that conforms with a deliberate Republican strategy of many years duration to pack onto America's courts proven conservative judges who will deliver the political goods they seek.

Setting aside all this politics, we should also never forget, never overlook the historic role that judges play in protecting the less powerful among us. We should always appreciate how a real-world understanding of the real-life impact of judicial decisions is a proper and necessary part of the process of judging.

Judge Sotomayor's wide experience, I hope, will bring her a sense of the difficult circumstances faced by the less powerful among us—the woman on the phone, shunted around the bank from voice mail to voice mail for hours as she tries to find someone to help her avoid foreclosure for her home; the family struggling to get by in the neighborhood where the police only come with raid jackets on; the couple up late at night at the kitchen table after the kids are in bed sweating out how to make ends meet that month; or the man who believes a little differently or looks a little different or thinks things should be different. If Justice Sotomayor's wide experience gives her empathy for those people so that she gives them a full and fair hearing and seeks to understand the real-world impact of her decisions on them, she will be doing nothing wrong—nothing wrong by the measure of history, nothing wrong by the measure of justice.

Experience, judgment, wise use of discretion, and a willingness to stand against oppression have always been the historic hallmarks of a great judge.

As to experience, Justice Oliver Wendell Holmes famously explained:

The life of the law has not been logic; it has been experience. The felt necessities of the time, the prevalent moral and political theories, intuitions of public policy, avowed or unconscious, even the prejudices which judges share with their fellow-men have had a good deal more to do than the syllogism in determining the rules by which men should be governed. The law embodies the story of a nation's development through many centuries, and it cannot be dealt with as if it contained only the axioms and corollaries of a book of mathematics.

As to judgment, Justice John Paul Stevens has observed:

[T]he work of federal judges from the days of John Marshall to the present, like the work of the English common-law judges, sometimes requires the exercise of judgment—a faculty that inevitably calls into

play notions of justice, fairness, and concern about the future impact of a decision.

As to discretion, Justice Benjamin Cardozo wrote:

The judge, even when he is free, is still not wholly free. He is not to innovate at pleasure. He is not a knight-errant, roaming at will in pursuit of his own ideal of beauty or of goodness. He is to draw his inspiration from consecrated principles. He is not to yield to spasmodic sentiment, to vague and unregulated benevolence. He is to exercise a discretion informed by tradition, methodized by analogy, disciplined by system, and subordinated to "the primordial necessity of order in the social life." Wide enough in all conscience is the field of discretion that remains.

And, as Alexander Hamilton explained in the Federalist Papers, courts were designed to be our guardians against "those ill humors, which the arts of designing men, or the influence of particular conjunctures, sometimes disseminate among the people . . . and which . . . have a tendency . . . to occasion . . . serious oppressions of the minor party in the community." Those oppressions tend to fall on the poor and voiceless. But as Hamilton noted, "[c]onsiderate men, of every description ought to prize whatever will tend to beget or fortify that temper in the courts: as no man can be sure that he may not be tomorrow the victim of a spirit of injustice, by which he may be a gainer to-day." We should not discard the wisdom of centuries.

Experience, judgment, discretion, and protection from oppression—the standard for judges of Hamilton, Holmes, Cardozo, and Stevens. History stands with them. And thoughtful people will note that empathy is a common thread through each of these characteristics.

Why might empathy matter? When might it make a difference? Take, for example, the history of the Colfax massacre.

Go back to Sunday, April 13, 1873 when a gang of White men murdered more than 60 Black freedmen in Colfax, LA. Some were burned in a courthouse where they had taken refuge; others were shot as they fled the burning courthouse; others were taken prisoner and then executed. U.S. Attorney James Roswell Beckwith determined to prosecute white citizens involved in the Colfax Massacre—not a popular call in those days. The case was tried before a U.S. District Judge William B. Woods, who determined that rule of law should prevail in his district. Predictably, polite White society was outraged. It took notable human empathy in that place and time to see the massacre of the Black freedmen as a crime, and to contemplate trying White men for the murder of Black men. The case was brought as one of the first applications of the Federal Enforcement Act, implementing the Constitution's new 14th amendment, so there was wide room for judicial discretion in that un-

charted area of law—no "balls and strikes" here. District Judge Woods assured a fair trial, but he also was prepared to honor Congress's desire that outrages upon the Black community should be punished as crime. He had sufficient empathy with the widows and children of the slain freedmen to take seriously their need for vindication, and he had sufficient courage to face the scorn and anger of the White community.

Another judge was involved, U.S. Supreme Court Justice Joseph P. Bradley, who under the procedural rules of the time "rode circuit" for Louisiana, and could sit in on trials. And sit in he did. He had no sympathy for the former slaves, and little regard for Congress's intent to punish the abuse of freedmen. Disagreeing from the trial court bench with Judge Woods, Justice Bradley found repeated technical faults with the indictments, took a restricted view of the authorities of the 14th amendment, dismissed the charges, and released the defendants to flee, on low bail, pending an appeal.

The U.S. Supreme Court upheld its colleague Bradley's opinions, thereby gutting the 14th amendment and the Enforcement Act for a generation, and a wave of murder and violence by Klansmen and White League members, emboldened by de facto immunity from prosecution, swept the South. Reconstruction was vitiated in those weeks. Justice, for the murder of a Black man by a White, departed the South for nearly a century.

History and the law ultimately proved district Judge Woods correct, but how much turned on the character of two judges: one who had the empathy to see Black men as victims of crime, and the courage to outrage White opinion by allowing the trial of White community leaders, before a mixed jury no less; the other a judge who valued the status quo, and recoiled from any shock to proper White opinion and authority; indeed, who was the reflection of that proper opinion.

That is what we mean by empathy, and while the divisions in our society are less today, there are still people who feel voiceless, whose voices a judge must be attuned to hear; there are still Americans who come to court bearing disadvantages that have nothing to do with the merits of their case. Empathy to look through those disadvantages to see the real merits of the case, even when it is unpopular or offends the power structure is the hallmark of a great judge. The words of Hamilton, Holmes, Stevens, and Cardozo I have quoted display it as history; the contrasting approaches of the two judges after the Colfax massacre display it as justice.

My Republican colleagues' misunderstanding of judicial history has led to a missed opportunity for bipartisan support of a highly qualified and moderate

judge who falls well within the mainstream of American legal thought. We could be celebrating the first Latina justice of the Supreme Court as a great American achievement. Instead we are having to defend basic principles of American history from assault from the right. I hope that, as the future looks back on this day, it will be the historic nature of this nomination that will be remembered, not the strange and strained efforts to impose right-wing political orthodoxy on the courts that defend our constitutional rights.

I look forward to Judge Sotomayor's service as an excellent Supreme Court Justice. I will vote proudly for her confirmation.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter of support of Justice Sotomayor from New York City's mayor, Michael Bloomberg.

I also ask to have printed in the RECORD a letter of support for Judge Sotomayor from former FBI Director Louis Freeh.

I yield the floor.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE CITY OF NEW YORK,
OFFICE OF THE MAYOR,
New York, NY. July 7, 2009.

Hon. PATRICK J. LEAHY,
Chairman, Judiciary Committee, U.S. Senate
Washington, DC.

Hon. JEFF SESSIONS,
Ranking Member, Judiciary Committee,
U.S. Senate,
Washington, DC.

DEAR CHAIRMAN LEAHY AND SENATOR SESSIONS: As Mayor of the largest city in the country and the place where Judge Sonia Sotomayor has spent her career, I strongly support President Barack Obama's nomination of Judge Sotomayor to serve as an Associate Justice of the United States Supreme Court.

One of my responsibilities as Mayor is to appoint judges to New York's Family and Criminal Courts, which gives me the opportunity to assess the qualifications of many judicial candidates. Over the past seven and half years, I have interviewed candidates for more than 40 judicial seats and have, like you, developed a strong sense of the qualities that will strengthen our justice system. Based on this experience, I have great confidence that Judge Sotomayor's rulings demonstrate her knowledge of the law, objectivity, fairness, and impartiality, which are essential qualities for any judge. Just as important, she possesses the character, temperament, intelligence, integrity, and independence to serve on the nation's highest court, and her well-respected record of interpreting the law and applying it to today's world is perhaps the best indication of her exceptional ability as a judge.

Judge Sotomayor's impressive 30-year career has given her experience in nearly all areas of the law. As an Assistant District Attorney in Manhattan, she earned a reputation as an effective prosecutor. As a Judge in the Southern District of New York, she established a record that amply supported her appointment to the Second Circuit. And in her current role as a Judge in the U.S. Court of Appeals for the Second Circuit, she is admired for her knowledge and understanding

of legal doctrine, having taken part in over 3,000 panel decisions and authored close to 400 opinions. In each role, she has served the public with integrity and diligence.

Judge Sonia Sotomayor is an outstanding choice for the United States Supreme Court, and I stand firmly behind her candidacy.

Sincerely,

MICHAEL R. BLOOMBERG,
Mayor.

—
FREEH SPORKIN & SULLIVAN, LLP,
July 9, 2009.

Hon. PATRICK LEAHY,
Chairman, U.S. Senate Judiciary Committee,
Washington, DC.

Hon. JEFF SESSIONS,
Ranking Member, U.S. Senate Judiciary Committee,
Washington, DC.

DEAR SENATORS: It is with tremendous pride in a former colleague that I write to recommend wholeheartedly that you confirm Sonia Sotomayor to be an Associate Justice of the Supreme Court. Judge Sotomayor has the extensive experience and the judicial qualities that make her eminently qualified for this ultimate honor and I look forward to watching her take her place on the Nation's highest Court.

I first met Judge Sotomayor in 1992 when she was appointed to the United States District Court for the Southern District of New York. As the then newest judge in the storied Courthouse at Foley Square in lower Manhattan, we followed the tradition of having the newly-minted judge mentored by the last-arriving member of the bench. Despite the questionable wisdom of this practice, I had the privilege of serving as Judge Sotomayor's point of contact for orientation and to help her get underway as she took on a full, complex civil and criminal case docket.

A few weeks of "New Judges School" sponsored by the Administrative Office of the Courts does not in any meaningful way begin to prepare a new District Judge for the unrelenting rigor of conferences, motions, hearings, applications, trials and other miscellaneous duties—including appeals from the Bankruptcy Court—which instantly construct what often appears to be an overwhelming schedule for a new judge. To make matters more challenging, when I was a new judge the Court followed the tradition of allowing the active judges to select a fixed number of their pending cases for reassignment to the new arrival.

Into this very pressurized and unforgiving environment, where a new judge's every word, decision, writing and question is scrutinized and critiqued by one of the harshest, professional audiences imaginable, Judge Sotomayor quickly distinguished herself as a highly competent judge who was open-minded, well-prepared, properly demanding of the lawyers who came before her, fair, honest, diligent in following the law, and with that rare and invaluable combination of legal intellect and "street smarts."

As I spent a lot of time reading her opinions, observing her in the courtroom conducting the busy, daily docket of a trial judge, and discussing her cases and complex legal issues, I was greatly impressed with how quickly she mastered and employed the critical skills of her new position.

To me, there is no better measure by which to evaluate a judge than the standards of the former Chief Judge of the U.S. District Court of Minnesota and nationally renowned American jurist, Edward J. Devitt. A former Member of Congress and World War II Navy hero, Judge Devitt was appointed to the federal

bench by President Eisenhower and became one of the country's leading trial judges and teacher of judges. A standard Jury Instruction textbook (Devitt and Blackmun) as well as the profession's most coveted award recognizing outstanding judges, the Devitt Award, bears his name.

I recently had the honor of participating in the dedication of a courtroom named for Judge Devitt. The judges and lawyers who spoke in tribute to Judge Devitt very ably and insightfully described the critical characteristics which define and predict great judges. But rather than discuss Judge Devitt's many decisions, particular rulings or the "sound bite" analyses which could have been parsed from the thousands of complex and fact specific cases which crossed his docket, they focused on those ultimately more profound and priceless judicial qualities which ensure that Article Three judges with lifetime tenure uphold the Rule of Law with fairness, courage and justice for all.

Teaching hundreds of new American judges over several decades, Judge Devitt liked to use a "nutshell version" for emphasis and because he always got right to the heart of things. So he offered three rules:

1. "Judging takes more than mere intelligence;
2. Always take the bench prepared. Listen well to all sides, stay open as you are listening and recognize any pre-conceptions that you may bring to the matter. Then, make a decision and never look back;
3. Call them as you see them."

Sonia Sotomayor would have gotten an "A plus" from the "Judge from Central Casting," as Judge Devitt was often called by his peers.

A great part of Judge Devitt's legacy is his famous "Ten Commandments to Guide the New Federal Judge," which he gave me, and which I passed on to Judge Sotomayor:

1. "Be Kind;
2. Be Patient;
3. Be Dignified;
4. Don't Take Yourself Too Seriously;
5. Remember That a Lazy Judge Is a Poor One;
6. Don't Be Dismayed When Reversed;
7. Remember There Are No Unimportant Cases;
8. Don't Impose Long Sentences;
9. Don't Forget Your Common Sense; and
10. Pray For Divine Guidance."

In my brief role as Judge Sotomayor's "second seat" on the Southern District trial bench, I probably spent more time with her in those first months than any other member of our great Court. And I was delighted to observe and conclude that she exhibited all the desired characteristics that Judge Devitt prescribed for his "students."

Since 1992 I have followed Judge Sotomayor's career on the bench both as a trial judge and later as a member of our Second Circuit Court of Appeals. Along with my former colleague judges and lawyers, we have seen her grow and mature into a truly outstanding judge, who embodies all of Judge Devitt's wise counsel and the most prized characteristics of judicial courage, integrity, intelligence and fair adjudication of the Rule of Law.

Judge Sotomayor's early demonstration of judicial restraint, appropriate deference to the other two Branches of government and her fidelity to upholding the rule of law can perhaps best be seen in a 1998 case. Sitting as a District Judge, she carefully heard a minimum wage lawsuit and, in recognition of the limits of judicial power, she relied on the statutory text and precedent to reach her de-

cision: "The question of whether such a program should be exempted from the minimum wage laws is a policy decision either Congress or the Executive Branch should make."

Judge Sotomayor will bring great legal as well as judicial experience to the Supreme Court and will serve there with distinction in the fine tradition of Judge Devitt. As the only "trial judge" on the current Court, she will import an immense wealth of experience which comes uniquely from judges who preside over cases with witnesses, juries, real time procedural and evidence rulings and the challenging (and unpredictable) dynamics of a trial courtroom. It will also be a very valuable asset for the Court to have a former criminal prosecutor (it has only one now) who was widely respected by judges, defense attorneys and law enforcement officers.

Most importantly, Judge Sotomayor will continue to exemplify the "Devitt Rules" we want all our judges to follow, and the courage, integrity and experience required to protect the Rule of Law. The efforts by some to discredit the Judge are far afield from the eminent jurist whom I know, and I hope that no Senator will be misled or motivated by partisan rancor to vote against someone who so fully fits the measure of what we should want in a Supreme Court justice. I hope you will consider her nomination expeditiously so she is confirmed and prepared to participate in the Court's first session on September 9, 2009.

Sincerely,

LOUIS J. FREEH.

The PRESIDING OFFICER. The Senator from Utah is recognized.

Mr. HATCH. Mr. President, I enjoyed my colleague's remarks. I don't agree with him, but he is certainly a great colleague and we appreciate him.

Mr. President, I rise today to explain why I cannot support the nomination of Judge Sonia Sotomayor to be an Associate Justice of the Supreme Court. I do so with regret because the prospect of a woman of Puerto Rican heritage serving on the Supreme Court says a lot about America. Judge Sotomayor has achieved academic and professional success, and I applaud her public service. But in the end, her record creates too many conflicts with fundamental principles about the judiciary in which I deeply believe.

It did not have to be this way. President Obama could have taken a very positive step for our country by choosing a Hispanic nominee whom all Senators could support. President Obama could have done so and I regret that he did not.

I commend the distinguished chairman and ranking member of the Judiciary Committee, Senators LEAHY and SESSIONS, for conducting a fair and thorough confirmation hearing. Judge Sotomayor herself said that the hearing was as gracious and fair as she could have asked for.

I evaluate judicial nominees by focusing on qualifications, which include not only legal experience but, more importantly, judicial philosophy. Judge Sotomayor's approach to judging is more important to me than her resume. I ask unanimous consent to have

printed in the RECORD following my remarks an article that I published earlier this year in the Harvard Journal of Law & Public Policy. It is titled "The Constitution as the Playbook for Judicial Selection" and explains more fully the principles I will mention here.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1)

Mr. HATCH. President Obama has described the kind of judge he intends to appoint. As a Senator, he said that judges decide cases based on their "deepest values . . . core concerns . . . broader perspectives . . . and the depth and breadth of [their] empathy." As a presidential candidate, he pledged to appoint judges who indeed have empathy for certain groups. And as President, he has said that a judge's personal empathy is an essential ingredient in judicial decisions.

This standard is seriously out of sync with mainstream America. By more than 3 to 1 Americans believe that judges should decide cases based on the law as written, rather than on their own sense of fairness or justice. The American people reject President Obama's standard for the kind of judge we need on the Federal bench.

At the Judiciary Committee hearing, Judge Sotomayor said that her judicial philosophy is simply fidelity to the law. While some of my Democratic committee colleagues said that they wanted to avoid slogans, codewords, and euphemistic phrases, they apparently accepted this one at face value. Unfortunately, it begs rather than answers the important questions.

Some Senators on the other side of the aisle try to confine concerns about Judge Sotomayor's record to a single case and a single phrase. That political spin, I will admit, makes for a quotable sound-bite. But even a casual observer of this process knows that this political spin is simply not true.

Ironically, those who would narrowly characterize the case against confirmation want us to confine our examination of Judge Sotomayor's record only to her cases while ignoring her speeches and articles. A partial review, however, cannot provide a complete picture. Appeals court decisions that are bound by Supreme Court precedent are not the same as Supreme Court decisions freed from such constraints. Taking Judge Sotomayor's entire record seriously not only gives us more of the information we need, but also gives her the respect she deserves.

Debates over judicial nominations are debates over judicial power, and America's founders gave us solid guidance about the proper role of judges in our system of government. Judges interpret and apply written law to decide cases. While judges cannot change the words of our laws, they can still control statutes and the Constitution by controlling the meaning of those

words. That would result in the rule of judges, not the rule of law. To borrow Judge Sotomayor's phrase, judges would not have fidelity to the law, but fidelity to themselves.

In September 2001, Judge Sotomayor introduced Justice Antonin Scalia when he spoke at Hofstra Law School. She repeated a legend about Justice Oliver Wendell Holmes and Judge Learned Hand. Like Judge Sotomayor, Judge Hand served on both the Southern District of New York and the Second Circuit. As they departed after having lunch, Judge Hand called out: Do justice, sir, do justice. Justice Holmes replied: That is not my job, my job is to apply the law.

Is it a judge's role to do justice or to apply the law? President Obama says that a judge's personal empathy is an essential ingredient for doing justice. At the hearing on Judge Sotomayor's nomination, one of my Democratic colleagues invoked what he called "America's common law inheritance" to describe Federal judges with broad discretion to decide cases based on their personal notions of justice or fairness.

That may be the judiciary some of my colleagues would prefer, but it is not the judiciary America's Founders gave us. Federal judges are not common-law judges. They may not decide cases based on subjective feelings they find inside themselves, but only on objective law they find outside themselves. Thankfully, the American people overwhelmingly say today what America's Founders said, that judges must follow the law rather than their personal empathy to decide cases.

The question is which kind of Supreme Court Justice Sonia Sotomayor will be. In one speech that she gave several times over nearly a decade while she was on the bench, she spoke directly about how judges should approach deciding cases. In this speech, she said that factors such as race and gender affect how judges decide cases and, as she put it, "the facts I choose to see." She embraced the notion that there is no objectivity or neutrality in judging, and that impartiality is merely an aspiration which judges probably cannot achieve, and perhaps should not even attempt. She said that judges must decide when their personal sympathies and prejudices are appropriate in deciding cases.

Judge Sotomayor and her advocates have tried unsuccessfully to blunt this speech's more controversial edges. Their claim that she used the speech solely to inspire young lawyers or law students, even if true, is irrelevant because the speech is controversial for its content, not its audience.

My concern only grew after discussing this speech with Judge Sotomayor during the hearing. Rather than adequately defend or disavow these views, she presented a different, and contradictory, picture. I am not

the only one who noticed. The Washington Post editorialized that Judge Sotomayor's attempts to explain away or distance herself from past statements "were unconvincing and at times uncomfortably close to disingenuous, especially when she argued that her reason for raising questions about gender or race was to warn against injecting personal biases into the judicial process. Her repeated and lengthy speeches on the matter do not support that interpretation."

In another speech just a few months ago, Judge Sotomayor addressed whether judges may use foreign law to interpret and apply American law in deciding cases. The distinguished ranking member of the committee mentioned this as well. She said that foreign law "will be very important in the discussion of how we think about the unsettled issues in our own legal system." She endorsed the idea that judges may, as they interpret American law, consider anything, from any source, that they find persuasive.

Once again, Senators discussed this issue with Judge Sotomayor at her hearing. And once again, she neither defended nor disavowed these controversial statements but presented a different, contradictory picture. In her speech, she hoped that judges would continue to consult what others have said, including foreign law, to "interpret our law in the best way we can." But in the hearing, she said that "I will not use foreign law, to interpret the Constitution or American statutes." In her speech, she said that judges may use ideas from any source that they find persuasive. But in the hearing, she said that foreign law cannot be used to influence a legal decision. These different versions are clearly at odds with each other.

Judge Sotomayor took a different tack in answering post-hearing questions. She said that decisions of foreign courts may not serve as "binding or controlling precedent" in deciding cases. The issue, however, is not whether a decision by the Supreme Court of France literally binds the Supreme Court of the United States. Of course it does not. The issue is whether that foreign decision may influence our Supreme Court in determining what our statutes and the Constitution mean. And in her answers to post-hearing questions, Judge Sotomayor once again said that decisions of foreign courts can indeed be "a source of ideas informing our understanding of our own constitutional rights."

In these speeches, Judge Sotomayor described how such things as race, gender, life experience, personal sympathies, or prejudices affect judges and their decisions. That is certainly possible. But I waited for her to say that judges have an obligation to eliminate the influence of these factors. I wanted her to say that because these things

undermine a judge's impartiality, judges must be vigilant to prevent their influence. That would have given me more solace about what Judge Sotomayor's phrase, fidelity to the law, really means. But she never said it. Instead, she endorsed the notion that judges may look either inside themselves to their empathy, or outside to foreign law, for ideas and notions to guide their decisions.

Turning to her cases, the Supreme Court has disagreed with Judge Sotomayor in nine of the ten cases it has reviewed, three of them in the most recent Supreme Court term alone. That is nine of her ten cases they reviewed. And these were not close decisions, either. The total vote in the cases reversing Judge Sotomayor was a lopsided 52-19.

In one case, Judge Sotomayor had held that the Environmental Protection Agency could not consider cost-benefit analysis when adopting a regulation. The Supreme Court reversed her, citing its own precedents extending back more than 30 years and holding that the EPA's use of cost-benefit analysis was well within the bounds of its statutory authority.

In another case, Judge Sotomayor had reopened part of a bankruptcy proceeding that had closed more than 20 years ago to resurrect a tort suit. Justice Souter, whom Judge Sotomayor would replace, wrote the opinion for the Supreme Court's 7-2 decision reversing her.

In another case, Judge Sotomayor declared unconstitutional a State law providing for political party election of judges because she felt the law did not give people what she called a "fair shot." The Supreme Court unanimously reversed her, saying that traditional electoral practice "gives no hint of even the existence, much less the content," of the fair-shot standard Judge Sotomayor had invented.

In one case, the Supreme Court affirmed Judge Sotomayor's result but rejected her reasoning because her reading of the relevant statute "flies in the face of the statutory language."

And in the one case where the Supreme Court affirmed both Judge Sotomayor's result and reasoning, it did so by the slimmest 5-4 margin. This is a very shaky record on appeal.

The *Ricci v. DeStefano* case, which has been mentioned quite a lot around here, is one of the cases in which the Supreme Court reversed Judge Sotomayor. The Court reversed her result by a 5-4 vote but unanimously rejected her reasoning. In this case, Judge Sotomayor affirmed the city of New Haven's decision to throw out the results of a fairly designed and administered firefighter promotion exam because too few racial minorities passed it.

This case presents troubling questions of both process and substance.

Judge Sotomayor initially used a summary order that did not have to be circulated to the full Second Circuit. That bothered me a great deal, because judges know when they issue a summary order, the rest of the judges are not going to see it. She then converted it to a per curiam opinion that is permissible only when the law is entirely settled. The summary order and the per curiam opinion were each a mere single paragraph and neither appears to be an appropriate vehicle for deciding this challenging case.

On the merits, Title VII of the 1964 Civil Rights Act prohibits two kinds of discrimination. It prohibits disparate treatment, which is intentional, and disparate impact, which may be unintentional. Disparate treatment focuses on the motivation of an employment decision, while disparate impact focuses on its effect. While discrimination cases typically involve one or the other, the *Ricci* case involved both. In this case, the city claimed it had to engage in disparate treatment of those who passed the promotion exam because it feared a disparate impact lawsuit by those who failed the exam.

I point out that this case involved both disparate treatment and disparate impact because Judge Sotomayor and her advocates claim that her decision was based squarely on settled and longstanding Second Circuit and Supreme Court precedent. We have heard some of that here on the floor tonight. Contrary to her statement to me at the hearing, however, her one-paragraph opinion cited no precedent at all. The only case she cited was the district court opinion in that very case. But the district court actually acknowledged that this case was the opposite of the norm. Rather than those failing an employment test challenging the use of the results, in this case those who passed the test challenged the refusal to use the results. None of the precedents cited by the district court involved this kind of case.

For this reason, six of Judge Sotomayor's Second Circuit colleagues believed that the full circuit should have reviewed her decision, arguing that the case raised important questions of first impression in the Second Circuit and the entire Nation. When it reversed Judge Sotomayor, the Supreme Court similarly observed that there were few, if any, precedents in any court even discussing the issue in this case.

In a column published today in *National Journal*, the respected legal analyst Stuart Taylor carefully analyzed whether Judge Sotomayor's decision in *Ricci* was indeed compelled by precedent. We have all read Stuart Taylor over the years. He is one of the most prescient commentators and journalists with regard to the law. He concludes: "The bottom line is that Circuit precedents did not make

Sotomayor rule as she did. Supreme Court precedent favored the firefighters. Sotomayor's ruling was her own." I ask unanimous consent that Mr. Taylor's column appear in the *RECORD* following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 2.)

Mr. HATCH. In addition to claiming that her decision in *Ricci* was grounded in either Second Circuit or Supreme Court precedent, Judge Sotomayor offered at the hearing that the Sixth Circuit had addressed a similar issue in the same way. I can only assume she did so to imply that if the Sixth Circuit independently came to the same conclusion in a parallel case, then it would be difficult to say that Judge Sotomayor's decision in *Ricci* is controversial.

I would first note that in *Oakley v. City of Memphis*, the Sixth Circuit actually analyzed the case, applied the law to the facts, and issued a real opinion. I wish Judge Sotomayor had done that in her case. But more importantly, Judge Sotomayor failed to mention that the Sixth Circuit case was issued 3 months after hers and, in fact, relied upon her decision as persuasive authority. That is no evidence that her decision was procedurally or substantively sound.

Neither are her decisions on the Second Amendment right to keep and bear arms. Last year, in *Dist. of Columbia v. Heller*, the Supreme Court clearly identified the proper analysis for deciding whether the Second Amendment binds States as well as the Federal Government. Several months later, Judge Sotomayor ignored that directive and clung to her previous insistence, following a different analysis the Supreme Court had discarded, that the right to bear arms does not apply to the States. She also held that the right to bear arms is so insignificant that virtually any conceivable reason is sufficient to justify a weapons restriction.

When I asked her about these decisions at the hearing, she refused to acknowledge that the Supreme Court's so-called rational basis test is its most permissive legal standard. Yet this is practically a self-evident truth in the law, one that Judge Sotomayor herself cited and applied just last fall to uphold a weapons restriction in *Maloney v. Cuomo*.

She likewise gave short shrift to the fundamental right to private property. In *Didden v. Village of Port Chester*, Judge Sotomayor affirmed dismissal of a property owner's lawsuit after the village condemned his property and gave it to a developer. The Supreme Court, incorrectly in my view, had previously held in *Kelo v. City of New London* that economic development can constitute the public use for which the Fifth Amendment allows the taking of private property. In *Didden*,

however, the village had only announced a general plan for economic development. No taking of anyone's property had occurred. Mr. Didden sued only after the village actually took his property.

In yet another cursory opinion that for some reason took more than a year to produce, Judge Sotomayor denied Mr. Didden even a chance to argue his case. She said that the 3-year period for filing suit began not when the village actually took his property, but when the village earlier had merely announced its general development plan. In other words, Mr. Didden should have sued over the taking of his property before his property had been taken. But had he done so then, he would certainly have been denied his day in court because his legal rights had not yet been violated. This catch-22 amounts to a case of dismissed if he did, and dismissed if he did not. Once again, Judge Sotomayor gave inadequate protection to a fundamental constitutional right.

In another effort to blunt the impact of such controversial decisions, Judge Sotomayor's supporters attempt to portray her as moderate by observing that on the Second Circuit, she agreed with Republican-appointed colleagues 95 percent of the time. On the one hand, this is one of several misguided attempts to defend her by suggesting that a calculator is all it takes properly to evaluate a judicial record. On the other hand, however, this claim comes from the same Democratic Senators who voted against Justice Samuel Alito just a few years ago. On the Third Circuit, he had agreed with his Democratic-appointed colleagues 99 percent of the time over a much longer tenure. It shows how specious some of the arguments are.

Let me return to where I began. I believe that Judge Sotomayor is a good person. I respect her achievements and applaud her service to her community, the judiciary, and the country. While appointment of the first Puerto Rican Justice says a lot about America, however, I believe that appointing a Justice with her judicial philosophy says the wrong thing about the power and role of judges in our system of government.

A nominee's approach to judging is more important than her resume, especially on the Supreme Court where Justices operate with the fewest constraints. Judge Sotomayor has expressed particular admiration for Justice Benjamin Cardozo. His book on the judicial process contains a chapter titled "The Judge as a Legislator" in which he compares judges to legislators who decide difficult cases on the basis of personal reflections and life considerations. That sounds very much like President Obama's appointment standard and Judge Sotomayor's expressed judicial philosophy. I believe it is inconsistent with the limited role

that America's founders prescribed for judges in our system of government.

My colleagues know that I take a generous approach to the confirmation process and I believe some deference to the President of the United States and his choice is appropriate. I have rarely voted against any judicial nominee and took very seriously the question of whether to do so now. To that end, I studied her speeches, articles, and cases. I spoke with experts and advocates from different perspectives. I participated in all three question rounds during the Judiciary Committee hearing.

But in the end, neither general deference to the President nor a specific desire to support a Hispanic nominee could overcome the serious conflicts between Judge Sotomayor's record and the principles about the judiciary and liberty in which I deeply believe.

I was the one who started the Republican Senatorial Hispanic Task Force and ran it for many years, bringing Democrats, Independents, and Republicans together in the best interest of the Hispanic community to try to give them more of a voice. I feel pretty deeply about Hispanic people, as I do all people.

I just want everybody to know that this took a lot of consideration on my part to come to the conclusion I have. I wish President Obama had taken a different course, but this is the decision I have to make in this case. As I say, I like Judge Sotomayor. I particularly like her life story and her wonderful family. I did not want to vote against her but I think I have explained here some of the serious concerns I have.

EXHIBIT 1

THE CONSTITUTION AS THE PLAYBOOK FOR JUDICIAL SELECTION

Orrin G. Hatch*

The Federalist Society plays an indispensable role in educating our fellow citizens about the principles of liberty, a task that is both critical and challenging. It is critical because, as James Madison put it, "a well-instructed people alone can be permanently a free people."¹ The ordered liberty we enjoy is neither self-generating nor self-sustaining, but is based on certain principles that require certain conditions. Knowledge and defense of those principles and conditions will be the difference between keeping and losing our liberty.

This educational challenge, however, has perhaps never been more daunting. We live in a culture in which words mean anything to anyone, celebrities substitute for statesmen, and people are no longer well instructed. Forty-two percent of Americans do not know the number of branches in the federal government, and more than sixty percent cannot name all three.² Four times as many Americans say that a detailed knowledge of the Constitution is absolutely necessary as say they actually have such knowledge.³ Twenty-one percent of Americans believe the First Amendment protects the right to own a pet.⁴

A few factors contribute to this state of affairs. Most people get their information

about the legal system only from television. Unless people sue each other or commit crimes—habits we really should not encourage—they will likely have no firsthand knowledge or experience to draw from. Furthermore, people hold lawyers in low esteem. If you plug the term "lawyer joke" into Yahoo, it returns a whopping 25.7 million hits, a number on the rise almost as fast as the national debt. The problem with lawyer jokes is that most lawyers do not think they are funny and most other people do not think they are jokes. This low view of lawyers means people have little motivation to learn more about what lawyers and judges really do.

The media do not help this state of affairs. The Harvard Journal of Law & Public Policy recently published an excellent article by Michigan Supreme Court Justice Stephen Markman,⁵ who served as my chief counsel when I chaired the Senate Judiciary Subcommittee on the Constitution in the early 1980s. He describes how the media's penchant for focusing on winners and losers significantly shapes and distorts how people understand what judges actually do, often for the worse.⁶

Nonetheless, the timing of this Essay is auspicious in several respects. First, I write in the wake of two very relevant Federalist Society student symposia, last year's about the people and the courts⁷ and this year's about the separation of powers.⁸ Second, President Obama has been particularly clear from the time he was a candidate about his intention to appoint judges who will exercise a strikingly political version of judicial power.⁹ Third, he has already started acting on that intention by making his first judicial nominations.¹⁰ New Presidents typically make their first judicial nominations in July or even August, yet the Senate Judiciary Committee has already held a hearing on the President's first nominee to the U.S. Court of Appeals, and the President sent two more nominees to the Senate just a few days ago.

Mark Twain popularized the notion that there are three kinds of lies: lies, damned lies, and statistics.¹¹ I prefer Senator Daniel Patrick Moynihan's comment that you may be entitled to your own opinion, but not your own set of facts.¹² Either way, I will statistically describe two macro and two micro factors of the judicial confirmation process to show its recent transformation before turning to how it should be conducted going forward.

The two macro factors are hearings and confirmations. The Judiciary Committee held hearings for fewer judicial nominees during the 110th Congress than any Congress since before I entered the Senate. This lack of hearings is not the result of the Judiciary Committee's inability to multitask. Instead, it is the result of a political choice, one that has been reversed since the last election. The Judiciary Committee has already held a hearing on President Obama's first appeals court nominee, just two weeks after that nominee arrived in the Senate.¹³ Under a Republican President, Judiciary Committee Chairman Patrick Leahy waited an average of 197 days to give an appeals court nominee a hearing.¹⁴ The last election amounted to the political equivalent of Drano, as the confirmation pipes are now wonderfully unobstructed and flowing freely once again.

Some might assume that Republicans demonstrate such strong partisan preference, but they would be wrong. Since I was first elected, Democrats running the Senate have granted hearings to forty-one percent more Democratic than Republican judicial nominees. When Republicans run the Senate, the partisan differential is less than five percent.

Moving from the Judiciary Committee to the Senate floor, the second macro factor is confirmations. In the last eight years, President Bush had the slowest pace of judicial confirmations of any President since Gerald Ford. Last year, the Senate confirmed fewer judicial nominees than in any President's final year since 1968, the end of the Johnson Administration. By comparison, when I chaired the Judiciary Committee during President Clinton's last year in office, the Senate confirmed twice as many appeals court nominees as it did last year.

As with hearings, the picture is not the same when Republicans are in charge. When Democrats run the Senate, they confirm forty-five percent more Democratic than Republican judicial nominees. When Republicans run the Senate, the differential is only nine percent.

At the ground level, the two micro factors in the confirmation process are votes and filibusters. The Senate has traditionally confirmed most unopposed lower court nominees by unanimous consent rather than by time-consuming roll call votes. From 1950 to 2000 the Senate confirmed only 3.2 percent of all district and appeals court nominees by roll call vote. During the Bush presidency, that figure jumped to nearly sixty percent. The percentage of roll calls without a single negative vote nearly tripled. And under President Bush, for the first time in American history, the filibuster was used to defeat majority-supported judicial nominees.¹⁵ With all due respect to Mark Twain, I think these numbers accurately give you at least a taste for the partisan division and conflict that now characterize the judicial confirmation process. It has become, to edit Thomas Hobbes just a bit, quite nasty and brutish.

Turning from what has been to what should be, I believe we can get on a better path by, as Madison emphasized in *The Federalist* No. 39, "recurring to principles."¹⁶ The judicial selection process has changed because ideas about judicial power have changed. My basic thesis is this: Our written Constitution and its separation of powers define both judicial power and judicial selection. They define the judicial philosophy that is a necessary qualification for judicial service, and they counsel that the Senate defer to the President when he nominates qualified individuals.

Consider a judicial nomination as a hiring process based on a job description. The job description of a judge is to interpret and apply law to decide cases. This job description does not mean whatever a President, political party, or Senate majority wants it to mean. Our written Constitution and its separation of powers set the judicial job description. Interpreting written law must be different than making written law. Because law written in statutes or the Constitution is not simply words, but really the meaning of the words, only those with authority to make law may determine what the words of our laws say and what those words mean. Judges do not have authority to make law, so they do not have authority to choose what the words of our laws say or what they mean. In other words, judges apply the law to decide cases, but they may not make the law they apply. Judges and the law they use to decide cases are two different things. Judging, therefore, is about a process that legitimates results, a process by which the law made by the people and those they elect determines winners and losers.

The Constitution and its separation of powers compel this judicial job description. This kind of judge is consistent with limited

government and the ordered liberty it makes possible. Justice Markman's article describes what he calls a "traditional jurisprudence—one that views the responsibility of the courts to say what the law 'is' rather than what it 'ought' to be."¹⁷ Such a philosophy of judicial restraint—an understanding of the limited power and role of judges—is a qualification for judicial service. This is the kind of judge a President should nominate.

Our written Constitution and its separation of powers also define how the confirmation stage of the judicial selection process should operate. The Constitution gives the power to nominate and appoint judges to the President, not to the Senate. The best way to understand the Senate's role is that the Senate advises the President whether to appoint his nominees by giving or withholding its consent. I explored this role in more detail in the *Utah Law Review* a few years ago in the context of showing that the use of the filibuster to defeat majority-supported judicial nominees is inconsistent with the separation of powers.¹⁸ One basis on which the Senate may legitimately withhold its consent to a judicial nominee, however, is that the nominee is not qualified for judicial service. Qualifications include more than information on a nominee's resume. And with all due respect to the American Bar Association, their rating does not a qualification determine. Instead, qualifications for judicial service include whether a nominee's judicial philosophy—his understanding of a judge's power and role—is in sync with our written Constitution and its separation of powers.

Judges, after all, take an oath to support and defend the Constitution of the United States. To be qualified for judicial service, a nominee must believe there is such a thing, that the supreme law of the land is not simply in the eye of the judicial beholder, and that judges need something more than a legal education, a personal opinion, and an imagination to interpret it.

I propose looking to the basic principles of our written Constitution and its separation of powers to guide the judicial selection process. For the President, those principles require nominees with a restrained judicial philosophy. For the Senate, they require deference to a President's qualified nominees. Senators, of course, must decide how to balance qualifications and deference. Our written Constitution and its separation of powers, however, provide normative guidance for the judicial selection process. Presidents and Senators will have to decide, and be accountable for, how they use or reject that guidance.

No matter how philosophically sound this proposal may be—and I believe it is philosophically rock solid—it may nevertheless be politically controversial. We have traveled a long way from Alexander Hamilton describing the judiciary as the weakest and least dangerous branch.¹⁹ We have traveled a long way from the Supreme Court saying in 1795 that the Constitution is "certain and fixed; it contains the permanent will of the people, and is the supreme law of the land; it is paramount to the power of the Legislature, and can be revoked or altered only by the authority that made it."²⁰ We have traveled a long way from the Senate Judiciary Committee saying in 1872 that giving the Constitution a meaning different from what the people provided when adopting it would be unconstitutional.²¹

For a long time now, we have instead labored under Chief Justice Charles Evans Hughes's notion that the Constitution is whatever judges say it is.²² It has become

fashionable to suppose that the only law judges may not make is law we do not like. Legal commentator Stuart Taylor correctly observes that "[l]ike a great, ever-spreading blob, judicial power has insinuated itself into every nook and cranny."²³ One of my predecessors as Senator from Utah who later served on the Supreme Court, George Sutherland, described the transformation in 1937 as it was literally under way. He warned that abandoning the separation of powers by ignoring the distinction between interpreting and amending the Constitution would convert "what was intended as inescapable and enduring mandates into mere moral reflections."²⁴ Less than two decades later, Justice Robert Jackson described what he saw as a widely held belief that the Supreme Court decides cases based on personal impressions rather than impersonal rules of law.²⁵

Judicial power and judicial selection are inextricably linked. Sometimes the Senate can appear to produce a lot of activity but take very little action. To some, that means the Senate is the world's greatest deliberative body. To others, it means that it produces a lot of sound and fury signifying nothing. But I hope that the debate over President Obama's judicial nominees will really be a debate over the kind of judge our liberty requires. The debate should be about whether judges should decide cases by using enduring mandates and impersonal rules of law or by using their own moral reflections and personal impressions.

President Obama has already taken sides in this debate. When he was a Senator, he voted against the nomination of John Roberts to be Chief Justice, stating that judges decide cases based on their deepest values, their core concerns, and the content of their hearts.²⁶ On the campaign trail, he pledged that he would select judges according to their empathy for certain groups such as the poor, African Americans, gays, the disabled, or the elderly.²⁷ The real debate is about whether judges may decide cases based on empathy at all, not the groups for which they have empathy. It is about whether judges may make law at all, not about what law judges should make. Conservatives as well as liberals often evaluate judges and judicial decisions by their political results rather than by their judicial process. But a principle is just politics unless it applies across the board. Professor Steven Calabresi, one of the *Federalist Society's* founders, wrote last fall that "[n]othing less than the very idea of liberty and the rule of law are at stake in this election."²⁸ He was right, and they remain at stake in the ongoing selection of federal judges.

Judges have no authority to change the law, regardless of whether they change it in a way I like. I am distinguishing here between judicial philosophy, which relates to process, and political ideology, which relates to results. Senators often reveal their view of judicial power when participating in judicial selection, proving once again that the two are inextricably linked. During the debate over Chief Justice Roberts's nomination, for example, one of my Democratic colleagues wanted to know whether the nominee would stand with families or with special interests. She said the American people were entitled to know how he would decide legal questions even before he had considered them.²⁹ Another Democratic Senator similarly said that the real question was whose side the nominee would be on when he decided important issues.³⁰ Would he be on the side of corporate or consumer interests, the

side of polluters or Congress when it seeks to regulate them, or the side of labor or management?

In this activist view of judicial power, the desired ends defined by a judge's empathy justify whatever means he uses to decide cases. This activist view of judicial power is at odds with our written Constitution and its separation of powers and, therefore, with ordered liberty itself. The people are not free if they do not govern themselves. The people do not govern themselves if their Constitution does not limit government. The Constitution cannot limit government if judges define the Constitution.

Terry Eastland aptly described the result of judicial activism in a 2006 essay titled *The Good Judge*: "The people's text, whether made by majorities or, in the case of the Constitution, supermajorities, would be displaced by the judges' text. The justices became lawmakers."³¹ This quotation highlights one of the many differences between God and federal judges. God, at least, does not think He is a federal judge. And it brings up the question of how many federal judges it takes to screw in a light bulb. Only one, because the judge simply holds the bulb as the entire world revolves around him.

There is perhaps some reason for optimism. One poll found last year that, no matter for whom they voted, nearly three-quarters of Americans said they wanted judges "who will interpret and apply the law as it is written and not take into account their own viewpoints and experiences."³² This debate is indeed the one we should be having, whether judges have the power to make law. When judges apply law they have properly interpreted rather than improperly made, their rulings may have the effect of helping or hurting a particular cause, of advancing or inhibiting a particular agenda. They may, at least by the political science bean counters, be considered liberal or conservative. The point, therefore, is not which side wins in a particular case, but whether the winner is decided by the law or by the judge. When judges interpret law, the law produces the results. Thus, the people can choose to change the law. When judges make law, judges produce the results and the people are left with no recourse at all. That state of affairs is the antithesis of self-government.

Let me close by saying that the effort to defend liberty never ends. Andrew Jackson reminded us as he left office in 1837 that "eternal vigilance by the people is the price of liberty; and that you must pay the price if you wish to secure the blessing."³³ The approach I outline actually joins an effort that began long ago and reminds me of a resolution passed by the Senate Republican Conference in 1997:

Be it resolved, that the Republican Conference opposes judicial activism, whereby life-tenured, unaccountable judges exceed their constitutional role of interpreting already enacted, written law, and instead legislate from the bench by imposing their personal preference or views of what is right or just. Such activism threatens the basic democratic values on which our Constitution is founded.³⁴

There you have it. Our written Constitution and its separation of powers define both judicial power and judicial selection. They require judicial restraint as a qualification for judicial service and require Senate deference to a President's qualified nominees. The weeks and months ahead will provide opportunities to debate these principles and their application. Nothing less than ordered liberty is at stake. I know the Federalist So-

ciety will be right in the thick of that debate.

EXHIBIT 2

[From the National Journal, Aug. 4, 2009]

(By Stuart Taylor Jr.)

DID PRECEDENT MAKE SOTOMAYOR RULE AGAINST RICCI?

Judge Sonia Sotomayor has not defended her most widely criticized decision—the one rejecting a discrimination lawsuit by 17 white firefighters, and one Hispanic, against the city of New Haven, Conn.—as a just or fair result.

That would have been an uphill battle: Polls in June showed that huge majorities of the public wanted the Supreme Court to reverse Sotomayor's decision.

And as I've explained elsewhere, although the Supreme Court split 5-4 in ruling for the firefighters in *Ricci v. DeStefano*, all nine justices rejected the specific legal rule applied by Sotomayor's three judge panel. That rule would allow employers to deny promotions after the fact to those who did best on any measure of qualifications—no matter how job-related and racially neutral—on which blacks or Hispanics did badly.

Instead of defending her panel's quota-friendly rule and its harsh impact on the high-scoring firefighters, Sotomayor and her supporters have argued that she essentially had no choice. The rule that her panel applied had been dictated, they say, by three precedents of her own court, the U.S. Court of Appeals for the 2nd Circuit.

Some critics have expressed skepticism about this claim, but the media have shed little light on its plausibility. I seek to shed some below.

Because some of this gets technical, I'll begin with critics' simplest rebuttal to Sotomayor's precedent-made-me-do-it claim:

Even assuming for the sake of argument that the Sotomayor panel's decision was dictated by the three 2nd Circuit precedents, it is undisputed that the full 2nd Circuit could have modified or overruled them if Sotomayor had voted to rehear the case en banc, meaning with all active 2nd Circuit judges participating. Instead, Sotomayor cast a deciding vote in the 7-6 decision not to rehear the case, suggesting she was satisfied with the ruling.

There is also ample reason to doubt that any of the three 2nd Circuit precedents actually required the Sotomayor panel to rule as it did, as some politicized professors have pretended.

Sotomayor fleshed out her vague testimony about the issue in answers to senators' written questions. She quoted her 2nd Circuit colleague Barrington Parker's concurrence, which she and three other judges had joined, in the 7-6 vote not to rehear Ricci. Judge Parker wrote:

There was controlling authority in our decisions—among them, *Hayden v. County of Nassau* [in 1999] and *Bushey v. N.Y. State Civil Serv. Comm'n* [in 1984]. These cases clearly establish for the circuit that a public employer, faced with a *prima facie* case of disparate-impact liability under Title VII, does not violate Title VII or the Equal Protection Clause by taking facially neutral, albeit race-conscious, actions to avoid such liability.

To unpack the legal language: Title VII is the employment discrimination portion of the 1964 Civil Rights Act. Title VII disparate-impact lawsuits are typically brought by blacks or Hispanics who challenge as discriminatory employers' use of objective tests on which those minorities do poorly. New Haven's ostensible reason for denying promotions to the white and Hispanic firefighters who had done well on qualifying exams was fear of being hit with a disparate impact lawsuit by blacks who had done poorly. And any black plaintiffs would indeed have had a *prima facie* disparate-impact case, which is legalese for proof that blacks had done much worse on the tests than whites.

But Judge Parker gave short shrift to the fact that even when plaintiffs have a *prima facie* case, an employer such as the city "could be held liable for disparate-impact discrimination only if the examinations were not job related and consistent with business necessity, or if there existed an equally valid, less-discriminatory alternative," as the Supreme Court stressed in Ricci.

In addition, Parker's reading of both *Hayden* and *Bushey* is conspicuously overbroad. Their facts (especially *Hayden*'s) were quite different from those of Ricci. And *Bushey* has been undermined by subsequent Supreme Court precedents and legislation.

That's why Judge Jose Cabranes, in the main dissent from the 2nd Circuit's 7-6 denial of rehearing en banc, began:

"This appeal raises important questions of first impression"—meaning questions not controlled by precedent—"in our circuit and, indeed, in the nation, regarding the application of the Fourteenth Amendment's Equal Protection Clause and Title VII's prohibition on discriminatory employment practices."

The question at the core of the case, Cabranes said, was: "May a municipal employer disregard the results of a qualifying examination, which was carefully constructed to ensure race neutrality, on the

ground that the results of the examination yielded too many qualified applicants of one race and not enough of another?"

This and other questions raised by the case, Cabranes continued, were "indisputably complex and far from well-settled" and "not addressed by any precedent of the Supreme Court or our Circuit," including *Hayden* and *Bushey*.

Ricci differed from *Hayden* in three critical respects. First, as Cabranes explained, *Hayden* had approved Nassau County's "race-conscious design of an employment examination," which was achieved mainly by eliminating tests of cognitive skills. Ricci, on the other hand, involved "race-based treatment of examination results" (emphasis added) to override local civil service laws under which promotions are virtually automatic for the firefighters with the best scores on job-related oral and written tests.

Second, *Hayden* stressed that the white plaintiffs "cannot establish that they were injured or disadvantaged" by the Nassau County test's race-conscious design. The Ricci plaintiffs were very clearly injured: They were denied promotions that they had done everything possible to earn under New Haven's civil service laws, and thus were "deprived of the pursuit of happiness on account of race," in the words of Washington Post columnist Richard Cohen.

Third, *Hayden* upheld the Nassau County exam's black-friendly design in part "to rectify prior discrimination" by the county against blacks seeking police jobs. Ricci involved no claim of prior discrimination by New Haven against blacks.

Bushey was a lawsuit by whites challenging New York State's race-norming of scores—by substantially raising each minority applicant's score—on a qualifying exam to become a correction captain. The 2nd Circuit's mixed ruling in the case was entitled to little or no weight as a precedent in Ricci for at least four reasons:

While *Bushey* held that the state could use unspecified "race-conscious remedies" to avert a lawsuit by minorities who had done badly on a test, the 2nd Circuit ordered further proceedings to determine whether the race-norming remedy chosen by the state went too far, and violated Title VII by "trammel[ing] the interests of nonminority candidates." In Ricci, the Sotomayor panel gave no weight at all to the interests of non-minority candidates.

In a key provision of the 1991 Civil Rights Act, Congress banned the sort of race-norming that the state had used in *Bushey*. This provision stated broadly that employers may not "adjust the scores of, use different cutoff scores for, or otherwise alter the results of employment-related tests on the basis of race." Indeed, by throwing out ("altering"?) the results of its test, New Haven arguably violated the 1991 provision, as well as others, in Ricci itself.

Bushey noted that the white plaintiffs' initial claims that their constitutional rights had been violated "are not before us," because on appeal they had relied solely on their Title VII claims. In Ricci, "significant constitutional claims . . . of first impression [were] at the core of this case," as Cabranes wrote. The Sotomayor panel completely ignored them.

The high-scoring firefighters' constitutional claims in Ricci were especially strong because landmark Supreme Court decisions in 1989 and 1995 had washed away the foundations of *Bushey* and another 2nd Circuit decision cited by Sotomayor defenders, *Kirkland v. New York State Department of Correc-*

tional Services (1980). The 1989 and 1995 decisions held for the first time that (respectively) state and federal favoritism toward blacks is just as suspect under the Constitution as favoritism toward whites. "Any preference based on racial or ethnic criteria must necessarily receive a most searching examination" and be struck down unless "narrowly tailored" to serve a "compelling" governmental interest, according to the 1995 decision, *Adarand Constructors v. Peña*.

The justices' constitutional rulings seem quite contrary to the 2nd Circuit's approach not only in *Bushey* but also in Ricci, in which—Cabranes suggested—Sotomayor and her allies "took the city's justifications at face value," ignoring strong evidence that its decision to dump the test scores was driven by racial politics, not legal principle. The result, Cabranes said, was that "municipal employers could reject the results of an employment examination whenever those results failed to yield a desired racial outcome—i.e. failed to satisfy a racial quota."

Later, in the Supreme Court's June 29 majority opinion in Ricci, Justice Anthony Kennedy said it was unnecessary to address the firefighters' constitutional claims because their Title VII claims alone were sufficient to win the case. But Kennedy stressed that there were "few, if any, precedents in the courts of appeals discussing the issue."

The bottom line is that 2nd Circuit precedents did not make Sotomayor rule as she did. Supreme Court precedent favored the firefighters. Sotomayor's ruling was her own.

THE PRESIDING OFFICER. The Senator from Oklahoma.

Mr. INHOFE. Mr. President, let me confess that I feel totally inadequate standing here tonight and talking about the subject of the confirmation of Judge Sotomayor. I am not a lawyer. I am amidst these brilliant lawyers. I listened to Senator HATCH and Senator SESSIONS. They have the kind of background where they can really get into this and look constitutionally and legally and evaluate, and I am not in that position.

I would like to speak on this nomination for the following reasons. I want to reaffirm my opposition to her confirmation.

I was the first Member of the Senate on the day she was nominated who announced I would not be supporting her. I recognize, as Senator HATCH said, that she will be confirmed. We know that.

I remember what Senator SCHUMER, the senior Senator from New York, said shortly after she was first nominated. He made the statement that Republicans are going to have to vote for her because they don't want to vote against a woman, vote against a Hispanic. He was right. But I would suggest that after the hearing, that statement is not nearly as true as it was before the hearings because of some of the extreme positions she has taken.

I have to say that from a nonlawyer perspective, I look at it perhaps differently than my colleagues who are learned scholars in the legal profession. A lifetime appointment to the Supreme Court requires not only a respect for

the rule of law but also for the separation of powers and an acknowledgment that the Court is not a place where policy is made. The Court is about the application of the law and not where judges get to make the world a place they want it to be. I saw that all throughout the hearings I watched with a great deal of interest.

In May of 2005, Judge Sotomayor asserted that the “court of appeals is where policy is made.” She also wrote in a 1996 law review article that “change—sometimes radical change—can and does occur in a legal system that serves a society whose social policy itself changes.”

The Constitution is absolutely clear: Policy is made in the Halls of Congress, right here—that is what we do for a living—not in the courtroom. Legislators write the laws. Judges interpret them. We understand that. Even those of us who are nonlawyers remembered that all the way through school. Sotomayor is correct that societies change, but the policies that are made to reflect these changes are done through Members of Congress who are elected to represent the will of the people.

Obviously, we are talking about a lifetime appointment. There is no accountability after this point. When judges go beyond interpreting the laws and the Constitution and legislate from the bench, they overstep their jurisdiction and their constitutional duty. Allowing judges who are not directly elected by the people and who serve lifelong terms to rewrite laws from the bench is dangerous to the vitality of a representative democracy. Simply put, judicial activism places too much power in the hands of those who are not directly accountable to the people. That is what we are talking about, a lifetime appointment.

Judge Sotomayor has overcome significant adversity to achieve great success, and I agree with Senator HATCH in his comments that we admire her for her accomplishments under adverse conditions. However, while her experiences as a Latina woman have shaped who she is as a person, they should not be used, as she affirms, to affect her judicial impartiality and significantly influence how she interprets the law and the Constitution.

In 2001, Judge Sotomayor gave a speech at the University of California, Berkeley in which she stated:

I would hope that a wise Latina woman with the richness of her experiences would more often than not reach a better conclusion than a white male who hasn't lived that life.

She has on several occasions conveyed the same idea. Between 1994 and 2003, she delivered speeches using similar language at Seton Hall University, the Woman's Bar Association of the State of New York, Yale University, the City University of New York School of Law. It is not a slip of the

tongue once; this is a statement that has been reaffirmed and reaffirmed. Quite frankly, that was the reason for my opposition back in 1998 when she was nominated to be on the circuit court of appeals. The statements she made show a very biased opinion that someone who is not a lawyer sees and thinks should disqualify someone for the appointment.

She further stated in 1994, in a presentation in Puerto Rico, that:

Justice O'Connor has often been cited as saying that “a wise old man and a wise old woman reach the same conclusion” in deciding cases . . . [however] I am also not sure that I agree with that statement . . . I would hope that a wise woman with the richness of her experience would, more often than not, reach a better conclusion.

That is pretty emphatic. There is no other way you can interpret that. She thinks that a woman with her experience can make a better conclusion than a White male. I consider that racist. Sotomayor not only suggests the possibility of judicial impartiality but also that gender and ethnicity should influence a judge's decision.

Furthermore, President Obama said that in choosing the next Supreme Court nominee, he would use an empathy standard. While judges may and should be empathetic people, they must be impartial judges first. If empathy was a guiding standard, with whom should a judge empathize? Should more empathy be shown to one race, one gender, one religion, one lifestyle? True justice does not see race, gender, or creed. We are all equal in the eyes of the law, and the law must be applied equally. That is why she wears a blindfold. It is supposed to be blind justice.

Rather than looking to factors beyond the law, judges must solely examine the facts of the case and the law itself. Their ability to equally apply justice under the law is the standard by which we should select judges. So we have two different standards right now with which I disagree. One is that judges should make policy and, secondly, that gender and ethnicity should influence decisions.

Another belief on which Judge Sotomayor and I fundamentally disagree is that American judges should consider foreign law when deciding cases. This probably concerns me more than any of the rest of them—the fact that we have this obsession in these Halls, in this Senate, that nothing is good unless it somehow comes from the United Nations or is coming from some multinational origin.

In 2007, in the forward to a book—and I read this myself—titled, “The International Judge,” Sotomayor wrote:

[T]he question of how much we have to learn from foreign law and the international community when interpreting our Constitution is not the only one worth posing.

This past spring, Judge Sotomayor gave an alarming speech at the ACLU which addressed this topic. She said:

[T]o suggest to anyone that you can outlaw the use of foreign or international law is a sentiment that is based on a fundamental misunderstanding, what you would be asking American judges to do is to close their minds to good ideas. . . .

No, Judge Sotomayor, it is sovereignty that we are talking about. Statements like these make it clear that President Obama has nominated a judge to our highest Court who believes our courts should rely on foreign decisions when interpreting our Constitution. And I have to say, whatever happened to sovereignty? This obsession with multinationalism has to come to an end. I believe America will reject this type of thought. Americans do not want the rest of the world interpreting our laws, and neither do I.

Finally, Mr. President, Judge Sotomayor's record on the second amendment is constitutionally outrageous. Maybe it is because I come from Oklahoma, but that is the thing I hear about more than anything else down there, and my own kids, I might add.

I do not believe Judge Sotomayor can be trusted to uphold the individual freedom to keep and bear arms if future second amendment cases come before her. I have received no assurances from her past decisions or public testimony that she will be willing to fairly consider the question of whether the second amendment is a fundamental right and thus restricts State action as it relates to the second amendment. It is incomprehensible to me that our Founding Fathers could have intended the right to keep and bear arms as non-binding upon the States and instead leave the right to be hollowed out by State and local laws and regulations. History and common sense do not support this.

I have to tell you, this has been more of a concern in my State of Oklahoma than anything else. I cannot confirm a nominee who believes the second amendment is something other than a fundamental right and instead treats it as a second class amendment to the Constitution. I do not know what a second class amendment to the Constitution is. This is not in line with my beliefs and not in line with the beliefs of the majority of Americans—certainly from my State of Oklahoma.

Today, I am persuaded the confirmation hearings served only to highlight many of my concerns. The numerous inconsistencies of her testimony with her record have persuaded not only me but the American people that Judge Sotomayor is not qualified to serve as a Justice on the highest Court, the U.S. Supreme Court. I say that because a recent Zogby Poll—and as several other polls have also consistently confirmed—following the confirmation hearings revealed that only 49 percent of Americans support Judge Sotomayor's confirmation, with an equal number opposing it. This is significant because she played the race

card all the way through this thing and was talking about the Hispanic effect. But the same poll showed that among Hispanic voters, only 47 percent say they are in favor of her confirmation.

In other words, there are fewer people in the Hispanic community who are favoring her confirmation than in the non-Hispanic. These numbers are evidence of the fact that Judge Sotomayor has not gained the approval of the American people during her confirmation hearings, and she certainly has not gained mine.

I was the first Member of the Senate to publicly announce my opposition to Judge Sotomayor after her nomination to the Supreme Court on May 26. On that date, I stated I could not confirm her. In addition to all the above, there is another reason. While I do not often agree with Vice President BIDEN, I do agree with his statement that once you oppose a Federal court nominee, you cannot support that nominee for a higher court because the bar is higher. I think that is very significant to point out here because there are several who are still serving today, as I am, who opposed her to the circuit court in 1998. I think Vice President BIDEN is correct. As the standard goes up, once you get to the U.S. Supreme Court, that is the end. So that should be the very highest standard. So it is unconceivable that anyone who would have opposed her in 1998 could turn around and support her now.

I have to say there are a lot of reasons I have pointed out. One is judges making policy. I object to that; I find that offensive. Gender and ethnicity should be a consideration; that is wrong. The international thing, that we have to go to the international community to see that we are doing the right thing in interpreting our Constitution; that is a sovereignty issue. The second amendment, that is a concern.

So even though Judge Sotomayor will be confirmed, it will be without my vote. I would have to say for the sake of my 20 kids and grandkids that I will oppose Judge Sotomayor's nomination to the U.S. Supreme Court.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SESSIONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SESSIONS. Mr. President, I believe there are a few minutes left on this side of the aisle. I would just like to share a few thoughts. I see Senator BROWN is here and would also like to speak tonight. I think some others may also.

One of the things that has been discussed tonight from my Democratic

colleagues is the great American ideal of equal justice under law. Those words are indeed chiseled on the face of the Supreme Court across the street, and it has been invoked as a reason to support this nominee. But I would suggest that at its most fundamental level that is one of the serious objections and concerns we have.

Lawsuits have parties. If you have empathy for one party, if you have a sympathy for one party, if you have a prejudice that favors one party, then that is not equal justice. In her own speeches and statements, Judge Sotomayor has said: I accept the fact that my background, my sympathies, even my prejudices—those are her words—will affect the facts, affect how I decide cases—that her background will “affect the facts I choose to see.” These were not just speeches given one time but repeated over a period of a decade.

So it raises real questions about that because the oath that a judge takes is a powerful thing. The oath reflects the ideal of American justice. And the oath says a judge will not be a respecter of persons. The oath says a judge shall do equal justice to the poor and the rich alike. The oath says a judge will be impartial; that they will carry out their duties under the Constitution and under the laws of the United States—not above the laws of the United States. A judge is not above the law. They are not empowered to utilize any of their personal views, politics, morals, or values in the process of their judging to manipulate the law, to carry out an agenda they may believe is the greatest thing for all of America. They are not entitled to do that.

So from her speeches and her approach to the law, there is a great concern to the extent of which I have not seen before in speeches and expressions, in Law Review articles by this nominee that suggests an acceptance of the fact that her background and experiences, opinions, sympathies, and prejudices will affect her rulings.

She goes on to say: I accept the fact that my background will “affect the facts I choose to see.” For a lawyer like myself who has practiced a good bit in Federal court, tried quite a few cases, this is a stunning development that a judge is going to tell me: Well, I may not see those facts because of my background, my sympathies, and my prejudices. That is what a judge puts on that robe for. The robe is to symbolize they pull themselves apart from the everyday pressures that are on them, the everyday biases and prejudices; that they will be a neutral, fair, objective umpire and will call the balls and strikes, call the game without taking sides, without trying to achieve a given result. This is the ideal of American justice.

One of our colleagues said he objected because some of us were advo-

cating a strange and strained conservative orthodoxy, that we would not vote for anybody who did not agree with some sort of philosophy like that. What I said at the opening of the hearing was that I would not vote for her, and no Senator should vote for any nominee, whether liberal or conservative, who was not committed—committed—as their oath commits them, to setting aside personal values, opinions, and so forth, and rendering true justice based on the law and the facts, whether they like the law or not.

So I think this is a big deal. They say: Well, you never confirmed a liberal Democrat, SESSIONS. You are a conservative Republican. But I would. And I voted for quite a number of them under President Clinton. I expect I will vote for quite a number under President Obama. I voted for 95 percent of President Clinton's nominees in the time I was in the Senate. It is not their politics. It is not the church they belong to. It is not whether they go to church. It is not what their moral values are. It is when they get on that bench and they decide cases, are they going to follow the law and the facts? That is the question, and that is what we are looking for.

It is sort of surprising to see a nominee express repeatedly over a period of years a contrary view. And to suggest that, well, it may be an aspiration to be unbiased, but it is just a mere aspiration—and to explicitly reject the classical formulation of a judge's role as expressed by Justice O'Connor, when she said: A wise old woman and a wise old man should reach the same conclusion—well, that is what we always have believed in America. Now we have this new theory that, well, you can bring to bear your background, and you might reach a better conclusion because you have different experiences you can bring to bear. That is not our goal in America, in my view.

Our legal system is built on a belief that there is a right answer to even the most difficult cases, and judges ought to give their absolute best effort to find that right answer. It is based on law and the facts and not what their personal views and values are. That is what we are all about. I think it is an important issue. And the activist, whether liberal or conservative, the activist judge allows those values and prejudices and political views and ideology to affect their rulings. It causes them to find some way to achieve a result that furthers an agenda they believe in. That is not justice, that is politics.

When President Obama says he wants a judge who will show empathy, I ask: Whom does he show empathy for? If you show empathy for one party, haven't you had a bias against the other? Who got empathy in the firefighters case? Was that equal justice under law—under law?

The Constitution says no one shall be deprived of equal protection of the laws on account of their race. But the firefighters who passed the test—a test that was never found to be defective, and the Supreme Court found it was not found to be defective—they had that test thrown out because they didn't like the racial results of it. Isn't that discriminating against the people who worked hard and studied and passed the test?

Lieutenant Vargas testified before our committee. I asked him, and he said if everybody had studied as hard as he had, a lot more of them would have passed. It was just a question of the commitment to learn the things necessary to be a leader in a fire department where you send people into life-and-death situations. This is not a little matter. You need to know things.

So I don't want anybody to think that what we are doing is some strange or strained approach to the law. I believe we are asking fundamental questions about law and justice in America and the Supreme Court of the United States. Aren't we entitled to expect that this nominee, such as every other judge who has ever taken the bench in any Federal court in America, should be not mildly committed to the oath but absolutely committed to the oath; committed to not being a respecter of persons; committed to equal justice for the poor and the rich; committed to impartiality; committed to conducting their office under the Constitution and under the laws of the United States and not above it.

I think that is what we need to be looking for. I am afraid this nominee, based on several important cases and a plethora of speeches over a decade, doesn't meet the standard. I wish it weren't so. I thought things would get better at the hearing. I don't think they did. That is my best judgment. So that is why I have concluded I cannot support her nomination.

I thank the Chair and yield the floor.

Mr. BROWN. Mr. President, I am a father of daughters who were raised with the belief that the United States is only as strong as its commitment to combating prejudice and promoting equality under the law. It is something I learned from my own mother. I am also a husband of a woman whose parents' sacrifice allowed her to be the first in her family to go to college, opening a world of possibility grounded in the basic American values of hard work and opportunity for all. It is with them in mind and with appreciation for the confidence Judge Sonia Sotomayor inspires that I am proud to support her to be the next Associate Justice of the U.S. Supreme Court.

Judge Sotomayor has cleared hurdle after hurdle to achieve the promise of the American dream. She has earned the admiration of her peers by demonstrating again and again her respect

for the law, her respect for the rule of law, and her dedication to its impartial interpretation. For more than three decades, as we have heard on the floor and we heard in committee, as a district attorney in New York, a civil litigator in private practice, a Federal judge in the Second Court of Appeals, Judge Sotomayor has shown that she is tough and she is fair and she is a thoughtful arbiter of justice. She will be an outstanding Associate Justice of the U.S. Supreme Court.

During her confirmation hearings, Judge Sotomayor responded thoughtfully and thoroughly to a wide range of questions. In fact, she answered more questions in depth than any nominee in recent history. Combined with first-class legal reasoning and disciplined intellect, Sonia Sotomayor's life experiences will make her a valuable addition to the Court.

She was raised in public housing in the Bronx. At age 9, she lost her father, a factory worker. Raised by her mother, a nurse, she battled childhood diabetes while excelling at every level in school. My best friend also suffered from childhood diabetes. He lived with diabetes for some 40 years. I know how it made him more disciplined, it made him more compassionate, and if I could use the word, it made him more empathetic toward those around him. It made him an all-around better person, it made him a better judge of character, and it made him more fair.

After graduating from our Nation's finest universities, Sonia Sotomayor reached the heights of the legal profession. Each of these experiences exposed her to the array of the American experience.

Current and former Supreme Court Justices from across the ideological spectrum have described how their personal experiences informed their judicial perspective. Judge Sandra Day O'Connor, nominated by President Reagan, once said:

We're all creatures of our upbringing. We bring whatever we are as people to a job like the Supreme Court. We have our life experiences.

Empathy, perhaps?

Justice Samuel Alito, a conservative nominated by President Bush, said during his confirmation hearings:

When I get a case about discrimination, I have to think about people in my own family who suffered discrimination because of the ethnic background or because of religion or because of gender. And I do take that into account.

Empathy, perhaps?

I don't recall when Judge Alito appeared in front of the Judiciary Committee that people questioned his empathy and questioned his ability to do his job because of his background. Similarly, Judge Sotomayor's background and life experiences will impart a new sense of perspective to the Court.

As I hear this discussion of empathy and I hear this accusation of Judge

Sotomayor being an activist judge, I think about who has sat on the Supreme Court through much of this Nation's history. Most of the people who sat on the Supreme Court were people of privilege. Most of the people who sat on the Supreme Court were people who were born into privilege. We have seen the Supreme Court, the highest Court in the land, particularly in recent years, side in case after case with the wealthy over the poor. We have seen them side with large corporations over workers. We have seen them side with the elite of our society over others in our society. Maybe they decided that way because the Justices came from privileged backgrounds themselves and that is the way they saw the world around them. I don't hear those discussions on the floor. I didn't hear those discussions in the Senate Judiciary Committee from those who oppose Judge Sotomayor's nomination.

Similar to Presidents Reagan and Bush and every President before, President Obama chose Sonia Sotomayor because he felt her views and her interpretations of our Nation's law reflect the way forward for our Nation. On issues ranging from criminal justice and labor and employment, Judge Sotomayor has an extraordinary record of following, defending, and upholding the rule of law as a Federal prosecutor, as a trial judge, and as an appellate judge. Nearly every major law enforcement organization in this Nation, ranging from the Fraternal Order of Police to the National Sheriff's Association to the National District Attorneys Association, has endorsed her. The American Bar Association awarded its highest ratings when evaluating Judge Sotomayor's judicial temperament and her treatment of all litigants. And the Judiciary Committee has received a letter of support for Judge Sotomayor's nomination from the American Hunters and Shooters Association, an organization that advocates for second amendment rights. The association told us some in the firearm community have leveled a number of charges against Judge Sotomayor that do not pass the truth test. They also wrote:

Conservatives should applaud Judge Sotomayor as a model of judicial restraint on the Circuit Court, even if that restraint has frustrated gun rights outcomes in the immediate cases.

Mr. President, I ask unanimous consent to have this letter printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follow

AMERICAN HUNTERS
& SHOOTERS ASSOCIATION,
June 29, 2009.

Senator PATRICK LEAHY,
Chairman, Senate Judiciary Committee,
U.S. Senate, Washington, DC.

DEAR CHAIRMAN LEAHY: In 1991, President George H.W. Bush appointed Judge

Sotomayor to the U.S. District Court for the Southern District of New York. Senator Al D'Amato (R-NY) led the fight for her initial Senate confirmation, which was approved by unanimous consent. Her later nomination to the U.S. Appeals Court (Second Circuit) was made by President Bill Clinton and also moved along by then Senator Al D'Amato. She received strong bi-partisan support with a vote of 67-29.

Some in the firearm community have leveled a number of charges against Judge Sotomayor that do not pass the truth test. In the recent case of *Maloney v. Cuomo*, a unanimous Second Circuit panel, which included Judge Sotomayor acknowledged that the landmark ruling in *District of Columbia v. Heller* confers an individual right of citizens to keep and bear arms.

The *Maloney* court also explained, as the Heller majority had, that earlier Supreme Court precedents had held that the Second Amendment "is a limitation only upon the power of congress and the national government and not upon that of the state." The panel noted that while Heller raises questions about those earlier Supreme Court decisions, the Second Circuit was obligated to follow direct precedent "leaving to the Supreme Court the prerogative of overruling its own decisions." While we are disappointed that the Supreme Court has not yet extended this right to the states, we note that Conservative Judge Frank Easterbrook of the 7th Circuit agreed with Sotomayor's ruling as being consistent with precedent. Judge Sotomayor has established herself as a model jurist in terms of respecting precedent. We suspect that her critics from the leadership of several well-known gun organizations are just as interested in supporting precedent as she is, now that the precedent to be protected is clearly enshrined within the Heller decision.

As the President of the American Hunters and Shooters Association, I am eager to see the Supreme Court take up the incorporation issue of the Second Amendment to the states. As a gun owner in Maryland, it is my fervent hope that the Supreme Court will extend the protections guaranteed by the Second Amendment, as defined in the Heller decision, to the citizens of the United States of America who reside outside the District of Columbia, as it has with the First and Fourth Amendments.

Our own views on gun ownership notwithstanding, it is the role of the President, who was elected by a rather impressive majority, to nominate and the Senate's duty to advise and consent. The Senate would be wise to consent to this nomination.

Conservatives should applaud Judge Sotomayor as a model of judicial restraint on the Circuit Court, even if that restraint has frustrated gun rights outcomes in the immediate cases. As moderate progressives, we hope that the nominee views the settled law in *Heller* as ripe for an activist expansion by incorporation to the states in harmonizing the different Circuit Court decisions.

On behalf of the American Hunters and Shooters Association, we extend our strong support for the confirmation of Judge Sotomayor to the U.S. Supreme Court. We fervently hope you and your fellow Judiciary Committee members will see fit to support this nomination.

Most respectfully submitted,

RAY SCHOENKE,

President.

Mr. BROWN. Mr. President, Judge Sotomayor is a groundbreaking Supreme Court nominee, who unfortunately

is facing gratuitous, groundless mischaracterizations. She is to be commended for her exemplary conduct in the face of critical and vicious personal attacks. Unfortunately, we have seen it all too many times. Judge Sotomayor is a woman and she is Puerto Rican. She is also a beloved daughter, sister, and aunt. She is a highly respected judge, with more relevant experience than any member of the current Supreme Court—than any member of the current Supreme Court.

Louis Brandeis, confirmed in 1916 as the Court's first Jewish nominee, faced massive distortions and mischaracterizations. Justice Thurgood Marshall, confirmed in 1967 as the Court's first African-American Justice, faced extraordinary personal attacks. Both Justice Brandeis and Justice Marshall made lasting legacies on the Court that ensured our Nation's progress to meet the very Democratic ideals enshrined in our Constitution. I would offer that their background perhaps made them even better Justices.

President Obama was elected in a historic election, where the American people turned pages of history to forge a new path for our Nation. It is a new path shaped by common sense and compassion and belief in the potential of our people and the greatness of our Nation. The Supreme Court is a vital part of this path forward.

Exercising one of his most important powers, President Obama nominated someone who will help ensure that our Supreme Court honors the Constitution and that every American is protected by it.

President Obama said:

What she will bring to this court is not only the knowledge and experience acquired over the course of a brilliant legal career, but the wisdom accumulated from an inspiring life journey.

I congratulate Judge Sotomayor, her mother Celina, and the rest of the Sotomayor family. I also congratulate Justice David Souter on his well-earned retirement. Justice Souter's probing intellect and brilliant legal mind deserve our Nation's sincere thanks and gratitude.

Commitment to the rule of law is the foundation of our Nation, where democratic values are enshrined in the Constitution that preserves and strengthens our basic freedom. As Senators, one of our most important Constitutional responsibilities is to confirm a Justice of the Supreme Court. I urge my Senate colleagues to join me in confirming Judge Sonia Sotomayor as the next Associate Justice of the U.S. Supreme Court.

Thank you. I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROWN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. BROWN. Mr. President, I ask unanimous consent that the Senate proceed to a period of morning business, with Senators permitted to speak for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

FLOODING IN LOUISVILLE

Mr. McCONNELL. Mr. President, I wish to make a few short observations about a severe storm that hit my hometown and dumped 6 inches of rain in 75 minutes in Louisville just today, causing major flooding and trapping people in their cars and in their neighborhoods. The Louisville Police and Fire and Rescue have been working nonstop since early this morning to assist those in need. I wish to commend them for the courageous and outstanding work they have been performing throughout the day.

Not surprisingly, I have heard from a number of my constituents. I appreciate very much their calls to keep me informed on the latest developments. We are going to continue to monitor the situation back home. In the meantime, our thoughts and prayers go out to everyone in Louisville today.

COMMENDING THE SIMPSON COUNTY HISTORICAL SOCIETY

Mr. McCONNELL. Mr. President, I rise today to pay tribute to the accomplishments of the Simpson County Historical Society, which is celebrating its 50th anniversary in September, making it one of the oldest continuously operating historical societies in Kentucky.

The society's half century of promoting research and knowledge of history makes it one of south-central Kentucky's treasures. At the society's very first meeting in 1959, 37 individuals met in a private home to discuss the creation of the organization.

For many years the society maintained a small collection at the Goodnight Library until members convinced the county to let them use the old county jail and jailer's house as a headquarters. The facility now serves as the Simpson County Archives and Museum. Their collection contains thousands of items, including books, manuscripts, original documents and papers, pictures, county records, tapes, CDs, microfilm, microfiche, computers, and more.

The research materials, librarians and volunteers at the archives have

helped thousands of visitors connect to their past and learn about their genealogy.

The dedicated staff and volunteers at the society have made it very successful. In 2006, Mary Garrett, Nancy Neely, Sarah Richardson, Sarah Smith, Beatrice Snider, Margaret Snider, and Dorothy Steers received the Lifetime Presidential Volunteer Service Awards for over 4,000 hours of volunteer service.

The group not only preserves history, but gives much to the community, for instance by supporting several historical markers in Simpson County and providing grants for schools and groups interested in preserving history. They also offer scholarships for students who want to study history.

Mr. President, I ask my colleagues to join me in honoring, as listed below, the society and their officers for their hard work and dedication to the preservation and research of Kentucky's and Simpson County's history over the past 50 years and for many more years to come:

SIMPSON COUNTY HISTORICAL SOCIETY
OFFICERS—2009

President Dr. James Henry Snider, Vice-President Jean Almand, Secretary Jason Herring, Assistant Secretary Bonnye Moody, Treasurer Commie Jo Hall, Librarian Kenny Lynn Scott, Directors Katherine McCutchen, Emily Mayes, Sarah Jernigan, Past President and Business Manager Sarah Jo Cardwell, Gayla Coates, Nancy Thomas, Commie Jo Hall, Morris Hester, Betty Nolan, Elizabeth Wakefield, Allison Cummings, Helen Cardwell, and Stacie Goosetree

SIMPSON COUNTY HISTORICAL SOCIETY
VOLUNTEERS

Myrtle Alexander, Kathy Allen (Dinning), David Forrest Almand, Jean Almand, Margaret Beach, Roxanne Boyer, Lucille Brown, Jean Burton, Barry Byrd, Bill Byrd, Helen Cardwell, Ruth Cardwell, Sarah Jo Cardwell, Pattye Caudill, Billy Jeff Cherry, Ruth Cherry, Liz Chisholm, Jim Clark, Gayla Coates, Sue Cooper, Irene Harding Cornett, Joe Craft, Nettie Craft, Mary Crow, Allison Cummings, Elizabeth Dinning, Elizabeth Dunn, Ruth Forshee, Jackie Forshee, Kathy Forshee, Larry Forshee, Mary Garrett, Paul Garrett, Addie Gillespie, Nora Belle Gillespie, Cheryl Goodlad, Stacie Goosetree, Kay Gregath, John Gregory, Commie Jo Hall, Janet Head, Jason Herring, Jimmy Jennett, Tracy Jennett, Dorothy Jent, Earl Jent, Amy Kopley, Ricky Kopley, Donna Laser, Mary Malone, Emily Martin, Emily Mayes, Charles McCutchen, Katherine McCutchen, Hallie McFarland, Mary Rose Meador, Lowrie Mervine, Peggy Mervine, Betty Milliken, Edna Milliken, Thomas N. Moody, Anne Mullikin, Nancy Neely, Tom Scott Neely, Dorothy Newbold, Mary Ogles, Olaine Owen, Mildred Perry, Jo Ann Phillips, Marian Phillips, Ruth Richards, Mozelle Richardson, Sarah Richardson, Wendell Richardson, Mattie Lou Riggins, Janet Roark, Betty Rogers, Lou Ella Rutherford, Edna Earl Scott, Kenny Lynn Scott, Ellen Smith, Henry Price Smith, Sarah Smith, Billy Briggs Snider, Beatrice Snider, James D. Snider, Margaret Snider, Lori Snider, James Henry Snider, D. B. Snider, Pearl Snider, Dorothy Steers, Geraldine "Jerri" Stewart, Rowena Sullivan, Robert E. Taylor,

Nancy Thomas, Jane Truelove, L. L. Valentine, Dan Ware, Bessie Watwood, Alisha Westmoreland, Michelle Willis, Christine Wilburn, Geraldine Wright, Joan Yorgason.

VOTE EXPLANATION

Mr. LIEBERMAN. Mr. President, I was unable to participate in the rollcall vote on the motion to invoke cloture on the Kohl substitute amendment, No. 1908, to H.R. 2997, the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act of 2010 and on the rollcall vote on amendment No. 1910 introduced by Senator McCain. Both rollcall votes took place yesterday.

Had I been present, I would have voted yea in support of the motion to invoke cloture and yea in support of Senator McCain's amendment. The McCain amendment would have cut \$17.5 million set aside for the Rural Utilities Service, High Energy Cost Grant Program—a program that was eliminated in President Obama's fiscal year 2010 budget.

I commend the chairman of the subcommittee, Senator KOHL, and the ranking member, Senator BROWNBACK, for their bipartisan work on this important bill that will fund agriculture priorities, nutrition assistance programs, and food and drug safety measures that are critical for my State of Connecticut and the rest of the country.

HEALTH CARE REFORM

Mr. DODD. Mr. President, last night I rose to speak on health care reform.

Today, another 14,000 Americans lost their health insurance.

That is 14,000 Americans who had health insurance when I spoke on the floor last night, but tonight each will go to bed fearing that if something happens to them or their family, they could lose everything—their home, their life savings, their economic security, gone.

Tomorrow, it will be another 14,000.

Another 14,000 the day after that.

And another 14,000 every single day until we finally pass real health care reform.

Between now and when we return from recess, half a million Americans will lose their insurance. Some will have preexisting conditions that, under our current system, will prevent them from ever finding coverage again. Some will have medical issues requiring expensive treatments that they will no longer be able to afford. Some will end up in bankruptcy. Some will end up on public assistance. And some will end up in the emergency room with a sick child whose illness could have been prevented with a simple doctor's visit.

The tragedy caused by our broken health care system is ongoing. It is

happening right now. And when we come back from recess, I have every hope and expectation that we will be ready to work together to stop it.

I take my Republican colleagues at their word when they say they don't want to stall this effort to death, they simply want bipartisanship.

The Affordable Health Choices Act, passed in the HELP Committee, didn't win bipartisan support, but it is a bipartisan bill. It incorporates 161 Republican amendments, and reflects a spirited and robust debate with participation from all sides—exactly the sort of debate I expect we can have when we come back from recess.

We are not going to agree on every detail, and there will be times when we have to have a simple up-or-down vote and live with the results. But surely we can all agree that the status quo isn't just unacceptable—it is unsustainable. That is why doctors and nurses, insurance companies and drug companies, Democrats and Republicans—all say we need reform.

Well, it is time for us to make that happen.

I believe that our bipartisan approach has yielded a good bill.

If you don't have health insurance, the Affordable Health Choices Act will put it within reach by giving you a range of affordable options to choose from. It forever banishes the term "preexisting conditions" from the American vocabulary.

If you have health insurance, the Affordable Health Choices Act will make it less expensive by investing in preventive care to bring down the long-term cost of keeping our citizens well, not to mention eliminating waste and fraud from our system.

And if you like your doctor and your insurance plan, and you are worried about keeping it, the worst thing in the world you could do would be to stand in the way of reform. The Affordable Health Choices Act guarantees that you won't see your insurance be taken away at the moment you need it most or watch as it is priced out of your family's budget.

Whether you have insurance or not, whether you like your health care options or not, whether you are sick or healthy, Democrat or Republican, working-class or a small business owner, reform is for you.

Let us take action on behalf of the 14,000 Americans who will lose insurance tomorrow. Let us take action on behalf of the 45 million uninsured and the 30 million underinsured. Let us take action on behalf of the American people who are looking to us to succeed.

Mr. JOHANNES. Mr. President, I rise today to bring attention to the unique health care challenges faced by the 62 million Americans who live in rural America.

If you took a snapshot of rural America, you would see a population that is

older, poorer, and has less access to health care than other places in the country. Because many rural residents are elderly, they need more health care services.

However, rural residents have greater transportation difficulties reaching health care providers and often have to travel long distances to reach a doctor or hospital. Very few public transportation systems are available, and so many folks wait until they are very sick before turning to the health care system. This makes the already challenging job of managing chronic conditions even more difficult. Rural areas report higher rates of chronic conditions, including heart disease and cancer. One contributing factor to these chronic conditions is the higher obesity and smoking rates of children and adults who reside in rural areas.

Compounding the problem, rural residents also tend to be poorer and make on average \$7,000 less per year than their urban counterparts. Nearly 24 percent of children who live in rural America are in poverty. Poverty affects the types of foods being offered at the dinner table as the price of fruits and vegetables can often bust a tight food budget.

It can also force people to put off medical care. According to a recent study, rural residents are more likely than their urban counterparts to report having deferred care because of cost. It can be a vicious cycle.

While health coverage is vitally important to these rural residents, the greatest crisis is access to care. We could give health insurance to everyone, but if your county has no doctor or hospital, the best insurance will make little difference. This is a simple concept, but an important one.

In rural America, the cornerstone of the health care delivery system is the critical access hospital. These hospitals, made up of 25 beds or less, provide the most basic access to medical services and serve as a rural safety net for emergency services. Of the 90 hospitals in Nebraska, 65 of them are critical access hospitals. Clearly their importance in rural America cannot be overstated.

However, it is difficult for many rural hospitals to keep their doors open. One reason is that there is less patient volume than in many urban settings. In addition, Medicare payments to rural hospitals and physicians are dramatically less than those to their urban counterparts for equivalent services. This correlates closely with the fact that more than 470 rural hospitals have closed in the past 25 years.

Rural areas also struggle to keep other aspects of their health care infrastructure in place. For example, 20 percent of counties in Nebraska do not have a local pharmacist who can fill prescription medications for their residents. I could go on and on with a simi-

lar story on home health services, long term care, durable medical equipment, and other critical health care services.

However, one of the biggest challenges facing rural America is difficulty recruiting and retaining health care professionals. Medical professionals sometimes do not want to set up practice where doctors are few and major metropolitan hospitals require hours of travel. Currently, 50 million Americans who live in rural America face challenges in accessing health care. There are too few providers to meet their basic primary care needs. According to the U.S. Department of Health and Human Services, while a quarter of the population lives in rural areas, only ten percent of physicians practice there. There are over 2,000 health professional shortage areas in rural and frontier areas of all States and U.S. territories compared to 910 in urban areas. Ninety out of 93 Nebraska counties are facing health care profession shortages in one or more areas of practice.

Unless something is done to address this problem, the situation will almost surely become a crisis. This scenario is quickly appearing on the horizon as rural America has a higher percentage of physician generalists who are nearing retirement than urban areas.

Fewer doctors and lack of health care access could decimate rural residents and their rural communities. Young families will not move to a place where they cannot access health care for their children, and older residents will be forced to move to places where they can find care.

This potential rural reality has major implications for the rest of the country and will affect the health and well being of everyone. For example, rural America produces the food and the fiber that our country needs to survive. Young farmers and their families will not come back to live and work in an area where they cannot receive health services should an accident or sickness occur. The farming profession is already a gamble and not having access to health care is something most people aren't willing to risk. If people are forced to leave rural America due to lack of health care, then a whole new set of challenges will arise that we are not currently prepared to address. Any health care solutions or reforms must account for current rural health care system realities and future challenges.

I have long said that the best solutions originate outside the beltway, the same holds true with health care. Blanket policies crafted from within the DC beltway do not always meet the needs of Nebraskans. In fact, they often add additional burdens onto the current system and compromise the ability to access quality health care.

That is why I encourage my colleagues crafting health care reform

legislation to incorporate the solutions offered in the Craig Thomas Rural Hospital and Provider Equity Act. I am a sponsor of this legislation and look forward to a number of its provisions being enacted.

Additionally, I hope any health care reform will offer critical access hospitals flexibility in determining their bed count to account for seasonal and emergency situations which might affect admissions rates. Any comprehensive legislation must address the unique payment issues facing rural hospitals like reimbursing them for lab services provided in nursing homes and rural health clinics, and increasing Medicare payment rates for rural health clinics. Finally, legislation should extend the rural community hospital demonstration project and provide incentives to encourage providers to practice in physician scarcity areas.

The health care delivery system in rural America is already stressed. We cannot afford a big mistake with health care reform, because if we get it wrong, the fragile rural health care delivery system may never recover. Mark my words; if we enact policies that drive providers and facilities out of business, no one is waiting in the wings to take their place. Therefore, I urge caution and thorough debate of all health care reform proposals as unintended consequences must be minimized.

COMMENDING SENATOR NORM COLEMAN

Mr. ENSIGN. Mr. President, I rise today to pay tribute to our former colleague, Norm Coleman.

Norm once said, "It is easy to criticize, particularly in a political season. But to lead is something altogether different. The leader must live in the real world of the price that might be paid for the goal that has been."

Norm Coleman is a leader. Norm or, more importantly, his character endured one of the most difficult elections in the history of the Senate, and came out standing taller in the eyes of many. It is not easy to lose. But it is so much harder to maintain your dignity in the face of defeat, which Norm has done.

Having spent most of his life as a Democrat, Norm is what we would call a "late bloomer." I also started out as a Democrat and voted for Jimmy Carter in 1976. In 1996, Norm realized that the path of the Democrat Party was paved for other people, not him. He joined the Republican Party to share in our vision to keep taxes low, reform education, and grow jobs.

Norm more than adhered to this vision while in the Senate; he became a powerful voice on these issues. He also established himself as a fierce advocate for renewable energy. Norm fought for

tax incentives that would strengthen the development of renewable energy across our country. He saw renewable energy as the key to greater national security and economic stimulus.

Norm also introduced legislation that would wean our Nation off our dangerous reliance on Middle Eastern oil by placing a greater emphasis on increasing renewable fuel infrastructure and alternative fuel technologies. His legacy will continue to thrive as we move our country closer to energy independence, through innovation, not government handouts.

Norm's leadership did not end at the shores of our Nation. He established himself as a true voice in foreign policy issues by exposing the corruption that was rife throughout the U.N.'s Oil for Food program and becoming a fierce advocate for our servicemen and women.

However, all of this pales in comparison to the legacy that he will leave in Minnesota. Throughout his entire Senate career, he never lost track of the voices of his constituents and the promises he made to them on the campaign trail.

His greatest legacy, perhaps, will be bringing hockey back to Minnesota. Minnesota will enjoy the fruits of his labor for years to come.

I consider Norm a friend and someone whom I respect and admire.

Norm, we will miss you dearly. I wish you much success in the future knowing that great things lie ahead of you.

COMMENDING BILL ANTON

Mr. ENSIGN. Mr. President, today I wish to recognize a brave American, William Anton. As a man of remarkable courage, strength, and conviction, Bill is receiving an extraordinary honor in the U.S. Army Ranger community by being inducted into the Ranger Hall of Fame. Bill will go down in the history books as the first Nevadan to ever receive this recognition.

As the son of an Army officer, Bill found his choice to continue the family tradition quite natural, but fate was needed to further solidify his commitment.

An ROTC scholarship to the University of Nebraska put Bill on the football team, but a football-ending knee injury put Bill right where he was supposed to be, as a fulltime Army cadet. Bill was soon promoted to cadet major general, making him the highest ranking ROTC cadet in the United States with over 20,000 cadets under his command.

According to Bill, life has been a constant pursuit of challenging endeavors saying, "In everything I've done, I always wanted to challenge myself to see if I could accomplish the most demanding tasks or courses—whether it was in the Army or in my academic pursuits."

And challenge himself he did. As a defender of our Nation's freedom in the

Vietnam war, Bill guided the most decorated combat Ranger unit in Vietnam, Company H, Ranger, 75th Infantry, Airborne. While Vietnam was seen as a controversial war back home, Bill's role to defend freedom was never a doubt in his mind.

Bill joined the Rangers because they are one of the toughest military organizations in our Nation's history, and as a member of the Ranger Hall of Fame, history will remember Bill as one of our greatest warriors. For it was the Rangers that accomplished some of the most demanding and impossible tasks, and as a member of this elite group of soldiers, Bill exemplified their requirements of high intellect, physical strength, stamina, and bravery.

Bill's own words describe him the best: "My entire career was full of fond memories. I sought demanding assignments to challenge myself. Serving my country as a professional soldier and Officer is the highest form of public service. It is full of selfless duty and devotion to our nation—defense of our people and the supreme document—the Constitution. When we take our oath, it is to the Constitution first, then the President, and then to the other officers appointed over us. This is not lost on any Officer or soldier."

When asked what Bill would like the world to remember about his fallen comrades, he had this to say: "The American military fights only when diplomacy fails. We enforce the policies of our great nation. Our fallen comrades do not die in vain. They are remembered by their comrades, families, and most of the citizens of our great nation."

We all know that Bill Anton is an extraordinary soldier, but now America will know that above all else, he is an American that truly embodies the spirit and freedom of this great Nation.

REMEMBERING JAMES O. "JIM" INGRAM

Mr. COCHRAN. Mr. President, this morning I was saddened by the news that my friend Jim Ingram, who served so well and courageously as commissioner of the Department of Public Safety of Mississippi, had passed away. He lost a long battle with cancer.

Jim was a retired FBI agent who was in charge of the civil rights unit that supervised the investigation and assisted in the prosecution of crimes by Klansmen and others who were charged with violence and murder in our State during the civil rights movement. He was a man of great courage, with a strong sense of purpose, whose warm and friendly personality make him easy to like and respect. The people of my State will long remember and appreciate his valuable contributions to peace and public safety.

I ask unanimous consent that a copy of his obituary, as it appeared in to-

day's Clarion-Ledger, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

James O. "Jim" Ingram, retired FBI agent and former Commissioner of the Department of Public Safety, passed away at Hospice Ministries in Ridgeland, Mississippi on Sunday, August 2, 2009, after a long battle with cancer.

Visitation will be held at Christ United Methodist Church in Jackson, Mississippi on Wednesday, August 5, 2009, from 5 pm until 7 pm and from 9 am until 10:30 am on Thursday, August 6, 2009. Reverend Vicki Landrum will officiate over the service, which will be held at Christ United Methodist Church on Thursday at 10:30 am. The burial service will follow at Parkway Memorial Cemetery on Highland Colony Parkway in Ridgeland, Mississippi.

Wright and Ferguson Funeral Home is assisting with the arrangements. Born January 22, 1932, in Henryetta, Oklahoma, Jim Ingram was a long time resident of the Jackson Metro area. Jim Ingram joined the FBI in 1953, and was with the FBI for over thirty (30) years in several capacities, such as Deputy Assistant Director in Washington, with duties supervising all FBI criminal investigations. He also was Special Agent in Charge (SAC) of the New York and Chicago FBI offices. Mr. Ingram traveled worldwide for the FBI to places such as France, Canada, Mexico, and most of Central and South America. Some famous FBI cases which he commanded were: The Guyana Jim Jones case where over 1,000 people committed suicide at the request of their leader, Jim Jones, and the investigation into the assassination of Federal Judge John H. Woods in Texas, where a hired assassin killed the federal judge. Drug lords were arrested for this crime.

Jim Ingram was also in charge of the FBI's Mississippi Civil Rights Unit in the 1960's, supervising the investigation and assisting in the successful prosecution of Edgar Ray Killen and other Klansmen who killed the three civil rights workers in the "Mississippi Burning Case" in Neshoba County, Philadelphia, Mississippi. Mr. Ingram also supervised the investigation and assisted in the prosecution of James Ford Seale for violent deaths committed in Mississippi. In June 1996, Mr. Ingram represented Mississippi in a meeting at the White House hosted by the President and Vice President on church burnings.

After retiring from the FBI, he served ten (10) years as Senior V.P., Director of Security for Deposit Guaranty National Bank. He served as Commissioner of Public Safety for eight years commanding the Mississippi Highway Patrol, Mississippi Bureau of Narcotics, and six other divisions. He served the State's second longest tenure in this capacity and said "these were some of the happiest times of my life." He was well known throughout the U.S. in law enforcement receiving several awards such as being honored with the Civil Rights Award in September 2006 in Boston, Massachusetts by the International Association of Chiefs of Police for the solution of the "Mississippi Burning Case" and was appointed as a Member by the Harvard University Associates in Police Science. Jim was active in the business community having served as President of the Jackson Rotary Club, the largest civic club in Mississippi.

Jim Ingram is survived by his loving wife, Marie, of 58 years; his three sons, Steven W.

Ingram and his wife, Brenda, Madison, Mississippi, Stanley T. Ingram and wife, Terri, Edwards, Mississippi, and James M. Ingram and wife, Janice, Madison, Mississippi, and fifteen (15) grandchildren and great grandchildren, all of whom have given him the love of his life.

His three sons, Steve, Stan and Jim, stated their dad enjoyed helping others. They have been amazed over the years of the caliber of people across the U.S. that sought his advice and wisdom. Their dad would tell them "Kindness is something you cannot give away. It always keeps coming back."

Before his death, Jim Ingram stated that he could never repay the kindness shown to him, his wife Marie, and family from neighbors, Peter DeBeukelaer and wife, Mireille, Dr. Greg Fiser and wife, Robin, Billy Powell and his wife, Barbara, Rusty Fulton and his wife, Sandy, Bob Lunardini and his wife, Susan, and Federal Judge Neal O'Lack and his wife, Rebecca.

Mr. Ingram gives special thanks to Dr. Cindy Wright and her husband Sam Wright for their kindness and support. Special thanks to the men and women of the FBI across the country and to former SAC Joe Jackson, Col. Mike Berthay and Charlie Saums and the men and women of the Mississippi Highway Patrol who have made his life so enjoyable.

Memorials may be made to Christ United Methodist Church Youth Ministry Program, 6000 Old Canton Road, Jackson, Mississippi 39211, or Hospice Ministries of Ridgeland, 450 Towne Center Boulevard, Ridgeland, Mississippi 39157.

ADDITIONAL STATEMENTS

100TH ANNIVERSARY OF THE TILLAMOOK COUNTY CREAMERY ASSOCIATION

• Mr. WYDEN. Mr. President, today I pay tribute to the 100th anniversary of an Oregon icon the Tillamook County Creamery Association, makers of Tillamook Cheese.

Since 1909, this world-famous, farmer-owned cooperative has been dedicated to producing the highest quality cheeses and other products from local dairies that have thrived in the lush coastal valleys around the community of Tillamook, OR. Tillamook Cheese is not just a commercial enterprise. It is the proud symbol of a way of life that has been passed on for generations.

The members of the Tillamook County Creamery Association have been mainstays of the local and state dairy industries and committed stewards of the environment. They employ more than 600 people at two factories in Oregon and have annual sales of nearly \$400 million.

With all due respect to my colleagues from the great State of Wisconsin, Tillamook is cheese. Over the years, the Tillamook County Creamery Association has won hundreds of awards, including six at the 2009 Oregon Dairy Industries products contest and six at the 2008 National Milk Producers Association. It has also been recognized by the Portland Business Journal for the third

year in a row as one of Oregon's "Most Admired Companies."

For decades, the Tillamook Cheese Factory has been a must-see stop for millions of tourists who travel highway 101. In recent years, the creamery association has expanded to other parts of the State, but its traditions are deeply rooted in the pastures and dairies that make Tillamook County and Tillamook Cheese what it is.●

MESSAGE FROM THE PRESIDENT

A message from the President of the United States was communicated to the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

In executive session the Presiding Officer laid before the Senate a message from the President of the United States submitting a nomination which was referred to the Committee on Energy and Natural Resources.

(The nomination received today is printed at the end of the Senate proceedings.)

MEASURES PLACED ON THE CALENDAR

The following bill was read the second time, and placed on the calendar:

H.R. 3435. An act making supplemental appropriations for fiscal year 2009 for the Consumer Assistance to Recycle and Save Program.

MEASURES READ THE FIRST TIME

The following bill was read the first time:

S. 1572. A bill to provide for a point of order against any legislation that eliminates or reduces the ability of Americans to keep their health plan or their choice of doctor or that decreases the number of Americans enrolled in private health insurance, while increasing the number of Americans enrolled in government-managed health care.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, and were referred as indicated:

EC-2587. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "Pasteuria usgae; Temporary Exemption From the Requirement of a Tolerance" (FRL No. 8429-1) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2588. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting,

pursuant to law, the report of a rule entitled "Sodium salts of N-alkyl (C8-C18)-beta-iminodipropionic acid; Exemption from the Requirement of a Tolerance" (FRL No. 8425-5) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

EC-2589. A communication from the Director of the Regulatory Management Division, Office of Policy, Economics, and Innovation, Environmental Protection Agency, transmitting, pursuant to law, the report of a rule entitled "N-alkyl (C8-C18) Primary Amines and Acetate Salts; Exemption from the Requirements of a Tolerance" (FRL No. 8428-9) received in the Office of the President of the Senate on July 29, 2009; to the Committee on Agriculture, Nutrition, and Forestry.

Kathleen Huffman: none.

*Douglas W. Kmiec, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta.

Nominee: Douglas W. Kmiec.

Post: Ambassador to the Republic of Malta.

(The following is a list of all members of my immediate family and their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.)

Contributions, amount, date, and donee:

1. Self: \$50, July 2008, Obama '08; \$170, Jan. 2009, Obama Inaugural Cmte.

2. Spouse: Carolyn: \$170, Jan. 2009, Obama Inaugural Cmte.

3. Children and Spouses: Keenan (son): \$250, Jan. 2008, Obama, '08; \$250, Sep. 2008, Obama '08.

*Jonathan S. Addleton, of Georgia, a Career Member of the Senior Foreign Service, Class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mongolia.

Nominee: Jonathan Addleton.

Post: Mongolia.

(The following is a list of all members of my immediate family and their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.)

Contributions, amount, date, and donee:

1. Self: \$100, Spring 2008, Senator Jeff Merkley*; \$250, Summer 2006, Nancy White, City Council**.

*Senator Merkley (D-Oregon) and I were fellow interns at the Carnegie Endowment for International Peace during 1979-1980, after college and before graduate school.

**In 2006, my sister Nancy White ran for a seat on the Macon, Georgia city council. I made a small financial contribution (\$250) to her successful campaign.

2. Spouse: Fiona, none.

3. Children: Catriona (age 14), none; Cameron (age 16), none; and Iain (age 18), \$100, Spring, Summer, Fall 2008, President Obama*.

*As a high school senior at Mount de Sales Academy in Macon, Georgia and college freshman at Davidson College in Davidson, North Carolina, our son Iain made many phone calls and house canvassing visits on behalf of Presidential candidate Barack Obama, both during the primaries and the general election that followed; he estimates that he also made small internet contributions totaling around \$80-\$100 intermittently throughout 2008.

4. Parents: Hubert Franklin Addleton, none; and Bettie Rose Addleton, none.

5. Grandparents: Ben Addleton—deceased; Bessie Addleton—deceased; Melton Simmons—deceased; and Bennie Simmons—deceased.

6. Brothers: David Addleton, none.

7. Sisters: Nancy White, \$300, 2006-2008, Local City Council*.

*My sister Nancy White is a member of the Macon, Georgia city council. She reports that ever since she joined in 2006, she has made small contributions to the political campaigns of other city council members running for office. In her estimation, the total contributions over the years do not exceed \$300.

*Matthew Winthrop Barzun, of Kentucky, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sweden.

Nominee: Matthew Barzun.

Post: Ambassador to Sweden.

(The following is a list of all members of my immediate family and their spouses. I have asked each of these persons to inform me of the pertinent contributions made by them. To the best of my knowledge, the information contained in this report is complete and accurate.)
